# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 20	TYPE OF FIRE: Wildland Fire
FIRE NAME: August Complex South Zone	OPERATIONAL PERIOD: Day Shift, October 31, 2020
DATE ISSUED: October 30, 2020	TIME ISSUED: 1900 
UNIT: Mendocino National Forest	SIGNED: Mike Beasley, FBAN

## INPUTS

**WEATHER SUMMARY:** For Specifics Please see the attached Incident Weather Forecast.

**WEATHER:** Little change from yesterday. Sunny, very dry.

**MAX TEMP:** 68-85° **MIN RH:** 8-15%

**20 FOOT WINDS:** Ridges: West 4-8 mph w/ gusts around 12 mph;  
Slope/Valley: Upslope/upvalley 3-9 mph  
Chance of Wetting Rain: 0%

**FUELS:** The fire is burning in mixed fuels, i.e. grasses, duff, brush, and conifer at the lower elevations with mixed conifer in the upper elevations. Fuels remain extraordinarily dry for this time of year.

**Ignition Receptiveness:** Probability of Ignition @ peak of the burn period: Below 3000': 65-88% unshaded/60-82% shaded, Above 3000': 63-86% unshaded/58-80% shaded

**Dryness:** Dead and down fuel moistures :1-hour 2-5%, 10-hour 4%, 100-hour 4-8%, and 1000-hour <10%.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

No perimeter growth is expected. Dry conditions will continue to encourage emergent hot spots in dozer berms, logs, standing snags, and an even a thin layer of litter from scorched needles that have been recently blown off the standing trees. This smoldering fire behavior will continue in the Hell Hole Canyon area (Division S). The fuels outside of the fire perimeter will remain dry and highly receptive to fire. Any escaped fire would likely only exhibit short-range spotting. Probability of ignition will continue to decline with a gradual increase in fine fuel moisture later in the week, as onshore flow returns.

**SPECIFIC: Division S:** Smoldering within the perimeter in stumps, logs, and in aerial fuels (candles). Watch for newly available fuel from needlecast and freezing temperatures. Any fire moving into new fuels will exhibit active fire behavior w/ short-range (< ¼ mile) spotting.

**All Other Divisions:** Interior smoldering.

**AIR OPERATIONS:** No issues.

— author Vivian Greene

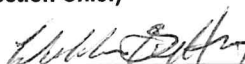

"Nothing in life is to be feared, it is only to be understood. Now is the time to understand more, so that we may fear less."

— physicist Marie Curie

## Refusing Risk

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

- A turn down is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.
- A turn down must be based on an assessment of risks and the ability of an individual or organization to control those risks.
- A situation may be a candidate for a turndown if:
  1. There is a violation of safe work practices.
  2. Environmental conditions make the work unsafe.
  3. The forces lack the necessary qualifications or experience.
  4. Defective equipment is being used.
- The following steps will be used when turning down an assignment:
  1. The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
  2. Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
  3. If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
  4. The safety hazard should be documented by the submission of a SAFENET or SAFECOM.
- These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.

- 1) Electronic submission (take a picture of the hard copy or use the electronic document and email to location below). *Preferred*

In the Subject Line include:  
CTR or Shift Ticket

*Please make sure you add this because it sends it straight to the posting box for the Time Recorders. If not, there may be a delay.*

- 2) Send a hard copy of CTR or Shift Ticket through divisions to the locations below.

Fire replacement items should be sent in via email 24 hours prior to demob.

Where to submit your time documents? Per the area you are working i.e. the IAP you are assigned, do not send to both email addresses.

## To order crews, overhead, equipment, supplies and SFF requests

Please email your requests to [2020.augustcomplex.ordering.south@firenet.gov](mailto:2020.augustcomplex.ordering.south@firenet.gov) using an electronic fillable ICS-213 based on Word document so the ordering manager can add an identifying number and make edits as necessary.

If you don't have a Word based ICS-213 email the above email and I can email a form to you. They are also available online from NWCG, FEMA and other sources.

Any issues just ask, I will work with you.

### Some helpful tips to speed up the ordering process:

Like orders can be combined on a single 213, but Overhead, Equipment, Crew and Supply orders need to be on separate 213s. These go to different people at dispatch when ordered.

At this time North Ops is requiring a minimum of 72 hours for date and time needed on resource requests. Providing a longer period of time increases the chances of getting a fill on your order. You may say will take sooner to ensure a resource does not wait until the date and time listed.

Local resources dispatched by CA-MNF can have shorter report times since they are handled at the forest level. Supply orders should allow at least 24 hours for delivery.

### Name Requests:

Name requests require a clear and defensible justification. Most California state and local government employees require an additional name request form.

Check the spelling of the name, and how they are listed in IROC (first and last only, middle initial, middle name, full name or shortened name (Dave or David) etc.

Ensure they are qualified for the position they are being requested to fill, that they are available and have checked with their supervisor before placing an order. Including the home dispatch and a contact phone number for the individual can speed up ordering.

### Other considerations:

Overhead – Approval for rental vehicle, laptop, cell phone, special equipment?

Equipment – 12 or 24 hour operational period? Will the transport stay with heavy equipment?

Supplies – Many requests for brand name items are no longer being accepted by the buying team, but you may suggest "like" Pilot G2 pen.

## Correct Biased Communication Patterns

Working in emergency incident situations is no simple task. Easily we can offend someone by a careless slip of the tongue, pen, or through inappropriate behavior.

With increased diversity there comes a need for increased sensitivity about how we interact with one another.

Becoming more sensitive in our dealings with one another results in increased rapport with those whom we work and contributes to a positive and productive work environment.

## Appendix A: Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does **not block** the water bar outlet. Waterbars should be dug as dips, not constructed from fill.

### Recommended spacing for waterbars on firelines.

Fireline slope %	Maximum Distance Apart (feet)
1-5	200
6-20	125
21-40	60
41-60	40
>60	25

Waterbars constructed by hand on hand line should be at least two Pulaski widths (4-6 inches) wide and 6-12 inches high.

Waterbars constructed by heavy equipment on dozer lines should be at least 12 inches wide and 12-18 inches high.

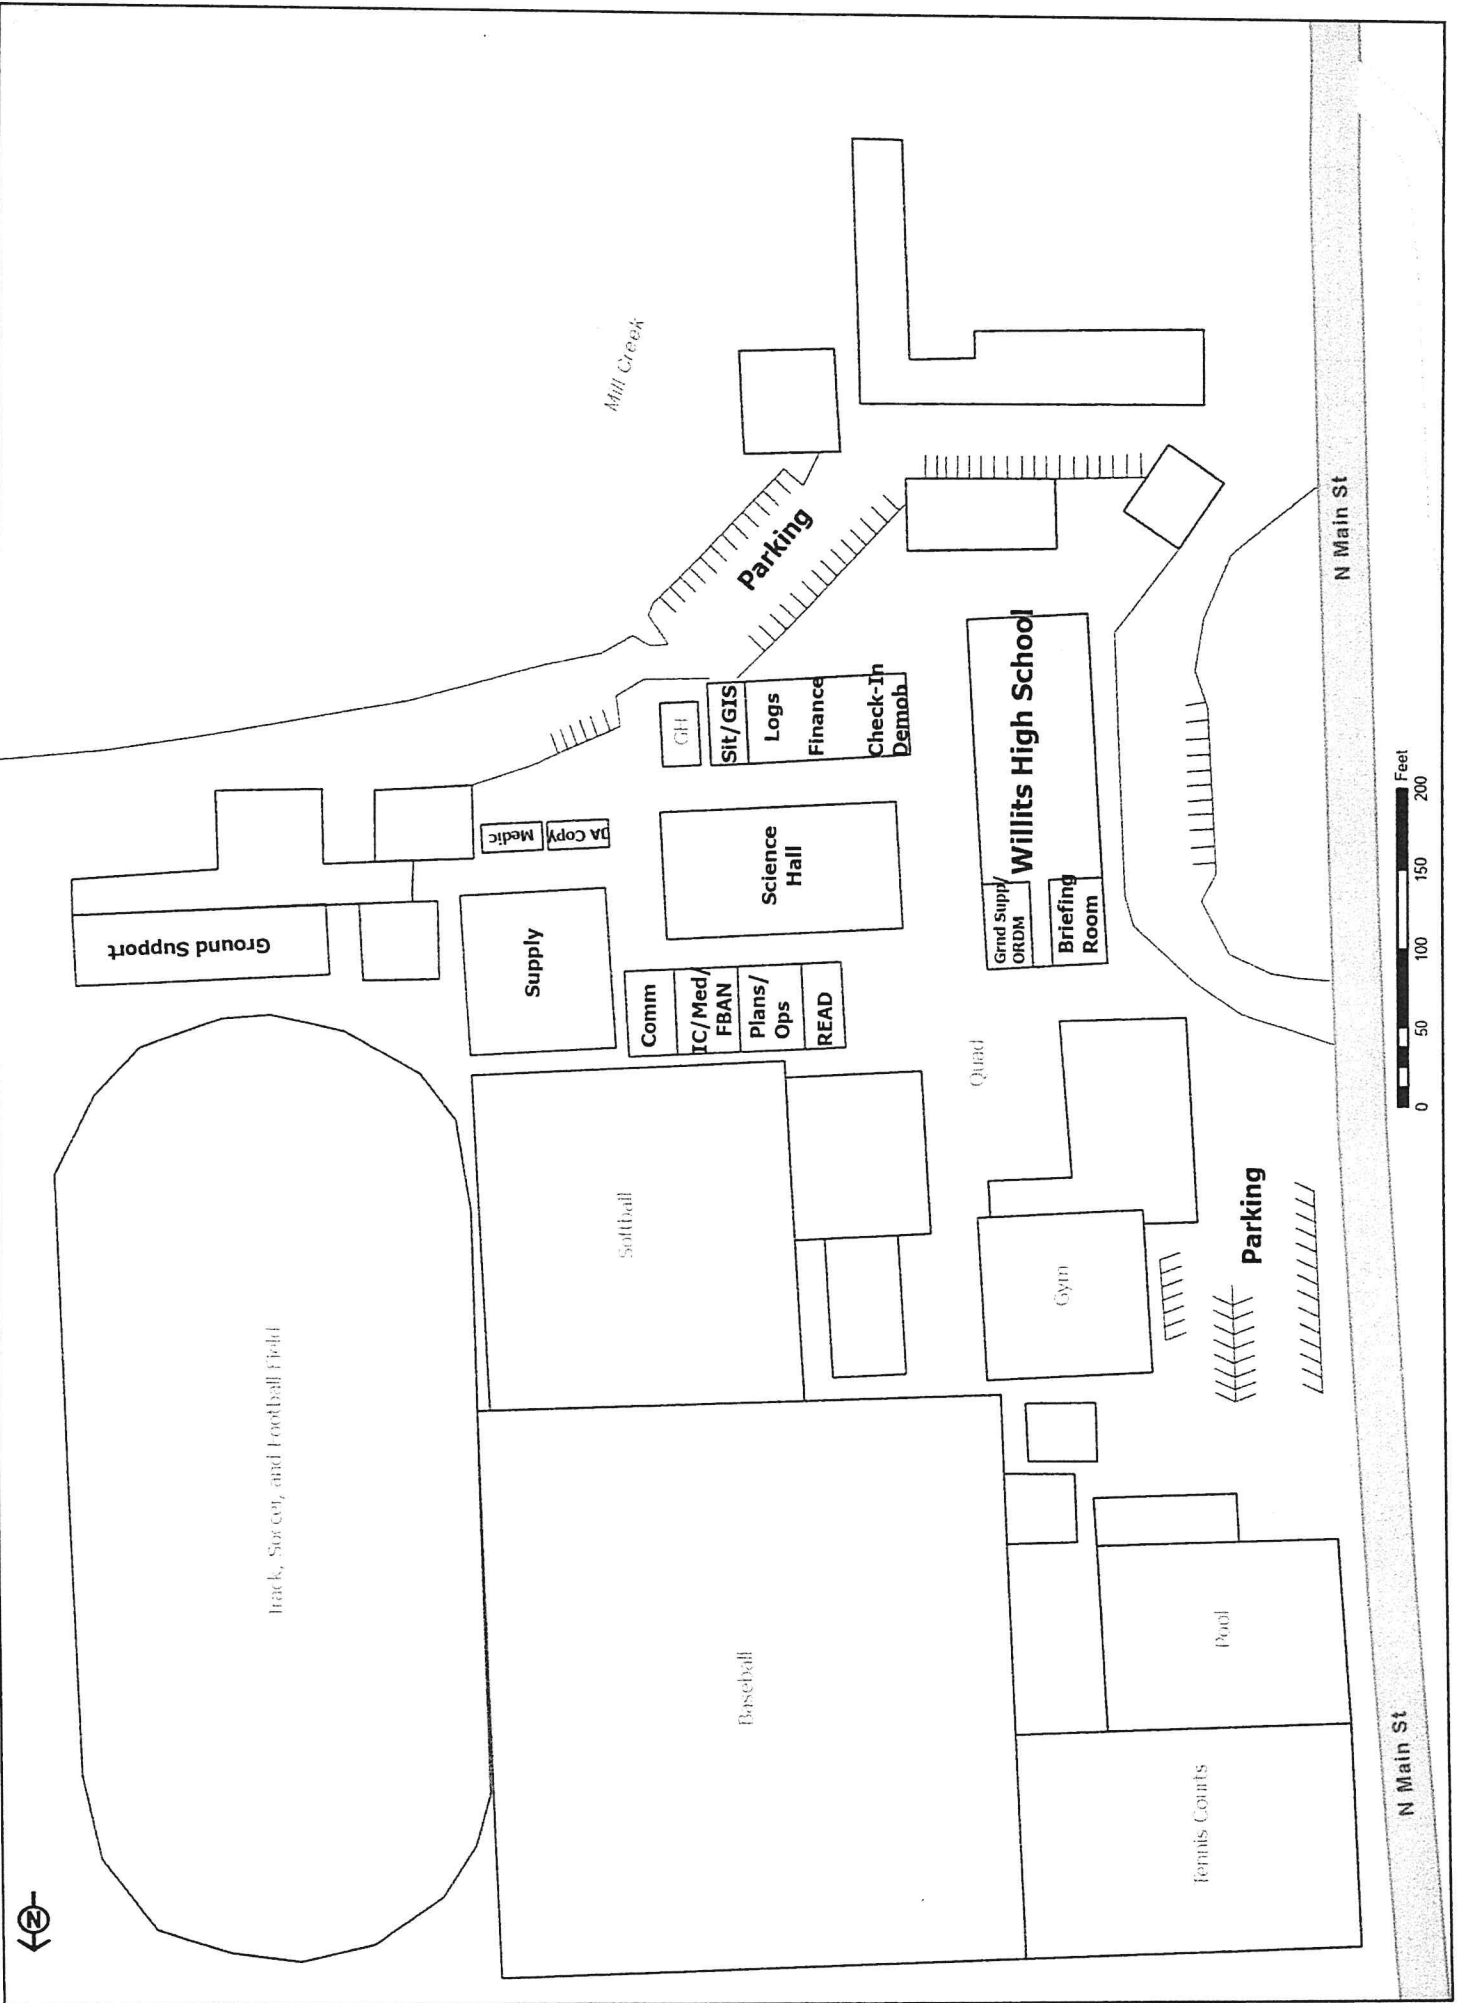

Illustration by  
Kathryn Ronnenberg

### Water bar construction

- a. Space water bars based on gradient, following the chart above.
- b. Build water bars at a 30-45° relative to perpendicular to the fireline.
- c. The outlet of the water bar must be cleared and open to ensure proper drainage and prevent ponding or pooling of water. The outlet must extend beyond the edge of the fireline.
- d. Water bars should be located so they drain onto vegetative cover, slash, rocks, duff, or other less erodible material. Water bars should not drain directly into drainages or unstable areas.
- e. Excavate water bars as dips into firm soil instead of building as dikes from fill material.
- f. Wherever possible, water bars should drain onto the unburned side of the line. On ridges, alternate direction of water bars (herringbone pattern) to prevent concentrating water on one side of the fireline.

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> – 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> – 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care	Name of Care Provider (Ex: EMT Smith)

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extraction*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY:** Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
