GENERAL FUEL ASSUMPTIONS: 10 Hr fuel moistures in the fire area were observed at 3-7% on September 9th. It has been well over 100 days since much of the fire area has received over 0.10" of precipitation and fuels are extremely dry and burning readily

FIRE BEHAVIOR OUTPUTS

GENERAL
 Fuels are at critically dry levels and continue to dry each and every day. Relative humidity's were recorded at 4-29% yesterday. Smoke over the fire continues to impact fire spread and behavior, but less than what was experienced prior to the wind event. Lighter winds should bring some relief but there is still the potential for rapid fire movement and moderate/extreme fire behavior. Terrain should play a greater role in fire spread and direction than yesterday.

AIR OPERATIONS:

Smoke from several fires in the area will impact the ability to utilize aircraft today.

SAFETY

The primary consideration of any operation is to assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structure.

HEALTH AND SAFETY MESSAGE

“Working safely may get old but so do the folks that practice it.”

INCIDENT: August Complex	DATE: September 10, 2020
Major Hazards & Risks: Complacency	

All humans are faced with making decisions. Some decisions have minimal consequence while others are momentous with serious consequences. Regardless of the outcome the process by which we make decisions is the same. Our expectation of our decision’s end result is always a combination two things: the chances of a bad outcome and the amount of value we will receive (risk vs. reward). Expectations need to be founded in factual, analytic processes but are often affected by emotion, hope and outside influences. Repetitive exposure to risk can create a sense of false security and as a result what should be scary becomes commonplace. It is extremely difficult to stay alert when you are inside your comfort zone. The truth is, there is no fire environment that does not have an inherent element of risk and fire line personnel are always in danger of injury or worse. In fire suppression we might consider a high risk tactic, for instance helicopter rappelling, for the opportunity to place firefighters on a small fire with growth potential in inaccessible terrain. In some instances, the risk is worth the reward. It is vitally important to separate the emotion, hope and outside influences from decision making. Objective risk management, sound strategy and tested tactics are the only way to effectively minimize bad decisions.

Are you as engaged today as you were on the first day you were here?

Human Factor Watch Outs

Watching out for yourself, coworkers, subordinates and your boss is a primary responsibility for everyone involved in high risk activities. Watch outs are not just for the tactical environment. The Human Factor Watch Outs are designed to create an opportunity for you to take a tactical pause and re-evaluate your situation. If any of the following occur:

- Your briefing was unclear.
- You are not getting answers to your questions.
- You are not getting clear acknowledgement of your message.
- You are encountering hazards that are not mentioned in your brief.
- Your team is not debriefing.
- Your tempo is too high to maintain command and control.

**Take a moment to re-assess your situation.
STOP THINK TALK Then ACT**

Flying

Are you on the DMOB list? Are you supposed to be? If so, there are several things you need to do before leaving the incident:

- 1) Return all equipment to supply and communications.
- 2) Does your vehicle need inspection from Ground Support? If so, get it done!
- 3) All vehicles leaving Stonyford Base Camp must go through the weed wash.
- 4) Then proceed to the ICP in Willows to meet with finance.
- 5) When done with finance, call DMOB @ 540-798-2218 and answer 5 short questions about your travel. Then be on your way!

QUESTIONS? Call 540-798-2218

Did you request an extension and your DMOB date has not changed? Visit with resources.

Human Resource Message

Got Blisters?

We have all had a blister. The longer the blister can fester, the worse it gets. However, with preventative measures, we can mitigate blisters. Problems/Issues are like blisters. Whether they involve lack of mutual respect, inappropriate behavior, harassment, or discrimination, we can all contribute to mitigating and resolving these issues and not allow them to fester and escalate. Please be proactive and come visit your HRSP when a work-related problem/issue first arises, and I will gladly help you mitigate it, so it won't become an ugly blister!

QUOTE of the Day

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
