INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: NORTH ZONE DAY	
NORTH ZONE		Date/Time From: 11/06/2020 0700 FRI	Date/Time To: 11/06/2020 1900 FRI
3. Objective(s):			
<p>Management Objectives:</p> <ol style="list-style-type: none"> 1. Ensure firefighter and public safety by using strategies and tactics that mitigate known and anticipated hazards while following COVID-19 mitigation actions. 2. Eliminate impacts to private property, communities and infrastructure while closely coordinating the protection of natural and cultural resources with Agency Resource Advisors through the suppression repair phase of the incident. 3. Maintain and enhance relationships with represented agencies, stakeholders, local landowners, and the general public. 4. Minimize the cost of the incident by employing tactics that have the highest probability of success while minimizing firefighter exposure. <p>Control Objectives:</p> <p>Keep the fire:</p> <ul style="list-style-type: none"> • North of the South Zone. • South of Friend Lake to Hwy 36. • East of Wool Mountain. • West of Raney Peak. • Keep fire within current control lines. 			
4. Operational Period Command Emphasis:

Fire Weather Forecast

FORECAST NO: 77
PREDICTION FOR: 24-Hour Shift
SHIFT DATE: Friday 11/6/2020
TIME AND DATE ISSUED: 11/5/2020 1900 PST

INCIDENT: August Complex North Zone
UNITS: Six Rivers & Shasta-Trinity NFs
SIGNED: *Christian Cassell*
Incident Meteorologist (IMET)

DISCUSSION: After a cold frontal passage overnight, rain diminishes to spotty rain and mountain snow showers for much of the daytime period today. Another period of rain and light mountain snow is possible this evening into Saturday morning before ending. Much cooler and breezy conditions can be expected through the weekend. Some light accumulation snow is possible overnight Saturday night into Sunday morning, but total liquid water equivalent is expected to be below 0.10".

TODAY:

SKY/WEATHER: Rain early this morning diminishing to isolated or scattered rain and snow showers. Snow levels dropping to near 5,000-ft elevation by late afternoon.

Max Temperature: 45 to 50 mid-slopes and valleys; 35 to 45 upper slopes and ridgetops.

Min RH: 40 to 75%.

20-FT WINDS:

Lower Valleys/Lower Slopes: West wind 6 to 12 mph with gusts up to 20 mph.

Upper Ridges: West 6 to 12 mph with gusts up to 20 mph.

TRANSPORT WINDS: West to Northwest around 10 mph.

Mixing Height: 7,000 ft. MSL.

TONIGHT:

SKY/WEATHER: Cloudy with a chance of rain and high-elevation snow showers, mainly before midnight. Snow levels near 4,000-ft elevation.

Min Temperature: 25 to 35 degrees.

Max RH: 80 to 100%.

20-FT WINDS:

Valleys/Lower Slopes: West to Northwest 5 to 10 mph.

Upper Ridges: North to Northwest 5 to 10 mph.

SATURDAY:

SKY/WEATHER: Mostly Cloudy. A slight chance of snow showers.

Max Temperature: 35 to 50 degrees, coldest toward ridgetops.

Min RH: 40 to 60%.

20-FT WINDS:

Lower Valleys/Lower Slopes: West to Northwest wind 6 to 10 mph with local gusts up to 20 mph.

Upper Ridges: West to Northwest 6 to 10 mph with local gusts up to 20 mph.

TRANSPORT WINDS: West to Northwest around 10 mph.

Mixing Height: 7,000 ft. MSL.

Outlook SUNDAY through TUESDAY: Unsettled and cool conditions persist as showers and clouds gradually diminish through Sunday night into Monday. With light winds Sunday night and partial clearing, temperatures could really bottom out well down into the teens and 20s in the valley bottoms. Monday will see brief high pressure ridging move through, with a slight warm-up and light winds under mostly clear skies. A weak weather system may bring a return of unsettled weather with the slight chance for showers Tuesday. Increasingly unsettled weather, possibly a season-ending event, is possible late next week.

OPERATIONS CHIEF		SHAUN CRAIG DAN GUSE (T)		BRANCH DIRECTOR		
DIVISION/GROUP SUPERVISOR		JAKE DAVIS ANTHONY ROJO (T)		AOBD	BRIAN SEXTON	
6. Control Operations/Work Assignments:						
Conduct suppression repair efforts between DP 97 and DP 92 utilizing the Fire Suppression Repair Guidelines in the IAP. Patrol and mop-up to the extent necessary to keep the fire in its current perimeter to prevent further fire spread.						
7. Special Instructions:						
Needle cast and seasonal leaf fall are causing previously mopped-up areas to need attention again. Patrol areas that may have been considered secured. Routinely patrol areas where structures are present. Back haul unused items to roadways or DPs. Get GPS coordinates or DP numbers for item location and back-haul needs. Be aware of logging operations on the 1S23 Road / Hwy 36.

6. Control Operations/Work Assignments:						
Continue to secure fireline into the South Fork of the Trinity River to prevent further spread to the north. Patrol and monitor Irish Mountain for any hotspots near the line. Mop-up any threats to the line. Backhaul any unused accountable property.						
7. Special Instructions:						
Be aware of logging operations on the 1S23 Road / Hwy 36. Needle cast and seasonal leaf fall are causing previously mopped-up areas to need attention again. Patrol areas that may have been considered secured. Routinely patrol areas where structures are present.

5. Special Instructions:	
6. Prepared By	Name: JOE MEHCIZ 661-332-7608, COMM UNIT 996-340-4633
(Communications Unit Leader)	Signature: 
ICS 205	IAP Page Date/Time: 11/05/2020 1110

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ALL	Fireline Hazards	<ul style="list-style-type: none"> Do not work directly above or below personnel during firing and mop-up operations. Watch for falling and rolling debris on steep slopes. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Flag and isolate all HAZMAT and alert all personnel working in Division. Follow WUI recommendations, IRPG Pg. 12.
ALL	Driving and Traffic	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, & cell phones etc.) and use the 3 second rule.
ALL	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify possible helispots and communicate Lat/Longs to DIVS. Be familiar with the medical plan and communicate 8 line promptly.
ALL	Heavy Equipment Operations	<ul style="list-style-type: none"> Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
ALL	Air Operations	<ul style="list-style-type: none"> Ensure positive communication with all air resources. Don't plan on air resources for medical transport or resupply. Follow "Aviation Watch-Out Situations" IRPG Pg. 46. Refer to "Directing Bucket or Retardant Drops" IRPG Pg. 58.
ALL	Poor Communications	<ul style="list-style-type: none"> Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
ALL	COVID-19 Environment	<ul style="list-style-type: none"> Utilize social distancing (6 feet). Wear a facemask if you can't social distance. Maintain the "module of one" concept. Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.). Utilize technology to communicate while maintaining social distance. Wash your hands frequently.
ALL	Cold weather	<ul style="list-style-type: none"> Carry extra clothing to prevent hypothermia following shift. Dry out gear each night for next day. Watch footing on frozen ground. Maintain personal hydration. Monitor wind-chill and establish trigger points for disengagement

Incident Name:

August North Zone

Operational Period: Day

November 06, 2020

OSC2:

Clint Gould
Chance Traub (t)

SOF2:

Greg Marfil
Ron Plummer (T)
Nick Bianchini(T)
Cogan Carothers (T)

Date and Time Prepared:

Nov 05, 2020 1600 Hours

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are ALL accountable for SAFE behaviors
For Day Operations: November 6, 2020

INCIDENT: **August Complex North**

Day: Friday Shift: Day 0700-1900

Major Hazard and Risk:

- **Covid-19:** Get your temp checked, wear a mask and practice social distancing each day to ensure you are protecting yourself and others.
- **Driving and Traffic:** Be prepared for adverse driving conditions due to a change in weather. Go slow to be fast.
- **Heat/Cold Related Injuries:** Stay hydrated, eat properly, take frequent breaks, and pay attention to your body. Utilize appropriate cold weather gear based on a current forecast to stay warm and dry.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions and fog can reduce the likelihood of utilizing helicopters for a medevac. Pay attention to incoming weather for further complications with transport.

Fire Order of the Day: Maintain control of your forces at all times.

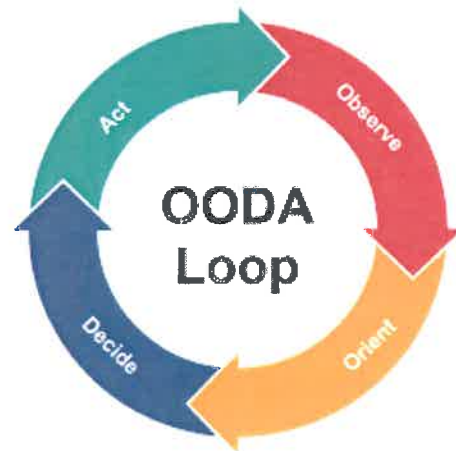

Watch Out Situation #15: Wind increases and/or changes direction.

Scout your work area prior to engaging if possible.
You never know what is out to get you.

Your decision making process is constant.

Stay alert!

Thanks from your Safety Team!!

Greg Marfil, Ron Plummer (T), Cougan Carothers (T)

A handwritten signature in blue ink, appearing to read "G Marfil".

**Communication is what makes a team
Strong**

August Complex North Zone Finance / Check-In / Demob (v.4)

FINANCE MESSAGE

Thank you for continuing to submit your times in the easiest and safest way possible. You may either turn in your CTR or shift ticket hardcopy or take a picture of it and send it electronically to the email address below. Please turn in your CTR or shift ticket at least every other day and make sure it is legible, includes your resource order number, and is signed by your supervisor.

Email or contact these phone numbers if you have any questions:

2020.augustcomplex.finance@firenet.gov

Hayfork ICP Personnel Time: 661-619-7368

Hayfork ICP Equipment Time: 409-739-3298

Hayfork ICP Finance Chief: 346-413-7242

CHECK IN / DEMOB

Check In and Demob are being processed at Hayfork ICP. Please contact us at 916-589-7792 if your last work date is incorrect in the IAP.

AIR TRAVEL

Anyone needing an airline flight home, contact Demob at 916-589-7792 at least 4 days prior to your departure date.

Fire Suppression Repair Cheat Sheet

Overall Objective

Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire are not explicitly mitigated or corrected during this repair phase, only those impacts caused by the suppression of the fire.

Guidelines by Feature Type

Dozer and Hand Lines

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line.
- Remove excess debris and dirt from adjacent segments of firelines that cross drainages. Construct water bars, and mulch with wood straw any adjacent segments of firelines that cross intermittent and perennial streams.
- Where firelines intersect roads, discourage OHV use with heavy debris and/or berms and slash where visible from the road.
- Construct piles of side cast slash within dozer lines, or adjacent to hand lines where the understory allows. Deck logs, if practicable.
- Obliterate hand lines where they intersect FS trails to disguise their presence.
- Primary lines intended for future use should have little to no debris or brush scattered over them, only piles.

Roads and Trails

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities.
- Where needed, grade surfaces and **remove berms** along roads impacted by suppression activities.
- Chip side cast slash on roads (best option), construct slash piles adjacent to the road where the understory allows (second best) or lop and scatter slash adjacent to the road (third best). Deck logs along roads, where practicable.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads.

Safety Zones, Drop Points, Helispots, Sling Sites, and Staging Areas

- Knock down berms, decompact soil and restore natural drainages.
- Only pull enough slash across the area to reduce erosion and prevent further impacts to cultural resources.

Fences and Gates

- Repair any fences and gates damaged by suppression activities.

Water Sources

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

Wetlands and Meadows

- Where fire lines, trails, or roads intersect meadows, restore drainage patterns and seed with native grasses, if necessary.

Special Consideration Areas

- Consult with the lead Federal Archaeologist prior to any repair work within archaeological or historic sites.
- Certain areas are considered highly culturally sensitive, in which repairs must be coordinated closely with the lead Federal Archaeologist, the appropriate Tribal Historic Preservation Officer and Heritage Consultants.

Miscellaneous

- Remove all equipment, gear, hose, flagging and trash from firelines and dispersal sites.

Remember: if you have any doubts or questions about the ideal end state of these repairs, consult with a READ.

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for water bars on fire lines.

Fire line slope %	Maximum Distance Apart (feet)
1 – 5	200
6 – 20	125
21 – 40	60
41 – 60	40
>60	25

Water bars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.

Kathryn Ronnenberg

Human Resource Message

The following are some tips for a slow, safe withdrawal from fire line life.

- Your first evening at home, start a roaring fire in the fireplace, turn off all the lights, and read a comic book by flashlight. Partially shut the flue damper and have a little smoke back up into the house, enough that it stings your eyes a little bit.
- When it's time for bed, turn on all the lights in your room. Leave them on all night. Sprinkle some dirt and pine needles on your sheets. Put some rocks and your dirty socks beneath your pillow. When you get into bed, be sure you've still got your boots or shoes on. Wear the same clothes you've had on all day. If your bed is too comfortable, sleep in an old, dirty sleeping bag near the fireplace and/or as close to the kitchen as possible.
- Have a friend come over, have him use a bullhorn outside your bedroom all night, using phrases such as "Will the crew boss from San Carlos #6 report to plans?", "Ground Support report to the Logistics Chief immediately", and the perfunctory "Ops Chief to Communications ASAP!" Have him blow into the bullhorn at least two times before making each announcement.
- Have a couple of people who don't know you and have not been in your house before, wander in between 2 and 3 a.m. with huge red packs, pull out their sleeping bags, and sleep on the floor. Have them leave a radio on, switched on to one of the incident's tac channels all night.
- Lock the bathroom door. Arrange to have a porta-potty placed in your driveway. Have it delivered full, after being used by at least a couple of hundred people. Make sure the latch on the door doesn't work. Have someone open the door a couple times while you are using it. Make sure the porta-potty is placed somewhere very dark, and forget to bring your flashlight when you use it.
- Ask the person who delivers your paper to honk the car horn for you as early as possible – preferably around 4 a.m.
- Acquire a taste for half melted 'energy bars', made mostly from sawdust.
- Wear a stuffed backpack all day at work; if it is too comfortable, put some rocks in it.
- At lunch time, take your sandwich outside and drop it in a flower bed. Retrieve it and stand beside a full garbage can while you eat it. Wash it down with a drink that's been in the car trunk all morning.
- Several times during the day, hit yourself in the shins with a hammer.
- During the day take a break by lying down in the dirt outside; if it is too comfortable, lay on a few rocks. Use your hard hat as a pillow by putting it in the crook of your neck, below the back of your head. It is preferable if you find a steep slope in the sun to lie down, steep enough that you have to plant your feet on some downhill boulders to keep from slipping down the slope.

August Complex Information Section

Fire Information (public and media inquiries): 530-628-0039

PHOTOS/VIDEOS:

We're looking for photos or videos of areas with reburn potential and of fire-suppression repair projects. It's okay if people are in the photos, but they need to be in full PPE. If you email us your photos, please give the location and a description of what's being depicted.

- Stop by the PIO office at ICP or TLC base camp
- Airdrop with us before/after the ops briefings.
- Email us: 2020.elkhorn@firenet.gov

SOCIAL MEDIA:

Each forest has its own Facebook and Twitter accounts where information about the fire is being posted.

MEDICAL PLAN (ICS 206 WF)
Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications: Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED/PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW/PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN/PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG Page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. /Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
