Fire Weather Forecast

FORECAST NO: 34

PREDICTION FOR: Monday-Monday Night

DATE: October 12th, 2020

FORECAST ISSUED: 2000 October 11th, 2020

Fire: August Complex Northeast Zone

UNIT: CA-MNF-000753

Incident Meteorologist: Eric Evenson

Signed: Eric Evenson

WEATHER DISCUSSION:

Good humidity recovery is expected at the start of the operational period with warming and drying taking place quickly in the morning as skies will be sunny. The temperature today will be a few degrees warmer and relative humidity a little lower than yesterday. Expect northwest winds to increase once again after 1100 along the midslopes and ridges with downslope/downvalley winds at the lower elevations in the morning, but northwest in the afternoon. With clear skies air operations should have clean air to fly. Winds will taper off tonight and become downslope/downvalley after 2300. Smoke may increase in the deeper valleys as the nighttime inversion develops.

TODAY:

WEATHER: Sunny.

MAX TEMP: 3000 feet: 72-76°

5000 feet: 66-70°

MIN RH: 3000 feet: 21-26%

5000 feet: 28-33%

CHC WTG RAIN: 0% Haines Index: 4

WINDS: 3000 feet: Downvalley/downslope 2 to 4 mph, then northwest 3 to 5 mph after 1200.

(20 FEET) 5000 feet: Northwest 3 to 6 mph until 1100, then increasing to 5 to 9 mph with gusts to 12 mph.

MIXING HEIGHT: Rising to 6000 feet by 1500. TRANSPORT WIND: Northwest at 5 to 8 mph.

VISIBILITY: Smoke possible in the deeper valleys in the morning with reduced visibilities. Good visibility in afternoon as

smoke mixes out of the valleys.

TONIGHT:

WEATHER: Clear with areas of smoke possible in the deeper valleys. Visibility reduced under 3 miles.

MIN TEMP: 3000 feet: 42-46°

5000 feet: 48-52°

MAX RH:

3000 feet: 65-70%

5000 feet: 53-58%

CHC WTG RAIN: 0% Haines Index: 3

WINDS: 3000 feet: Northwest 3 to 6 mph until 2300, then downvalley/downslope winds 2 to 4 mph.

5000 feet: Northwest 4 to 8 mph with gusts to 10 mph, becoming 2 to 5 mph after 2100.

TRANSPORT WIND: Northwest 3 to 6 mph. **INVERSION:** Inversion develops after 2300.

EXTENDED OUTLOOK: Tuesday Through Saturday: Expect slightly warmer and drier conditions on Tuesday compared to Monday with northwest winds developing along the midslopes and ridges once again. Noticeable warming and drying takes place Wednesday through Saturday. During this period we return to poor humidity recovery at night and low relative humidity during the day. The potential for gusty north to northeast winds will also exist, especially on Friday.

Submit Wx/Fire Obs Nearby Weather Obs

FIRE BEHAVIOR FORECAST								
FORECAST NUMBER: 34	TYPE OF FIRE: Wildfire							
FIRE NAME: August Complex-Northeast	OPERATIONAL PERIOD: Day/Night shift 10/12/2020							
DATE ISSUED: 10/11/2020	TIME ISSUED: 2000							
UNIT: Shasta-Trinity National Forest	Prepared by:_/s/ Ryan Jones							

INPUTS

WEATHER SUMMARY: See fire weather forecast for details

**Good overnight humidity recovery, a little warmer and drier with RH's dropping quicker today than the previous shift with another mostly sunny day.

Fuels: At all elevations, fuels are <u>Critically Dry</u> in all size classes, both live and dead. Fine fuels: 6%-exposed and 6-9%-shaded; 1000hr 9%, ERC's have dropped below the 90th percentile but are rebounding over the next couple days.

FIRE BEHAVIOR

OUTPUTS

GENERAL: Moderate to active fire behavior is expected with the most active areas likely being exposed slopes with wind alignment. With increased solar heating fuels will become receptive sooner today correlating with increasing fire behavior potential. Interior pockets will continue to clean up and bumout with increased smoke production throughout the shift.

Spotting distance: (.1 to .2) miles. Probability of Ignition: 40-60%

Timber-Shrub: Head fire ROS-(3-7 ch/hr), FL(5-7 ft) **Shrub:** Head fire ROS-(17-34) ch/hr, FL(10-13 ft) **Grass:** Head fire ROS-(4-10) ch/hr, FL (1-2 ft)

SPECIFIC:

Branch 31-. Moderate potential for surface fire spread between Irish Mountain and 14 road area. NW winds should be favorable to control actions. In the Rattlesnake creek area along on the FS57 road there is still scattered heat and moderate potential for the fire threaten containment line with NW winds pushing fire behavior back into the fire away from the line. Smoke will increase throughout the day as heavy fuels continue to smolder and consume.

Branch 40- Fire activity in the upper areas of the North Fork of Beegum, Middle Fork Beegum, Texas Chow, Dark Canyon creeks, and the East Fork of the South Fork of the Trinity River will continue to be active as pockets of fuel clean up. NW winds could continue to push the fire into the Buck fire scar to the southeast. NW winds have the potential to push the fire on the south side the Middle Fork Beegum Creek drainage between North Star and Round Mountains. Fire activity from DP-145 to DP-135 is expected to be minimal with scattered heat with increased smoke production as heavy fuels continue to smolder.

Night Operations-Fire behavior is expected to be low-moderate overnight as temperatures stay low and RH recoveries good. Northwest winds overnight will push fire any fire activity to the southeast of Beegum creek towards North Star mountain. Areas of the fire near exposed slopes will have higher activity than areas below 3,500'. Burn operations could be hindered in several areas with the general winds overriding the diumal influences.

AIR OPERATIONS:

Sunrise: 0718 **Sunset**:1835

Expect visibility to be poor in the deeper valleys until the afternoon when winds begin to push smoke out of the valleys. Visibility should be good across the ridge tops as smoke mixes out sooner than in the valleys.

SAFETY

The areas of the fire that are on the south facing slopes in the drainage will have the wind aligned with slope, expect very active fire behavior, including crown runs, group and single tree torching and spotting.

6. Control Operations/Work Assignments:

TASK: Resource accountability. Assess structure protection opportunities by deliberately analyzing probability of success given current and expected fire behavior. Assist other divisions as requested. Develop plan for containment lines N of Hwy 36.

PURPOSE: Minimize structure loss in the Forest Glen area, protect Rowdy Bear and Hayfork communities.

END STATE: Structure loss is minimized. Values at risk are minimally impacted by fire.

7. Special Instructions:

For urgent access through any construction delay on Hwy 36 near Dinsmore, contact Lou Robertson of Mercer Frazer Construction at 707-599-6372.

^{**}Denotes a 24 hour availability resource

6. Control Operations/Work Assignments:

TASK: Resource accountability. Continue to secure fireline along the 29N80 and 29N73 roads south of Hwy. 36. Continue to assess and improve structure protection measures around the Post Mountain community.

PURPOSE: Keep fire south of Hwy. 36 and minimize the impact to the community of Post Mountain.

END STATE: Minimal impact to Hwy. 36 corridor and improvements. Values at risk in the community of Post Mountain are minimally impacted by fire.

7. Special Instructions:

Read Special Instructions: Sensitive areas are flagged in yellow/white candy striped flagging for avoidance.

REMS 1 available from India 1

FINANCE MESSAGE

All incident personnel (crews, contractors, and overhead resources) need to turn in daily CTR's and Shift Tickets to one of the following locations:

- Hayfork Spike
- ICP Redding

Time can also be submitted electronically via email to: 2020.elkhorn.finance@firenet.gov

In the email subject line, please put your resource number, your company/engine name, followed by the date. (Example: E-1045 South River Fire Rescue 10-07-20).

Shift Ticket Requirements:

If you have equipment or an engine that has a secondary rate for mileage, additional operators (i.e., crew) and/or a lowboy (or other transport), please ensure your shift tickets reflect the necessary justification for both the start and stop odometer readings, any additional operator names, and "transport attached" if applicable. Also enter your "current" E# in the upper right corner of the ticket.

If you are a contractor who is purchasing fuel in the field, please make sure and keep a copy of your fuel ticket to turn in to finance during your demob so that the fuel deduction can be made on your final invoice.

CTR Requirements:

Any shift times that exceed 16 hours unless already authorized by the incident, must have a shift justification form attached.

Please ensure you have accurately notated any travel time, hazard pay, or meal breaks with justifications as needed.

Finance Demobing:

If you are within two (2) days from your scheduled demob date, please take a few minutes to review all your time submissions and ensure that they were properly completed and signed. Any missing CTRs/Shift Tickets or other finance documents will delay your demob process.

Finance Section
August Complex - Northeast Zone
ICP Finance: (530)-200-2164

Hayfork Spike Finance: (984) 227-1448

FINANCE CHECK IN

Due to there being so many incidents that have rolled into the August Complex we are asking all resources to complete this form and send to Finance. You can complete and email to 2020.elkhorn.finance@firenet.gov, drop it off with Logistics at either camp or give to your Division Supervisor to get to Finance. We want to ensure we have all resources accounted for in our system and getting everyone's time posted correctly so that you can get paid.

Human Resource Message

FATIGUE AND MENTAL HEALTH!

How fatigue affects performance:

- Accuracy and timing degrade
- Lowers performance standards unconsciously become acceptable
- o Performance becomes inconsistent
- Multitasking activities become difficult to perform
- The ability to efficiently integrate information is lost
- Social interactions (critical information exchange) decline
- Attitude and mood deteriorate
- o The ability to reason is impaired
- Situational awareness declines
- Attention wanes
- o Involuntary and uncontrollable lapses into sleep begin to occur

TWO THINGS TO REMEMBER IN LIFE: "Take care of your thoughts when you are alone and take care of your words when you are with people."

Larry Sandoval Human Resource Specialist 213-431-4031 TRAINING MESSAGE - Trainees - please SIGN IN with the Training Specialist, by accessing the fillable Trainee Sign-In Form here:

ONCE YOU HAVE SIGNED INat any time during the during the incident:

If Trainee or Trainer is demobing: Trainers – Trainer needs to fill out the relevant parts of the Task Book and do an Incident Personnel Performance Rating and discuss the assignment with the trainee.

If Trainee is staying: Trainee should contact Training Specialist to discuss plans for remainder of the assignment.

If Trainee is demobing: Trainee should access the Trainee SIGN OUT form here:

If you have any questions or need to discuss your assignment, please contact the Training Specialist

Don Washco, 623-695-6487 Don Washco@firenet.gov

The Shasta-Trinity National Forest

Much of the August Complex's Northeast Zone, especially the area still actively burning, is located on the Shasta-Trinity National Forest. The Shasta-Trinity National Forest is the largest National Forest in California at 2.1 million acres. The elevation of the forest ranges from about 1,000 feet to over 14,000 feet and spans from the Sacramento Valley foothills, to the Modoc Plateau and the Klamath Ranges, encompassing a large variety of climatic zones and habitat types. The Shasta-Trinity National Forest also contains the headwaters of the McCloud, Sacramento and Trinity Rivers.

The **August Complex-NE Zone** is burning in the Trinity side of the Shasta-Trinity National Forest on the South Fork Management Unit. So what's cool about it?

SPECIAL INTEREST AREAS (SIAs)!

SIAs are managed for their unique geological, botanical, biological, zoological, scenic, or cultural features. Natural Bridge SIA has geologic and cultural significance, and is located between Hayfork and Wildwood. Western Azalea SIA is a wetland known for its botanical significance, located off the Bramlett Road between Forest Glen and the Yolly Bolly Wilderness. Tedoc SIA is known for its botanical significance on serpentine soils, and is located between State Highway 36 and the Yolly Bolly Wilderness.

WILDERNESS!

At the southernmost extent the Forest lies 37,469 acres of the Yolly Bolly/Middle Eel Wilderness, comanaged with the Mendocino National Forest. The Yolly Bollys are best known for its snowcapped peaks and protects the headwaters of the Middle and North Forks of the Eel River, Mad River and South Fork of the Trinity. It also has the only known location of the threatened California red-legged frog on the Shasta-Trinity National Forest.

WILD and SCENIC RIVERS!

Both the Trinity River and the **South Fork of the Trinity River** are designated Wild and Scenic Rivers. The South Fork of the Trinity is one of California's largest undammed river systems, providing habitat for steelhead (summer and winter runs), chinook (spring and fall runs) and the threatened Coho salmon, as well as old-growth forest dependent wildlife species. The river and tributaries also offer outstanding outdoor recreation opportunities. The Forest appreciates the use of Minimal Impact Suppression Tactics (MIST) to the extent possible when close to the South Fork of the Trinity.

ANADROMOUS FISH!

Anadromous fish are born in freshwater, then migrate to the ocean as juveniles where they grow into adults before migrating back into freshwater to spawn. Good Rule of Thumb: If a stream has any water in it during fire season, it is likely Critical Habitat for threatened Coho salmon. As such, care must be taken to use fish screens and document water drafting. See a REAF for a fish screen or with questions.

Thank you for all your efforts in preserving and appreciating the unique characteristics of the Shasta-Trinity National Forest. You are deeply appreciated. Please be safe.

Pacific Southwest Region Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. We do great; however, stress is cumulative. And 2020 has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Get Plenty of Rest
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Wendy Flannery, R5 CISM/CAP Coordinator 209-283-4552 Tessa Chicks, R5 Deputy CISM/CAP Coordinator 360-982-8220

Great Basin Team 2 Expectations 2020 Safety is the Team's Number One Priority Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty**, **Respect**, and **Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments:

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Tony DeMasters

Incident Commander

DMOB PROCESS - Northeast Zone

PLEASE READ THE FOLLOWING PROCEDURES IF YOU ARE DEMOBING IN THE NEXT FOUR DAYS

Resources that are flying need to contact DMOB 48 hours prior to DMOB Date so flight can be arranged. We will need your NAME, as it appears on your picture ID, your Date of Birth, Gender, and a few other questions.

PAPERLESS DEMOBILIZATION CHECKOUT PROCESS:

1.) Visit the DMOB Unit Last for final checkout.

_	At each of the following Units, take a picture of the Unit Leads signature after you have been cleared by them for DMOB.
_	Supply Communications Ground Support
_	Weed Wash
**IF YO	U HAVE A RENTAL VEHICLE CHECKED OUT THROUGH THIS FIRE. PLEASE TELL GROUND RT $stst$
•	TIME – Complete all finance and time paperwork in ICP at Holiday Inn, 1900 Hilltop Drive, Redding, CA.

- 4.) Once cleared from all units, present your pictures to the DMOB unit for final approval and checkout.
- * If you do not have all pictures, you will not be cleared for demobilization.
- * If you do not have the ability to take pictures please let your line supervisor know.
- **IF YOU HAVE FURTHER DMOB QUESTIONS, PLEASE CONTACT LORIE AT: 925-588-6734 or 801-710-7043

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are ALL accountable for SAFE behaviors

For Day/Night Operations

INCIDENT: August Complex North East Zone

DATE: October 12, 2020

TIME: 0700

Major Hazards and Risks:

- → **DRIVING:** Drive defensively, be aware of <u>all traffic</u> in and out fire area. Obey all posted speed limits **SLOW DOWN!** & Share the roadway. Be aware of other drivers, personnel and wildlife. Be alert and watch for vehicles on steep narrow roads. Heads up for dusty roads keep your windshields clean.
- → HAZARD TREES: Look up, Look down, Look around for signs of fire weakened trees.

Be Alert, Keep Calm, Think Clearly and Act Decisively

- → Maintain your situational awareness
- → Avoid Complacency & Stay alert
- → Review the Medical Plan & know what to do if you have an emergency

FATIGUE MANAGEMENT

FATIGUE IS CUMULATIVE!!!!

Complete the checklist...what's your score???

- [] Adequate Rest? [] Thinking about going home?
- [] Proper Nutrition? [] Driving too far?
- [] Personal Hygiene? [] Been out to many

Unnecessary Exposurecould ruin YOUR day!

- Check your Situational Awareness
- Pay attention to the smaller things
- Never trust chance

Driving

- → Drive defensively on highways and fire access roads. Slow down on narrow roads and blind turns.
- → Be courteous, look ahead and pull over.
- → Use seat belts
- → Lights on, windshields clean.
- → Ensure that all safety features on your vehicle are functional.
- → Watch for cattle, wildlife and other unknown hazards.

Please Slow Down

COVID-19 Check list

- **☑** Masks
- **☑** Washing hands often
- **☑** Social Distancing of 6 feet

Your Safety Team:

Laney Cutshaw, Brad Wagner

Our Safety Record to date is GREAT.

Please take the time to watch out for each other!

HAZARD MITIGATION THROUGH RISK MANAGEMENT

Operational Engagement

"Risk Management doesn't get in the way of doing the mission – *it is the way we do the mission*." The Risk Management Process assists in ensuring that critical factors and risks of the fireline work environment are considered during decision making. Good risk management utilizes a five-step process:

Step 1—Situational Awareness:

- Obtain information.
- Scout the fire.
- Identify hazards—those likely to result in a negative impact.
- Consider all aspects of current and future situations.
- Consider known historical problem areas (Apply information from the Fire Danger Pocket Card.).
- · Recognize the need for action.
- Demonstrate ongoing awareness of fire assignment status.
- Note deviations.
- · Attempt to determine why discrepancies exist with information before proceeding.

Step 2—Hazard Assessment:

- Assess hazards to determine risks (e.g., fire behavior, snags, unburned fuels, work/rest).
- Use the Look Up, Down, and Around; and the Tactical Watch Outs (both located in the Incident Response Pocket Guide) to identify high-risk tactical hazards.
- Assess the impact of each hazard in terms of potential loss, cost, and mission/operational
 degradation based on probability and severity (probability—how likely an event will occur;
 severity—consequences if the event occurs). Keep in mind that increased exposure time
 increases probability.

Step 3—Hazard Control:

- Determine the best approach to mitigate or control the risk from the hazards assessed.
- Establish controls (e.g., anchor point, LCES, utilize downhill checklist, limit exposure time).
- As control measures are developed, reevaluate each risk until it is reduced to a level where benefits outweigh potential costs.
- Step 4—Decision Point (decision to accept or not accept the risk(s) associated with an action):
 - Consider whether controls are in place for identified hazards, whether selected tactics are based on expected fire behavior and if instructions have been given and understood.
 - Make certain the decision is made at the appropriate level; if not, then elevate to a higher level.
 - Reject the action if the risk is unacceptable.

Step 5—Evaluation:

- Ensure controls are implemented and accomplished to standards.
- Supervise/evaluate effectiveness of controls and decisions. Stay on top of the situation and adjust risk controls as necessary.
- Anticipate consequences of decisions; if controls do not work, determine problem and derive a better solution.
- Adjust actions as the situation changes; maintain situational awareness at all times.
- Maintain feedback line.

2020 COVID-19 Guidance

LEADERS INTENT:

- Incident responders have a DUTY to safeguard each other and the public we serve from hazards. It is through our RESPECT for everyone's health and safety that we follow these mitigations, and we rely on everyone's INTEGRITY to ensure that we do so and expect the same of others.
- All incident personnel are expected to conduct self-screening of their health on a daily basis. Individuals experiencing any of the symptoms should take precautions to self-isolate and immediately report symptoms to your supervisor and to the IMT's Medical Officer or MEDL for assessment.
- All incident personnel will adhere to the Module of One concept to the extent practical.
- All incident personnel and visitors will wear cloth face coverings when six feet of social distancing cannot be maintained with others outside of their Module of One.
- All incident personnel and visitors are required to wear cloth face coverings when attending briefings or meetings in common use areas at ICP and camps.
- All incident personnel and visitors will wear cloth face coverings whenever they enter an enclosed incident facility, such as yurt, tent, building, restroom facility, or other common-use areas regardless of proximity to other people.

ALL RESOURCES (IMT Members, Single Resource, Operational & Support resources):

• Each resource should arrive at the incident "self-sufficient" for 72 hours, including food, water, sanitizer or wipes, batteries, etc.

ICP AND CAMPS

- Access into ICP and some base camp facilities may be restricted to essential personnel only, i.e. module supervisors and trainers
- To promote isolation and social distancing, operational resources will be assigned to camps and spike camps dispersed on the incident.
- Food will be individually packaged and delivered to drop points for distribution. Special dietary needs should be reported to your line supervisor.
- Daily operational briefings will be conducted via radio or virtually. Only supervisors and trainees should attend in-person briefings.

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Totally of in the pass 2 : notice; the control of t
Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries:	DO NOT ANNOUNCE
Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.	Ask individual to step aside and follow the steps below.
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	

Steps to follow
Escort symptomatic individual to isolation area.
Isolation support personnel should begin documentation.
Have symptomatic individual contact Supervisor for further direction.
Notify COVID Coordinator at 910-973-5027.
Have individual transported as appropriate.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

¹ Symptoms of Coronavirus

INCIDENT SAFETY ANALYSIS 215a

August Complex North East Zone CA-000753 - Monday, October 12, 2020

	igust complex more	in East Zone CA-000733 Widhay, October 12, 2020
8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ALL	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets.
All	Extreme Fire Behavior	 Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions, refer to page 1, IRPG.
All	Heat Related Illness (HRI)& Dehydration	~ Drink Fluids throughout operational period (6-8 qts/shift). ~ Maintain water/electrolyte ratio of 3 to 1. ~ Carry extra water on line and cache water at drop points. ~Take Frequent breaks, minimum of 10 minutes every hour. ~Allow out of area resources time to acclimatize before expecting peak performance. ~ Recognize symptoms of HEAT RELATED ILLNESS which include. o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating
ALL	Chain Saw Operations	 Follow "Hazard Tree Safety" guidelines, IRPG page 22 Look up, Look down, Look around for hazard tree indicators. Only fell and buck trees within your expertise, and training. Follow "Procedural Felling Operations" on page 79 in IRPG. Do not fall trees during high wind events. Ensure proper use of all required PPE.
All	Helicopter Operations	 Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry. Monitor A-G communications. Follow aviation safety guidelines in IRPG and IHOG.
All	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.

INCIDENT SAFETY ANALYSIS 215a

ALL	Bees, Ticks, Mosquitoes	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
ALL	COVID-19	~ Follow local and CDC guidelines. ~ Practice social distancing and hand washing guidelines. ~ Wear face coverings in designated areas and when social distancing is not possible. ~ Follow module of one concept. ~ Minimize number of indivuals at briefings and meetings. ~ Monitor symptoms of all resourses daily and report concerns to COVID Coordinator.
ALL	Air Operations	∼ Follow " Aviation Watch-Out Situations" on page 44, IRPG. ∼ Don't plan on air resources for medical transport or resupply. ∼ Refer to page 57, IRPG for directing bucket drops. ∼ Ensure positive communication with all air resources.
ALL	ATV/UTV use	 Ensure equipment is inspected and safe to use. Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook and/or RMA. Question if it is mission critical.
ALL	Injury & Medical Emergency	 Assist injured employee appropriate medical care. Use EMT's on Division for initial care. Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
ALL	Unburned Area/Reburn Potential	 Monitor weather. Base actions upon observed and predicted fire behavior. LCES Checklist (IRPG pg. 6). Look Up, Down and Around (IRPG pg. 2-3).
ALL	Power Utilities	 Notify all personnel of down electrical lines. Refer to the IRPG page 24 for Power Line Safety. Always treat downed wires as energized. Identify and avoid high tension transmission lines. Identify and avoid high pressure natural gas lines. Identify and avoid damaged gas service near structures. Be aware of utility restoration in your work area.
Branch 31	Firing Operations & Devices	 Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
Branch 31,40	Mop-up & Rehab	 Do not work above or below personnel during rehab/mop-up operations. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Wear eye protection.
Branch 31,40	Night Operations	 Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue. Take breaks away from areas of known hazard.
All	Poisonous Plants	∼ Identify and Avoid hazard areas. ∼ Launder clothing. ∼ Shower frequently.

INCIDENT SAFETY ANALYSIS 215a

All	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts (IRPG pg 6).
All	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.
All	Indirect Fireline	∼ Post lookouts, identify escape routes and safety zones (IRPG pg. 6). ∼ Review "Strategy/Indirect Attack" (IRPG pg. 87).
All	Structure Protection & HAZMAT	 Review "Wildland Urban Interface" Watch outs, IRPG page 12. Use "Structure Assessment" checklist, IRPG pages 12-16. Follow "HAZMAT Incident Operations" on pages 34-36 in IRPG.
ALL	Wildlife & Livestock	 Watch out for wildlife & livestock inside fire area and along roadways. Clean up all debris and trash during each operational period. There are Moose in the area with calves. Avoid getting between the female and calf. Be Bear Aware.
ALL	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Don not rely on human repeaters.
ALL	Firefighter & Public Smoke Exposure	 Use warning lights and provide traffic control on roadways during smoky and night operations. Rotate crews out of smoky areas during firing and mop-up operations. Contact Communications when firing operations are initiated.
Branch 40	Gas Lines	∼Identify locations before operations in areas of concern. ∼Monitor depth before using Heavy Equipment in areas of concern.

Special Instructions:

When calling in an Emergency:

- 1) Slow down, speak clearly.
- 2) Identify who, and where you are.
- 3) What is the emergency? (Paint a good picture)
- 4) What additional needs required i.e., Helicopter / Ambu / REMS / etc..

Timothy Egan (MEDL) 775-232-3515 Bruce Toy (MEDL) 775-815-4888

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

CONTACT	COMMUN	VICATIONS	/ DISPATCH	(Verify correct frequency p	rior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incid Ex: "Communications, I have a Red Meadow Medical, IC is TFLD Jones. EMI	priority patient, unconscious, struck b			est Road 1 at (Lat./Long.) This will be the Trout				
Severity of Emergency / Transport Priority	□ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. □ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. □ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.							
Nature of Injury or Illness								
& Mechanism of Injury				Brief Summary of Injury or Illness Ex: Unconscious, Struck by Falling Tree)				
Transport Request				Air Ambulance / Short Haul/Hoist Ground Ambulance / Other				
Patient Location		De		escriptive Location & Lat. / Long. (WGS84)				
Incident Name				Geographic Name + "Medical" (Ex: Trout Meadow Medical)				
On-Scene Incident Commander				Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)				
Patient Care				Name of Care Provider (Ex: EMT Smith)				
3. INITIAL PATIENT ASSESSMENT	F: Complete this section for each patien	nt as applicable (start wi	th the most severe patient)					
Patient Assessment: See IRPG page 106								
Treatment:								
4. TRANSPORT PLAN:								
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:								
Helispot / Extraction Site Size and Hazards:								
5. ADDITIONAL RESOURCES / EQ	JIPMENT NEEDS:	() () () () () () () () () ()						
Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication								
6. COMMUNICATIONS: Identify St			,					
Function Channel Name/Nur	nber Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *				
COMMAND								
AIR-TO-GRND								
TACTICAL								
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.								
8. ADDITIONAL INFORMATION: Updates/Changes, etc.								
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
