INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: August Complex - North Zone	2. Operational Period: Date From: SAT 10/03 Date To: SUN 10/04 Time From: 0700 Time To: 0700												
3. Objective(s): <ul style="list-style-type: none"> • Provide for firefighter and public safety by assessing and mitigating risk in order to develop and implement sound tactical operations. Ensure all resources have a clear understanding of assignments and associated hazards. • Provide for point protection within the fire area where it is safe to do so. Develop and implement direct and indirect contingency lines to protect communities, utility infrastructure, transportation corridors, county watersheds and timber values from immediate and long-term threats. • Provide for a well-planned, efficient, and orderly transfer of command by ensuring pertinent organizational information is collected and conveyed to incoming Incident Management Team. • Maintain and enhance relationships with agency partners, cooperators, stakeholders, and the public through timely and accurate information exchange. Ensure long-term strategies are communicated. • Ensure coordination and communication is taking place between South Zone, West Zone, and Area Command to provide unified strategic direction, efficient resource use, and common public messaging across all three zones. • Follow CDC, local, state, and federal COVID-19 mitigation guidance and protocols to reduce exposure and protect firefighters and the public from virus spread. • Treat all personnel with dignity and respect by providing a harassment free, zero-tolerance work environment. • Ensure financial and documentation packages are prepared in accordance with agency requirements 													
4. Operational Period Command Emphasis: The next several days will include changes to zone boundaries, transfer of command, and reallocations of resources. Firefighter and public safety during these transitions is dependent on clear communication and sharing of information. Today's focus will be to provide for successful transfer, while maintaining an operational tempo required to meet suppression objectives.													
5. General Situational Awareness Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. Many fatalities, serious injuries, and incidents with potential for injury have occurred during these transition periods. Be proactive in mitigating the risks by proper implementation of LCES—Lookouts, Communications, Escape Routes, and Safety Zones.

FIRE BEHAVIOR FORECAST																				
FORECAST NUMBER: 25	INCIDENT TYPE: Wildland Fire																			
FIRE NAME: August Complex North Zone	OPERATIONAL PERIOD: Day/Night Shift, October 3, 2020																			
DATE ISSUED: October 02, 2020	TIME ISSUED: 2000																			
UNIT: CA-MNF-000753	PREPARED BY: Chris Moore FBAN <i>Christopher Moore</i>																			
INPUTS																				
WEATHER SUMMARY: ***Sunny Areas with Dense Smoke*** Temp: Max. 3,000': 82-87°, 5,000': 76-82°; Min. 3,000': 46-51°, 5,000': 53-58°. RH: Min. 3,000': 17-23%, 5,000': 19-24%; Max. 3,000': 52-60%, 5,000': 25-32%. Wind: 3,000' Downslope/down valley 2-4 mph becoming upslope/up valley 3-5. 5,000' WNW 4-8 mph gusts to 12 mph after 1400.																				
FUELS & FUEL MOISTURE: <ul style="list-style-type: none"> Fuels vary greatly based on elevation and aspect but are primarily timber with heavy loads of grass and areas of thick brush. At all elevations, fuels are critically dry in all size classes, both live and dead. Fuels driven spread is possible when terrain is favorable even under an inversion. Fine Fuels: 3-6% based on shading; 1000-hr 9%; ERCg Friend Mountain 75 (85th percentile); PIG 90%																				
OUTPUTS - FIRE BEHAVIOR																				
GENERAL: The following fire behavior outputs are based on wind and slope alignment for surface fire.																				
<table border="1"> <thead> <tr> <th rowspan="2">Fuel Model</th> <th>Head fire Rate of Spread</th> <th>Flame Length (ft.)</th> <th>Spot Dist.(mi.)</th> </tr> <tr> <th>CH/HR</th> <th>Head fire</th> <th></th> </tr> </thead> <tbody> <tr> <td>Timber</td> <td>15-20</td> <td>10-15'</td> <td>.3</td> </tr> <tr> <td>Grass</td> <td>70-80</td> <td>7-9</td> <td></td> </tr> <tr> <td>Brush</td> <td>70-8</td> <td>18-20'</td> <td></td> </tr> </tbody> </table>		Fuel Model	Head fire Rate of Spread	Flame Length (ft.)	Spot Dist.(mi.)	CH/HR	Head fire		Timber	15-20	10-15'	.3	Grass	70-80	7-9		Brush	70-8	18-20'	
Fuel Model	Head fire Rate of Spread		Flame Length (ft.)	Spot Dist.(mi.)																
	CH/HR	Head fire																		
Timber	15-20	10-15'	.3																	
Grass	70-80	7-9																		
Brush	70-8	18-20'																		
SPECIFIC: Branch 21 – Fire behavior will increase when the inversion lifts and winds surface, especially in areas of new growth. Significant heat around most of the perimeter has potential for spread, mainly south, in aligned terrain. Spread in the Picket Peak fire will continue to slowly move in receptive fuels. Branch 31 – Smoky conditions will limit fire spread through most of the day. Higher elevations aligned with winds will have the most potential for spread. Expect a significant increase in fire behavior in areas where the inversion lifts. Fire north of the Highway 36 will continue to spread based on topography. North Structure Group – The threat to Post Mountain will remain elevated as the fire continues to spread on both sides Highway 36. The progression of the fire south of 36 and west of Post Mountain needs to be monitored for potential impacts. Along Highway 36 scattered values have potential to be impacted by fire, especially if the smoke clears. Branch 40 – Fire around DP 125 will continue to be active, especially if afternoon winds surface. Interior fuels will continue to consume. The Buck fire scar continues to check fire spread but should be continually reassessed.																				
AIR OPERATIONS: Sunrise 0708 Sunset 1847. Smoky conditions will persist over the fire into the afternoon when the inversion possibility lifts in the late afternoon.																				
SAFETY: Solar radiation and wind are still the main driver of fire growth. Unexpected clearing could result in a significant increase in fire behavior in all branches.																				

****Base all action on current and expected fire behavior****

- Snags/Hazard Trees
- Steep Terrain/Footing
- Fatigue
- Heavy Equipment
- Unburned Fuel

NARRATIVE:

Fireline Leadership

The most essential element of successful wildland firefighting is competent and confident leadership. Leadership means providing purpose, direction and motivation for wildland firefighters working to accomplish difficult tasks under dangerous, stressful circumstances. In confusing and uncertain situations, a good operational leader will:

- TAKE CHARGE of assigned resources
- MOTIVATE firefighters with a "can do safely" attitude
- DEMONSTRATE INITIATIVE by taking action in the absence of orders
- COMMUNICATE by giving specific instructions and asking for feedback
- SUPERVISE at the scene of action

Steps to Effective Fireline Leadership:

- Determine tasks to be assigned, establish procedures to monitor and assess the crew, and inform the crew members of fire assignment progress.
- Establish and reaffirm norms of conduct for behavior in the group, and insist that people keep each other informed on what they were doing and the reasons for their actions, and the situational model that gave rise to those reasons and actions. This would include:
 1. Here's what I think we face;
 2. Here's what I think we should do;
 3. Here's why;
 4. Here's what we should keep our eye on;
 5. Now talk to me.
- Discuss ways to improve performance, ask for input; discuss problems.
- Tell crew members what to do, reallocate work in a dynamic situation, focus crew attention to task, provide feedback to crew on performance.

From the Alaska Safety Team

IMT COVID-19 INTENT for the AUGUST NORTH COMPLEX

All wildland firefighters must take COVID-19 messaging seriously and demonstrate consistent, preventative measures known to be effective in limiting viral spread. The Alaska IMT is reminding firefighters to apply the core values of wildland fire management community of “Duty, Respect, and Integrity” and apply these values to the COVID mitigation requirements:

- **Duty:** To provide a workforce safe from known hazards such as disease transmission, and keep us, our fellow firefighters, and the public safe, on and off the clock.
- **Respect:** To demonstrate respect to oneself and to each other by taking routine precautions as guided, such as wearing a mask and social distancing.
- **Integrity:** To do the right thing when at home, while travelling, or on assignment. Undertake the precautions to keep ourselves and the rest of the workforce healthy and able to respond, then we are not the source of an outbreak within the public we are assigned to protect.

Concept of “Module as One:”

Team members, crews, and other resources should use a “Module as One” approach to insulate as one unit and reduce exposure to the public and other crews. If each member within a unit is monitored, screened, and healthy, then proximity, when necessary, is not an issue.

By insulating as a unit, crews and modules can limit outside viral exposure and may safely complete operational tasks in closer proximity, and ride in vehicles without face coverings when working within their “**Module as One**” concept:

- As often as practical, the same team members should travel in the same vehicle, work together in the same space, and ensure module members are conscientious regarding mitigations.
- Identify select individuals on a crew or module that will interact with the public, ensuring this person relies on social distancing, wears a cloth face covering, and practices hand hygiene during or after every interaction.
- When the “Module as One” has been established, minimize contact with public and outside community. This is to protect every crew member, their family, and the community we serve.

Essential Mitigations:

- **Pre-Screening and Regular Monitoring:** Individuals should measure temperature and assess symptoms each day prior to starting work. Ideally, temperature checks should happen before the individual enters the facility or interacts with others on staff or the crew.
- **Social/Physical Distance:** The employee should maintain 6 feet and practice social distancing as work duties permit in the workplace.
- **Wearing a Mask:** Employees should always wear a facemask or face covering when social distancing cannot be maintained. When facemasks cannot be worn during arduous work tasks, social distancing practices should be implemented.
- **Disinfect and Clean:** Clean and disinfect all areas, particularly “high touch surfaces” such as engine compartments, bathrooms, common areas and shared electronic equipment routinely.
- **Empower** all individuals to ask co-workers to follow social distancing guidelines.

COVID-19 REPORTING , TRANSPORT AND TESTING

People with COVID-19 have had a wide range of symptoms reported ranging from mild symptoms to severe illness.

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

This list does not include all possible symptoms. The CDC will continue to update this list as we learn more about COVID-19.

All personnel should be encouraged to self-monitor for symptoms before they come to work. Fire personnel who have symptoms of COVID-19 should immediately notify their supervisor, safety officer and self-isolate. If symptoms are severe contact medical personnel. Personnel in the symptomatic patient's group or module should be monitored for signs and symptoms. Contact the the COVID Coordinator for testing arrangements.

Human Resources Message

October 3, 2020

Communication is an issue that affects every aspect of our lives. How can we communicate better?

- **Find the Right Time.** Find a time when you are calm and not distracted, stressed or in a rush. Schedule time if you have to.
- **Talk Face to Face.** Put down the phone! Talk about serious matters or issues in person. Texts and emails can be misinterpreted.
- **Do Not Attack.** Using “you” can sound like you’re attacking. Instead, try using “I” or “we” statements.
- **Be Honest.** Agree to be honest. Sometimes the truth hurts, but it’s the key to a productive relationship.
- **Check Your Body Language.** Sit up, face them and make eye contact when speaking. Don’t take a phone call, text or browse the internet when you’re talking.

FINANCE CHECK IN

Due to there being so many incidents that have rolled into the August Complex we are asking all resources to complete this form and send to Finance. You can complete and email to 2020.elkhorn.finance@firenet.gov, drop it off with Logistics at either camp or give to your Division Supervisor to get to Finance. We want to ensure we have all resources accounted for in our system and getting everyone's time posted correctly so that you can get paid.

FINANCE MESSAGE

All incident personnel (crews, contractors, and overhead resources) need to turn in daily CTR's and Shift Tickets to one of the following locations:

- Hayfork Spike
- TLC Spike
- ICP - Redding

Time can also be submitted electronically via email to:

2020.elkhorn.finance@firenet.gov

In the email subject line, please put your resource number, your company/engine name, followed by the date. (Example: E-1045 South River Fire Rescue 10-07-20).

Shift Ticket Requirements:

If you have equipment or an engine that has a secondary rate for mileage, additional operators (i.e., crew) and/or a lowboy (or other transport), please ensure your shift tickets reflect the necessary justification for both the start and stop odometer readings, any additional operator names, and "transport attached" if applicable. Also enter your "current" E# in the upper right corner of the ticket.

CTR Requirements:

Any shift times that exceed 16 hours unless already authorized by the incident, must have a shift justification form attached.

Please ensure you have accurately notated any travel time, hazard pay, or meal breaks with justifications as needed.

Finance Demobing:

If you are within two (2) days from your scheduled demob date, please take a few minutes to review all your time submissions and ensure that they were properly completed and signed. Any missing CTRs/Shift Tickets or other finance documents will delay your demob process.

DEMOB

2020.elkhorn.dmob@firenet.gov

PLEASE READ THE FOLLOWING PROCEDURES IF YOU ARE DEMOBING IN THE NEXT FOUR DAYS

Resources that are flying home need to contact demob 3-4 days prior to their demob date so that their flight can be arranged. We will need: Your **Name**, as it appears on your picture ID you use at airport security, your **Date of Birth**, **Gender**, and a few other questions. Call **608-797-6554**.

DAY OF DEMOB INSTRUCTIONS FOR RESOURCES AT TLC AND HAYFORK:

TLC – 37175 HWY 36 (MP 35.5)	HAYFORK
Step 1: PICK UP AN ICS221, DEMOBILIZATION CHECKOUT SHEET TO START THE PROCESS	
At TLC pick up your checkout sheet from Plans in the Main Building .	At Hayfork , pick up your checkout sheet at Ground Support .
Step 2: CHECK OUT IN PERSON WITH SUPPLY*, COMMO*, AND GROUND SUPPORT*	
Ground Support: Inspections, etc.	Ground Support: Inspections, etc.
Supply: return non-expendable supplies and equipment	Supply: return non-expendable supplies and equipment
Commo: Return radios and other commo gear	Commo: Return radios and other commo gear
Step 3: CHECK OUT REMOTE OR IN PERSON WITH FINANCE*	
At TLC , checkout in person with Finance in the Main Building .	At Hayfork , you may checkout in person during briefing and shortly thereafter with Demob personnel. You may checkout remotely at other times by calling the following: Equipment: 318-278-0861 or 907-328-8589 Personnel: 907-371-6311 If you are passing by ICP on your way home, you can check out in person at ICP.
Step 4: CHECK OUT REMOTE OR IN PERSON WITH DEMOB* We need your actual departure time, estimated arrival times and any overnight stops. This helps us coordinate with Dispatch to close out your travel home. You will turn in any Unit Logs, Evaluations, and General Messages for documentation.	
At TLC , checkout in person with Plans in the Main Building and turn in your documentation there.	At Hayfork , you may checkout in person with Demob personnel located in the building with Operations. You may checkout remotely at other times by calling the following: DEMOB: 608-797-6554 or 360-801-8471 If you are passing by ICP on your way home, you can check out in person at ICP and turn in your documentation there.
Step 5: WEED WASH*	
Due to the Hwy 36 road closure, all resources at TLC do not need to drive to Hayfork and go through the weed wash.	All resources demobing from Hayfork must go through the Weed Wash. Once complete, you may begin travel home.
Step 6: ARRIVE HOME SAFELY	
<i>*Required Check-outs</i>	

For Extension Request forms and instructions, please call 828 541-1082 or 907 987-9329.

Avenza Collection Folders

Collection folders group maps together to allow easy access to all maps in the folder by panning and selecting in an extent window. This cuts down the need to back out and reselect a new map.

Create a Collection Folder

- From main screen tap EDIT
- Tap the add folder icon  and choose “Collection”
- A “New Collection” folder will be created. You can tap the  to rename the folder.

Add New Maps to a Collection Folder

- When you are in the Collection Folder, tap 
- Choose the route to get your map.

Move Existing Maps to the Collection Folder

- From main screen tap EDIT
- Select all the maps you would like added to the new folder.
- Tap move icon .
- Select the new collection folder you created.

****Unless you delete out old maps, make a new collection folder for each operational period. Do not add the same map extent from different days into the same folder.**

When you access a single map from a collection folder, you will easily be able to pan between map and tap the extent window to switch between all maps in the folder without having to back out of the map view.
