INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: AUGUST COMPLEX NORTH ZONE	2. Operational Period:	Date From: 9/12/2020 Time From: 0700	Date To: 9/13/2020 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Management Objectives

- Ensure that strategies and tactics provide for firefighter and public safety through the application of sound risk management principles.
- Minimize the threat to private property, critical infrastructure and heritage resources.
- Establish and strengthen cooperator, partner, and stakeholder relationships.
- Minimize the cost of the incident by employing tactics that have highest probability of success while minimizing firefighter exposure.
- Minimize the threat of exposure to COVID-19 by adhering CDC COVID-19 Guidelines.

Control Objectives

- Keep fire North of Hammer Horn Ridge
- Keep fire South of Hwy 36
- Keep fire East of Eel River
- Keep fire West of Pellows / Redbank Road

General Situational Awareness:

- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.
- In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.
- Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

Fire Weather Forecast

FORECAST NO: 4
PREDICTION FOR: Friday-Friday Night
DATE: September 12th, 2020
FORECAST ISSUED: 1900 September 11th, 2020

Fire: August Complex North Zone
UNIT: CA-MNF-000753
Incident Meteorologist: Derek Williams
Signed: *Derek Williams*

WEATHER DISCUSSION: Lingering smoke is expected to keep temperatures down and a stable lower atmosphere again today as winds remain diurnally driven and light (gusts around 10 mph). A marginal improvement in visibility as smoke slowly and gradually disperses across the region. RH values should remain above critical levels this afternoon with overnight recoveries approaching 50%. Temperatures continue to be dependent on smoke cover but if clearing occurs expect a daytime temperature differential of 5-7 degrees and overnight lows in the 50s.

TODAY:

WEATHER: Marginal improvement in visibility with smoke and haze. Some clearing at higher elevations.

MAX TEMP: 3000 feet: 79-83° **MIN RH:** 3000 feet: 20-25%
5000 feet: 71-75° **5000 feet:** 23-28%

CHC WTG RAIN: 0% **LAL:** 1

WINDS: 3000 feet: Terrain driven/upslope winds 3-5 mph with gusts around 10 mph. SW wind component in the Six Rivers NF becoming W late afternoon, ESE wind component east of Six Rivers NF.
(20 FEET) 5000 feet: Terrain driven/upslope winds 5-7 mph with gusts around 12 mph. SW wind component in the Six Rivers NF becoming W late afternoon, ESE wind component east of Six Rivers NF.

MIXING HEIGHT: Rising to 7500 feet by 1600.

TRANSPORT WIND: S 8-10 mph.

VISIBILITY: 3-6 miles.

TONIGHT:

WEATHER: Poor visibility with smoke and haze.

MIN TEMP: 3000 feet: 54-57° **MAX RH:** 3000 feet: 45-50%
5000 feet: 56-60° **5000 feet:** 35-45%

CHC WTG RAIN: 0% **LAL:** 1

WINDS: 3000 feet: Downslope/downvalley 2-4 mph.
(20 FEET) 5000 feet: Downslope 3-5 mph with an east component on higher ridgetops.

TRANSPORT WIND: S 9-12 mph.

INVERSION: Weak temperature inversion developing.

EXTENDED OUTLOOK: Sunday through Wednesday: High pressure slides eastward allowing a low pressure trough to affect northern CA Sunday and Monday bringing increased southwest winds, some cloud cover and possible increased smoke dispersion. Chances for rain exist as early as Tuesday with some showers expected Wednesday. Temperatures will fall from the lower 80s to the lower 70s by late next week while the onshore flow will help raise RH in the coming days.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 004

TYPE OF FIRE: Wildfire

FIRE NAME: August Complex North Zone

OPERATIONAL PERIOD: 09/12/20 0600-0600

DATE ISSUED: September 11, 2020

TIME ISSUED: 19:00

UNIT: CA-MNF-000753

SIGNED:

Typed/printed: Jeff Shelton (LTAN)

INPUTS

WEATHER SUMMARY:

*****Smokey, Dry and Warm...AGAIN *****

Smoke shading will again diminish solar effect. Temperatures and winds continue their slight downward trend. As low pressure approaches well to our north, overnight RH recoveries will transition from poor to fair, particularly towards the western fire perimeter.

Max. Temperature: 75-83 degrees **Min. Humidity:** 22-25% **Winds(Day):** Upslope 3-5 mph/Gusts to 10 mph
Min. Temperature: 54-60 degrees **Max. Humidity:** 50-55% **Winds(Night):** Downslope/ Light East-Ridgetops

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Know where and when slope reversals are likely... **Rapid, Intense Up-Slope Runs Possible!**
- Respect any tree torching... Identify why it's happening and re-evaluate your plan!
- Expect Fine Dead Fuel Moistures from 4-12%; day into night. Firing opportunities may arise!
- Very dry large fuels (<10%-1000 hr.) will retain heat and fire until engaged or fully consumed!
- Recent RH recovery is affecting lighter fuel availability... Burn periods are slowly changing!
- Expect drift smoke from regional fires to reduce your visibility... **AND** situational awareness!
- Areas with limited fire movement will have increasingly unstable trees and rollout potential!

SPECIFIC:

**All Divisions: Well Established, *High Intensity*, Fuels Driven, Surface Fire...
Isolated Torching, and Short Crown Runs in Steep, Aligned Topography.....**

Flame Lengths- 4 to 6 ft. in Grass, Up to 20 ft. in Brush... greatly diminishing overnight!

Rate of Spread- 20 chains/hour in Grass, Up to 40 chains/hour in Brush... diminishing overnight.

Spotting Distances- Up to .1 miles in Grass/Brush, Up to .25 miles in Timber (From Torching)

Probability of Ignition- 40% Shaded, 70% Unshaded; Down to around 20% overnight

AIR OPERATIONS:

Sunrise: 0647 Sunset: 1925

Expect poor to fair smoke dispersion with only limited clearing possible from light transport winds from the south and southeast. Mixing heights will raise to 7500' by 1600. Anticipate greatly reduced visibility early, especially before the peak of afternoon heating.

SAFETY

Fire Moves Fastest Where You Move Slowest!

Steep Terrain will Predictably Focus the Fire's Energy!

Absolutely Know Your Position Relative to the Fire!

August Complex-North Zone- Safety Message

INCIDENT# CA-MNF-000753

DATE: 9-12/13-20 Day/Night Shift
TIME: 0700-0700

DANGER/ HAZARD TREES:

All trees, especially large trees are potentially dangerous.

- Trees do not tell when they are going to fall, they just fall. Be heads up!
- Minimize your exposure time and resources around hazard tree.
- How many times do we have a conversation under large trees?
- Use extra caution while working in forested areas during windy periods, helicopter water drops, and airtanker drops.
- Never work around trees until they have been evaluated and the hazards have been mitigated.
- Use the Hazard Tree Safety guidelines in the IRPG, page 22-23.
- Always eliminate the hazards with qualified sawyers or heavy equipment.
- Modify suppression tactics or fireline location to avoid high-risk areas.

Weather and Fire Behavior Forecast

- Pay close attention to the weather and fire behavior forecasts in the IAP.
- There is the potential for change, and you will need to modify your briefings to focus on the increased hazardous conditions.

Ensure LCES is in place.

DRIVING

- When driving, keep speed at or **below** the posted speed limit.
- Drive defensively! Expect the unexpected around every curve.
- Watch out for debris and wildlife on the roads.
- Do not tail gate, keep a safe distance between vehicles on dirt roads.
- Always fasten your seat belt before the vehicle is set into motion.
- Use a "backer" when backing your vehicle. Do a walk around if a "backer" is not available.
- Use caution with restricted sight distances since there may be uneven road surfaces.
- Watch your position on the roadway since the roads are narrow: there may be another vehicle also entering a corner.
- Be alert to the potential of rolling materials and hazard/danger trees when parking your vehicle.

Safety Officers: B. Savage, SOF1
D. Welch, SOF1

Escape Route/Safety Zone Checklist

Escape Routes:

- Designate primary and back-up escape routes
- Scouted – soils, vegetation, slope
- Timed – slowest person, fatigue, dozer speed
- Marked – flagged for day and night use

Safety Zones:

- Survivable without a shelter
- Natural – clean burn, water, bare soil/rock
- Man-made – constructed sites, roads, etc.
- Scouted for size and hazards
- Close enough considering escape time needed

Remember and Follow:

- The 10 Standard Fire Orders
- The Common Denominators of Fire Behavior on Tragedy Fires
- The Downhill Line Construction Guidelines

BR/ DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	WEATHER	<ul style="list-style-type: none"> • Be aware of changing weather conditions. • Watch out for increasing heat, winds, and instability. • Anticipate increased fire behavior conditions. • Communicate any observed changes in weather and fire behavior. • "Base all actions on current and expected behavior of the fire."
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCEs is in place, plan for worst case fire behavior. • Provide additional briefing on drought related fire behavior and areas of high concentration of hazard trees. • Increase the level of SA. • Provide additional briefing for new resources and maintain communications..
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below. • Make sure LCEs is in place. • Follow the "Downhill Line Construction Checklist" on IRPG page 9. • Evaluate necessity to send personnel in areas with limited access.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is high. • Use spotters when backing. • Always use headlights, • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits, school is in session in some areas. • Use chock blocks and turn wheels into the hill. • Watch for rolling rocks and debris from hillsides.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. • Radio Communications may be poor in some areas: use human repeaters as needed. • Ensure all personnel are familiar with the incident and the IAP communications plans. • Make sure all resources have radios cloned appropriately. • Ensure that non-agency resources understand radio use and procedures.
ALL	FATIGUE / COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of heat stress and fatigue, take breaks as necessary. • HYDRATE before, during and after your shift. • Monitor ALL resources for level of fatigue. • Recognize the symptoms of heat stress and fatigue, and take action as necessary to provide rest and recovery. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps (switching of assignments, training opportunities during slow periods, etc.) to maintain situational awareness for the duration of the incident
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Do not plan on air resources for tactical support or medical transportation. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Ensure ground personnel have safety illumination, with light-sticks being the minimum. • Maintain a 50'-100' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height. • Expect the operators to not be aware of your location if you are below them.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22-23). • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	FIRING OPERATIONS	<ul style="list-style-type: none"> • Only personnel trained in the use of each device will be authorized to use firing equipment. • Ensure all personnel are aware of firing operation that may affect them. • Wear appropriate PPE. • Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, deer, rattlesnakes, and bees. Watch footing and hand placement around rocks. Use caution around gas and power lines. • Personal hygiene is #1 when it comes to Poison Oak Prevention. • Watch for illegal grow sites. Avoid sites if located and notify LEO's. • Follow all CDC and Agency COVID 19 protocols.

Human Resource Message

Please welcome Adrienne Sarcinella! She has joined us as an HRSP trainee.

We would like to thank all of you for the mutual respect you are exhibiting on this incident. With COVID mitigations and the severity of the fire activity we have seen this year, it can be very difficult to continue to have patience and understanding. We all know how important it is to treat each other appropriately and with respect. Let's make sure we are serving as examples for each other.

Please continue to exercise tolerance, show gratitude, practice compassion and exhibit leadership.

“Seek Respect Not Attention, It Lasts Longer”

Andrea Cabida- HRSP

707-330-9939; andrea.cabida@usda.gov

Wildland Fire COVID-19 Screening Tool

Interim Standard Operating Procedures – 4/15/2020

NOTE: This Screening Tool represents interim guidance. Additional clarification will be coming as soon as it is defined.

DO YOU HAVE ANY OF THESE SYMPTOMS?

Today or in the past 24 hours, have you had any of the following symptoms listed below, **in addition to your normal work-related issues?**

- Fever, felt feverish, or had chills? Repeated shaking with chills?
- Cough? Shortness of breath or difficulty breathing?
- Muscle pain? Headache? Sore throat?
- New loss of taste and/or smell?

If in doubt about any of these symptoms, consult a Physician.

In the past 14 days, have you had contact with a person known to be infected with the coronavirus (COVID-19)?

Take temperature with touchless thermometer if available

INSTRUCTIONS FOR SCREENING

- If resource is positive for any symptoms prior to mobilization **DO NOT MOBILIZE.**
- At Entries – Consider the adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.
 - o If resource is positive for any symptoms including fever (over 100.4) at entry **DO NOT ANNOUNCE-** ask to step aside.
 - o Escort sick individual to isolation area.
 - o Isolation support personnel should begin documentation. Have sick individual contact Supervisor for further direction.
 - o Notify public health officials.
 - o Have individual transported as appropriate.
 - o Protect and secure any collected Personal Identifiable Information or Personal Health Information.

8. MEDICAL EMERGENCY PROCEDURES

LINE "MEDICAL-EMERGENCY" PLAN:

- Crew Supervisor to contact Division Supervisor/Operations with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 1/Red- life threatening emergency trigger Incident within Incident (IWI).
- Division Supervisor/Operation contacts Lake Communications:
 - Division Supervisor or POC* will run "Medical -Emergency" on the Command frequency.
 - Division Supervisor or POC* to use "Medical Incident Report" worksheet on page 118-119 of the IRPG.

POC* (Point of Contact) and/or Operations

LINE "NON-EMERGENCY INCIDENT" PLAN:

- Crew Supervisor to contact Division Supervisor with:
 - Patient Complaint, Condition and Location via Tactical or Command frequency. Priority 3/Green Patients do not trigger Incident within Incident (IWI).
- Division Supervisor contacts Communications:
 - Division Supervisor or POC* will run "Non-Emergency Incident" on the Command frequency.
 - Division Supervisor or POC* will use "Medical Incident Report" worksheet on page 118 -119 of the IRPG.

IN-CAMP – 24 HOUR MEDICAL

- Contact Communications with:
 - Patient Complaint, Condition and Location via LOGS net or Command frequency

9. PREPARED BY
MED - Jeff Carlton

SOF1- Brian Savage 

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)
 Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.
 Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)
 "This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.	
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.	
<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.		
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: (NO PATIENT NAMES) Federal Contractor Local Government

Patient Assessment: Age: Weight: Chief Complaint:

(If pertinent to Injury) Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extraction

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
 Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
