North Complex Weather Forecast

FORECAST NO: 6 UNIT: CA-PNF

SHIFT DATE: Thursday, Aug 27, 2020 PREDICTION FOR: 0700 - 1900 FORECAST ISSUED: 1930 hrs. 8/26/20

Incident Meteorologist: Brett Lutz SIGNED:

You can call, text, or e-mail obs to: (240) 778-5297 / Brett.Lutz@noaa.gov

...Becoming Hotter and Drier Today Into This Weekend...

WEATHER DISCUSSION: Relative humidities this afternoon into this evening will fall 10-15% over what was observed yesterday afternoon and temperatures will be a few degrees warmer this afternoon. Winds will be primarily terrain driven through the day, but are likely to become westerly in the afternoon and then west-northwest in the evening above the drainages. Smoke in the morning is likely to be pushed to the northwest some before moving north and east in the afternoon, and then southeast in the evening. There is a chance of slow moving showers and thunderstorms Friday afternoon and evening. Diurnal ranges will then increase as the air mass dries out further.

Today (0700-1900):

Weather: Smoky, dense at times in the valleys, thinning, especially south of fires & at elevation from 1200-1600L. Otherwise, Mostly Sunny.

High Temperatures: 73-80° Upper Slopes & Ridges, 81-91° Low-Mid Slopes & Valleys. (Trend: Up 3°)

Afternoon Humidity: 15-25%. (Trend: Down 10-15%)

20 Foot Winds:

Valleys/Lower Slopes: Downslope & down drainage 5 mph in the morning, then becoming upslope and up valley

5-10 mph in the afternoon.

Upper Slopes & Ridges: SE 5 mph early, becoming West 5-10 mph with gusts 15 mph in the afternoon.

(Wind Trend: Speeds same to 5 mph less and direction W instead of SW in the afternoon upper slopes & ridges)

Transport Wind: SE 5 mph becoming SW 5 mph afternoon, then WNW 5 mph early evening.

LAL: 1.

Che of Wetting Rain (> or = to 0.10"): 0%

Stability: Inversion at 6,700ft MSL until noon local time.

Afternoon Mixing Height: 10,500 feet MSL.

Tonight (1900-0700):

Weather: Clear skies and smoky.

Temperatures: Lows 49° valley bottoms to 67° ridges. (Trend: Up 1-4°)

Overnight Max Humidity: Valleys: 50-85%; Ridges: 30-50%. (Trend: Down 5-20%, greatest ridges)

20 Foot Winds:

Lower Slopes: WNW 5 mph early in the evening, becoming downslope and down valley 5 mph.

Upper Slopes: WNW 5-10 mph in the evening, becoming NE 5-10 mph gusting 10-15 mph by morning.

LAL: 1

Chc of Wetting Rain (> OR = to 0.10"): 0%

Inversion: 7,300ft with smoke becoming trapped below it.

2-5 Day Outlook, Friday-Monday:

A 30% chance of showers and thunderstorms Friday between 1400 and 2000L. Any thunderstorms will be slow moving and capable of erratic, gusty winds and localized moderate rainfall. Otherwise, mostly clear with cool mornings with moderate to poor RH recoveries on the upper slopes and ridges, and hot, dry afternoons. Max Temps 75-95° with Minimum RHs 13-28%. 8-17% Sat-Mon. Lows 41-68°. Max RHs: 25%-95%.

Observations from Wednesday, 8/26/20:

Feather River College (3425ft) near ICP- Temps: 53F/88F, RH: 100%, 31%. Max wind: WNW 7 mph. Buck Lake Road West (3793ft) NE of Bear Fire- Temps: 50F/82F, RH: 99%, 36%, Max wind: SW 18 mph. Pierce (5811ft) SW of Sheep Fire: Temps: 58F/77F, RH: 71%, 34%, Max wind: W 23 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 07	TYPE OF FIRE: Wildland Fire
FIRE NAME: North Complex	OPERATIONAL PERIOD: 8/27/20 Day
DATE ISSUED: 8/26/20	TIME ISSUED: 2100
UNIT: Plumas NF	SIGNED:/s/ Patrick Doyle, FBAN-t

INPUTS

WEATHER SUMMARY:

Temps: Highs 73-91°

RH: min. 15-25%

Winds: morning SE 0-5 mph, transitioning in the afternoon to W 5-10 mph

Ridges: afternoon W 10-15 mph afternoon (see Fire Wx Forecast, previous page) Gusts W 15 mph ridgetop afternoon.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Expect increased activity today, with forecasted hotter temperatures and much lower Rhs (**down 10-15%**). There will be lower fire activity in the morning, transitioning to increased fire activity in afternoon with lifting smoke and haze. As fire responds to increased temperatures, windspeeds, and decreased Rh. Watch areas that have heavier fuels, that are holding heat and waking up with warmer temps and lower Rhs.

Key Points:

- Critically low fuel moistures (~90th percentile conditions) make all dead and down fuels available for burning, continue to lower into weekend.
- · Low nighttime Rh recovery continues to contribute to critically low and decreasing fuel moisture in dead fuels.
- Expect afternoon winds to pick up lifting out smoke and inversion with increased fire activity and spotting.
- Torching and spotting has contributed significantly to fire spread and reduced control efforts. Watch for holdover heat near control lines.
 RC 73 (▼down -3, near 90th percentile)
 BI 53 (▲up +2, near 90th percentile)
 Northern Sierras PSA NC07

ERC 73 (▼down -3, near 90th percentile)

BI 53 (▲up +2, near 90th percentile)

100 HR Dead Fuel Moisture: 7.4% (▲up +0.8, near 90th percentile)

1000 HR Dead Fuel Moisture: 7.7% (▲up +0.1, greater than 90th percentile)

SPECIFIC:

Branch IV / V: Sheep fire – East of Div A / M break continues to be challenging with increased activity in the afternoon, with fire wanting to spread N-NE with wind. Div D/F/H even though a lot of work has gone into securing these lines, spotting from holdover heat standing and down heavy fuels near line will be a concern. Fire spread in grass and sage-steppe in foothills and flats near Susanville and Janesville will support rapid rates of spread (up to 180+ch/hr) with afternoon winds.

Key Points:

- Div A / M break, watch-check white ash near control lines for holdover heat from recent activity waking up in the afternoon.
- Watch fire activity in Div D & F timber stringers for holdover heat near line for spotting in afternoon.
- Div H will continue to flank on mid-to-upper slopes in timber, actively flanking with torching and spotting.
- Spotting from individual tree torching and passive crown fire activity has contributed significantly to increased fire spread rates and reduced control efforts.

Rate of Spread (ROS): max 20-180 ch/hr, min ROS 1-10 ch/hr. Prob. Of Ignition: 79-90%

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where fuels and topography are not in alignment expect FL <1-5 ft.

Branch II: Claremont Fire - With much diminished fire activity in the Claremont fire area, be diligent in seeking out that heavier fuels are retaining heat and will awake in the afternoon. Watch out for potential spotting upslope or downwind across containment lines. Area east of main fire, towards Sloat have most active behavior in Claremont fire from Div X around and mainly in Div Z.

Key Points:

- Div Z: Fire behavior modeling (continues) project fire spread to the E, parallel with Middle Fork Feather River spreading towards Sloat.
- · Expect afternoon winds to pick up, lifting out smoke and inversion, and increased fire activity and spotting from torching trees and shrubs.
- Watch for spotting from individual tree torching or heavy down fuels holding heat spring back to life with winds and solar heating in the afternoon near control lines.

Rate of Spread (ROS): max 10-90 ch/hr, min ROS 1-8 ch/hr.

Prob. Of Ignition: 79-90%

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where fuels and topography are not in alignment expect FL <1-5 ft.

Branch X: Bear Fire – Fire has backed down to the Middle Fork of the Feather River, approximately in the middle portion of fire, between Little Bear Creek and Bear Creek. Watch for afternoon spotting to the northeast of main fire in Bear Creek.

Key Point:

Watch out for roll-out with material igniting below with uphill runs in drainage, and in afternoon spotting continues to be a significant component
of fire spread (spotting distances 1/10 to 1/25 of mile). In addition, to actively backing and flanking, and uphill/updrainage spread in most
directions.

Rate of Spread (ROS): max 10-90 ch/hr, min 1-8 ch/hr.

Prob. Of Ignition: 79-90%

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where fuels and topography are not in alignment expect FL <1-5 ft.

AIR OPERATIONS:

Air operations window may be affected by inversion and thunderstorm development in area.

SAFETY

Mop up should be more extensive in areas that could generate wind-blown embers across the line.

•

Safety Message North Complex – Sheep Fire

INCIDENT: North Complex Date: 8/27/2020 Safety Officers: Doug McKelvey CC Christensen

- **Driving:** Drowsy driving is a major problem. The risk, danger, and sometimes tragic results of drowsy driving are alarming. Drowsy driving is the dangerous combination of driving and sleepiness or fatigue. This usually happens when a driver has not slept enough.
- Structure Protection: Firefighter safety first, stay mobile. Back equipment in and know the road system. Use and a spotter when backing. Refer to Page 12 in the IRPG for WUI. Check for plastic culverts. Avoid parking and working under powerlines. ID all hazardous materials. LCES, monitor fire and spread. Have a trigger point established with a known rally point.
- Slips, Trips, and Falls: Take your time while traveling on foot. It is steep and quite easy to step in the wrong place or in the wrong way and blow out a knee, sprain an ankle, or make a one-point landing on your head. Take extra precautions on steep slopes. Be aware of your location, the time it took on foot to your location, and what resources you will need if someone gets injured out on the fireline.

Create a bigger safety margin for yourself, your crew, and your adjoining resources by:

- Taking your time: No need to rush tasks, always come up with contingency plans. (IWI)
- Assess the situation: Scout the work area, look for hazards, communicate them, and mitigate using sound risk management decision processes.
- Make Good Decisions: Use all the info you have gathered, look for blind spots in your plan, and above all else... Keep your people informed.

IWI

Identify who is on your division and qualified EMT. Know who is adjoining your division and can assist with an IWI If one should happen. Make sure you,

- Have a plan in place
- Fill in box 6 in the Med Plan
- Have a contingency plan
- IRPG page 118 & 119

Fail to plan, plan to fail!

Smart firefighters are hydrated firefighters!

INCIDENT SAFETY ANALYSIS 215a

North Complex CA-PNF-001308 - Thursday, August 27, 2020

8.Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Extreme Fire Behavior	~ Share weather observations with all personnel assigned to division. ~ Establish "Trigger Points" to withdraw. ~ Use "Risk Management" process prior to engaging in suppression actions IRPG Pg 1. ~ Refer to "Common Denominators of Fire Behaior Tragedy Fires" IRPG Pg 5. ~ Refer to "Alighnments & Patterns for Dangerous Fire Behavior" IRPG Pg 73
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Injury & Medical Emergency	 Assist injured employee appropriate medical care. Use EMT's on Division for initial care. Follow "Emergency Medical Care" IRPG Pgs 105-118 Follow procedures in Medical Plan, ICS 206 Refer to "Planning for Medical Emergencies" IRPG Pg 2
All	Fireline Hazards	 Refer to "Fireline Location" considerations, IRPG Pg 84 Do not work directly above or below personnel during firing and mop-up operations. Watch for falling and rolling debris on steep slopes. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Avoid stepping over debris that could roll by walking around object. Avoid radiant heat by wearing appropriate PPE correctly. Use correct tool for task assigned. Flag and isolate all HAZMAT and alert all personnel working in Division. Follow WUI recommendations, IRPG Pg 12.
Br II	Heavy Equipment Operations	~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment.
Br II	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts IRPG Pg 7
All	Air Operations	~ Ensure positive communication with all air resources. ~ Don't plan on air resources for medical transport or resupply. ~ Follow "Aviation Watch-Out Situations" IRPG Pg 46. ~ Refer to "Directing Bucket or Retardant Drops" IRPG Pg 58. ~ Refer to "Aerial Retardant Safety" IRPG Pg57. ~ Refer to "Aircraft Mishap Response Procedure" IRPG Pg 62.
All	Bees, Ticks, Mosquitoes	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.

INCIDENT SAFETY ANALYSIS 215a

All	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205.
		~ Utilize human repeaters when working in dead spots.
All	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters & Honk horn to alert personnel when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. ~ Use the 3 second rule for following distance when driving. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs. ~ Refer to "Smoke and Transportation Safety" IRPG Pg 31 ~ Refer to "Roadside Response Safety" IRPG Pg 26
All	Heat Related Illness (HRI)& Dehydration	~ Refer to Heat Ralated Illness information, IRPG Pg 109
Sheep & Clariage	Structure Protection & HAZMAT	 Review "Wildland Urban Interface Firefighting" considerations, IRPG Pg 12-16 Use "Structure Assessment" checklist, IRPG Pg 13 Refer to "Structure Hazard Marking System" IRPG Pg 41 Follow "HAZMAT Incident Operations" IRPG Pg 36
All	Unidentified Hazardous Waste and Unexploded Ordinance	~ Avoid identified Hazmat and UXO areas ~ Use "Unexploded Ordinance Safety" guidelines IRPG Pg 27 ~ Deny entry to others. Do not transmit on radio if in proximity ~ Map locațion of all UXO and Hazmat.
All	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.
Br II Sheep	Night Operations	∼ Maintain high visibility in work area and wear vest while in roadway. ∼ Use glow sticks to mark hazards. ∼ Ensure personnel have a personal light (headlamp). ∼ Watch for signs of fatigue. ∼ Take breaks away from areas of known hazard.

Region 5: Employee Self-Assessment Questions June 11, 2020

Have all employees apply this self-assessment prior to entering any work location every day. This self-assessment includes four questions:

- 1. In the last 14 days have you had a fever, shortness of breath, bodyaches or coughing (not attributable to something else, e.g. allergies) or been diagnosed with COVID-19 (presumptive or positive test)?
 - If so, do not return to work until cleared by a medical professional or you meet CDC guidance on "<u>Discontinuation of</u> Isolation."
- 2. In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms (fever, shortness of breath, body-aches or coughing (not attributable to allergies)).
 - If so, you cannot report to the workplace until cleared by a medical provider or until 14 days after the last date of exposure. If you develop symptoms, see #1.
- 3. In the last 14 days have you assisted in the care of an individual (outside your household) who is not well?
 - If so and you were wearing proper PPE (including a N95 mask), work with your supervisor to determine whether you should report to the workplace.
 - If so and you were not wearing proper PPE, you cannot report to the workplace until cleared by a medical provider <u>or</u> until 14 days after date of exposure. If you develop symptoms, see #1.
- 4. In the last 14 days have you traveled outside your local area?
 - If so, you should notify your supervisor and monitor yourself for symptoms for 14 days. If mitigations were not possible during travel, work with your supervisory chain to determine if self-quarantine is needed. If you develop symptoms, see #1.

AND CHECK-IN AT ICP BUILDING

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Your OES AREP for the North Complex including the Sheep
