Fire Weather Forecast

FORECAST NO: 79

PREDICTION FOR: 24-Hour Shift

SHIFT DATE: Sunday 11/8/2020

TIME AND DATE ISSUED: 11/7/2020 1900 PST

INCIDENT: August Complex North Zone **UNITS:** Six Rivers & Shasta-Trinity NFs

SIGNED: Christian Cassell

Incident Meteorologist (IMET)

<u>DISCUSSION</u>: Skies clear by this afternoon behind a low pressure system that moved through during the overnight hours last night, though an isolated snow shower or two could linger into the morning. Northerly winds will help usher in drier air through the day, especially east of South Fork Mountain. With the arrival of a drier air mass and clearing skies, overnight low temperatures tonight may drop as low as the teens and 20s in some valley bottoms, which could be the coldest temperatures so far this season. Shortwave upper level ridging brings quiet conditions Monday, though increasing clouds can be expected late in the day with an approaching disturbance.

TODAY:

SKY/WEATHER: Mostly cloudy with isolated snow showers in the morning, then becoming sunny.

Max Temperature: 32 to 46 ridges and upper slopes, 44 to 53 valley and lower slopes.

Min RH: 25 to 50%, lowest in valley bottoms.

20-FT WINDS:

Lower Valleys/Lower Slopes: North 5 to 8 mph. Gusts to 15 mph in the morning.

Upper Ridges: North to Northwest 7 to 14 mph. Gusts to 20 mph in the morning on ridgetops.

TRANSPORT WINDS: North 10 to 15 mph.

Mixing Height: 8,000 ft. MSL.

TONIGHT:

SKY/WEATHER: Partly Cloudy. Widespread frost developing.

Min Temperature: 15 to 30 degrees. Max RH: 60 to 90%, lowest on ridgetops.

20-FT WINDS:

Valleys/Lower Slopes: North 5 to 8 mph.

Upper Ridges: North 5 to 10 mph.

MONDAY:

SKY/WEATHER: Partly Cloudy becoming Mostly Cloudy. Widespread frost in the morning.

Max Temperature: 38 to 51 ridges and upper slopes; 45 to 57 lower slopes and valleys.

Min RH: 22 to 38%, lowest toward Beegum Group.

20-FT WINDS:

Lower Valleys/Lower Slopes: North to West around 5 mph.

Upper Ridges: North to West around 5 to 8 mph.

TRANSPORT WINDS: North to West 5 to 10 mph.

Mixing Height: 8,000 ft. MSL.

Outlook TUESDAY through THURSDAY: An increasingly unsettled weather pattern takes shape with the chance for significant moisture to arrive beginning by late Thursday and beyond. The first system will arrive Tuesday but will likely only bring increased clouds and perhaps a shower or two. The jet stream finally moves south enough to potentially bring the arrival of a more significant weather system with widespread wetting rains, and potentially a season-ending event, sometime on Thursday and lasting through the weekend. 2 to 4 inches of rain appear likely over a 4-day period.

Control Operations/Work Assignments: Continue to secure fireline into the South Fork of the Trinity River to prevent further spread to the north. Conduct suppression repair efforts in the DP-161 area and between DP-150 and DP-152 utilizing the Fire Suppression Repair Guidelines in the IAP. Patrol and monitor Irish Mountain for any hotspots near the line. Mop-up any threats to the line. Backhaul any unused accountable property. 7. Special Instructions: Be aware of logging operations on the 1S23 Road / Hwy 36. Needle cast and seasonal leaf fall are causing previously moppedup areas to need attention again. Patrol areas that may have been considered secured. Routinely patrol areas where structures are present.

6. Control Operations/Work Assignments:

Continue to patrol and monitor North Zone from DP-151 to DP-137. Take appropriate suppression action(s) near DP-137 (Beegum Thumb). Take appropriate suppression actions from DP-137 to DP-123. Monitor fire activity in the old Buck Fire near H-130. Continue suppression repair between DP-143 to DP-157, and Turkey Mullin Gulch. Continue repair of dozer line around DP-130 to DP-136.

7. Special Instructions:

Needle cast and seasonal leaf fall are causing previously mopped-up areas to need attention again. Patrol areas that may have been considered secured. Routinely patrol areas where structures are present.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are <u>ALL</u> accountable for <u>SAFE</u> behaviors For Day Operations: November 8, 2020

INCIDENT: August Complex North

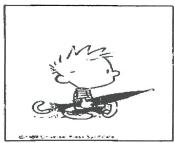

Day: Sunday Shift: Day 0700-1900

Major Hazard and Risk:

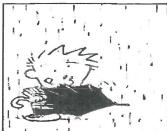

- ➤ Covid-19: Get your temp checked, wear a mask and practice social distancing each day to ensure you are protecting yourself and others.
- > **Driving and Traffic:** Be prepared for adverse driving conditions due to a change in weather. Go slow to be fast.
- ➤ Heat/Cold Related Injuries: Stay hydrated, eat properly, take frequent breaks, and pay attention to your body. Utilize appropriate cold weather gear based on a current forecast to stay warm and dry.
- Extended Extraction Times: Be familiar with the medical plan. Develop a plan on how you would get an injured firefighter out timely. Factor in how smoke inversions and fog can reduce the likelihood of utilizing helicopters for a medevac. Pay attention to incoming weather for further complications with transport.

Standard Firefighting Order of the Day: Keep informed on fire weather conditions and forecasts.

Watch Out Situation #17: Taking a nap near the fireline.

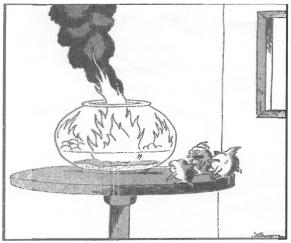

Make the most out of your situation. It may be cold and wet, but at least you are making a difference while staying safe.

Tragedy Fires

- On relatively small fires or deceptively quiet areas of large fires.
- In relatively light fuels, such as grass, herbs and light brush
- When there is an unexpected shift in wind direction or in wind speed
- When fire responds to topographic conditions and runs uphill

"Well, thank God we all made it out in time. ...
'Course, now we're equally screwed."

Thanks from your Safety Team!!

Greg Marfil, Ron Plummer (T), Cougan Carothers (T)

You want to improve your mental toughness? Try this: Be tougher.

Jocko Willink-

BR/DIV	HAZARDOUS	S ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES						
ALL	Н	azard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. 						
ALL	Fire	elin e Hazards	 Do not work directly above or below personnel during firing and mop-up operations. Watch for falling and rolling debris on steep slopes. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Flag and isolate all HAZMAT and alert all personnel working in Division. Follow WUI recommendations, IRPG Pg. 12. 						
ALL	Drivi	ng and Traffic	 Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, & cell phones etc.) and use the 3 second rule. 						
ALL	Extended	Medical Extraction Times	 Identify possible helispots and communicate Lat/Longs to DIVS. Be familiar with the medical plan and communicate 8 line promptly. 						
ALL	Heavy Eq	uipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 2 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment. 						
ALL	Air	Operations	 Ensure positive communication with all air resources. Don't plan on air resources for medical transport or resupply. Follow "Aviation Watch-Out Situations" IRPG Pg. 46. Refer to "Directing Bucket or Retardant Drops" IRPG Pg. 58. 						
ALL	Poor C	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots. 						
ALL	COVID	-19 Environment	 Utilize social distancing (6 feet). Wear a facemask if you can't social distance. Maintain the "module of one" concept. Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.). Utilize technology to communicate while maintaining social distance. Wash your hands frequently. 						
ALL		old weather	 Carry extra clothing to prevent hypothermia following shift. Dry out gear each night for next day. Watch footing on frozen ground. Maintain personal hydration. Monitor wind-chill and establish trigger points for disengagement

Fire Suppression Repair Cheat Sheet

Overall Objective

Repair damage caused by suppression activities, and thus minimize short and long-term environmental impacts. Impacts caused by the direct effects of fire are not explicitly mitigated or corrected during this repair phase, only those impacts caused by the suppression of the fire.

Guidelines by Feature Type

Dozer and Hand Lines

- Construct water bars and/or rolling dips where access is no longer needed and erosion is a concern. Knock down berms into the fire line.
- Remove excess debris and dirt from adjacent segments of firelines that cross drainages. Construct water bars, and mulch
 with wood straw any adjacent segments of firelines that cross intermittent and perennial streams.
- Where firelines intersect roads, discourage OHV use with heavy debris and/or berms and slash where visible from the road.
- Construct piles of side cast slash within dozer lines, or adjacent to hand lines where the understory allows. Deck logs, if practicable.
- Obliterate hand lines where they intersect FS trails to disguise their presence.
- Primary lines intended for future use should have little to no debris or brush scattered over them, only piles.

Roads and Trails

- Clean ditches, side drains, rolling dips, and other drainage features along roads damaged by suppression activities.
- Where needed, grade surfaces and remove berms along roads impacted by suppression activities.
- Chip side cast slash on roads (best option), construct slash piles adjacent to the road where the understory allows (second best) or lop and scatter slash adjacent to the road (third best). Deck logs along roads, where practicable.
- Repair damaged earthen barriers for Maintenance Level 1, decommissioned, and non-system roads.

Safety Zones, Drop Points, Helispots, Sling Sites, and Staging Areas

- Knock down berms, decompact soil and restore natural drainages.
- Only pull enough slash across the area to reduce erosion and prevent further impacts to cultural resources.

Fences and Gates

Repair any fences and gates damaged by suppression activities.

Water Sources

- Remove dams, dikes, and other impoundments.
- Restore damaged stream banks to natural contours.
- Report fuel and oil spills.

Wetlands and Meadows

Where fire lines, trails, or roads intersect meadows, restore drainage patterns and seed with native grasses, if necessary.

Special Consideration Areas

- Consult with the lead Federal Archaeologist prior to any repair work within archaeological or historic sites.
- Certain areas are considered highly culturally sensitive, in which repairs must be coordinated closely with the lead Federal Archaeologist, the appropriate Tribal Historic Preservation Officer and Heritage Consultants.

Miscellaneous

Remove all equipment, gear, hose, flagging and trash from firelines and dispersal sites.

Remember: if you have any doubts or questions about the ideal end state of these repairs, consult with a READ.

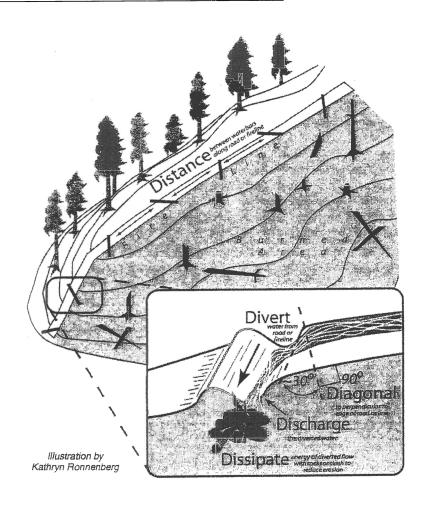

Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet.

Recommended spacing for water bars on fire lines.

Fire line slope %	Maximum Distance Apart (feet)
1– 5	 200
6 - 20	 125
21 - 40	 60
41 - 60	 40
>60	 25

Water bars should be at least 2 pulaski (4-6 inches) widths wide and 12-24 inches high for handlines.

Think before you post...

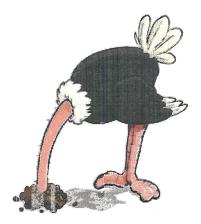

The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online.

- On official time, do official duties; if using government equipment, do government business.
- · Don't use your official position/title for private gain.
- Do share government information that is publically available. Don't disclose (via any medium) non-public information to further private interests or the private interests of others.
- Don't accept compensation for state nents made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partis in candidate or partisan political group).
- Federal Employees may express their opitions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post, contact your local Public Affairs or Public Information Officer. They can help you.

Ostrich Syndrome

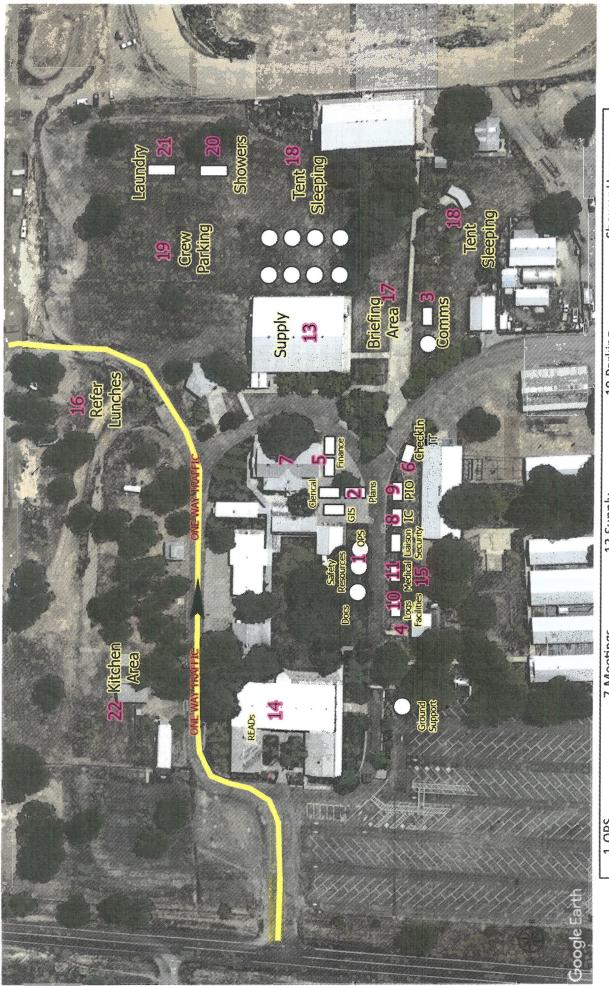

This is an ostrich.

Don't be an ostrich and bury your head in the sand when you hear or see any form of behavior that is negatively impacting another person's well-being. Be the leader that you are and stop the inappropriate behavior from continuing. Based on the significance of the behavior, immediately bring the matter to your supervisor's attention and/or the HRSP's.

Feel free to call/text or come by any time if you have questions, concerns, or just want to chat.

Ryan Voelkl -- HRSP: 530-457-7276

MEDICAL PLAN (ICS 206 WF) Controlled Unclassified Information/Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.						
Use the following items to communicate situation to communications/dispatch.						
 CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications: Div. Alpha. Stand-by for Emergency Traffic." INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care." 						
-	Severity of Emergency / Transport Priority RED/PRIORITY 1 Life or Ilmb threatening injury or Illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented. YELLOW/PRIORITY 2 Serious Injury or Illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. GREEN/PRIORITY 3 Minor Injury or Illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.					
Nature of Injury or Illness						
& Mechanism of Injury					Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)	
Transport Request					Air Ambulance / Short Haul/Hoist Ground Ambulance / Other	
Patient Location		Descriptive Location & Lat. / Lo		Descriptive Location & Lat. / Long. (WGS84)		
Incident Name					Geographic Name + "Medical"	
On-Scene Inc	ident Commander				(Ex: Trout Meadow Medical) Name of on-scene IC of Incident within an	
					Incident (Ex: TFLD Jones)	
Patient Care					Name of Care Provider (Ex: EMT Smith)	
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)						
Patient Assessment: See IRPG Page 106						
Treatment:						
I. TRANSPORT PLAN:						
Evacuation Location (if different): (Desciptive Location (drop point, intersection, etc.) or Lat. /Long.) Patient's ETA to Evacuation Location:						
telispot / Extraction Site Size and Hazards:						
ADDITIONAL RESOURCES / EQUIPMENT NEEDS:						
Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope resuce, Wheeled litter, HAZMAT, Extrication						
. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable						
Function	Channel Name/Numl	ber Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *	
COMMAND AIR-TO-GRND						
TACTICAL						
. CONTINGENCY: <u>Considerations</u> : If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.						
. ADDITIONAL INFORMATION: Updates/Changes, etc.						
EMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
