## Fire Weather Forecast

**FORECAST NO:** 78  
**PREDICTION FOR:** 24-Hour Shift  
**SHIFT DATE:** Saturday 11/7/2020  
**TIME AND DATE ISSUED:** 11/6/2020 1900 PST

**INCIDENT:** August Complex North Zone  
**UNITS:** Six Rivers & Shasta-Trinity NFs  
**SIGNED:** *Christian Cassell*  
Incident Meteorologist (IMET)

---

**DISCUSSION:** A few isolated snow and valley rain showers are possible today before a passing system brings a period of snow showers overnight tonight into Sunday morning. Minor snow accumulations are possible above the valley floors with this event. A drying trend commences by Sunday afternoon and which continues into Monday. With the drying and at least partial clearing trend, Sunday night/Monday morning low temperatures could fall as low as the teens.

### **TODAY:**

**SKY/WEATHER:** Mostly Cloudy becoming partly cloudy. A slight chance of rain showers and mountain snow showers.

**Max Temperature:** 35 to 45 upper ridges and ridgetops; 45 to 55 mid-slopes and valleys.

**Min RH:** 35 to 55%.

### **20-FT WINDS:**

**Lower Valleys/Lower Slopes:** West to Northwest wind 6 to 10 mph with local gusts up to 20 mph.

**Upper Ridges:** West to Northwest 6 to 10 mph with local gusts up to 20 mph.

**TRANSPORT WINDS:** West to Northwest around 10 mph.

**Mixing Height:** 5,500 ft. MSL.

### **TONIGHT:**

**SKY/WEATHER:** Cloudy with a chance of snow and valley rain showers.

**Min Temperature:** 23 to 33 degrees.

**Max RH:** 80 to 100%.

### **20-FT WINDS:**

**Valleys/Lower Slopes:** West to Northwest 5 to 8 mph. Gusts to 15 mph.

**Upper Ridges:** Northwest 6 to 10 mph. Gusts to 25 mph on ridgetops.

### **SUNDAY:**

**SKY/WEATHER:** Mostly Cloudy with a chance of rain and snow showers early, then mostly sunny skies.

**Max Temperature:** 40 to 55 degrees, coldest toward ridgetops and warmest in the valleys.

**Min RH:** 25 to 50%, lowest east of South Fork Mountain and toward ridgetops.

### **20-FT WINDS:**

**Lower Valleys/Lower Slopes:** North 5 to 8 mph. Gusts to 15 mph.

**Upper Ridges:** Northwest 7 to 12 mph. Gusts to 25 mph on ridgetops.

**TRANSPORT WINDS:** North 5 to 10 mph.

**Mixing Height:** 8,000 ft. MSL.

**Outlook MONDAY through WEDNESDAY:** High pressure ridging Monday should allow for seasonably dry conditions but continued cool temperatures. A weather system looks to approach from the northwest Monday night into Tuesday but will likely fall apart before reaching the fire area, keeping precipitation at a minimum. Precipitation chances improve by Wednesday as onshore northwesterly flow aloft pushes disturbances toward the general area. Even better chances for rain arrive later Thursday into next weekend.

**6. Control Operations/Work Assignments:**  
Continue to secure fireline into the South Fork of the Trinity River to prevent further spread to the north. Patrol and monitor Irish Mountain for any hotspots near the line. Mop-up any threats to the line. Backhaul any unused accountable property.

**7. Special Instructions:**  
Be aware of logging operations on the 1S23 Road / Hwy 36. Needle cast and seasonal leaf fall are causing previously mopped-up areas to need attention again. Patrol areas that may have been considered secured. Routinely patrol areas where structures are present.

# HEALTH AND SAFETY MESSAGE

*SAFETY* starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

For Day Operations: November 7, 2020

INCIDENT: **August Complex North**

Day: Saturday Shift: Day 0700-1900

## Major Hazard and Risk:

- **Covid-19:** Get your temp checked, wear a mask and practice social distancing each day to ensure you are protecting yourself and others.
- **Driving and Traffic:** Be prepared for adverse driving conditions due to a change in weather. Go slow to be fast.
- **Heat/Cold Related Injuries:** Stay hydrated, eat properly, take frequent breaks, and pay attention to your body. Utilize appropriate cold weather gear based on a current forecast to stay warm and dry.
- **Extended Extraction Times:** Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions and fog can reduce the likelihood of utilizing helicopters for a medevac. Pay attention to incoming weather for further complications with transport.

Fire Order of the Day: Base all actions on current and expected behavior of the fire

Watch Out Situation #15: instructions and assignments not clear

## Driving on wet roads

- Reduce speed
- Increase following distance
- Avoid hard breaking

## Primary Plan

## Alternate plan

## Contingency Plan

## Escape plan

**Thanks from your Safety Team!!**

Greg Marfil, Ron Plummer (T), ~~Cougan Carothers~~ (T)

## Covid -19 Mitigations:

- Wash your hands
- Where your facemask
- Practice Social distancing
- Module of one.

## Fire Suppression Repair Cheat Sheet

### Overall Objective

Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire are not explicitly mitigated or corrected during this repair phase, only those impacts caused by the suppression of the fire.

### Guidelines by Feature Type

#### Dozer and Hand Lines

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line.
- Remove excess debris and dirt from adjacent segments of firelines that cross drainages. Construct water bars, and mulch with wood straw any adjacent segments of firelines that cross intermittent and perennial streams.
- Where firelines intersect roads, discourage OHV use with heavy debris and/or berms and slash where visible from the road.
- Construct piles of side cast slash within dozer lines, or adjacent to hand lines where the understory allows. Deck logs, if practicable.
- Obliterate hand lines where they intersect FS trails to disguise their presence.
- Primary lines intended for future use should have little to no debris or brush scattered over them, only piles.

#### Roads and Trails

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities.
- Where needed, grade surfaces and **remove berms** along roads impacted by suppression activities.
- Chip side cast slash on roads (best option), construct slash piles adjacent to the road where the understory allows (second best) or lop and scatter slash adjacent to the road (third best). Deck logs along roads, where practicable.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads.

#### Safety Zones, Drop Points, Helispots, Sling Sites, and Staging Areas

- Knock down berms, decompact soil and restore natural drainages.
- Only pull enough slash across the area to reduce erosion and prevent further impacts to cultural resources.

#### Fences and Gates

- Repair any fences and gates damaged by suppression activities.

#### Water Sources

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

#### Wetlands and Meadows

- Where fire lines, trails, or roads intersect meadows, restore drainage patterns and seed with native grasses, if necessary.

#### Special Consideration Areas

- Consult with the lead Federal Archaeologist prior to any repair work within archaeological or historic sites.
- Certain areas are considered highly culturally sensitive, in which repairs must be coordinated closely with the lead Federal Archaeologist, the appropriate Tribal Historic Preservation Officer and Heritage Consultants.

#### Miscellaneous

- Remove all equipment, gear, hose, flagging and trash from firelines and dispersal sites.

**Remember: if you have any doubts or questions about the ideal end state of these repairs, consult with a READ.**

## Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

### Recommended spacing for water bars on fire lines.

Fire line slope %	Maximum Distance Apart (feet)
1-5	200
6-20	125
21-40	60
41-60	40
>60	25

*Water bars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.*

## PHOTOS/VIDEOS:

We're looking for photos or videos of areas with reburn potential and of fire-suppression repair projects. It's okay if people are in the photos, but they need to be in full PPE. If you email us your photos, please give the location and a description of what's being depicted.

- Stop by the PIO office at ICP or TLC base camp
- Airdrop with us before/after the ops briefings.

## Human Resource Message

### Employee Advocate

Everyone here today is playing a critical role in fighting the August Complex fire. We all have our assignments that must be met in order to achieve our mission of protecting life, resources and property. Of course, we cannot accomplish our mission when one of our fellow team members may be experiencing a work and/or personal matter that is impacting their ability to keep focused and remain positive.

If we witness a team member who is having a rough go at it, become their advocate. Ask them how things are going. See if they want to take a break to talk about what's going on. Give them the opportunity to vent and to share with you their concern. You may be the person that brings them back to where we need them to be to help meet our objectives.
