### Fire Weather Forecast

FORECAST NO: 15

PREDICTION FOR: 24 Hr Shift
SHIFT DATE: Thursday 9/03/2020

INCIDENT: August Complex
UNIT: Mendocino NF
SIGNED: Chuck Redman

TIME AND DATE ISSUED: 9/2/2020 1800 PDT Incident Meteorologist (IMET)

### <u>Discussion:</u> \*\*\*Temperatures 10 to 15 degrees above normal over the weekend\*\*\*

Hot and dry conditions will continue over the fire region as an upper ridge located over the Great Basin dominates the weather. Generally light southerly winds aloft are expected today which will predominantly bring terrain induced wind pattern across the fire landscape. Well above normal temperatures are expected by the weekend as a stronger southwest flow develops over the region. The airmass that moves up into the region in that southwest flow is expected to be very dry with single digit humidity possible.

### **WEATHER FORECAST FOR TODAY:**

**SKY/WEATHER:** Mostly sunny.

Max Temperature: 78 to 85 higher elevation and smoked filled valleys, except mid to upper 90s lower valleys.

Min RH: 12 to 18 percent.

### -20 ft Level WINDS:

**Lower Valleys/Lower Slopes** Down drainage to 10 mph, becoming up drainage to 10 mph by noon. **Upper Ridges:** East to Northeast wind around 10 mph, becoming southwest by early afternoon.

**TRANSPORT WINDS:** Southwest to 10 mph. **Mixing Height** 7,000 ft.

### **TONIGHT:**

SKY/WEATHER: Clear with continued poor RH recovery

Min Temperature: Mid 60s, except mid 70s in the Thomes Creek drainage.

Max RH: 25 to 40 percent.

WINDS: -20 ft Level-

Valleys/Lower Slopes: Down drainage to 10 mph after sunset. Gusts to 15 mph in the Thomes Creek area,

**Upper Ridges:** East to Northeast to 10 mph by midnight.

### Friday:

**SKY/WEATHER:** Mostly sunny.

Max Temperature: 80 to 88 higher elevations and smoked filled valleys except 95 to 100 lower valleys

Min RH: 8 to 14 percent.

WINDS:

-20 ft Level- Lower Valleys Down drainage to 10 mph in the morning becoming up drainage by noon.

Upper Ridges: Winds becoming Southwest 10 to 15 mph by mid afternoon.

**TRANSPORT WINDS:** Southwest around 15 mph. **Mixing Height** 8,000 ft

Mendocino

Stonyford

FIRE BEHAVIOR FORECAST						
FORECAST NUMBER: #15	TYPE OF FIRE: Wildfire					
FIRE NAME: August Complex	OPERATIONAL PERIOD: Thursday 03 September 2020					
DATE ISSUED: Wednesday 02 September 2020	TIME ISSUED: 1800					
UNIT: CA-MNF	7.4: / 1.1 //					
Prepared By: Michael W. Housh/FBAN	Michael W. Housh					

### **INPUTS**

### **WEATHER SUMMARY:**

TODAY (Thursday): See Fire Weather Forecast.

**WEATHER:** Mostly sunny

Lower Valleys/Slopes: MAX Temp: 90-95 degrees MIN Rh: 12-18% WIND: Down drainage to 10 mph, becoming up

drainage to 10 mph by noon

Upper Ridges: MAX Temp: 78-85 degrees MIN Rh: 12-18% WIND: East to northeast wind around 10 mph, becoming

southwest by early afternoon.

LAL: 1 CWR: 0%

MIXING HEIGHT 7,000 ft AGL TRANSPORT WINDS SW @ 10 mph

**GENERAL FUEL ASSUMPTIONS:** It has been over 100-150 days since much of the fire area has received over 0.10" of precipitation and fuels are extremely dry and are burning readily. 10 Hr fuel moistures in the fire area were again observed at 5-8% on September 2<sup>nd</sup>.

### **FIRE BEHAVIOR OUTPUTS**

### **GENERAL**

Fuels continue to dry due to lack of precipitation combined with low humidity's (15-25%) yesterday. Smoke over the fire continues to impact fire spread and behavior, but the potential is still there for rapid fire movement and moderate/extreme fire behavior if the airshed clears out. Most of the fire spread is anticipated to be terrain driven except on exposed ridgetops.

		Fire Behavior Potential						
Vegetation Type	Fuel Model	ROS (ch\hr) FL (ft) PIG (%) Spot Dist (mi)						
Grass	GR2	55-60	5-6	76	0.3			
Grass/Shrub	GS2	35-40	6-7	76	0.3			
Shrub	SH7	56-59	15-16	76	0.3			
Timber	TL8	7-8	4-5	76	0.3			

### SPECIFIC:

>Branch I: Anticipate continued Fire spread up slope/up drainage during the day and down drainage/downslope at night with diurnal wind patterns. Post lookouts and monitor the situation on the Elkhorn Fire to the N/NE. Movement on the spot fire on Boswell Ridge is expected to spread up the ridgeline with backing and flanking down the ridge edges.

**>Branch II:** Active upslope fire spread on the Western edge of the Doe Fire. Maintain SA on fire moving into Panther Creek near the Archer Cabin area. If fire moves into the bottom of the drainage expect fire spread up drainage to the SW towards Smith Camp.

>Branch III: Great work! Maintain lookouts for spotting. Anticipate continued terrain influenced fire spread along Brushy Camp Ridge.

>Branch IV: Hull Fire, the NE portion of the fire has aligned with terrain and is in more favorable terrain for fire spread to the N/NW. Maintain SA during the firing operations on the Southern portion of the fire.

>Branch V: Hopkins fire, IR indicates significant heat along the Northern half of the fire perimeter. Expect continued fire movement to the north following terrain and fuels. Willow Basin fire, some heat detected on SE corner of the fire. Does not appear to be significant perimeter growth over the last few operational periods. Continue to monitor fire spread.

\*

Saturday through Tuesday's wx could support conditions for more active fire behavior than we have seen the last few days. Think about securing those identified weak spots along control lines now to set us up for success. Winds are forcasted for SW on Sat, transitioning to NE by Monday/Tuesday.

\*\*ElkHorn fire: Continue to maintain SA on this developing situation. \*\*

### AIR OPERATIONS:

Smoke will continue to impact air operations.

### **SAFETY**

Mild, moderate, and EXTREME fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions, as well as predicted and current weather conditions. As fire behavior changes, it is critical to act decisively in regard to the changing situation.

### HEALTH AND SAFETY MESSAGE

"Safety is a product of your willingness to speak up"

Major Hazards & Risks: Safety Zones, Fire Behavior, and Smoke Exposure

Safety Zones: This is only a risk if you don't know where Safety Zone(s) are located. Safety Zones are locations where threatened firefighters may find refuge from the fire, they should be conceptualized and planned as a location where no shelter is needed. This does not mean a firefighter should hesitate to deploy their shelter if needed, however if a shelter is deployed the location is not a true safety zone. Fire line intensity and safety zone topographic location determine safety zone effectiveness. Refer to page 8 in the IRPG for recommended parameters. Know the location of the safety zone nearest to your location and the quickest route to get there. It is ideal if the route is marked with flagging.

**Fire Behavior:** Temps are getting hotter this week. This will cause an increase in fire behavior. **Keep your situational awareness up**, if the smoke or cloud cover breaks, the fire will take this opportunity to make aggressive runs. Fuels are cured and available to burn when conditions are favorable. The terrain is the major influence at this time on the fire behavior. Watch for winds increases in the fire weather forecast as this will increase the fire activity.

**Smoke Exposure:** Carbon Monoxide can come from fire and exhaust. CO can cause impaired vision and judgement, headaches, and fatigue. Fine Particulate Matter can affect the heart and lungs, especially those with hypertension and high cholesterol. Related studies show exposure to wildland smoke can make you more susceptible to COVID-19.

# Watch Out Wo sittle (17 of 19) 16.GETTING FREQUENT SPOT FIRES ACROSS LINE

### **INTERSECTIONS**

Intersections have a higher accident rate than straight roads or highways. Consider intersections other than roadways.

- Longlines and ground personnel
- Hand lines and roadways
- Equipment and hand lines
- Cattle trails and roads
- Helicopter buckets and crews
- Helicopter routes and drone zones
- Deer trails and highways

Search out intersections of various kinds. Be alert when approaching them. Tell your crewmembers and neighbors.

Safety Officers: Brian Beisel, Pat Sheridan, and Paul Churchill

ALL	Driving & Traffic	~ Practice "Defensive Driving" techniques on all roads.  ~ Use spotters when backing.  ~ Honk horn to alert personnel when backing.  ~ Keep clutter off dash and inside cab.  ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts).  ~ Always use headlights.  ~ Yield to pedestrians and bicycles.  ~ Observe posted speed limits.  ~ Use the 3 second rule for following distance when driving.  ~ Avoid distractions (eating, cell phones, radio).  ~ Ensure that windshields are kept clean of dust and bugs.  ~ Allow dust to settle to maintain safe visibility.
ALL	Helicopter Operations	<ul> <li>Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry.</li> <li>Monitor A-G communications.</li> <li>Follow aviation safety guidelines in IRPG P. 58 and IHOG.</li> <li>Report any flying hazards to pilot.</li> </ul>
All	Fatigue & Over Exertion	<ul> <li>Drink 1 quart of water each hour during and after work.</li> <li>Rotate crews out of smoky areas.</li> <li>Set a reasonable work pace and allow adequate rest breaks while on the project.</li> <li>Stagger work crews start time to limit fatigue.</li> <li>Use buddy system to monitor personnel of heat related and fatigue issues.</li> <li>Long travel routes to assignments.</li> <li>Follow work / rest guidelines.</li> <li>Rotate personnel out of smoke as much as possible.</li> </ul>
DIVS A,C,D,N,O,R	Firing Operations & Devices	<ul> <li>Only personnel trained in the use of each device will be authorized to use firing equipment.</li> <li>Ensure all personnel are aware of firing operation that may affect them.</li> <li>Wear appropriate PPE and aviod fuel spills on clothes.</li> <li>Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.</li> </ul>
All	Indirect Fireline	~ Post lookouts, identify escape routes and safety zones IRPG page 7. ~ Review "Strategy/Indirect Attack" (IRPG pg. 87).
ALL	Heavy Equipment Operations	~ Ensure communications are established with operators.   ~ Use hand signals if other communications are unavailable.   ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber.   ~ Use a spotter when backing.   ~ Avoid working below heavy equipment.
ALL	Heat Related Illness (HRI)& Dehydration	~ Drink Fluids throughout operational period (6-8 qts/shift).  ~ Maintain water/electrolyte ratio of 3 to 1.  ~ Carry extra water on line and cache water at drop points.  ~Take Frequent breaks, minimum of 10 minutes every hour.  ~Allow out of area resources time to acclimatize before expecting peak performance.  ~ Recognize symptoms of HEAT RELATED ILLNESS which include.  o Lack of energy  o Headaches, dizziness  o Lack of rest  o No hunger, poor eating habits  o Hot skin, and lack of sweating
Al	Steep Terrain & Rolling Debris	<ul> <li>Maintain 8'-10' spacing when working &amp; walking.</li> <li>Don't work above any personnel, including bucket work.</li> <li>Be on the lookout for rolling rocks, debris, or burning material.</li> <li>Evaluate necessity to send personnel in areas with limited access.</li> <li>Post lookouts and refer to IRPG page 7.</li> </ul>

ALL	Communications	~ Maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources. ~ Utilize the ICS 205. ~ Utilize human repeaters when working in dead spots.
All	Extreme Fire Behavior	<ul> <li>Share weather observations with all personnel assigned to division.</li> <li>Establish "Trigger Points" to withdraw.</li> <li>Use "Risk Management" process prior to engaging in suppression actions, refer to page 1, IRPG.</li> </ul>
Branch 1 & 2	Spike Camp	~ Keep a clean camp. ~ Logistical support in place. ~ Ensure communications are in place. ~ Review and observe "Line Spike" considerations IRPG page 95.
Branch 1,2	Power Utilities	~ Notify all personnel of down electrical lines.
ALL	COVID-19	~ Maintain at least 6' distancing from others when possible.   ~ Work as a module of 1 for duration of incident.   ~ Wear masks around others if 6' distancing isn't maintained   ~ Wear masks in camp at all times \ if others are not around use common sense.   ~ Wash hands often and use hand sanitizer through out the day.   ~ Report any illness to supervisor immediately and remove yourself from others   ~ Notify Medical Unit of any illness   ~ Do not share tools or equipment   ~ Do not touch any part of your face
All	Wildlife & Livestock	~ Rattle snakes and scorpions are plentiful in this area. ~ Look around before you sit or step over logs. ~ Watch for wildlife and livestock on roads. ~ Clean up all trash and debris through out the day. ~ Wear gloves when moving logs or debris.
All	Night Operations	<ul> <li>Wear high visibility reflective vests when in roadways.</li> <li>Use glow sticks to mark hazards.</li> <li>Ensure personnel are using headlamps.</li> <li>Watch for signs of fatigue.</li> <li>Take breaks away from areas of known hazard.</li> <li>Review escape routes and safety zones in daylight.</li> </ul>
All	Bees, Ticks, Mosquitoes	~ Canvas crew members for those with known allergic reactions to stings.   ~ Ensure crew members have medication pens if needed.   ~ Perform daily self inspection.   ~ Use repellent as necessary.   ~ Advanced Life Support, multi-dose epi and airway protection.   ~ Keep affected area clean and bandaged.   ~ Be extra careful when eating and/or drinking to avoid stings to mouth and throat.

Branch 2 & 4	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and trees within your expertise, and training. ~ Follow "Procedural Felling Operations" IRPG page 85. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
All	Haz Mat	<ul> <li>Contact Resource Advisor for information about hazmat sites.</li> <li>Stay away from containers with unknown contents.</li> <li>Hazmat material in and around structures is likely, stay away from structures after treated for defensible space.</li> <li>Watch out for areas of dead/dying vegetation indication possible toxic chemicals.</li> <li>Munitions are likely in cabins within the fire area.</li> <li>Small buildings may be used fuel storage so avoid them.</li> </ul>
All	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and trees within your expertise, and training. ~ Follow "Procedural Felling Operations" IRPG page 85. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
All	Heavy Smoke and Dust	<ul> <li>Rotate firefighters around so no one is in heavy smoke for prolonged periods.</li> <li>Take frequent breaks in clean air when working in areas of smoke or thick dust.</li> <li>Locate camps outside of the area of heavy smoke.</li> <li>Use dust abatement on heavily traveled roads.</li> </ul>

Air Resource Advisor

Margaret Key

434.221.9339

aramargaretkey@gmail.com

My best piece of advice came from the IC at an Alder Fire morning briefing:

Be STRONG enough to stand on your own,

SMART enough to recognize when you need help,

and BRAVE enough to ask for it.

Firefighters are known for their courage, but asking for help can be a really tough thing to do. This piece of advice is not specific to smoke, but it does apply. Health effects from unhealthy air quality levels include wheezing, difficulty breathing, chest pain or tightness, and rapid heartrate. If you start to experience health impacts from smoke, be smart enough to realize you might need help, and brave enough to ask for it.

Incident Name	Branch		Division/Group
August Complex		I	Α
Operational Period 0700 - 1900	Date	09/03/2020	

**Control Operations/Work Assignments:** 

(1) Continue improving line and firing. (2) Conduct tactical burnouts according to Division Supervisor in advance of Glade Fire approaching line. (3) Construct and improve dozer line along the north side of Blue Slide Creek from FH7 road southwest towards Black Butte River. Implement hand line construction within river buffer. (4) Implement defensive firing operations around Keeran Camp and Garnett Camp as necessary if fire reaches top of Rock Basin Ridge. Coordinate with FMODs, chippers, and military assets to prep roadside for use as potential future containment lines.

### Special Instructions:

Use caution around snags and flag as needed for safety; Use caution when driving on roadways and on the fireline; Backhaul excessive equipment and trash. Follow all COVID protocols and precautions; READS will call DIVS when entering.

### **Control Operations/Work Assignments**

- Hold western flank of Hull Fire inside lines.
- Continue to hold and mop up spot fires along M1 road.
- Utilize tactical firing as directed to stay in front of the fire.
- Utilize aviation resources on spot fires when conditions are favorable.

### **Special Instructions**

Use caution around snags and flag as needed for safety.

Use caution when driving on roadways and on the fire line.

Backhaul excessive equipment and trash. Follow all COVID protocols and precautions.

READS will call DIVS when entering.

### **Line Emergency Day/Night:**

Once any injury/illness has occurred:

- Ensure patient receives immediate First Aid and care
- Crew Supervisor to contact Division Supervisor
- Division Supervisor to contact August Communications via on Command Channel and relay information on Medical Incident Report
- DO NOT USE THE INJURED PERSON'S NAME ON THE RADIO.
- MEDL and Incident Safety Officer will assist with the coordination of further medical care and mode of transportation.
- Ambulance and/or air resources will be coordinated through MEDL and SOF1.

### Basecamp or ICP Emergency

Contact MEDL and SOF1 with patient complaint/condition and location.

Notify Medical Unit of any injury/illness being transported to Medical Unit prior to transport.

### WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

### **Instructions for Screening**

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries:	DO NOT ANNOUNCE
Consider adequate number of personnel needed for screening.  Although medical personnel are ideal, screeners do not have to be medically trained.	Ask individual to step aside and follow the steps below.
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	

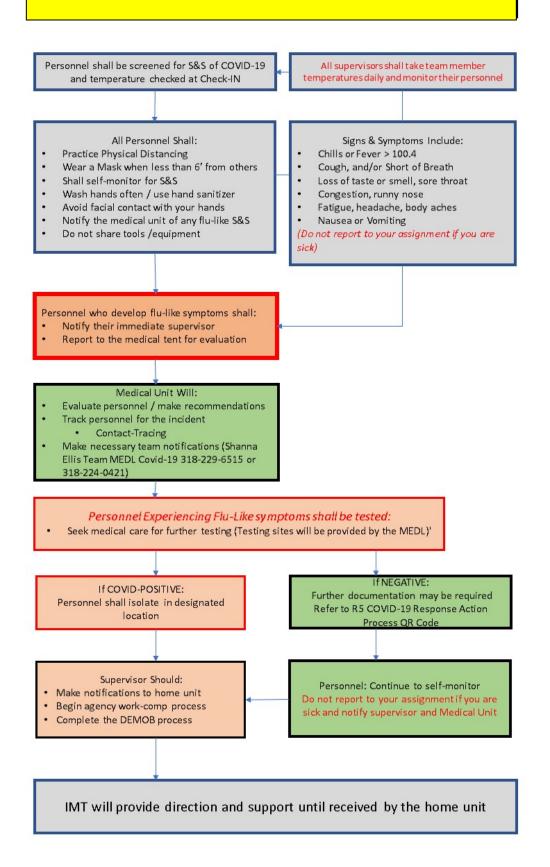

Steps to follow
Escort symptomatic individual to isolation area.
Isolation support personnel should begin documentation.
Have symptomatic individual contact Supervisor for further direction.
Notify public health officials.
Have individual transported as appropriate.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

# Mendocino National Forest August Complex COVID Mitigation Flow Chart

### **COVID-19 Operational Flow Chart**

### **CHECK-IN PROCEDURES**

Virtual Check-In: Please complete online check-in with your smart phone.

Use your Resource Order and Incident Qualification Card to complete the check-in information accurately. For CREWS, only the leader must check in online. For all other resources with multiple people per resource order number, all people should complete check-in.

1.SCAN THE QR CODE and COMPLETE the form in its entirety.

### 2.EMAIL RESOURCE ORDER AND MANIFEST TO:

or 2020.augustcomplex.resources@firenet.gov

If you do not have the capability or information needed to complete online check-in on your smart phone, please come to Check-In Trailer and knock on the door and someone will come outside to assist you with check-in. Thank You!

Base Camp Check-in Trailer Hours 0600 – 2000

Willows ICP Check-In Hours 0700-2100

## **FINANCE**

Send all finance documentation (SIGNED CTR/shift ticket/AD forms/inspections/etc) to:

2020.augustcomplex.finance@firenet.gov

When submitting a finance document to finance please use the following format in your email subject line:

# Resource order number\_Last name, First name\_Document type\_Date \*Casual Hires add "AD" after Date\*

### **Examples:**

0-2\_Duck, Daffy\_CTR\_0821\_AD
O-4\_Bear, Smokey\_CTR\_0821
E-34\_Bob's Dozer\_ST\_0821
C-3 Smoky Hot Shots CTR 0821

For all other Issues/questions use the email above. Be specific in the subject line to ensure your email is directed to the appropriate finance contact.

### Are you on the DMOB list? Are you supposed to be on the DMOB list?

If you are supposed to be on the DMOB list, there are several things you need to do before leaving the incident:

- Return all equipment to supply and communications.
- Does your vehicle need inspection from Ground Support? If so, get it done!
- Then proceed to the ICP in Willows to meet with finance. When done call DMOB @ 540-798-2218 answer 5 short questions about your travel and be on your way!

Did you request an extension and your DMOB has not changed!? Talk with Resource Unit at Camp or ICP.

**QUESTIONS? Call 540-798-2218** 

### **Public Information**

California Law concerning journalist's access to fires California Penal Code 409.5(d):

Media cannot be prevented from accessing the fire unless their presence would impede firefighting operations, the location is a crime scene, or accessing private property without owner permission. If entering a location is hazardous, they should be advised of the situation. Call PIO for more details.

### **SEND US YOUR PHOTOS**

Scan this QR Code to send us your pictures from the field by email:

2020.AugustComplex@firenet.gov

# <u>Consider agency guidelines and potential ramifications before sharing</u> pictures of:

- fireline personnel not wearing full PPE
- identifiable structures (i.e. addresses)
- burning / burned structures
- inmate crews
- faces of children (written parental consent required)
- accident or investigation scenes
- sensitive natural or cultural resources (or QR codes to maps that identify them)
- whiteboards / flipcharts with passwords or internal contacts listed

# Human Resource Message

### PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs whenever unwelcome conduct based on gender, adversely affects a person's ability to do their job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following types of conduct:

- Unwelcome sexual advances
- Requests for sexual favors
- **♣** Discussing sexual activities
- ♣ Telling off-color jokes
- **4** Unnecessary touching
- Displaying sexually suggestive pictures
- Using demeaning or inappropriate terms
- Using indecent gestures
- Using crude and offensive language
- **4** Commenting on physical attributes

"Inappropriate behavior is harassment including sexual and racial harassment and shall not be tolerated". Fireline Handbook, Common Responsibilities.

Incident Human Resource Specialist :	<u> </u>

### TRAINING MESSAGE

<u>Check-in</u> – If you have a position task book (PTB), please check in by scanning the QR code below to initiate the registration process. Please complete the form in its entirety. To complete the registration process, at your earliest convenience, please email a copy of your qualification card and position task book cover to Debra Burgos, TNSP at <u>debra.burgos@usda.gov</u> (if you have questions, please call 404-987-3256).

For your convenience, an electronic ICS-226 and Evaluation Record with be sent to you after you complete the registration process.

### **AUGUST COMPLEX TRAINEE REGISTRATION**

<u>Demob</u> – In order to receive credit for your assignment, you must 'close out' with the Training Specialist prior to departure.

Close out requirements include:

- 1. Ensure your trainer(s)/evaluator(s) has/have initialed completed tasks in your PTB;
- 2. Obtain an Incident Performance Evaluation;
- 3. Obtain an Evaluation Record;
- 4. If evaluator initialed #1 on your Evaluation Record, ensure he/she signs as final evaluator (located on the backside of your PTB cover page);
- 5. Email all documentation (including item #3, when appropriate) to <a href="mailto:debra.burgos@usda.gov">debra.burgos@usda.gov</a> (please do not text);
- 6. Complete Exit Interview Scan QR Code below.

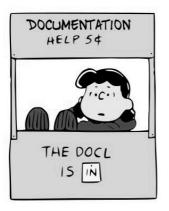

**AUGUST COMPLEX TRAINEE EXIT INTERVIEW** 

### A Message from the DOCL

Good morning! I'm your friendly Documentation Unit Leader (DOCL), and I'm providing this message to give you an idea of what is needed from you as far as documentation goes.

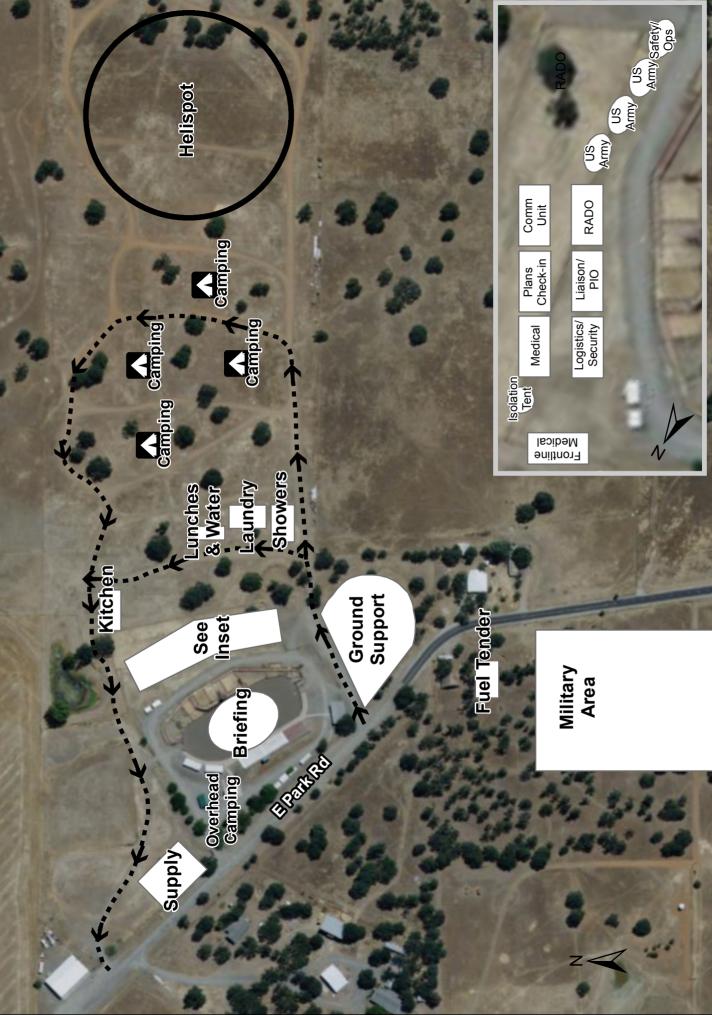

- The documentation that applies to each of you are Unit Logs (214s) and General Messages (213s). These can be submitted as a print or electronic copy. The unit log form (214) is found in the daily IAP, and is an important way of documenting anything significant that may have happened during your shift. These records can be very important, especially in the instance of an accident, so please try to get them turned in.
- About those 213s..... I only need the original or electronic document that was sent <u>to you</u>.
   If it is a carbon copy of a 213 that you sent to someone else, please keep that for your own records but I do not need it.
- There are many other documents that should be submitted during an incident, and I have a list available for your particular section at your request. I can also provide you with labeled folders if you need them.
- The new electronic filing system allows you to upload documents directly into Microsoft Teams and the eDoc Box. Please <u>do not</u> file these documents in the eDoc Box section folders, but use the folder called "9 TO BE FILED" instead. I have to use a specific naming convention, and this also allows me to know that something was submitted that I need to take care of. The folder is found in Teams under "Files > General > eDoc Box > Doc Box Template > 9 To Be Filed". For convenience you may create a folder in your section's channel called "To Be Filed", and I will be happy to copy the documents from there.
- If you do not have access to the Microsoft Teams, documentation can be emailed to me at chris\_oelschlager@firenet.gov.
- Please send any original paper copies of documents to ICP as often as possible. A lot of paperwork comes in as a team leaves an incident, and this can be a challenging to handle in a short window of time.

Finally, I'm thrilled to be here working with you and want to assist however I can. Let me know how I can help and I will be happy to.

Thanks so much for your cooperation, Chris Oelschlager, DOCL chris\_oelschlager@firenet.gov (270) 871-7302

### Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

I. C	ONTACT	COMMUNICATIONS	DISPATCH	(Verify co	rrect frequency	prior to	starting report)
------	--------	----------------	----------	------------	-----------------	----------	------------------

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

Ex: "Commur	<b>TATUS:</b> Provide incident sui nications, I have a Red priority dical, IC is TFLD Jones. EMT	patient, unconscious, struc	k by a falling tree. Reques	tructure. sting air ambulance to Forest Road 1 a	at (Lat./Long.) This will be the			
Severity of Emergency / Transport Priority		□RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE  Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.  □YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.  Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.  □GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport  Ex: Sprains, strains, minor heat-related illness.
