GENERAL FUEL ASSUMPTIONS: It has been well over 100 days since much of the fire area has received over 0.10" of precipitation and fuels are extremely dry and burning readily. 10 Hr fuel moistures in the fire area were observed at 3-4% on September 8th. The airshed was most likely cleared out over a good portion of the fire area yesterday so expect clear skies on some areas of the fire.

FIRE BEHAVIOR OUTPUTS

GENERAL

Fuels continue to dry every day and humidity's over the fire area were recorded at 04-33% yesterday. Expect less smoke over the fire area today as yesterday's high winds cleared the airshed to some extent. High winds may still be experienced over the upper ridges; however, most of the fire spread should be terrain/diurnal wind influenced. The fire area has changed since yesterdays operational period so maintain your SA and re-establish your escape routes and safety zones.

>**Branch I:** Anticipate continued terrain influenced/diurnal wind fire spread except at higher elevations/exposed terrain.

>**Branch II:** Anticipate continued terrain influenced/diurnal wind fire spread except at higher elevations/exposed terrain.. Monitor fire spread in the Black Butte River drainage.

>**Branch IV:** Anticipate continued terrain influenced/diurnal wind fire spread except at higher elevations/exposed terrain. Monitor fire spread in the Mendenhall Creek drainage closely.

****ElkHorn fire:** Continue to maintain SA on this developing situation. **

AIR OPERATIONS:

Periods of clear sky may allow for utilization of aircraft today.

SAFETY

The fire ground has been reset from yesterday's wind event. Re-establish your situational awareness, safety zones and escape routes. Communicate any changes. Fire weakened timber may be more susceptible to falling after yesterdays winds.

HEALTH AND SAFETY MESSAGE

“Safety doesn’t happen by accident”

INCIDENT: August Complex	DATE: September 09, 2020
Major Hazards & Risks: EXTREME FIRE BEHAVIOR POTENTIAL	
<h3 style="text-align: center;">Planning using PACE</h3> <p>PACE is an acronym (Primary, Alternate, Contingency and Emergency) used initially for military communication system planning but has benefits relative to operational planning. Planning for the worst case scenario allows wildfire operations personnel to be prepared for any eventuality even though things might go exactly as planned. Defined, PACE is:</p> <ul style="list-style-type: none">• Primary – the routine and most effective operational approach. (anchor, flank, pinch, secure)• Alternate – another common method of wildfire strategy/tactics with minimal or no additional impact. May be used along with the primary under normal circumstances. (Supporting crews and engines with aviation, heavy equipment, etc.)• Contingency – This method will normally not be as convenient or efficient as the first two methods, but is capable of achieving objectives when necessary. (Emergency Equipment Rental Agreements, out of GACC resources, etc.)• Emergency – This is a method of last resort that probably has significant negative impacts or will create significant delays. (Transitioning to a higher complexity team)	
<h3 style="text-align: center;">Leaders Intent</h3> <p>All leaders of firefighters have the responsibility to provide complete briefings and ensure that their subordinates have a clear understanding of their intent for the assignment:</p> <ul style="list-style-type: none">• TASK = What is to be done• PURPOSE = Why is it to be done• END STATE = How it should look when done <p style="text-align: center;">(2018 IRPG Page X)</p>	<p>The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision-making. Good risk management utilizes a six-step process:</p> <h3 style="text-align: center;">Risk Management Cycle</h3>  <pre>graph TD; SA[Situational Awareness] --> AS[Assessment]; AS --> RC[Risk Control]; RC --> D[Decision]; D --> I[Implementation]; I --> E[Evaluation]; E --> SA;</pre> <p style="text-align: center;">“Risk Management doesn’t get in the way of doing the mission – it is the way we do the mission.”</p>

New Collector Map Released - August Complex 2020 Collector Map v2

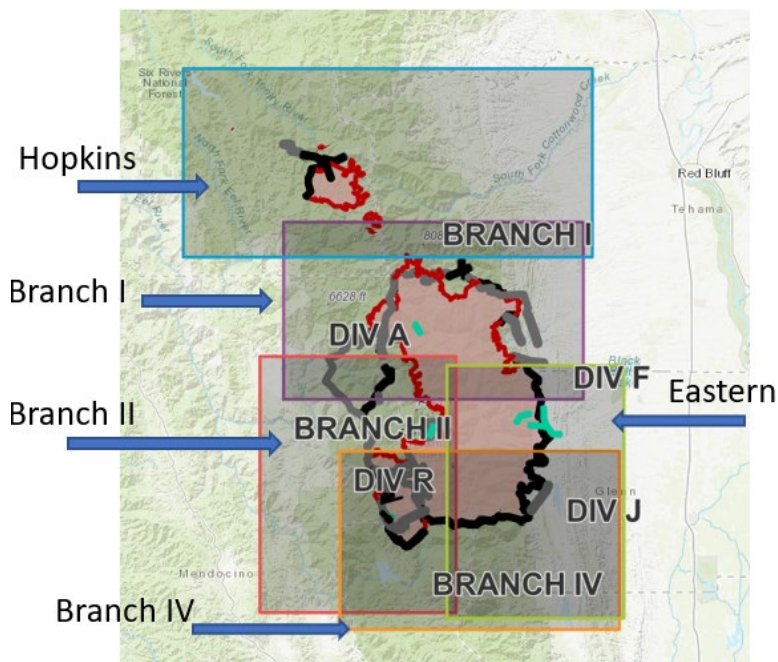

We are releasing a new version of the Collector map for Operations on the August Complex fire.

We made some changes to the Collector map to streamline data collection and to reduce the size of the basemaps, as we recognize that internet/cell coverage is sparse and syncing the maps has been problematic in some areas.

Releasing a new map makes it easier for field personnel to get the new functionality than updating the existing map. **The old map will be retired at noon 9/9/2020.** The new map is available now.

You can sync any existing edits from the previous map before removing the offline area and map in Collector. If there are errors with the sync, back out of the map and switch to the new v2 map.

Open the new v2 map and select the offline area (basemap) that covers the area where you will be working. The image below shows the extents of the new offline areas.

We have posted a help document for removing map areas (it is easy) and a Collector Field Guide to the QR folder that is linked on all our maps and below.

Please contact the Situation Unit if you have any questions or problems.

Are you on the DMOB list? Are you supposed to be? If so, there are several things you need to do before leaving the incident:

- 1) Return all equipment to supply and communications.
- 2) Does your vehicle need inspection from Ground Support? If so, get it done!
- 3) All vehicles leaving Stonyford Base Camp must go through the weed wash.
- 4) Then proceed to the ICP in Willows to meet with finance.
- 5) When done with finance, call DMOB @ 540-798-2218 and answer 5 short questions about your travel. Then be on your way!

Creating a Personal Hygiene Routine: Tips and Benefits

Each person's idea of personal hygiene differs. These main categories are a useful place to start for building good hygiene habits:

Hands hygiene

Germs on your hands can easily enter your body through your mouth, nose, eyes, or ears. Wash your hands:

- when you handle food
- before you eat
- if you handle garbage
- when you sneeze
- any time you touch an animal

Teeth hygiene

Good dental hygiene is about more than just pearly white teeth. Caring for your teeth and gums is a smart way to prevent gum diseases and cavities.

Brush at least twice a day for 2 minutes. Aim to brush after you wake up and before bed. If you can, brush after every meal, too. Floss between your teeth daily and ask your dentist about using an antibacterial mouthwash.

These two steps can help prevent tooth decay and eliminate pockets where bacteria and germs can build up.

A Message from the Documentation Unit

If you need to submit Documentation but do not have access to Microsoft Teams, you can send it to the following e-mail address:

2020.augustcomplex.docl@firenet.gov

This is an easy way to get your documents in, and can be either an electronic form or a scanned/clearly photographed handwritten form.

The more you can send my way now, the less difficult it will be for whomever takes over next week. Please take a little bit of time to get your forms and paperwork in, especially things you don't really need to hold onto anymore.

Thanks very much for your cooperation,

Belinda Wilkins, DOCL

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
