Remote Check-In

*** COVID-19 Mitigation Actions and Leader's Intent ***

- ✓ Assigned resources will practice social distancing (to the extent possible) and be in alignment with the "module of one concept." When interacting outside of the "module of one," face-coverings are required; this includes ICP, established businesses, and fireline interactions outside of the "module of one".
- ✓ Frequent handwashing will be encouraged.
- ✓ Once established, please utilize the virtual check-in and demob procedures to reduce potential exposure.
- ✓ All personnel entering the ICP will be temperature screened by Incident MEDICAL staff.
- ✓ All personnel MUST complete the daily COVID-19 screening form (see above QR code).

FOR OFF-SITE AFTER-HOURS EMERGENCIES

Activate the 9-1-1 system, then contact AUGUST COMPLEX-SOUTH ZONE Safety Officer at (208) 515-5820

South Zone**

DATE
PREPARED

10/13/2020

TIME
PREPARED

2000

OPERATIONAL PERIOD (DATE/TIME)

**WEDNESDAY October 14, 2020
Day Operational Period: 0700-1900**

GENERAL CONTROL OBJECTIVES

Leader's Intent

- Effectively implement a value-driven strategy that utilizes a mix of tactics (direct, indirect, and point-protection) when and where the probability of success is high, and the risk is commensurate with the identified values. Success is defined as safely achieving objectives with the least firefighter exposure necessary while enhancing stakeholder support and adhering to the core values of **Duty, Respect and Integrity**.

Values at Risk

- Incident personnel and the public (#1 priority)
- Rural communities of Lake, Glenn, Tehama, Mendocino and Trinity Counties
- Round Valley Tribes' Tribal Lands, and lands administered by the BIA
- Private property, ranches, businesses and associated infrastructure
- Recreation sites, to include campgrounds, picnic areas, cabins, summer camps, etc.
- Energy resources and infrastructure, to include powerlines, oil and gas pipelines, and hydro plants (Gosselin)
- BLM Oil and gas leases
- Communication Sites, to include Pickett Peak, Big Signal Peak, and Pratt Mountain
- Major transportation corridors and Scenic Byways
- Federal, State and private forest resources, to include commercial timberlands, timber sales, old growth or mature timber stands, and MGR (Major Gene Resistance) Sugar Pine stands.
- Archaeological, historical and cultural resources
- Wildlife and fisheries resources and habitat, to include threatened, endangered, proposed, candidate or sensitive (TEPCS) species, such as Northern Spotted Owl, Sage Grouse, Bald Eagle, and Peregrine Falcon; Coho and Chinook Salmon, Steelhead and Pacific Lamprey
- Watersheds, riparian areas or reserves, and municipal water supplies
- Designated Wilderness Areas, to include North Fork, Sanhedrin, Snow Mountain, Yolla Bolly-Middle Eel, Yuki
- Wilderness Study Areas (WSAs), to include Big Butte, Eden Valley, Thatcher Ridge, and Yolla Bolly Contiguous
- Forest Service and BLM range allotments

Incident Objectives

- Ensure all actions reflect a commitment to firefighter, first responder and public safety through the development of tactical operations that are commensurate with values at risk, probability of success and the use of the least number and types of firefighting resources necessary to successfully accomplish the mission.
- Take appropriate actions to limit the size and duration of the incident, and coordinate with public health officials to minimize smoke impacts to local communities.
- Use appropriate strategies and tactics to minimize fire impacts to natural and cultural resources.
- Minimize damage to structures, private property, and infrastructure.
- Coordinate suppression efforts with Cal Fire Team 5; Great Basin Team 2; and Northwest Team 2 under the Coast Range Area Command.
- Effectively manage incident costs through the selection and implementation of strategies and tactics that have a high probability of success in meeting objectives.
- Maintain or enhance relationships with, and provide timely and accurate information to cooperating agencies, stakeholders, property owner, public and media on the fire status and incident activities.

Incident Requirements

- Resources will maintain "module of one" separation. Masks will be required in meetings and briefings, and when interacting in close proximity (less than 6 feet) with individuals outside your "module of one."
- Fight fire with good situational awareness, having established LCES first.
- Engage the host agencies and resource advisors to effectively protect values and minimize impacts.
- Create and maintain a work environment in which people are treated with respect and dignity.
- Adhere to relevant and applicable laws, policies and professional standards for the United States Forest Service, Bureau of Land Management, Bureau of Indian Affairs and California Department of Forestry and Fire Protection.

August Complex South Fire Weather Forecast

FORECAST NO: 6
PREDICTION FOR: Day Shift
DATE: Wednesday October 14th, 2020

NAME OF FIRE: August Complex South Zone
UNIT: Mendocino National Forest
Incident Meteorologist: Lamont Bain (T)
Incident Meteorologist: Todd Carter

FORECAST ISSUED: 1930 October 13th, 2020

Signed: *Anthony Lamont Bain*

...Red Flag Warning in effect Tonight (2300 Hours) - Friday Morning (1100 Hours)...

WEATHER DISCUSSION: After morning fog dissipates, mostly sunny skies with patchy haze and passing high clouds are forecast. Terrain driven winds at lower elevations are expected with northeasterly winds becoming increasingly probable through the late afternoon at all elevations. This will result in humidity values falling into the teens and promote unseasonable warmth. Winds will increase tonight into the pre-dawn hours on Thursday, particularly at the higher ridge tops and along aligned drainages. The stronger winds may not be realized until near or just after sunrise Thursday at lower/sheltered elevations. However, peak gusts may approach 30 mph at the higher elevations early Thursday morning.

TODAY:

WEATHER: Shallow Valley/River Fog---dissipating by 1000 hours. Warm. Patchy haze with passing high clouds.

TEMPERATURES: 3000-4000 FT: 80-86° 4000-5000 FT: 70-76°
HUMIDITY: 3000-4000 FT: 14-24% 4000-5000 FT: 15-25%

20 FT WINDS:

Valleys up to mid-slopes: Calm becoming up-slope/up-valley between 0800-1100 hours. Otherwise, northerly winds of 5 to 9 mph with gusts to near 14 mph.

Upper slopes/ridges: Becoming north and north easterly with speeds of 9 to 13 mph. Gusts up to 15 mph.

STABILITY/INVERSION: Shallow near-surface inversion dissipating by 1000 hours. Inversion at 5,000 feet eroding around 1300 LT.

MIXING HEIGHTS: Around 5,000 feet. **TRANSPORT WINDS:** Becoming northeasterly with speeds near 15 mph.

TONIGHT:

WEATHER: Red Flag Warning in Effect. Windy with patchy smoke/haze. Mostly cloud-free skies.

TEMPERATURES: 3000-4000 FT: 54-60° 4000-5000 FT: 58-64°
HUMIDITY: 3000-4000 FT: 13-23% 4000-5000 FT: 11-21% (single digit RH possible above 5000 feet.)

20 FT WINDS:

Valleys up to mid-slopes: Northerly winds becoming down-valley and down-drainage/northeasterly with speeds of 10 to 15 mph. Gust to near 20 mph. Sheltered and lower elevations will see wind speeds near 12 mph with gusts to 15 mph.

Upper slopes/ridges: North to northeast winds increasing through the nighttime hours with sustained speeds of 20 to 25 mph. Gust to near 30 mph at some of the highest ridge tops (especially those with a north aspect).

Thursday and Friday: Strong northeast to east winds will persist into the day on Thursday, but will subside some in the afternoon at the higher elevations. Wind gusts to near 25 mph are expected at some of the higher ridge tops (especially those with a north aspect). Winds may increase through the day at lower elevations with gusts near 22 mph. Winds will briefly ramp back up on Thursday night into Friday with gusts to near 25 mph at higher elevations. Humidity values will generally fall from the teens on Thursday morning to near single digits by the afternoon. Similar trends can be expected Friday morning with RH values remaining above 10 percent during this time. Winds will also abate Friday.

The Weekend: Winds are expected to abate this weekend with better humidity values than the previous days. Northeast to east-northeast breezes are forecast with unseasonable warmth continuing.

Please send observations to the IMET (T) at
Lamont.Bain@noaa.gov or via phone 580-583-9265.
The QR code contains weather observations
within a 30 mile radius of the fire.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildland Fire
FIRE NAME: August Complex South Zone	OPERATIONAL PERIOD: Day Shift, October 14, 2020
DATE ISSUED: October 13, 2020	TIME ISSUED: 2000
UNIT: Mendocino National Forest	SIGNED: Stewart Turner, FBAN

INPUTS

WEATHER SUMMARY: For Specifics Please see the attached Incident Weather Forecast.

******RED FLAG WARNING in effect Wednesday Night – Friday Moring for humidity and winds******

WEATHER: Shallow valley/river fog dissipating by 1000 hours. Patchy haze with a few passing high clouds.

MAX TEMP: 72 to 86° **MIN RH:** 15-27%

20 FOOT WINDS: North and northeasterly 9-13 mph gusts to 15 mph.

Chance of Wetting Rain: 0%

FUELS: The fire is burning in mixed fuels, i.e. grasses, duff, brush, and conifer at the lower elevations with mixed conifer in the upper elevations.

Ignition Receptiveness: Probability of Ignition 87%.

Dryness: Dead and down fuel moistures : 1 hour – 3%, 10 hour– 6%, 100 hour–10%, and 1000 hour– 9%.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Poor overnight recovery along with the low daytime humidity expect to see an increase in the visible heat sources around the fire. Smoldering will still be the most common fire behavior but open line with heat will creep and move following fuels and slope.

SPECIFIC:

Division O2: Interior smoldering.

Division R2: Interior smoldering will dominate the fire behavior.

Division T2/G: Fire behavior will be limited to smoldering throughout the day.

Division N: Interior Smoldering.

Division Q: Smoldering in the larger fuels.

Division S: Smoldering will continue in the larger fuels and become more visible as the day progresses. Any heat along unburned fine fuels will creep and move upslope. Low to moderate fire behavior can be expected. Evening winds and low humidity will cause an increase in the nighttime movement and glowing on the hill. Watch for alignment of wind, slope and fuels, expect movement in these areas as long as there is an ignition source.

AIR OPERATIONS: Morning smoke/fog may limit air operations.

SAFETY

Take weather observations frequently. Base all actions on current and expected fire behavior. Reexamine your plan and risk analysis as fire behavior increases. Post more lookouts, if more warning time is needed.

CONTROL OPERATIONS:
 Task: Mop up and cold trail fireline.
 Purpose: Contain fire edge.
 End State: No flames or smokes are found that are a threat to escape the fireline.
 Risk Assessment: High: Line construction and Hazard Trees.

- SPECIAL INSTRUCTIONS:**
- Use caution around snags and flag as needed for safety. Use caution when driving on roadways and on the fire line.
 - Backhaul excessive equipment and trash.
 - Resource advisors will be operating in multiple divisions. They will check in & out with DIVS each time they enter and exit that division. Lead READ is Tom DeMeo (503) 267-3943
 - Follow CDC guidance and established local, state and national guidance to ensure a healthy work environment. Adhere to the "module of one" concept to reduce physical exposure and transmission of COVID 19. Resources with symptoms notify COVID coordinator at 530-551-1729.
 - Contact DIVS or BRANCH for initiating resource extension or crew swaps.
 - Resources returning from R&R or swapping crew members MUST CALL CHECK-IN prior to shift.
 - All medical resources MUST check in with Communications once in place on assigned Divisions.
 - Communicate radio dead spots to DIVS.

CONTROL OPERATIONS:

Task:

1. Initiate fire suppression repair.
2. Mop-up and cold trail fireline.

Purpose:

1. Rehab dozer and fireline where identified.
2. Contain fire edge.

End State:

1. Dozer and fireline is repaired per fire suppression repair standards.
2. No flames or smokes are found that are a threat to escape the fireline.

SPECIAL INSTRUCTIONS:

- Heavy equipment lowboys utilize lead vehicle or road guard to assist with oncoming traffic.
- Preference to have one READ with each piece of equipment for heritage site avoidance.

RISK COMMUNICATION

Risk conscious decision quality leads to an effective and efficient organization

INCIDENT: August Complex (South Zone) DATE: October 14th 2020 Operational Period: Day & Night

High Risk Hazards and Mitigations

FIRE WEAKENED TREES - Look Up, Look Down, Look Around. Identify and communicate hazard trees with particular emphasis on oak species. Reference IRPG pg. 72 for wind class and avoid these areas if class 3 or above.
PHYSICAL ASSAULT - Identify yourself with firefighter PPE. Utilize buddy system or work in groups. Avoid suspicious activity. Request Law Enforcement for threats. Do not deviate from planned travel route to and from work site.
ENTRAPMENT - Communicate and identify spot fire locations. Ensure LCES is in place before engagement.

Risk Narrative: THE WEATHER IS CHANGING. Our tactical engagement should always reflect risk management principles. Take no unnecessary risk and Accept risk when benefits outweigh the costs should be at the forefront of decision making. Winds are increasing through the shift and into the coming days. Expect trees within the fire perimeter to fall. Suppression repair should be a low-moderate risk activity. Firefighting is high risk activity and should be based on values at risk. We should always ask the question 'why'. Why helps us to understand the benefits and ultimately weigh the risk. Div. S & Q need to be vigilant in their personal safety to external threats. What is going to go wrong today?

Risk Assessment Tool (Real-Time Risk Management)

1. Do you know the risk associated with your task today?	<input type="checkbox"/> Yes	<input type="checkbox"/> No	
2. Do you understand why you're doing this task and what the end state looks like?	<input type="checkbox"/> Yes	<input type="checkbox"/> No	
3. Determine whether the benefits of meeting your objective exceeds the degree of risk that will entail (<i>Amount of gain in meeting objectives</i>)	<input type="checkbox"/> Low Gain	<input type="checkbox"/> Moderate Gain	<input type="checkbox"/> High Gain
4. Determine the probability of success in completing your assigned mission. (<i>Probability of success in meeting objectives</i>)	<input type="checkbox"/> Low P.O.S.	<input type="checkbox"/> Medium P.O.S.	<input type="checkbox"/> High P.O.S.
5. RISK ELEMENTS - THESE SIX ELEMENTS ARE IDENTIFIED AS CONTRIBUTING TO A LARGE PORTION OF RISK ON PROJECTS/WORK ACTIVITIES. (RATE EACH ELEMENT 1 THROUGH 10)	SCORE	Total risk element scores for GAR risk	
Supervision - Leadership is actively engaged, good communication, organized, qualifications, experience levels, clear chain of command. (<i>1=Very competent; 10=Terrible organization</i>)		Total Score = 6-23 GREEN (Low Risk)	
Planning - Thoroughly planned, risk assessment, resources match the job, timeline appropriate, emergency contingency in place. (<i>1=Organized & well thought out; 10=No planning, ill-prepared</i>)			
Leader's Intent - Clear task, purpose, and end state; adequate briefings; safety first (<i>1=Same page, objectives addressed; 10=Vague, instructions and assignments not understood</i>)		Total Score = 24-44 AMBER (Medium Risk)	
Team Fitness - physical/mental fitness, good morale, mindful, high level of situational awareness, experience, cohesiveness. (<i>1=Strong body & mind; 10=Physically/mentally struggling</i>)			
Environment - Weather & environment conditions, rugged terrain, remoteness, hazards -snags, wildlife, manmade hazards, etc. (<i>1=limited, low risk hazards; 10=numerous, high risk hazards</i>)		Total Score = 45-60 RED (High Risk)	
Duration/Complexity - task duration, repetitive, overextended, air support or logistics dependent (<i>1=Short term project, not many moving parts; 10=Long-term project, many moving parts</i>)			
6. DOES THE GAIN WARRANT THE RISK?	←GAIN VS. RISK→	Discuss results with team members	

Incident Risk Assessment (ICS-215A)

GRAVELLY RESOURCES WILL RESPOND TO ALL NIGHT-TIME MEDICALS AT GRAVELLY SPIKE

COVELLO MEDICAL RESOURCES WILL RESPOND TO ALL NIGHT-TIME MEDICALS FOR SOUTH ZONE RESOURCES AT COVELLO CAMP

ILL PERSON PROTOCOLS FOR FLU - LIKE SYMPTOMS:

- **Fever 100.4°F**
- **Cough**
- **Mild shortness of breath or difficulty breathing**
- **Muscle pain, headache**
- **Sore throat**
- **New loss of taste and/or smell**

Procedure

- ❖ Crew member informs supervisor.
- ❖ Supervisor and patient shall have proper PPE (masks), and initiate self-quarantine procedures (for example remain in the cab of the supervisor vehicle).
- ❖ If, the supervisor triages the emergency as Green/Minor.
 - Contact should be made to the Infectious Control Medical Unit Leader (520) 560-2742.
 - If contact cannot be made with the above resources, then notification can be made to any Medical Unit Leader (Planning/Field MEDL), or any medical resources assigned.
 - The Infectious Control Medical Unit Leader will coordinate with the supervisor on procedures, and permissions to have the supervisor or his designee transport the crew-member to pre-arrange testing site/facility.
- ❖ The supervisor shall keep the remainder of the patient's module isolated from all other personnel, until test results are obtained.
- ❖ In cases of life-threatening presentations, established NWCG medical response protocols (MIR) will be followed.

Prevention and Management of COVID-19 During Wildland Fire Operations

Keep yourself and your peers safe by practicing these measures whenever possible

Practice Social/Physical Distancing

- Do not gather in groups or shake hands.
- Hold necessary meetings outside and maintain a social distance of 6 feet at a minimum.
- Use radios, remote units, and virtual technology for communications as much as possible.
- Establish smaller spike camps to insulate crews/modules from each other and outside personnel and resources (Module as One).
- Keep newly onboarded crewmembers separate for 2 weeks.
- Create separate spaces in offices and housing and stagger work hours.
- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.

Clean and Disinfect

- Clean and disinfect shared areas and high touch surfaces in workplaces, vehicles, and housing at regular intervals.
- Use appropriate PPE and follow product label instructions when cleaning and disinfecting.
- Do not share dishes, drinking glasses, cups, eating utensils, towels, or bedding without appropriately sanitizing them.
- Minimize equipment sharing, disinfect equipment, and wash/sanitize hands before and after use.

Maintain a Healthy Workforce

- Monitor your own health and maintain awareness of symptoms.
- Prioritize rest, proper hydration, and nutrition to reduce cumulative fatigue.
- Practice rigorous sanitation and personal hygiene, including covering coughs and sneezes and washing/sanitizing hands.
- Conduct symptom screening, including temperature checks, at duty stations or on incidents.
- Mitigate smoke exposure whenever possible.
- Assign at-risk individuals to duties that reduce their potential for contracting the illness.

98.6 °F

Prevent the Spread of COVID-19

- Separate sick individuals; provide a separate bedroom, bathroom, and essential supplies.
- Sick individuals must wear a face mask or cloth covering over their nose and mouth and maintain a 6-foot distance.
- Seek immediate medical attention if someone develops emergency warning signs for COVID-19.
- Only discontinue isolation after meeting CDC criteria.

Wear Face Coverings/Masks

- Wear cloth face coverings and practice hand hygiene when riding in vehicles or coming into contact with outside resources, personnel, or the general public.
- Cloth face coverings worn over the mouth and nose should be washed with soap and water after each use. Do not use face coverings that are less than 2 layers thick.
- Do not use face coverings or masks with valves.
- Disposable face and surgical masks worn over the mouth and nose should be discarded after one use.
- A face shield does not take the place of a cloth face covering or mask.
- N95 filtering facepiece respirators are PPE and have a close facial fit and efficient filtration of airborne particles.

Other Resources

- Centers for Disease Control and Prevention: <https://www.cdc.gov/coronavirus/2019-ncov/>.
- National Wildfire Coordinating Group: <https://www.nwccg.gov/committees/emergency-medical-committee/infectious-disease-guidance>.

TENTATIVE RELEASE -AUGUST COMPLEX - SOUTH

NO RESOURCES ARE SCHEDULED FOR RELEASE

DEMOBILIZATION PROCESS

To begin the Demob process:

- Email Finance final SIGNED times to:
2020.augustcomplex.finance.south@firenet.gov
- Return any items checked out from Supply.
- Return any items checked out from Communications.
- Complete any required inspections at Ground Support. Scan QR code at Ground Support.
 - All E-#'s and C-#'s must complete inspection.
 - Any O#'s required by their cooperative agreement must complete inspection.
 - For all other Federal O-#'s, inspection is optional.
- Complete any evaluations & documented training to:
2020.augustcomplex.dmob.south@firenet.gov

After completing the items above, scan the QR code and answer all of the questions. When all the questions are answered and submitted, call the Demob Unit at:

208-713-9179

The Demob Unit Leader will verify that the items above were completed.

The Demob Unit Leader will then contact Finance to finish the process.

- Federal Crews, Federal Engines, and Federal Overhead (except AD's) can close-out over the phone and documents will be emailed.
- For all other resources, the Demob Unit Leader will arrange with Finance to talk with you and finish up your paperwork.

Human Resource Message

Thought for the Day

As people get tired, they become more impatient. Sometimes impatience leads to a bad attitude; which then leads to tempers flaring up just as the fire had been doing.
Don't let a bad attitude get hold of you.

Bad attitudes are like bad viruses:
--They are contagious
--People don't want to be near you

Instead, strive to maintain an
ATTITUDE OF GRATITUDE
And infect others with a positive one!

Yesterday's Riddle – What question can you never honestly answer yes to? Answer: Are you asleep (or dead)?

Today's Riddle -- What ten letter word can you spell using just the top row of a computer keyboard? **Q W E R T Y U I O P**

REMEMBER DO NOT CHEAT AND USE THE INTERNET!!!

Ana G. Parada, HRSP (text me or call me at 505-270-3457)

Pacific Southwest Region
Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. We do great; however, stress is cumulative. And 2020 has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Get Plenty of Rest
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Wendy Flannery, R5 CISM/CAP Coordinator 209-283-4552
Tessa Chicks, R5 Deputy CISM/CAP Coordinator 360-982-8220

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2nd–3rd burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2nd–3rd burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
