INCIDENT OBJECTIVES (ICS 202)

| | | | |
|---|-------------------------------|----------------------|--------------------|
| 1. Incident Name: NORTH COMPLEX | 2. Operational Period: | Date From: 8/23/2020 | Date To: 8/24/2020 |
| | | Time From: 0700 | Time To: 0700 |

3. Objective(s):

Leaders Intent: Suppress the North Complex fires using a full range of management tactics & strategies that minimize exposure to firefighters, communities, and reduce the susceptibility to COVID19.

Management Objectives:

- Ensure safety of emergency responders & public utilizing strategies & risk management processes.
- Protect natural and cultural resources, commercial timber, and critical infrastructure while utilizing resource and agency advisors.
- Foster and maintain good relationships with local cooperators, stakeholders, and public while providing coordinated, accurate and timely information.
- Effectively manage cost by implementing strategies and tactics that have a high probability of success.

Control Objectives:

- Suppress all new fires in the complex on the Mt. Hough RD
- Keep all fires within existing perimeters

Sheep Fire - keep the fire:

- West of Richmond & Wingfield Rd
- North of Fruit Growers Blvd
- East of Road 29N03 and 28N08
- South of Hwy 36

Claremont Fire - keep the fire:

- South and West of Hwy 70
- East of Road 24N21
- North of Cleghorn Bar Road and Trail

Bear Fire - keep the fire:

- West of the 8M07 trail
- North of Middle Fork Feather River
- East of Road 23N60 and Hartman Bar Trail
- South of Roads 24N28, 23N14, and 23N16

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice physical distancing and wear a face covering.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

(240) 778-5297 / Brett.Lutz@noaa.gov

***** Red Flag Warning for Gusty Outflow Winds & Dry Lightning 1400 PDT Sunday - Tuesday Morning*****

WEATHER DISCUSSION: RH recoveries this morning were lesser than they were 24 hours ago. This lesser RH recovery coupled with SW winds kicking in earlier in the day today is likely to make for a longer burn period over most of the area. Valley smoke is likely to begin to mix out earlier due to the increasing wind. Increasing clouds and marginal instability is likely to lead to gusty afternoon winds and isolated thunderstorms along or near the Sierra Crest Sunday afternoon to evening could result in gusty and erratic outflow winds. The greatest threat of thunderstorms and outflow is Sunday night through Monday morning with a lesser threat Monday into early Tuesday.

Today (0700-1900):

Weather: Smoke, dense at times in the valley in the morning, thinning between 1100 and 1400L.
Partly to Mostly Cloudy with a slight chance of thunderstorms with gusty outflow winds after 1400L.

High Temperatures: 70-80° Upper Slopes & Ridges, 80-90° Low-Mid Slopes & Valleys. *(Trend: Little Change)*
Afternoon Humidity: 13-20%. *(Trend: Little Change)*

20 Foot Winds: *GUSTY AND ERRATIC WINDS EXPECTED IN/NEAR THUNDERSTORMS*

Lower/Mid Slopes: Light & variable in the morning, then SW 5-10 mph w/gusts 10-20 mph after noon.

Upper Slopes & Ridges: SW 10-20 mph with gusts 20-25 mph in the afternoon.

(Wind Trend: More definitively SW, increasing earlier, and up about 5 mph)

LAL: 1, then 2 after 1400L.

Chc of Wetting Rain (> or = to 0.10"): <5%

Stability: Inversion at 6500ft MSL lifting 1100-1400L.

Afternoon Mixing Height: 16,000 feet MSL.

Tonight (1900-0700):

Weather: Mostly Cloudy and smoky with a chance of showers and thunderstorms. Gusty outflow winds likely.

Temperatures: Lows 60-70°.

Overnight Humidity: Valleys: 30-40%; Ridges: 35-50%.

20 Foot Winds:

Lower Slopes: Downslope and down valley 0-5 mph.

Upper Slopes: South 5-15 mph with gusts 15-30 mph possible, especially in and near thunderstorms.

LAL: 2

Chc of Wetting Rain (> OR = to 0.10"): 20%

Inversion: Moderate to strong thermal belt near 7,000ft with smoke becoming trapped below it.

Monday-Thursday:

Remaining hot, dry, and breezy. A slight chance of dry thunderstorms Monday morning through Tuesday morning. Little to no rainfall is expected. Gusty outflow winds will remain a concern. Temperatures similar to today for Monday, cooling by 5 degrees for Tuesday and Wednesday, then heating back up Thursday. Gusty S to SW winds each afternoon and evening.

Observations from Friday:

Feather River College (3425ft) near ICP- Temps: 45F/91F, RH: 89%, 18%. Max wind: W 5 mph.

Buck Lake Road West (3793ft) NE of Bear Fire- Temps: 44F/88F, RH: 92%, 15%, Max wind: W 14 mph.

Pierce (5811ft) SW of Sheep Fire- Temps: 56F/82F, RH: 48%, 12%, Max wind: WSW 23 mph.

**...Red Flag Warning for Dry Thunderstorms & Gusty Outflow Winds
from 2 PM PDT Sunday through Tuesday Morning...**

The IMET on the North Complex has issued a Red Flag Warning for dry thunderstorms and gusty outflow winds, which is in effect from 2 PM Sunday to 11 AM PDT Tuesday. This Red Flag Warning upgrades the Fire Weather Watch.

- * **Affected Area...**The North Complex fires, which are in Fire Weather Zones 268 and 271.
- * **Thunderstorms...**The main period of concern for thunderstorm potential is Sunday evening through Monday morning with faster moving storms producing lightning and limited rainfall. However, pyrocumulus forming off of the smoke plumes Sunday afternoon and evening have a possibility of turning into thunderstorms if enough heat and instability is generated. Additionally, thunderstorms along or near the Sierra Crest could result in gusty outflow winds Sunday afternoon and evening.
- * **Impacts...**Lightning is likely to result in new fire starts and may combine with strong outflow winds to cause a fire to rapidly grow in size and intensity before first responders can contain them. Gusty outflow winds could also result in erratic wind directions and blow over snags or weakened trees.
- * **Additional Information...**Storms are likely to be dry and fast moving, likely allowing for lightning strikes outside of the main thunderstorm core. With resources already stretched thin, any new fire starts are likely to be an issue.
- * **Outflow Winds...**Erratic wind gusts of 30 to 50 mph are possible.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

Be prepared to take shelter in vehicles away from weakened trees and snags if outflow winds arrive or if lightning and thunder approach, especially if it is getting louder and more frequent. Weather updates will be issued through Communications when necessary.

FIRE BEHAVIOR FORECAST

| | |
|--------------------------|-----------------------------------|
| FORECAST NUMBER: 04 | TYPE OF FIRE: Wildland Fire |
| FIRE NAME: North Complex | OPERATIONAL PERIOD: 8/23/20 Day |

INPUTS

WEATHER SUMMARY: * RED FLAG WARNING – Thunderstorms & Strong Outflow Winds (Sun-Tues) *****

Temps: Highs 70-80

RH: min. 13-20%

Winds: calm in the morning with light and variable, transitioning in the afternoon to southwest 5-10 mph, with gusts 20 mph.

Ridges SW 10-20 mph, Gusts 20-25 mph. *** Gusty and erratic winds expected in/near thunderstorms ***

ERC 77 (no change, at 90th percentile) BI 58 (▼ down -2, near 90th percentile) Northern Sierras PSA NC07

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Last night of low relative humidity (Rh), with little recovery, expect all the fires in the complex will have more activity in the morning. Be on the lookout for areas near control or fire lines which may become active. Today's, Red Flag Warning for thunderstorms (T-storms) and outflow winds may bring new life into these areas. Downburst/outflow winds can significantly increase fire activity and/or change direction of primary fire spread and spotting.

Fire weather effect on fire behavior will be similar with two exceptions, very low-to low Rh recovery overnight and afternoon T-storm development. Watch for changes in fire activity related to diurnal wind changes. This typically reverses prior to sunset, but also expect delay in decreased fire activity response. Minimal nighttime Rh recoveries expected. Afternoon winds heavily influence and may override typical upslope primary fire growth and spread direction.

100 HR Fuel Moisture: 6.8% (▼ down -0.5, near 90th percentile)

1000 HR Fuel Moisture: 7.7% (no change, 90th percentile)

SPECIFIC:

Branch I: Sheep fire – North-half of fire has been active the last few days pushing towards Susanville from the timber into the grass-sage flats in the foothills. Control efforts where the vegetation changes (timber to grass-scrub) has improved fire suppression efforts. Areas to the east on the northside of Diamond Peak area continue to spot with low rates of spread in the morning to moderate in the afternoon. When the fire aligns with the topography fuels and wind may significantly increase spotting and spread rates at head of fire, then projected surface spread rates below. Fire spread in the south-half of the fire will continue to back and flank. Primary activity will be from flanking and backing fire with greater spread where winds align cross-slope to areas with unburned fuels.

Fire spread in the morning will be primarily creeping or low rates of spread. This will transition to active as winds they increase in the afternoon. All fuels are available for active fire behavior, with potential for rapid rates of spread from effect of strong winds.

Area where the fire is burning north of Gold Run is lighter fuels in an area where rapid rates of spread has occurred in past fire history.

Rate of Spread (ROS): max rates in areas in alignment expect ROS 20-90 ch/hr, where alignment is low to moderate expect ROS 1-10 ch/hr.

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where alignment is low to moderate expect FL <1-5 ft. Spotting can significantly increase fire growth.

Branch II: Claremont Fire – Area where the fire has reached near La Porte road will continue to challenge resources from active fire behavior and spotting in the afternoon. Watch out for T-storm or pyrocumulus development in area with potential to have strong outflow winds that will increase fire activity and push fire outside of existing containment lines. The 2017 Minerva fire that is on the north-side of Claremont Peak continues to provide area with reduced fire spread due to reduction in fuels and continuity from recent fire.

Rate of Spread (ROS): max rates in areas in alignment expect ROS 10-90 ch/hr, where alignment is low to moderate expect ROS 1-8 ch/hr.

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where alignment is low to moderate expect FL <1-5 ft.

Branch II: Bear Fire – The fire moved actively updrainage in the Bear Creek drainage spotting across the creek yesterday morning and made a run to top of slope on the northside Bear Creek. Location of fire on Bear Creek near the Middle Fork of the Feather river, continues to pose a significant fire spread risk with afternoon strong up canyons winds in the Feather River. Critically low fuel moistures, 90th percentile ERCs, and strong winds could potentially drive fire spread up canyon towards the Claremont. Watch out for roll-out with material igniting fuel below with uphill runs in drainage, and in afternoon. Fire activity increases with spotting to north on to the plateau, pushing to the north faster than surface fire spread rate.

Rate of Spread (ROS): max rates in areas in alignment expect ROS 10-90 ch/hr, where alignment is low to moderate expect ROS 1-8 ch/hr.

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where alignment is low to moderate expect FL <1-5 ft.

AIR OPERATIONS:

Thunderstorm activity can impede air operations where T-storm development is active.

SAFETY

Short intense fire runs are possible. Make sure you know where your safety zone is at and the time it takes to get there.

North Complex Safety Message

Chainsaw Safety: Complete a personal Risk Assessment to determine if you are comfortable completing the task at hand. Stay within your Quals. Go over your Med Plan 206 before you begin with including extraction. Prevent Fuel Geysering by slowly releasing cap more than 20 feet away from burning fuels.

Heavy Equipment use: Reinforce Strong situational awareness for use of Dozer`s and Heavy Equipment on the Claremont and Sheep Fires. Insure a good briefing from the IRPG Page 86. Post lookouts and always maintain communications with Operators. Check Comms before beginning tasks.

Driving: Lights on, slow down, Traffic control, warning signs, close road as needed. Coordinate with Law Enforcement, Control travel speeds and routes, Close road to public as needed for firefighter safety

Risk- VS- Gain

- Take extra time to assure that everyone has the same understanding of leader's intent and work instructions.
- Closely review the Weather and Fire Behavior Forecast.
- Risk -vs- Gain, is the assignment safe and worth the exposure

INCIDENT SAFETY ANALYSIS 215a

North Complex CA-PNF-001308 - Sunday, August 23, 2020

| 8. Location | 9. Hazard | 6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc) |
|-------------|--------------------------------|--|
| All | Extreme Fire Behavior | <ul style="list-style-type: none"> ~ Share weather observations with all personnel assigned to division. ~ Establish "Trigger Points" to withdraw. ~ Use "Risk Management" process prior to engaging in suppression actions IRPG Pg 1. ~ Refer to "Common Denominators of Fire Behavior Tragedy Fires" IRPG Pg 5. ~ Refer to "Alignments & Patterns for Dangerous Fire Behavior" IRPG Pg 73 |
| All | Injury & Medical Emergency | <ul style="list-style-type: none"> ~ Assist injured employee appropriate medical care. ~ Use EMT's on Division for initial care. ~ Follow "Emergency Medical Care" IRPG Pgs 105-118 ~ Follow procedures in Medical Plan, ICS 206 ~ Refer to "Planning for Medical Emergencies" IRPG Pg 2 |
| All | Fireline Hazards | <ul style="list-style-type: none"> ~ Refer to "Fireline Location" considerations, IRPG Pg 84 ~ Do not work directly above or below personnel during firing and mop-up operations. ~ Watch for falling and rolling debris on steep slopes. ~ Alert crew personnel of rolling debris by yelling to affected individuals. ~ Position debris that could roll vertically on slope. ~ Avoid stepping over debris that could roll by walking around object. ~ Avoid radiant heat by wearing appropriate PPE correctly. ~ Use correct tool for task assigned. ~ Flag and isolate all HAZMAT and alert all personnel working in Division. ~ Follow WUI recommendations, IRPG Pg 12. |
| Br II | Heavy Equipment Operations | <ul style="list-style-type: none"> ~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment. |
| Br II | Steep Terrain & Rolling Debris | <ul style="list-style-type: none"> ~ Maintain 8'-10' spacing when working & walking. ~ Don't work above any personnel. ~ Be on the lookout for rolling rocks, debris, or burning material. ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts IRPG Pg 7 |
| All | Air Operations | <ul style="list-style-type: none"> ~ Ensure positive communication with all air resources. ~ Don't plan on air resources for medical transport or resupply. ~ Follow "Aviation Watch-Out Situations" IRPG. ~ Refer to "Directing Bucket or Retardant Drops" IRPG Pg. ~ Refer to "Aerial Retardant Safety" IRPG Pg. ~ Refer to "Aircraft Mishap Response Procedure" IRPG Pg. |
| All | Bees, Ticks, Mosquitoes | <ul style="list-style-type: none"> ~ Canvas crew members for those with known allergic reactions to stings. ~ Ensure crew members have medication pens if needed. ~ Perform daily self inspection. ~ Use repellent as necessary. ~ Advanced Life Support, multi-dose epi and airway protection. ~ Keep affected area clean and bandaged. ~ Be extra careful when eating and/or drinking to avoid stings to mouth and throat. |
| All | Communications | <ul style="list-style-type: none"> ~ Maintain communication with aviation resources, and suppression organization. ~ Ensure all know frequency and protocol for contacting resources. ~ Utilize the ICS 205. ~ Utilize human repeaters when working in dead spots. |

INCIDENT SAFETY ANALYSIS 215a

| | | |
|------------------|---|--|
| All | Driving & Traffic | <ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters & Honk horn to alert personnel when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs. ~ Refer to "Smoke and Transportation Safety" IRPG Pg 31 ~ Refer to "Roadside Response Safety" IRPG Pg 26 |
| All | Heat Related Illness (HRI)& Dehydration | <ul style="list-style-type: none"> ~ Refer to Heat Related Illness information, IRPG Pg 109 ~ Drink Fluids throughout operational period (6-8 qts/shift). ~ Maintain water/electrolyte ratio of 3 to 1. ~ Carry extra water on line and cache water at drop points. ~ Take Frequent breaks, minimum of 10 minutes every hour. ~ Allow out of area resources time to acclimatize before expecting peak performance. ~ Recognize symptoms of HEAT RELATED ILLNESS which include. <ul style="list-style-type: none"> o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating |
| Sheep & Clariage | Structure Protection & HAZMAT | <ul style="list-style-type: none"> ~ Review "Wildland Urban Interface Firefighting" considerations, IRPG Pg 12-16 ~ Use "Structure Assessment" checklist, IRPG Pg 13 ~ Refer to "Structure Hazard Marking System" IRPG Pg 41 ~ Follow "HAZMAT Incident Operations" IRPG Pg 36 |
| All | Unidentified Hazardous Waste and Unexploded Ordinance | <ul style="list-style-type: none"> ~ Avoid identified Hazmat and UXO areas ~ Use "Unexploded Ordinance Safety" guidelines IRPG Pg 27 ~ Deny entry to others. Do not transmit on radio if in proximity ~ Map location of all UXO and Hazmat. |
| All | Fatigue & Over Exertion | <ul style="list-style-type: none"> ~ Drink 1 quart of water each hour during and after work. ~ Rotate crews out of smoky areas. ~ Set a reasonable work pace and allow adequate rest breaks while on the project. ~ Stagger work crews start time to limit fatigue. ~ Use buddy system to monitor personnel of heat related and fatigue issues. ~ Follow work / rest guidelines. |
| Claremont | Night Operations | <ul style="list-style-type: none"> ~ Maintain high visibility in work area ~ Use work lights ~ Ensure personnel have a personal light (headlamp). ~ Watch for signs of fatigue. ~ Take breaks away from areas of known hazard. ~ Contact DIVS / Plumas Dispatch / 911 for IWI |
| All | Covid-19 | <ul style="list-style-type: none"> -Follow agency CDC, agency BMP and IMT guidelines on daily checks. - IMT consult with local health officials and Forest Covid contact. - Always maintain social distance, best hygiene practices and wear mask when near others. - Seek medical attention immediately if symptoms are experienced. - Document daily on 214 those that come in close contact or work closely with on assignment. |
| Greenville | Spike Camp | <ul style="list-style-type: none"> ~ Keep a clean camp. ~ Ensure communications are in place. ~ Review and observe "Line Spike" considerations, IRPG Pg. 95 |

| <p>7. CONTINGENCY: <u>Considerations:</u> If primary options fall, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>8. ADDITIONAL INFORMATION: Updates/Changes, et c.</p> <p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Region 5: Employee Self-Assessment Questions
June 11, 2020

Have all employees apply this self-assessment prior to entering any work location every day. This self-assessment includes four questions:

1. In the last 14 days have you had a fever, shortness of breath, body-aches or coughing (not attributable to something else, e.g. allergies) or been diagnosed with COVID-19 (presumptive or positive test)?
 - If so, do not return to work until cleared by a medical professional or you meet CDC guidance on "Discontinuation of Isolation."
2. In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms (fever, shortness of breath, body-aches or coughing (not attributable to allergies)).
 - If so, you cannot report to the workplace until cleared by a medical provider or until 14 days after the last date of exposure. If you develop symptoms, see #1.
3. In the last 14 days have you assisted in the care of an individual (outside your household) who is not well?
 - If so and you were wearing proper PPE (including a N95 mask), work with your supervisor to determine whether you should report to the workplace.
 - If so and you were not wearing proper PPE, you cannot report to the workplace until cleared by a medical provider or until 14 days after date of exposure. If you develop symptoms, see #1.
4. In the last 14 days have you traveled outside your local area?
 - If so, you should notify your supervisor and monitor yourself for symptoms for 14 days. If mitigations were not possible during travel, work with your supervisory chain to determine if self-quarantine is needed. If you develop symptoms, see #1.

Human Resource Message

North Complex Incident

Greetings, my name is Ryan and I am the Human Resource Specialist (HRSP) assigned to the incident. As the HRSP, I am available to *all* incident personnel to provide assistance with a wide range of issues that may be impacting the work environment, such as conflict resolution and addressing any allegations of misconduct.

As a reminder, whether you are a federal, state, county or local government employee, contractor or AD, while assigned to the incident, we all must adhere to federal rules and laws regarding appropriate behavior. We have zero tolerance on this incident for illegal drugs (including marijuana), alcohol, and sexual harassment. Just don't do it.

Remember: Kilo, India, Sierra, Foxtrot, Whiskey...*Keep it safe for work!*

If I can be of any assistance to you, please text or call the below number. If you are located at the Plumas County Fairgrounds, you can find me in the building behind the food area.

Hours are 0530 to 2200
Ryan Voelkl- (HRSP) – (530) 457-7276
