FIRE BEHAVIOR

Daytime, 09/09

Timber fuel type: potential head rate of spread 20-40 chains/hour, flame length 6-10 feet. Spotting distance to ¾ mile. Torching and occasional crown fire runs likely. Probability of ignition 90-100%.

Grass/shrub fuel type: potential head rate of spread 50-80 chains/hour, flame length 8-12 feet. Spotting distance to ¼ mile. Heavier brush stands could produce flame lengths of 12-20 feet during the peak of the burning period.

Daytime, 09/10-11

Timber fuel type: potential head rate of spread 10-30 chains/hour, flame length 6-8 feet. Spotting distance to ½ mile. Torching and occasional crown fire runs may occur. Probability of ignition 80-100%.

Grass/shrub fuel type: potential head rate of spread 30-50 chains/hour, flame length 6-10 feet. Spotting distance to ¼ mile. Heavier brush stands could produce flame lengths of 12-20 feet during the peak of the burning period.

Nighttime

Most nighttime activity is expected to be backing and flanking fire. The potential worst-case fire behavior will be a head rate of spread of 2 - 5 chains/hour and a flame length of 1-4 feet for a surface fire. Probability of ignition 30-40%. Spotting is negligible.

SAFETY MESSAGE

Transition Day- Be Prepared For Change

- **Ensure you are getting complete briefings.**
- **Validate the plan to ensure it matches the current situation.**
- **Pass on Situational Awareness gained from previous operational periods.**
- **Know the who, what, when, where, why and how?**
- **Ask for clarification if something does not make sense or if there are questions. You are probably not the only person with that concern or question.**
- **If you see something, say something!**

MAJOR HAZARDS AND RISKS

Fatigue Driving Heated Related Illness	Hazard Trees Communications Wildlife	Heavy Equipment Steep Terrain Complacency
---	---	--

Be sure all elements of your safety plan are in place prior to engagement

Hazard Tree Safety

- **Inspect area for hazard trees before starting work. Are there trees that have been falling, leaning, hung up, or have broken tops? Are there high risk species? How long has the fire been burning in the area?**
- **Identify hazards and fell or avoid the hazard and flag.**
- **Take down hazard trees only with qualified sawyers and then only if necessary.**

Planning for Medical Emergencies

Ask and be able to answer these 3 questions:

1. **What are we going to do if someone gets hurt?**
2. **How will we get them out of here?**
3. **How long will it take to get them to a hospital?**

All operational activities should be based on answers to these questions. See page 2 of the IRPG for more guidance.
