## Fire Weather Forecast

**FORECAST NO:** 73  
**PREDICTION FOR:** 24-Hour Shift  
**SHIFT DATE:** Monday 11/2/2020  
**TIME AND DATE ISSUED:** 11/1/2020 1900 PST

**INCIDENT:** August Complex North Zone  
**UNITS:** Six Rivers & Shasta-Trinity NFs  
**SIGNED:** *Christian Cassell*  
Incident Meteorologist (IMET)

---

**DISCUSSION:** High pressure continues over the region through Tuesday with continued light winds, with the main impact being a return of very low humidity and overnight humidity recovery, especially on the mid-slopes and upper ridges. High clouds increase for Monday night as a dry disturbance crosses the area, with temperatures lowering about 5 degrees on ridgetops Tuesday as a result.

### **TODAY:**

**SKY/WEATHER:** Sunny, but with high clouds increasing toward sunset. Continued warm and dry.

**Max Temperature:** 73 to 83 mid-slopes and valleys; 65 to 75 upper slopes and ridgetops.

**Min RH:** 10 to 17%.

### **20-FT WINDS:**

**Lower Valleys/Lower Slopes:** Upslope/Upvalley 3 to 7 mph becoming West in the afternoon.

**Upper Ridges:** South to Southeast 3 to 8 mph in the morning gradually becoming West to Southwest in the afternoon.

**TRANSPORT WINDS:** Southeast 5 mph becoming Southwest.

**Mixing Height:** 8,000 ft. MSL.

### **TONIGHT:**

**SKY/WEATHER:** Partly to Mostly Cloudy.

**Min Temperature:** 40 to 60 degrees, highest in thermal belts and ridgetops; 20s and 30s in valley bottoms.

**Max RH:** 30 to 45%, except up to 65% in valley bottoms.

### **20-FT WINDS:**

**Valleys/Lower Slopes:** Downvalley wind 3 to 6 mph.

**Upper Ridges:** South to Southwest 5 to 10 mph.

### **TUESDAY:**

**SKY/WEATHER:** Partly to Mostly Cloudy.

**Max Temperature:** 68 to 78 mid-slopes and valleys; 62 to 72 upper slopes and ridgetops.

**Min RH:** 14 to 23%.

### **20-FT WINDS:**

**Lower Valleys/Lower Slopes:** Upslope/Upvalley 3 to 8 mph becoming West to Southwest in the afternoon.

**Upper Ridges:** Southwest 4 to 9 mph.

**TRANSPORT WINDS:** Southwest 8 to 12 mph.

**Mixing Height:** 10,000 ft. MSL.

**Outlook WEDNESDAY through FRIDAY:** Above normal daytime temperatures persist Wednesday and Thursday as passing high pressure system exerts some influence over the region. Humidity levels will moderate somewhat with a more persistent light onshore westerly wind flow aloft. A significant pattern change toward cooler temperatures with the chance for precipitation occurs late Thursday into the weekend. A cold front passage Thursday night or Friday will cause west to northwest winds to increase and may also bring the chance of rain and/or snow, possibly even a low-end wetting rain event, to north and western parts of the fire area especially. The pattern change is likely to have some staying power into the weekend, at least with regards to cooler temperatures.

**\*\*YOU ARE RESPONSIBLE FOR YOUR OWN SAFETY\*\***

-If you practice safety, your co-workers will appreciate it and your personal welfare can be protected-

Remember that it is your life that is on the line. You have the right to voice your opinion and concerns about personal safety. Don't hesitate to speak up if you feel uncomfortable with the situation or the circumstance in which you are. Firefighting is inherently hazardous. Discuss your concerns with your immediate supervisor or with a Safety Officer. We are in this together!

## FIRE SAFETY BEGINS WITH U

- ✓ Most accidents happen on the smaller fires or on isolated portions of larger fires.
- ✓ Most fires are innocent in appearance before unexpected shifts in wind direction and/or speed results in "flare-ups" or "extreme fire behavior." In some cases, tragedies occur in the mop-up stage.
- ✓ Flare-ups generally occur in deceptively light fuels, such as grass and light brush.
  - ✓ Fires run uphill surprisingly fast in chimneys, gullies, and on steep slopes.

**"Deal with stress in a healthy way. Don't let stress deal with you."**

Life is full of frustrations and demands. Stress isn't always bad, though. Stress within your comfort zone can help you perform under pressure, motivate you to do your best, even keep you safe when danger looms. But when stress becomes overwhelming, it can damage your health, mood, relationships, and quality of life.

You can protect yourself by understanding how the body's stress response works, recognizing the signs and symptoms of stress, and taking steps to reduce effects.

<p>Factors that influence your stress tolerance:</p> <ul style="list-style-type: none"><li>• Support Network</li><li>• Physical and Mental Health</li><li>• Sense of Control</li><li>• Attitude and Outlook</li><li>• Ability to deal with emotions</li><li>• Knowledge and Preparation</li></ul>	<p>How you can support each other:</p> <ul style="list-style-type: none"><li>• Listen carefully</li><li>• Don't take anger personally</li><li>• Look out for one-another</li><li>• Give and respect space</li></ul>

## Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

### Recommended spacing for water bars on fire lines.

Fire line slope %	Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

*Water bars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.*

# Fire Suppression Repair Cheat Sheet

## Overall Objective

Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire are not explicitly mitigated or corrected during this repair phase, only those impacts caused by the suppression of the fire.

## Guidelines by Feature Type

### Dozer and Hand Lines

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line.
- Remove excess debris and dirt from adjacent segments of firelines that cross drainages. Construct water bars, and mulch with wood straw any adjacent segments of firelines that cross intermittent and perennial streams.
- Where firelines intersect roads, discourage OHV use with heavy debris and/or berms and slash where visible from the road.
- Construct piles of side cast slash within dozer lines, or adjacent to hand lines where the understory allows. Deck logs, if practicable.
- Obliterate hand lines where they intersect FS trails to disguise their presence.
- Primary lines intended for future use should have little to no debris or brush scattered over them, only piles.

### Roads and Trails

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities.
- Where needed, grade surfaces and **remove berms** along roads impacted by suppression activities.
- Chip side cast slash on roads (best option), construct slash piles adjacent to the road where the understory allows (second best) or lop and scatter slash adjacent to the road (third best). Deck logs along roads, where practicable.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads.

### Safety Zones, Drop Points, Helispots, Sling Sites, and Staging Areas

- Knock down berms, decompact soil and restore natural drainages.
- Only pull enough slash across the area to reduce erosion and prevent further impacts to cultural resources.

### Fences and Gates

- Repair any fences and gates damaged by suppression activities.

### Water Sources

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

### Wetlands and Meadows

- Where fire lines, trails, or roads intersect meadows, restore drainage patterns and seed with native grasses, if necessary.

### Special Consideration Areas

- Consult with the lead Federal Archaeologist prior to any repair work within archaeological or historic sites.
- Certain areas are considered highly culturally sensitive, in which repairs must be coordinated closely with the lead Federal Archaeologist, the appropriate Tribal Historic Preservation Officer and Heritage Consultants.

### Miscellaneous

- Remove all equipment, gear, hose, flagging and trash from firelines and dispersal sites.

**Remember: if you have any doubts or questions about the ideal end state of these repairs, consult with a READ.**
