INCIDENT OBJECTIVES (ICS 202)

1.	Incident Name: August Complex - North Zone	2. Operational Period: Date From: MON 9/28 Date To: TUE 9/29 Time From: 0700 Time To: 0700							
3. Obj	Objective(s):								
•	Provide for firefighter and public safety by assessing and mitigating risk in order to develop and								
	implement sound tactical operations. Ensure all resources have a clear understanding of								
	assignments and associated ha	azards.							
•	Protect homes, businesses, co	mmunities, utility infrastructure, transportation corridors, county							
	watersheds and timber values	from immediate and long-term threats. Contain the fire where it is							
	safe to do so. Have contingend	cy plans for uncontained fire edge.							
•	Maintain and enhance relation	nships with agency partners, cooperators, stakeholders, and the public							
		nformation exchange. Ensure long-term strategies are communicated.							
•		nunication is taking place between South Zone, West Zone, and Area							
		rategic direction, efficient resource use, and common public							
	messaging across all three zon	- '							
•		ederal COVID-19 mitigation guidance and protocols to reduce exposure							
	and protect firefighters and th	,							
•	,	y and respect by providing a harassment free, zero-tolerance work							
	environment.	y and respect by providing a narassment free, zero tolerance work							
•		tation packages are prepared in accordance with agency requirements							
	and agreements are closed ou								
4. Op	erational Period Command Emph	asis:							
	· _	n our number one objective, firefighter, and public safety. Provide							
	<u>.</u>	ugh your briefings. Ensure accountability, communications and medical							
plans	are in place and understood be	ore engaging in any firefighting or evacuation efforts.							
5. Gei	neral Situational Awareness:								
Expec	t more adverse weather conditions	today. Make sure you have accountability for your resources.							
		for each other and be ready for a long day.							
6. Inc	ident Action Plan (the items check	ed below are included in this Incident Action Plan):							
\times	ICS 203 🗵 ICS 206	Other Attachments:

Fire Weather Forecast

FORECAST NO: 20

PREDICTION FOR: Monday-Monday Night

DATE: September 28th, 2020

FORECAST ISSUED: 1900 September 27th, 2020

Fire: August Complex North Zone

UNIT: CA-MNF-000753

Incident Meteorologist: Brooke Taber

Signed: Brooke Taber

WEATHER DISCUSSION: ****Red Flag Warning until 2100 Monday****

Strong high pressure will be building across northern California today and this will result in much lighter offshore winds across the complex. The highest winds of 10 to 15 mph with localized ridgetop and gap wind gusts up to 25 mph will be possible through 1200, before becoming 5 to 10 mph. Very low minimum relative humidity values will persist, with readings in the single digits to mid-teens, as warm temperatures continue. The trend of poor midslope and ridgetop recoveries will continue tonight, but winds will remain light and mainly terrain driven.

TODAY:

WEATHER: Warm and dry with areas of smoke.

3000 feet: 81-86° **MAX TEMP:**

5000 feet: 72-77°

MIN RH:

3000 feet: 9-14%

5000 feet: 13-19%

CHC WTG RAIN: 0%

Haines Index: 5

WINDS:

3000 feet: East-northeast 6 to 12 mph localized gusts 15 mph, becoming 4 to 8 mph after 1200.

(20 FEET)

5000 feet: East-northeast wind 12 to 18 mph localized gusts up to 25, becoming ESE 6 to 12 mph with

gusts up to 15 mph after 1200.

MIXING HEIGHT: Rising to 6800 feet by 1600.

TRANSPORT WIND: East 18 to 24 mph, becoming 12 to 18 mph after 1200. VISIBILITY: 1 to 3 mile in the morning, becoming unrestricted by 1300.

TONIGHT:

Clear with very poor midslope and ridgetop recoveries. Much lighter winds. **WEATHER:**

MIN TEMP:

3000 feet: 52-57°

MAX RH:

3000 feet: 28-35%

5000 feet: 54-59°

5000 feet: 15-23%

CHC WTG RAIN: 0%

LAL:

WINDS:

3000 feet: Downvalley/downslope winds 3 to 6 mph.

5000 feet: East-northeast winds 4 to 8 mph.

TRANSPORT WIND: ESE 5 to 10 mph. INVERSION: Strong inversion lifts by 1400.

EXTENDED OUTLOOK: Tuesday through Friday: A large ridge of high pressure both at the surface and aloft will build across northern California for this upcoming week. This will result in much above normal temperatures, mainly lighter terrain driven winds, and low relative humidity values with potential poor recoveries at night. Temperatures and relative humidity values could be impacted by areas of smoke, as daily mixing in the deeper valleys will be limited, given the much lighter transport winds.

FIRE BEHAVIOR FORECAST									
FORECAST NUMBER: 20 INCIDENT TYPE: Wildland Fire									
FIRE NAME: August Complex North Zone OPERATIONAL PERIOD: Day/Night Shift, September 28, 2020									
DATE ISSUED: September 27, 2020	TIME ISSUED: 2000								
UNIT: CA-MNF-000753 PREPARED BY: Chris Moore FBAN Christopher Woore									

INPUTS

WEATHER SUMMARY: ***Red Flag Warning 9/27 0500 - 9/28 2100*** **Temp:** Max. 3,000': 81-86°, 5,000': 72-77°; Min. 3,000': 52-57°, 5,000': 54-59°. **RH:** Min. 3,000': 9-14%, 5,000': 13-19%; Max. 3,000': 28-35%, 5,000': 15-23%.

Wind: 3,000' ENE 6-12 mph gusts 15 mph, becoming 4-8 after 1200.

5,000' ENE 12-18 mph gusts to 25 mph becoming ESE 6-12 gusts to 15mph after 1200.

FUELS & FUEL MOISTURE:

- Fuels vary greatly based on elevation and aspect but are primarily timber with patches of open grass and areas of brush.
- At all elevations, fuels are **critically dry** in all size classes, both live and dead.
- Offshore winds events have previously caused large fire growth events on this fire especially given the current grass load found in California.

Fine Fuels: 3-6% based on shading; 1000-hr 10%; ERCg Friend Mountain 68 (70th percentile); PIG 90%

OUTPUTS - FIRE BEHAVIOR											
GENERAL: The following fire behavior outputs are based on wind and slope alignment.											
Fuel Model	Head fire Rate of Spread	Flame Length (ft.)	Spot Dist.(mi.)								
	CH/HR	Head fire									
Timber	30-50	14-16'	1								
Grass	180-220	1012'									
Brush	150-170	26-28'									

SPECIFIC:

Branch 21 - Rapid rates of spread and extreme fire behaviour continue as the winds remain elevated through 1200. Fire behavior will significantly increase if it transitions from timber to brush or grass. Spotting will continue to be prolific in unshaded fuel beds.

Branch 31 – Strong down canyon winds will continue to spread fire in the highway 36 corridor. Deeper drainages will funnel winds and localized spread may be different based on local topography. New spots will continue to have potential for rapid rapids of spread in all fuel types. Higher ridges could have more long-range spotting. Do not assume previous fire scars will act as slowing features.

North Structure Group – The threat to Post Mountain will remain elevated as the winds funnel based on local topographical features. Fire progression below Highway 36 as well as firing will need to be monitored for impacts to values.

Branch 40 - Minimal threats to the line are expected. Interior fuels will continue to burn out especially in areas that have heavy fuel concentrations to support combustion. The Buck fire scar will continue to check fire spread.

AIR OPERATIONS: Sunrise 0703 Sunset 1855. Visibility over the fire may be hampered by smoke from the Zoog Fire and the building high pressure. Strong gusty northeast winds may be the limiting factor in the morning.

SAFETY: Trees will continue to be a safety hazard as areas of new growth are assessed. As situational awareness of the fire location is gained, review access and egress in new areas of travel.

^{**}Base all action on current and expected fire behavior**

6. Control Operations/Work Assignments:

TASK: Resource accountability. Identify and protect structures deliberately assessing the probability of success considering current and expected fire behavior. Assist other divisions as requested.

PURPOSE: Reduce structure loss in the South Ruth Valley area.

END STATE: Structure loss is minimized.

7. Special Instructions:

**Be available at DP 126 or 126.5 for assignment in BR 21 or BR 31.

REMS2 available from Div E1.

Contact Branch Safety Jeff Hammes for all safety prioritizations.

Ground transport time to Level 3 hospital 2 hours and Level 2 hospital 4 hours.

6 Control Operations/Work Ass	ianments:								

TASK: Resource accountability. Identify and protect structures deliberately assessing the probability of success considering current and expected fire behavior. Assist other divisions as requested.

PURPOSE: Reduce structure loss in the North Ruth Lake area.

END STATE: Structure loss is minimized.

7. Special Instructions:

Contact Branch Safety Jeff Hammes for all field safety prioritizations.

6. Control Operations/Work Assignments:

TASK: Resource accountability. Hold and improve existing control lines between DP 125 and DP 145 to the extent reasonably possible to hold fire from crossing towards the north. Assist other divisions as requested.

PURPOSE: Minimize fire growth to the northeast. Fire remains south of control lines so Hwy 36 is not impacted.

END STATE: Fire remains south of Hwy 36 and west on the control lines.

7. Special Instructions:

Contact Branch Safety Terry Severson or Dustin Widmer for field safety prioritizations.

Safety Officers available for all Divisions based on the highest priority

Medical resources are available from DIV I1.

Lookouts Communications Escape Routes Safety Zones

August Complex North

Operation Period: 09/28/2020 Day/Night 0700-0700

SAFETY MESSAGE

MAJOR HAZARDS AND RISKS

STEEP TERRAIN
FATIGUE
DRIVING VISIBILITY

ROLLING MATERIAL POISON OAK LONG DRIVE TIMES HEAVY EQUIPMENT HAZARD TREES POOR AIR VISIBILITY

- Know what your fire is doing at all times, post lookouts and stay in communications
- Assess structures for defensibility and identify escape routes and safety zones. Be aware of the hazardous materials associated with buildings and sheds.
- Fatigue is cumulative without good rest and proper diet. Know your limits and watch out for one another.
- -Risk Management is a continuous process. Stay focused on your surroundings and the strategy and tactics of the day.

Symptoms & Signs of Heat Illness

Heat Exhaustion: Victim will have cool, clammy skin; pale coloring; feel weak, dizzy and/or nauseous.

Treatment – Have individual sit in shade or cool area; administer fluids; loosen clothing and assure rest.

Heat Stroke: This is a medical emergency!!

Victim will hot, dry, red skin and possible convulsions. These symptoms can progress to unconsciousness and death!

Treatment – Immediately cool individual's body by pouring water over them, especially the head and upper body. Contact the medical unit. Monitor the victim and provide whatever medical support necessary. Placing ice around the neck, groin and armpits can help speed the cool down.

Hazard Tree Safety

Hazard trees, both dead snags and live green trees, are one of the most common risks encountered on the fireline. All firefighters should frequently survey their work area for potential hazard trees.

Hazard tree indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs overhead
- Accumulation of downed limbs
- · Absence of needles, bark or limbs
- Leaning or hung-up

In addition to suppression and mop up operations, assess, control, and monitor hazard trees along roads and when selecting break areas or campsites.

From the Alaska Safety Team

IMT COVID-19 INTENT for the AUGUST NORTH COMPLEX

All wildland firefighters must take COVID-19 messaging seriously and demonstrate consistent, preventative measures known to be effective in limiting viral spread. The Alaska IMT is reminding firefighters to apply the core values of wildland fire management community of "Duty, Respect, and Integrity" and apply these values to the COVID mitigation requirements:

- **Duty**: To provide a workforce safe from known hazards such as disease transmission, and keep us, our fellow firefighters, and the public safe, on and off the clock.
- **Respect**: To demonstrate respect to oneself and to each other by taking routine precautions as guided, such as wearing a mask and social distancing.
- Integrity: To do the right thing when at home, while travelling, or on assignment. Undertake the precautions to keep ourselves and the rest of the workforce healthy and able to respond, then we are not the source of an outbreak within the public we are assigned to protect.

Concept of "Module as One:"

Team members, crews, and other resources should use a "Module as One" approach to insulate as one unit and reduce exposure to the public and other crews. If each member within a unit is monitored, screened, and healthy, then proximity, when necessary, is not an issue.

By insulating as a unit, crews and modules can limit outside viral exposure and may safely complete operational tasks in closer proximity, and ride in vehicles without face coverings when working within their "Module as One" concept:

- As often as practical, the same team members should travel in the same vehicle, work together in the same space, and ensure module members are conscientious regrading mitigations.
- Identify select individuals on a crew or module that will interact with the public, ensuring this person relies on social distancing, wears a cloth face covering, and practices hand hygiene during or after every interaction.
- When the "Module as One" has been established, minimize contact with public and outside community. This is to protect every crew member, their family, and the community we serve.

Essential Mitigations:

- Pre-Screening and Regular Monitoring: Individuals should measure temperature and assess symptoms each day prior to starting work. Ideally, temperature checks should happen before the individual enters the facility or interacts with others on staff or the crew.
- **Social/Physical Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- Wearing a Mask: Employees should always wear a facemask or face covering when social distancing cannot be maintained. When facemasks cannot be worn during arduous work tasks, social distancing practices should be implemented.
- **Disinfect and Clean**: Clean and disinfect all areas, particularly "high touch surfaces" such as engine compartments, bathrooms, common areas and shared electronic equipment routinely.
- Empower all individuals to ask co-workers to follow social distancing guidelines.

I would like to thank all of you for the mutual respect you are exhibiting on this incident. Please continue to exercise tolerance, show gratitude, practice compassion and exhibit leadership.

Just for today:

- *Do not have expectations about how you should be treated
- *Be as friendly as you can to the people around you
- *Be grateful for your health, your work, your family, your country
- *Remember the work you are doing is important

Far and away the best prize that life has to offer is the chance to work hard at work worth doing.

--Theodore Roosevelt—

Your new HRSP is Julie Nelson. Please do not hesitate to contact her with any questions or concerns. (307) 421-8151

FINANCE CHECK IN

Due to there being so many incidents that have rolled into the August Complex we are asking all resources to complete this form and send to Finance. You can complete and email to 2020.elkhorn.finance@firenet.gov, drop it off with Logistics at either camp or give to your Division Supervisor to get to Finance. We want to ensure we have all resources accounted for in our system and getting everyone's time posted correctly so that you can get paid.

NO INFO. NO PAY....

DEMOB

2020.elkhorn.dmob@firenet.gov

PLEASE READ THE FOLLOWING PROCEDURES IF YOU ARE DEMOBING IN THE NEXT FOUR DAYS

人

Resources that are flying home need to contact demob 3-4 days prior to their demob date so that their flight can be arranged. We will need: Your **Name**, as it appears on your picture ID you use at airport security, your **Date of Birth**, **Gender**, and a few other questions. Call **608-797-6554**.

DAY OF DEMOB INSTRUCTIONS FOR RESOURCES AT HETTENSHAW AND R WILD:

HETTENSHAW	R WILD				
Step 1: PICK UP AN ICS221, DEMOBILIZATION CH	ECKOUT SHEET TO START THE PROCESS				
At Hettenshaw, pick up your checkout sheet at the Plans yurt.	At R-Wild, pick up your checkout sheet at Ground Support .				
Step 2: CHECK OUT IN PERSON WITH SUPPLY*, COMMO*, AND GROUND SUPPORT*					
Ground Support: Inspections, etc.	Ground Support: Inspections, etc.				
Supply: return non-expendable supplies and equipment	Supply: return non-expendable supplies and equipment				
Commo: Return radios and other commo gear	Commo: Return radios and other commo gear				
Step 3: CHECK OUT REMOTE OR IN PERSON WIT	H FINANCE*				
At Hettenshaw, checkout with Finance in person in the Finance/Plans Yurt.	At R Wild, you may checkout in person between the hours of 0730-1200 with Finance personnel in the Logistics yurt. You may also checkout remotely at other times by calling the following: Equipment: 907-371-0512 Personnel: 907-371-6311 If you are passing by ICP on your way home, you can check out in person at ICP.				
Step 4: CHECK OUT REMOTE OR IN PERSON WIT estimated arrival times and any overnight stops. This have home. You will turn in any Unit Logs, Evaluations,	elps us coordinate with Dispatch to close out your				
At Hettenshaw, checkout in person at the Plans yurt and turn in your documentation there.	At R-Wild, you may checkout in person between the hours of 0730-1200 with Demob personnel in the Logistics yurt. You may also checkout remotely at other times by calling the following: DEMOB: 608-797-6554 If you are passing by ICP on your way home, you can check out in person at ICP and turn in your documentation there.				
Step 5: Weed Wash*					
All non-local resources at Hettenshaw must drive to R Wild and go through the weed wash there. Once complete, you may begin travel home. Local resources demobing from Hettenshaw do not need to use the Weed Wash.	All resources demobing from R Wild must go through the Weed Wash. Once complete, you may begin travel home.				
Step 6: ARRIVE HOME SAFELY	*Required Check-outs				

For Extension Request forms and instructions, please call 828 541-1082 or 907 987-9329.

Special Instructions:

Ensure all Medical Resources are in place to provide rapid response to medical incidents. Field Operations must determine medical response times for REM teams, Ambulances, Short Haul and Line Medics/ EMTs before engaging.

#### Special Medical Emergency Procedures:

Follow the Medical Incident Report (MIR) on the back of the IAP

#### Fireline/ Spike Camp Medical Transports and Emergencies:

**Green** - Provide immediate patient care, Notify Division Medic or EMT on Tac. Medic or EMT will contact MEDL by phone at earliest convenience. Minimize, non-critical, operational radio traffic on Command and maintain situational awareness.

Yellow/Red- Contact Communications on Command with a Medical Incident Report.

#### **Night Shift**

**Green-** Provide immediate patient care, Notify Night Med Team or Ambulance on Tac. Med Team/ Ambulance will contact MEDL by phone at end of shift. Minimize, noncritical, operational radio traffic on Command and maintain situational awareness.

Yellow/ Red- Contact Communications on Command with a Medical Incident Report.

#### ICP/ Helibase Emergencies:

Call 911 and contact MEDL as soon as possible.

#### Covid- 19 Tip of the day:

Remember to wash your hands, don't touch your face and social distance to stop the spread of infectious diseases!
