There have been a few items come up throughout the incident that Finance would like to provide the documentation of the NWCG Standards for Interagency Incident Business Management (PMS 902) which is always available online for the full version:
<https://www.nwcg.gov/sites/default/files/publications/pms902.pdf>

21 **Meal Periods**

22 Compensable meal periods are the exception, not the rule (5 CFR 551.411 (c) and 29 CFR 785.19 (a)).

23 Time for a meal period is not compensable if the employee is not required to perform substantial duties
24 (86 Forest Practices Board Regulations 1026). When an employee's time and attention is primarily
25 occupied by a private pursuit such as eating a meal, then the employee is completely relieved from duty
26 and is not entitled to compensation under the FLSA (102 Labor Employee Press 39580).

27 Personnel on the fireline may be compensated for their meal period if all of the following conditions are
28 met:

- 29 • The fire is not controlled, and
- 30 • The Operations Section Chief makes a decision that it is critical to the effort of controlling the
31 fire that personnel remain at their post of duty and continue to work as they eat, and
- 32 • The compensable meal break is approved by the supervisor at the next level and it is documented
33 on the CTR, SF-261.

34 In those situations where incident support personnel cannot be relieved from performing work and must
35 remain at a post of duty, a meal period may be recorded as time worked for which compensation shall be
36 allowed and documented on the CTR, SF-261.

37 Compensable meal breaks include time spent eating while traveling in a plane, bus, or other vehicle.

38 For personnel in support positions, and fireline personnel after control of the fire, a meal period of at
39 least 30 minutes must be ordered and taken for each work shift e.g., a minimum 30 minute break for
40 shifts of 8 hours or more.

32 **Incident Operations Driving**

33 These standards address driving by personnel actively engaged in wildland fire or all-hazards response
34 activities, including driving while assigned to a specific incident or during initial attack fire response
35 (includes time required to control the fire and travel to a rest location). In the absence of more
36 restrictive agency policy, these guidelines will be followed during mobilization and demobilization as
37 well. Individual agency driving policies shall be consulted for all other non-incident driving.
38 Agency resources assigned to an incident or engaged in initial attack fire response will adhere to the
39 current agency work/rest policy for determining length of duty-day.

14 **Criteria for Entitlement to Hazardous Pay Differential for Irregular and Intermittent Hazardous**
15 **Duties (5 CFR 550.904)**

16 Full-time, part-time, and intermittent GS employees are eligible for hazard pay differential computed at
17 25 percent of the base rate when performing duties specified below.

18 Any member of the incident fire suppression organization is eligible for hazard pay while carrying out
19 assigned duties, if hazard pay criteria, as described below, are met. Incident supervisors must manage
20 for the appropriate application of the authority.

- 21 • Firefighting – Participating as a member of a firefighting crew in fighting forest and range fires
22 on the fireline before the fire is controlled. This includes single resource personnel assigned to
23 the fireline. Personnel assigned firefighting duties are not entitled to hazard pay after the
24 declaration of an official control time and date.

25 This does not include personnel engaged in logistical support, service, and non-suppression
26 activities, e.g., media tours to the fireline, incident personnel driving to the fire to observe
27 activities, drivers delivering tools or personnel (Appendix B – hazard/environmental pay matrix).

- 28 • Flying – Individuals, except pilots, who are participating in limited control flights.

29 Hazard pay for flying activities is related to the use of the aircraft, not the work of the occupants. If the
30 flight is undertaken under unusual and adverse conditions which threaten or severely limit control of the
31 aircraft, then hazard pay is warranted. Hazard pay is not authorized for situations such as flying
32 passengers from a work center to a location to fix equipment when there are no adverse conditions that
33 threaten or severely limit the aircraft.

- 34 • Groundwork Beneath Hovering Helicopter – Participating in ground operations to attach an
35 external load to a helicopter hovering just overhead.

PERSONNEL

CHAPTER 10

- 1 • Work in rough and remote terrain – Working on cliffs, narrow ledges, or near vertical
2 mountainous slopes where a loss of footing would result in serious injury or death, or when
3 working in areas where there is danger of rock falls or avalanches.

4 Burned Area Emergency Response (assessment or implementation) does not meet the definition of
5 firefighting for hazard pay eligibility; however, hazard pay criteria listed above may apply.

6 Prescribed fire does not meet fireline hazard definition for hazard pay; however, hazard pay criteria
7 listed above may apply.

Human Resource Message

Team Work and Stress

When something is not going right, look for what is wrong not who is wrong to resolve conflicts.

Fire personnel frequently experience stressful situations, following are some simple ideas to help break that stress cycle:

- ❖ Take frequent breaks throughout the day
- ❖ Stretch
- ❖ Take a walk
- ❖ Try deep breathing
- ❖ Eat three nutritional meals a day
- ❖ Eat healthy snacks
- ❖ Sleep, try for at least 7 hours

Incident Human Resource Specialist

Appendix A: Effective Waterbars

When locating and building water bars, place them the right **distance** apart, at a **diagonal** to the fireline, so that they **divert**, then **discharge**, then **dissipate** the energy of the flowing water. Be sure to make them deep enough so they'll be durable, and that soil does not **block** the water bar outlet. Waterbars should be dug as dips, not constructed from fill.

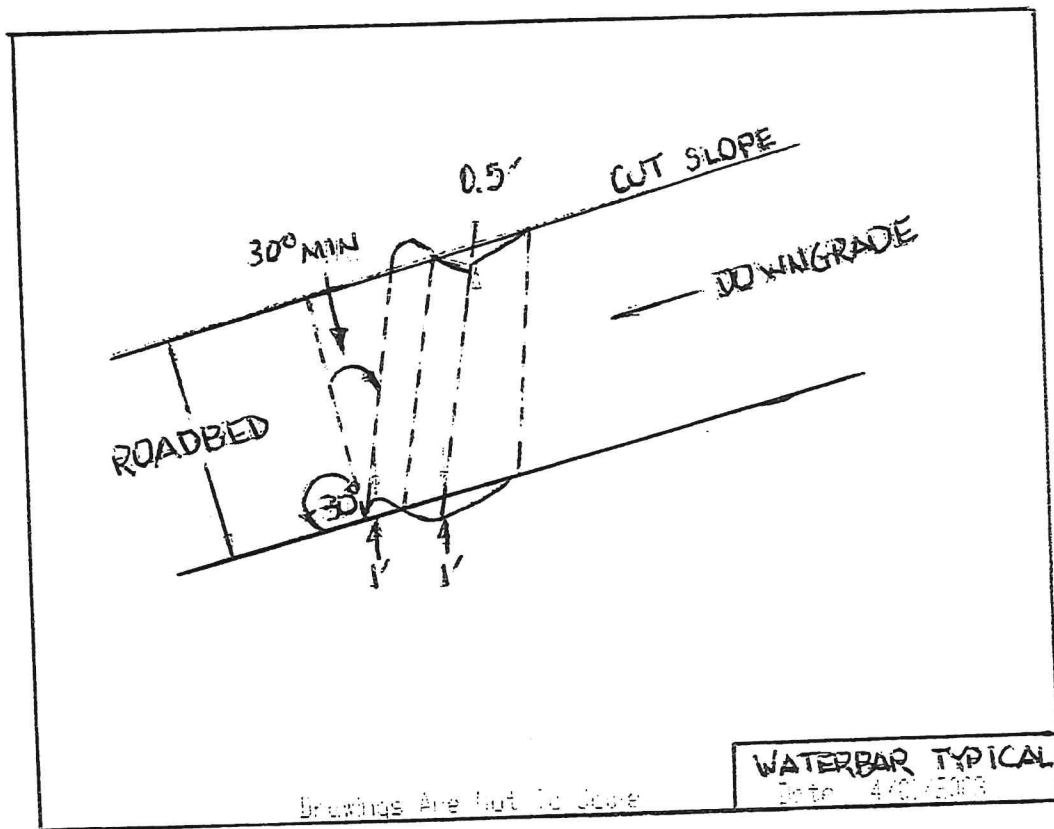

Recommended spacing for waterbars on firelines.

Fireline slope %	Maximum Distance Apart (feet)
1-5	200
6-20	125
21-40	60
41-60	40
>60	25

Waterbars constructed by hand on hand line should be at least two Pulaski widths (4-6 inches) wide and 6-12 inches high.

Waterbars constructed by heavy equipment on dozer lines should be at least 12 inches wide and 12-18 inches high.

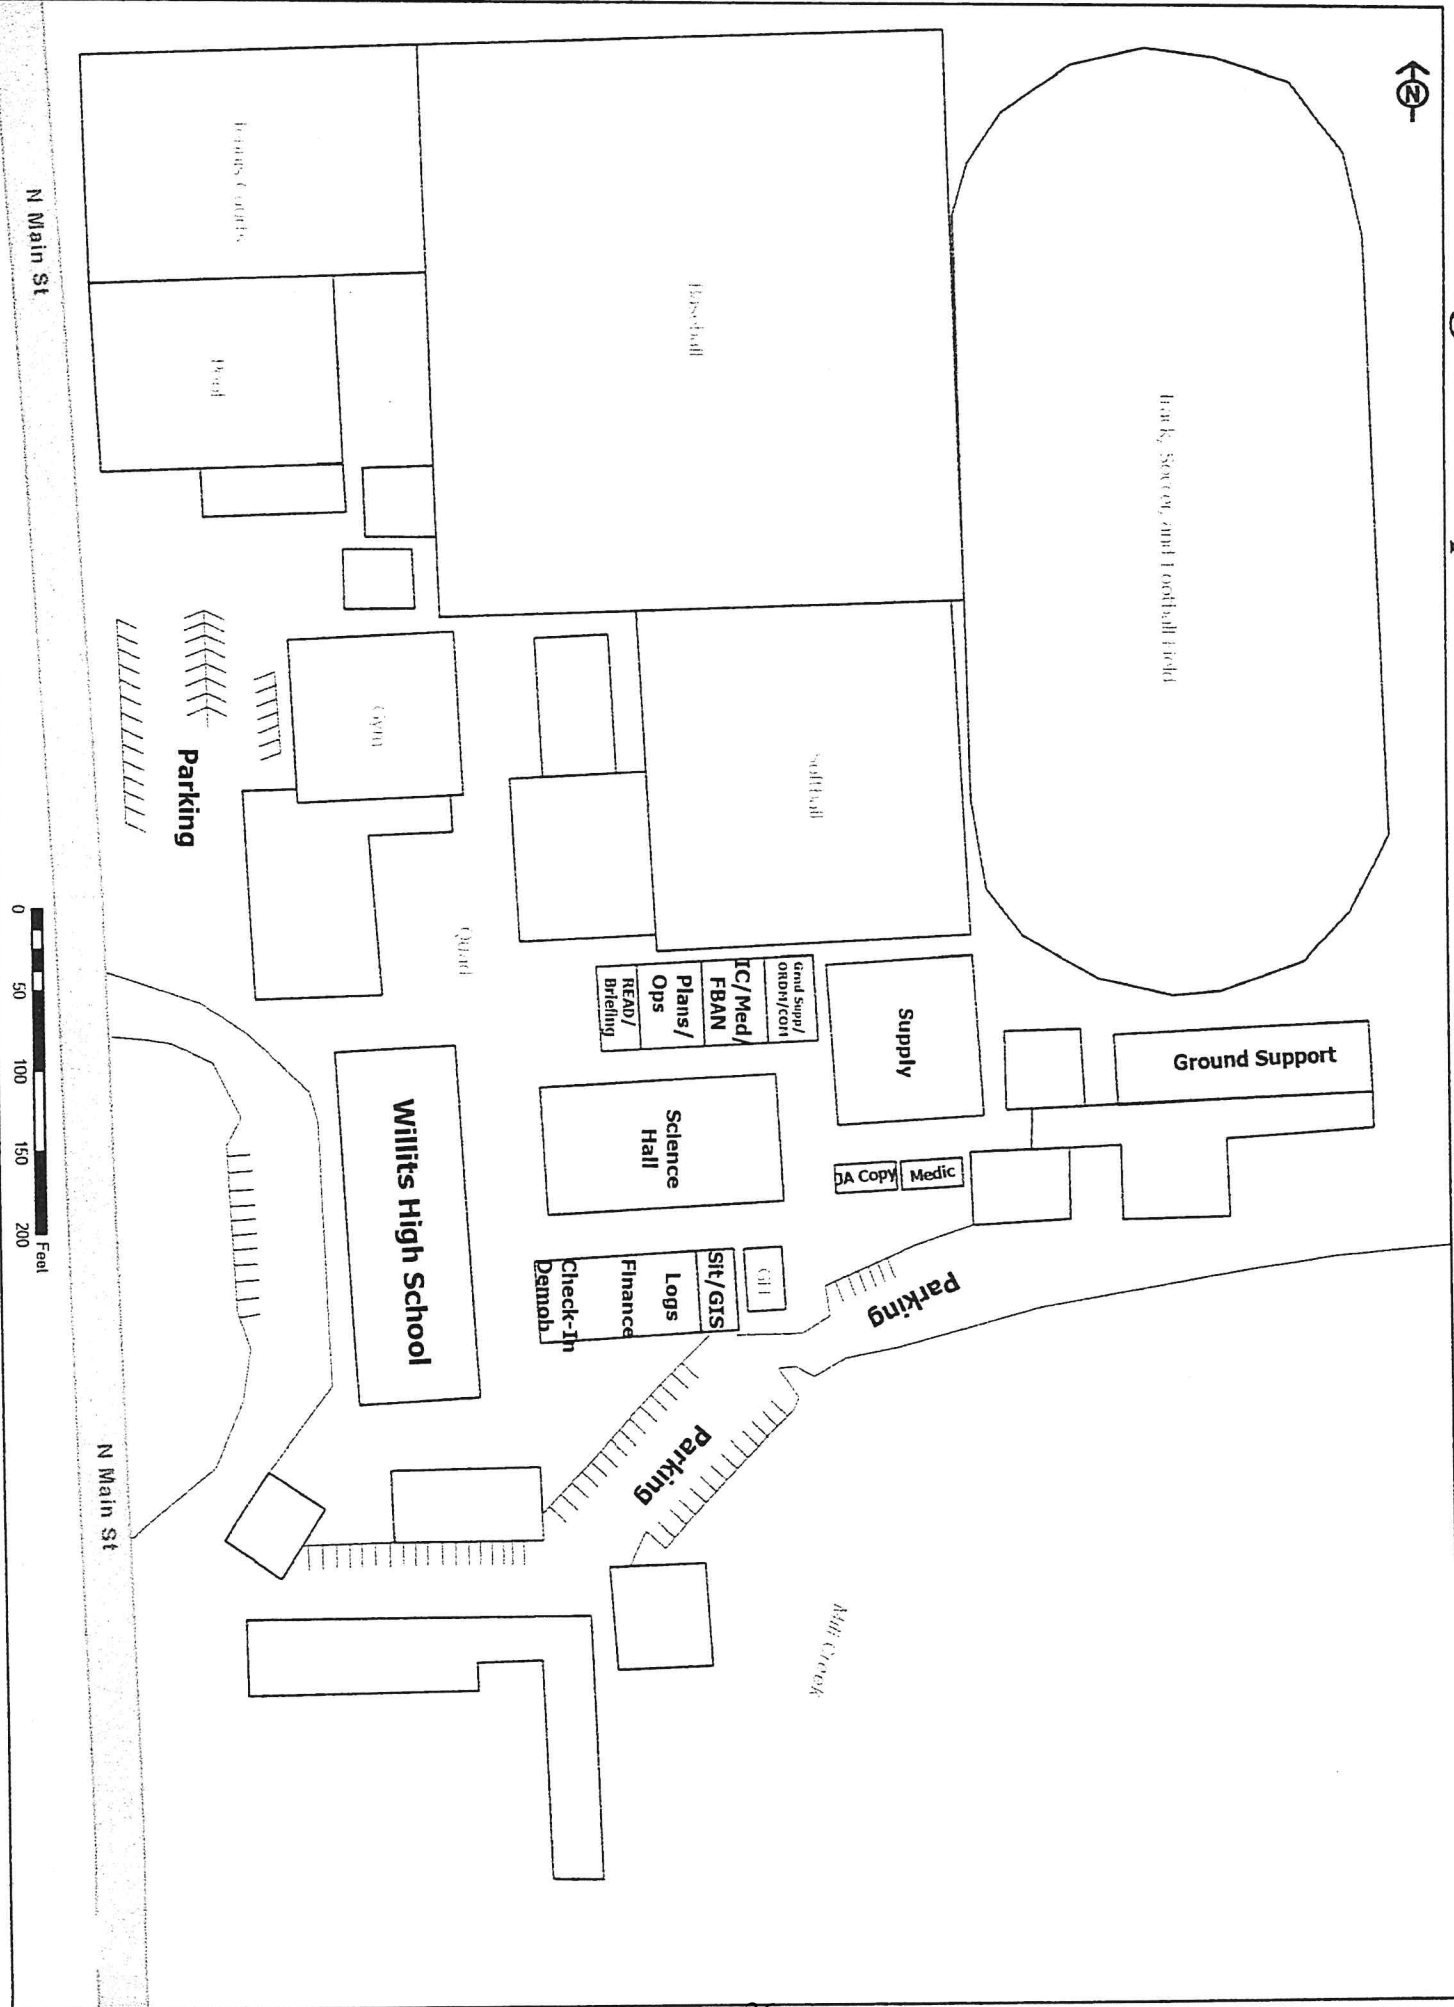

Water bar construction

- a. Space water bars based on gradient, following the chart above.
- b. Build water bars at a 30-45° relative to perpendicular to the fireline.
- c. The outlet of the water bar must be cleared and open to ensure proper drainage and prevent ponding or pooling of water. The outlet must extend beyond the edge of the fireline.
- d. Water bars should be located so they drain onto vegetative cover, slash, rocks, duff, or other less erodible material. Water bars should not drain directly into drainages or unstable areas.
- e. Excavate water bars as dips into firm soil instead of building as dikes from fill material.
- f. Wherever possible, water bars should drain onto the unburned side of the line. On ridges, alternate direction of water bars (herringbone pattern) to prevent concentrating water on one side of the fireline.
