Fire Weather Forecast

FORECAST NO: 35

PREDICTION FOR: Tuesday-Tuesday Night

DATE: October 13th, 2020

FORECAST ISSUED: 2000 October 12th, 2020

Fire: August Complex Northeast Zone

UNIT: CA-MNF-000753

Incident Meteorologist: Eric Evenson

Signed: Eric Evenson

WEATHER DISCUSSION: ...FIRE WEATHER WATCH WEDNESDAY THROUGH FRIDAY MORNING...

The gradual warming and drying trend will continue today, but more noticeable warming and drying takes place Wednesday through Friday. Sunshine is expected today with a little more smoke lingering over the fire area that could reduce the visibility below 5 miles. The cloud free skies will allow air operations the opportunity to fly for a better part of the operational period. Winds along the midslopes and ridges will once again be from the northwest with terrain driven winds in the lower elevations. Relative humidity will start to recover during the first part of tonight, but expect a sharp drop in the relative humidity after 2400 as winds become more north-northeast. This will start the extended period (Wednesday through Friday) of above normal temperatures, low relative humidity during the day with poor recovery at night, and gusty northeast winds (10-15 mph with gusts to 20-25 mph). Heads up for weather and smoke to impact fire operations.

TODAY:

WEATHER: Sunny with areas of smoke in the lower valleys.

MAX TEMP: 3000 feet: 76-80°

5000 feet: 68-72°

MIN RH: 3000 feet: 20-25%

5000 feet: 32-37%

CHC WTG RAIN: 0% Haines Index: 4

WINDS:

3000 feet: Downvalley/downslope 2 to 4 mph, then northwest 4 to 8 mph after 1200 with gusts to 15 mph

in and around the Beegum Creek drainage.

(20 FEET) 5000 feet: Northwest 4 to 8 mph until 1200, then increasing to 6 to 10 mph with gusts to 14 mph.

MIXING HEIGHT: Rising to 7000 feet by 1500. **TRANSPORT WIND**: Northwest at 5 to 9 mph.

VISIBILITY: Smoke possible in the deeper valleys in the morning with reduced visibilities, but good visibility in afternoon

as smoke mixes out of the valleys.

TONIGHT:

WEATHER: Clear with areas of smoke possible in the deeper valleys. Visibility reduced under 3 miles.

MIN TEMP:

3000 feet: 50-54°

MAX RH:

3000 feet: 50-55% until 2400 then falling into

the 20-25% range by end of period.

5000 feet: 51-55° **5000**

5000 feet: 60-65% until 2400 then falling into the 25-30% range by end of period.

CHC WTG RAIN: 0% Haines Index: 4

WINDS:

3000 feet: Northwest 3 to 6 mph until 2400, then becoming more north-northeast by end of period. **5000 feet:** Northwest 5 to 9 mph until 2400, then becoming more north-northeast by end of period.

TRANSPORT WIND: Northwest 3 to 7 mph. **INVERSION**: Inversion develops after 2300.

EXTENDED OUTLOOK: Wednesday Through Sunday: Above normal temperature, low relative humidity, poor nighttime humidity recovery, and gusty northeast winds will lead to critical fire weather conditions. Conditions moderate slightly Saturday and Sunday, but will stay warm and dry, but weaker winds.

Submit Wx/Fire Obs

Conditions moderate out weaker winds.

Nearby Weather Obs

FIRE BEHAVIOR FORECAST								
FORECAST NUMBER: 35	TYPE OF FIRE: Wildfire							
FIRE NAME: August Complex-Northeast	OPERATIONAL PERIOD: Day/Night shift 10/13/2020							
DATE ISSUED: 10/12/2020	TIME ISSUED: 2000							
UNIT: Shasta-Trinity National Forest	Prepared by:_/s/ Ryan Jones							

INPUTS

WEATHER SUMMARY: See fire weather forecast for details

**Fair overnight humidity recovery, a little warmer and drier with RH's dropping quicker today than the previous shift with another mostly sunny day.

Fuels: At all elevations, fuels are <u>Critically Dry</u> in all size classes, both live and dead. Fine fuels: 6%-exposed and 4-9%-shaded; 1000hr 9%, ERC's have dropped below the 90th percentile but continuing to rebound over the next couple days.

FIRE BEHAVIOR

OUTPUTS

GENERAL: Moderate to active fire behavior is expected with the most active areas likely being exposed slopes with wind alignment. With increased solar heating fuels will become receptive sooner today correlating with increasing fire behavior potential. Interior pockets will continue to clean up and burnout with increased smoke production throughout the shift. The burn window for active burning is lengthening again with hotter days and poorer RH recoveries.

Spotting distance: (.1 to .2) miles.

Probability of Ignition: High of 80% in elevations below 3000', High of 70% in elevations above 3000'.

Timber-Shrub: Head fire ROS-(3-8 ch/hr), FL(4-8 ft) Shrub: Head fire ROS-(19-36) ch/hr, FL(10-14 ft) Grass: Head fire ROS-(5-11) ch/hr, FL (1-3 ft)

SPECIFIC:

Branch 31-. Moderate potential for surface fire spread between Bear Wallow and Irish Mountains. NW winds should be favorable to control actions. In the Rattlesnake creek area along on the FS57 road there is still scattered heat and moderate potential for the fire to threaten containment line with NW winds pushing fire behavior back into the fire away from the line. Smoke will increase throughout the day as heavy fuels continue to smolder and consume.

Branch 40- Interior pockets continuing to clean up in the upper areas of the North Fork of Beegum, Middle Fork Beegum, Texas Chow, Dark Canyon creeks. NW winds could continue to push the fire into the Buck fire scar to the southeast. NW winds have the potential to push the fire on the south side the Middle Fork Beegum Creek drainage between North Star and Round Mountains. Fire activity from DP-145 to DP-135 is expected to be minimal with scattered heat with increased smoke production as heavy fuels continue to smolder.

Night Operations-Fire behavior is expected to be low-moderate with RH's beginning to fall after midnight increasing potential for fire activity to increase. Northwest winds overnight will push any fire activity to the southeast of Beegum creek towards North Star mountain. Areas of the fire near exposed slopes will have higher activity than areas below 3,500'. Burn operations could be hindered in several areas with the general winds overriding the diurnal influences.

AIR OPERATIONS:

Sunrise: 0719 **Sunset**:1831

Expect visibility to be poor in the deeper valleys until the afternoon when winds begin to push smoke out of the valleys. Visibility should be good across the ridge tops as smoke mixes out sooner than in the valleys.

SAFETY

Weather becoming hotter and drier, watch for a corresponding increase in fire behavior and the indicators of that occurring i.e. increasing smoke, vertical lifting of smoke as inversion lifts, smoldering transitioning to creeping and surface fire spread, trees torching out.

6. Control Operations/Work Assignments:

TASK: Resource accountability. Assess structure protection opportunities by deliberately analyzing probability of success given current and expected fire behavior. Assist other divisions as requested. Develop plan for containment lines N of Hwy 36.

PURPOSE: Minimize structure loss in the Forest Glen area, protect Rowdy Bear and Hayfork communities.

END STATE: Structure loss is minimized. Values at risk are minimally impacted by fire.

7. Special Instructions:

For urgent access through any construction delay on Hwy 36 near Dinsmore, contact Lou Robertson of Mercer Frazer Construction at 707-599-6372.

6. Control Operations/Work Assignments:

TASK: Resource accountability. Continue to secure fireline along the 29N80 and 29N73 roads south of Hwy. 36. Continue to assess and improve structure protection measures around the Post Mountain community.

PURPOSE: Keep fire south of Hwy. 36 and minimize the impact to the community of Post Mountain.

END STATE: Minimal impact to Hwy. 36 corridor and improvements. Values at risk in the community of Post Mountain are minimally impacted by fire.

7. Special Instructions:

Read Special Instructions: Sensitive areas are flagged in yellow/white candy striped flagging for avoidance.

REMS 1 available from India 1

FINANCE MESSAGE

All incident personnel (crews, contractors, and overhead resources) need to turn in daily CTR's and Shift Tickets to one of the following locations:

- Hayfork Spike
- ICP Redding

Time can also be submitted electronically via email to: 2020.elkhorn.finance@firenet.gov

In the email subject line, please put your resource number, your company/engine name, followed by the date. (Example: E-1045 South River Fire Rescue 10-07-20).

Shift Ticket Requirements:

If you have equipment or an engine that has a secondary rate for mileage, additional operators (i.e., crew) and/or a lowboy (or other transport), please ensure your shift tickets reflect the necessary justification for both the start and stop odometer readings, any additional operator names, and "transport attached" if applicable. Also enter your "current" E# in the upper right corner of the ticket.

If you are a contractor who is purchasing fuel in the field, please make sure and keep a copy of your fuel ticket to turn in to finance during your demob so that the fuel deduction can be made on your final invoice.

CTR Requirements:

Any shift times that exceed 16 hours unless already authorized by the incident, must have a shift justification form attached.

Please ensure you have accurately notated any travel time, hazard pay, or meal breaks with justifications as needed.

Finance Demobing:

If you are within two (2) days from your scheduled demob date, please take a few minutes to review all your time submissions and ensure that they were properly completed and signed. Any missing CTRs/Shift Tickets or other finance documents will delay your demob process.

Finance Section
August Complex - Northeast Zone
ICP Finance: (530)-200-2164

Hayfork Spike Finance: (984) 227-1448

FINANCE CHECK IN

Due to there being so many incidents that have rolled into the August Complex we are asking all resources to complete this form and send to Finance. You can complete and email to 2020.elkhorn.finance@firenet.gov, drop it off with Logistics at either camp or give to your Division Supervisor to get to Finance. We want to ensure we have all resources accounted for in our system and getting everyone's time posted correctly so that you can get paid.

THANK YOU FOR YOUR COOPERATION. THIS WILL HELP US GET YOU PAID. AUGUST COMPLEX – NORTHEAST ZONE FINANCE

potties, sleepers, tents, etc.)

TRAINING MESSAGE - Trainees - please SIGN IN with the Training Specialist, by accessing the fillable Trainee Sign-In Form here:

ONCE YOU HAVE SIGNED IN......at any time during the during the incident:

If Trainee or Trainer is demobing: Trainers — Trainer needs to fill out the relevant parts of the Task Book and do an Incident Personnel Performance Rating and discuss the assignment with the trainee.

If Trainee is staying: Trainee should contact Training Specialist to discuss plans for remainder of the assignment.

If Trainee is demobing: Trainee should access the Trainee SIGN OUT form here:

If you have any questions or need to discuss your assignment, please contact the Training Specialist

Don Washco, 623-695-6487 Don Washco@firenet.gov

Human Resource Message

Are you carrying more than you can handle? It's not always easy to tell what another person is going through!

Come see Human Resources.

Pacific Southwest Region Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. We do great; however, stress is cumulative. And 2020 has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Get Plenty of Rest
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Wendy Flannery, R5 CISM/CAP Coordinator 209-283-4552 Tessa Chicks, R5 Deputy CISM/CAP Coordinator 360-982-8220

Coho Salmon

(Oncorhynchus kisutch)

Size: An adult coho may measure more than **2 feet in length** and can weigh **up to 35 pounds**. However, the average weight of adult coho is 8 pounds.

Look: Dark metallic blue or greenish backs with silver sides and a light belly and there are small black spots on the back and upper lobe of the tail while in the ocean.

Diet: Coho feed on plankton and insects in freshwater and switch to a diet of small fishes while in the ocean.

Life: Coho salmonids make their way downstream to the ocean. After several (1-8) years, adults migrate from a marine environment into the freshwater streams and rivers **of their birth**; they spawn only once and then they die.

Salmon live in the ocean but are born and spawn in freshwater rivers and streams. They're extremely sensitive to a variety of natural and manmade stressors, on land as well as in the ocean. Changes in ocean and climatic conditions, habitat loss from the construction of dams and urban development, and degraded water quality from agricultural and logging practices are just a few of the factors that have taken a toll on wild salmon populations, especially in the Pacific Northwest. With salmon, managing impacts to habitat is just as important as managing salmon harvests. The two are very closely related - the quality and quantity of salmon habitat impact the abundance of salmon, and the abundance of salmon determines how much salmon may be harvested by commercial, recreational, and subsistence fishermen. NOAA Fisheries and partners constantly monitor salmon abundance and manage harvests accordingly, and also work to restore and maintain healthy habitat to support these resources and fisheries.

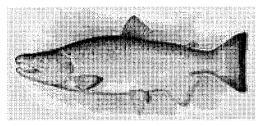

Salmonid species on the west coast of the United States have experienced dramatic declines in populations during the past several decades as a result of various human-induced and natural factors. There is no single factor solely responsible for this decline, given the complexity of the salmon species life history and the ecosystem in which they reside.

Our local Coho Salmon (Southern Oregon/Northern California Coast) was listed as **Threatened** in 1997. Many of the streams within the August Complex are designated Critical Habitat for Coho. Due to the drought, even streams that would normally have plentiful water yields are dried up, further limiting options for salmonid survival. **Please utilize water from fairground hydrants whenever possible.** When hydrant use is not feasible, ensure proper screening is in place when drafting.

A proper screen allows the operator to draw the required water volume demanded **without harming various hatchling salmonids**. If you are using a screen that with holes larger than 1/8" – talk to a READ about getting a fish screen immediately.

If your screen wouldn't hold rice, it WILL harm fish.

Great Basin Team 2 Expectations 2020 Safety is the Team's Number One Priority Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of Duty, Respect, and Integrity as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments:

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Tony DeMasters

Incident Commander

Team Ordering / Timeline Process:

- 0630 Morning Briefing, start of crew time.
- 1500 DIVS to have next day's resource order ready for OPS.
- 1100 Last call to change spike camp resource (food, fuel, etc.) location.
- *All crew level orders will be placed through DIVS
- *DIVS will place all orders through Communications Unit
- *All orders will be traced using the process found on the front of form

DMOB PROCESS - Northeast Zone

PLEASE READ THE FOLLOWING PROCEDURES IF YOU ARE DEMOBING IN THE NEXT FOUR DAYS

Resources that are flying need to contact DMOB 48 hours prior to DMOB Date so flight can be arranged. We will need your NAME, as it appears on your picture ID, your Date of Birth, Gender, and a few other questions.

PAPERLESS DEMOBILIZATION CHECKOUT PROCESS:

1.) Visit the DMOB Unit Last for final checkout.

2.)	At each of the following Units, take a picture of the Unit Leads signature after you have been cleared by them for DMOB.
	Supply Communications Ground Support
	Weed Wash

**IF YOU HAVE A RENTAL VEHICLE CHECKED OUT THROUGHTHIS FIRE. PLEASE TELL GROUND SUPPORT

- 3.) TIME Complete all finance and time paperwork in ICP at Holiday Inn, 1900 Hilltop Drive, Redding, CA.
- 4.) Once cleared from all units, present your pictures to the DMOB unit for final approval and checkout.
- f * If you do not have all pictures, you will not be cleared for demobilization.
- $f{*}$ If you do not have the ability to take pictures please let your line supervisor know.
- ** IF YOU HAVE FURTHER DMOB QUESTIONS, PLEASE CONTACT LORIE AT: 925-588-6734 or 801-710-7043

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU** PREDICTABLE IS PREVENTABLE

For Day/Night Operations

INCIDENT: August Complex North East Zone

DATE: October 13, 2020

Major Hazards and Risks:

- DRIVING: Drive defensively, be aware of <u>oncoming traffic</u> on all roadways and fire area. SLOW DOWN and SHARE the ROAD.
- HEAVY EQUIPMENT OPERATION: Maintain 50 100 ft exclusion area around equipment and 1 ½ times the height of timber. Avoid working below equipment.
- HAZARD TREES: Look up, Look down, Look around for signs of fire weakened trees.
- SAFETY ZONES: Know at all times where your safety zone is located. Be sure you can get there under the conditions that exist.

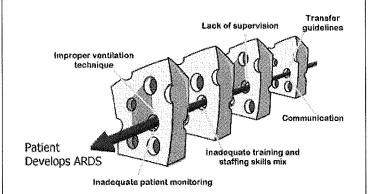

Fire Order of the Day:

Uninformed on Strategy, Tactics, and Hazards

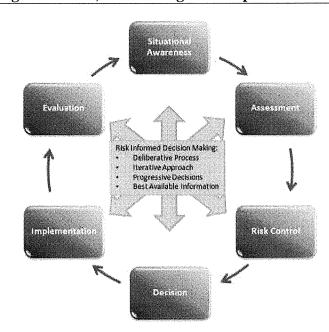

- Be alert to changing conditions.....does your perception = reality?????
- Share as much information as possible......sometimes it's the little things that make the difference
- Flag hazards and mitigate by avoidance, removing the hazard, and sharing with all personnel

Situation Awareness

- Speak up if you see something that looks wrong!!!
- Get a good briefing prior to beginning task
- Ask if you don't understand!!!!

• HELP BREAK THE "ERROR CHAIN"!!

- Establish situation awareness.
- Identify hazards and assessing the risk.
- Control or eliminate hazards.
- Make decisions based on acceptability of remaining risk.
- Evaluate effectiveness of hazard controls and continuously reevaluate the situation.

Your Safety Team: Laney Cutshaw, Brad Wagner

Unburned Fuel Between You And The Fire

Operational Engagement Category

It is important for firefighters to recognize unburned fuel between themselves and the fire as Watchout Situation #11. Often it is not possible or practical for direct attack on a fire. Before attempting indirect attack and any time the firefighter is in a position where there is unburned fuel between them and the fire, the following questions must be addressed immediately:

- Can you see the fire or are you in contact with someone who can? Discuss situations you might find yourself in where you are out in the green and cannot see the fire. What can you do?
- Is fire spread in a direction away from you? Do you consider the potential for fire spread? Are you safe if the wind switches?
- Will your position be defensible when the fire reaches you? Talk about what must be taken into account when building indirect line or approaching a fire through the green.
- Is your line anchored? Discuss how you anchor indirect line.
- Are your escape routes and safety zones adequate? What is adequate?
- Are weather indicators constantly changing?
- To reduce the risks:
 - Post lookouts.
 - Consider a different location. Review situations where you constructed indirect line or approached a fire through the green and how you provided for your safety.

Resources:

Incident Response Pocket Guide, PMS 461 Interagency Standards for Fire and Fire Aviation Operations Wildland Fire Incident Management Field Guide, PMS 210

2020 COVID-19 Guidance

LEADERS INTENT:

- Incident responders have a DUTY to safeguard each other and the public we serve from hazards. It is through our RESPECT for everyone's health and safety that we follow these mitigations, and we rely on everyone's INTEGRITY to ensure that we do so and expect the same of others.
- All incident personnel are expected to conduct self-screening of their health on a daily basis. Individuals experiencing any of the symptoms should take precautions to self-isolate and immediately report symptoms to your supervisor and to the IMT's Medical Officer or MEDL for assessment.
- All incident personnel will adhere to the Module of One concept to the extent practical.
- All incident personnel and visitors will wear cloth face coverings when six feet of social distancing cannot be maintained with others outside of their Module of One.
- All incident personnel and visitors are required to wear cloth face coverings when attending briefings or meetings in common use areas at ICP and camps.
- All incident personnel and visitors will wear cloth face coverings whenever they enter an enclosed incident facility, such as yurt, tent, building, restroom facility, or other common-use areas regardless of proximity to other people.

ALL RESOURCES (IMT Members, Single Resource, Operational & Support resources):

• Each resource should arrive at the incident "self-sufficient" for 72 hours, including food, water, sanitizer or wipes, batteries, etc.

ICP AND CAMPS

- Access into ICP and some base camp facilities may be restricted to essential personnel only, i.e. module supervisors and trainees
- To promote isolation and social distancing, operational resources will be assigned to camps and spike camps dispersed on the incident.
- Food will be individually packaged and delivered to drop points for distribution. Special dietary needs should be reported to your line supervisor.
- Daily operational briefings will be conducted via radio or virtually. Only supervisors and trainees should attend in-person briefings.

¹ Symptoms of Corona virus

WILDLAND FIRE COVID-19 SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	DO NOT MOBILIZE
At Entries:	DO NOT ANNOUNCE
Consider adequate number of personnel needed for screening. Although medical personnel are ideal, screeners do not have to be medically trained.	Ask individual to step aside and follow the steps below.
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	

Steps to follow
Escort symptomatic individual to isolation area.
Isolation support personnel should begin documentation.
Have symptomatic individual contact Supervisor for further direction.
Notify COVID Coordinator at 910-973-5027.
Have individual transported as appropriate.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

¹ Symptoms of Coronavirus

INCIDENT SAFETY ANALYSIS 215a

August Complex North East Zone CA-000753 - Tuesday, October 13, 2020

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ALL	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters when backing. ~ Honk horn to alert personnel when backing. ~ Keep clutter off dash and inside cab. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs.
All	Extreme Fire Behavior	 Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions, refer to page 1, IRPG.
All	Heat Related Illness (HRI)& Dehydration	~ Drink Fluids throughout operational period (6-8 qts/shift). ~ Maintain water/electrolyte ratio of 3 to 1. ~ Carry extra water on line and cache water at drop points. ~Take Frequent breaks, minimum of 10 minutes every hour. ~Allow out of area resources time to acclimatize before expecting peak performance. ~ Recognize symptoms of HEAT RELATED ILLNESS which include. o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating
ALL	Chain Saw Operations	 Follow "Hazard Tree Safety" guidelines, IRPG page 22 Look up, Look down, Look around for hazard tree indicators. Only fell and buck trees within your expertise, and training. Follow "Procedural Felling Operations" on page 79 in IRPG. Do not fall trees during high wind events. Ensure proper use of all required PPE.
All	Helicopter Operations	 Stay clear of all bucket drops when suppression actions are in place and allow 1 minute prior to re-entry. Monitor A-G communications. Follow aviation safety guidelines in IRPG and IHOG.
All	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.

INCIDENT SAFETY ANALYSIS 215a

APPROXIMENT OF THE PROPERTY OF		
ALL	Bees, Ticks, Mosquitoes	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
ALL	COVID-19	 Follow local and CDC guidelines. Practice social distancing and hand washing guidelines. Wear face coverings in designated areas and when social distancing is not possible. Follow module of one concept. Minimize number of indivuals at briefings and meetings. Monitor symptoms of all resourses daily and report concerns to COVID Coordinator.
ALL	Air Operations	∼ Follow " Aviation Watch-Out Situations" on page 44, IRPG. ∼ Don't plan on air resources for medical transport or resupply. ∼ Refer to page 57, IRPG for directing bucket drops. ∼ Ensure positive communication with all air resources.
ALL	ATV/UTV use	 Ensure equipment is inspected and safe to use. Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook and/or RMA. Question if it is mission critical.
ALL	Injury & Medical Emergency	∼ Assist injured employee appropriate medical care. ∼ Use EMT's on Division for initial care. ∼ Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
ALL	Unburned Area/Reburn Potential	 Monitor weather. Base actions upon observed and predicted fire behavior. LCES Checklist (IRPG pg. 6). Look Up, Down and Around (IRPG pg. 2-3).
ALL	Power Utilities	 Notify all personnel of down electrical lines. Refer to the IRPG page 24 for Power Line Safety. Always treat downed wires as energized. Identify and avoid high tension transmission lines. Identify and avoid high pressure natural gas lines. Identify and avoid damaged gas service near structures. Be aware of utility restoration in your work area.
Branch 31	Firing Operations & Devices	 Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
Branch 31,40	Mop-up & Rehab	 Do not work above or below personnel during rehab/mop-up operations. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Wear eye protection.
Branch 31,40	Night Operations	 Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue. Take breaks away from areas of known hazard.
All	Poisonous Plants	∼ Identify and Avoid hazard areas. ∼ Launder clothing. ∼ Shower frequently.

INCIDENT SAFETY ANALYSIS 215a

All	Steep Terrain & Rolling Debris	 ∼ Maintain 8'-10' spacing when working & walking. ∼ Don't work above any personnel. ∼ Be on the lookout for rolling rocks, debris, or burning material. ∼ Evaluate necessity to send personnel in areas with limited access. ∼ Post lookouts (IRPG pg 6).
All	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.
All	Indirect Fireline	∼ Post lookouts, identify escape routes and safety zones (IRPG pg. 6). ∼ Review "Strategy/Indirect Attack" (IRPG pg. 87).
All	Structure Protection & HAZMAT	 Review "Wildland Urban Interface" Watch outs, IRPG page 12. Use "Structure Assessment" checklist, IRPG pages 12-16. Follow "HAZMAT Incident Operations" on pages 34-36 in IRPG.
ALL	Wildlife & Livestock	 ∼ Watch out for wildlife & livestock inside fire area and along roadways. ∼ Clean up all debris and trash during each operational period. ∼ There are Moose in the area with calves. Avoid getting between the female and calf. ∼ Be Bear Aware.
ALL	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Don not rely on human repeaters.
ALL	Firefighter & Public Smoke Exposure	 ∼ Use warning lights and provide traffic control on roadways during smoky and night operations. ∼ Rotate crews out of smoky areas during firing and mop-up operations. ∼ Contact Communications when firing operations are initiated.
Branch 40	Gas Lines	∼Identify locations before operations in areas of concern. ∼Monitor depth before using Heavy Equipment in areas of concern.

Special Instructions:

All medical resources familiarize yourself with communications, locations and access points to your resources.

When calling in an Emergency/IWI

- 1) Slow down, speak clearly
- 2) Identify who you are and your location.
- 3) Describe the situation briefly (paint a good picture)
- 4) Identify your needs Helicopter/Ambu/REMS/etc.

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.						
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."						
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.						
		iority patient, unconscious, struck Smith is providing medical care."	by a falling tree. Requ	esting air ambulance to P	orest Road 1 at (Lat./Long.) This will be the Trout
