Slater Fire Weather Forecast

FORECAST NO: 4 D PREDICTION FOR: SHIFT DATE: FORECAST ISSUED:

Monday Day Shift September 14, 2020 1900 September 13, 2020 NAME OF FIRE: Slater Fire UNIT: KNF / CIIM Team 10 Incident Meteorologist: Jeff Tonkin

...Gusty Southwest Upper Slope and Ridge Winds Again Today...

WEATHER DISCUSSION: Gusty southwest winds and low RH values can be expected again along the highest elevations. Better ventilation along the lower slopes and drainages thus warmer temperatures and lower RH values along with a slight increase in upslope winds this afternoon and also on Tuesday. Major change on track for mid-week with cloudier skies, higher RH's and light rain amounts Wednesday through Friday.

WEATHER FORECAST TODAY (MONDAY SHIFT):

WEATHER: Smoke decreasing gradually.

MAX TEMPERATURES: Drainages (<3,500 ft) 68 - 72 F. Upper Slopes/Ridges (>3,500 ft) 72 - 76 F

MIN HUMIDITY: Drainages (<3,500 ft) 35-40%. Upper Slopes/Ridges (>3,500 ft) 27-33%

WINDS (EYE LEVEL):

Lower Slopes/Drainages (<3,000ft) – West or upslope 3 – 7 mph...Gusts 15 mph after 1400.

Upper Slopes/Ridges (>3,000 ft) - Southwest 8 to 12 mph with Gusts 20-25 mph.

LAL: 1 CWR: 0% Mixing Height:: 4k ft AGL

STABILITY / INVERSION: Stable. Inversions over-night lasting through late afternoon.

SMOKE TRANSPORT WIND: South 5-10 mph

WEATHER FORECAST FOR MONDAY NIGHT:

WEATHER: High Clouds...Higher RH values.

MIN TEMPERATURES: Drainages (< 3500 ft) 50 – 54. Slopes/Ridges (> 3,500 ft) 53 – 58 F

MAX HUMIDITY: Drainages/Mid Slopes (<3000 ft) 45 - 55%. Upper Slopes/Ridges (>3,000 ft) 55 - 65%

WINDS (EYE LEVEL): Valleys – Down slope or southeast 3 – 6 mph.

Ridges – West and Southwest 6 – 10 mph...Gusts 20 mph.

LAL: 1 CWR: 0% Mixing Height: 1000 ft AGL

SMOKE TRANSPORT: South 25 mph

OUTLOOK FOR TUESDAY: High Clouds and a few sprinkles possible. Max Temps: 70-75. Min RH: 48-53%.

THREE DAY EXTENDED (WEDNESDAY - FRIDAY ABOVE 3500 FT)

	Max T	Min RH	Max RH	Ridge Winds, Afternoon	LAL	WX
WED	63 - 68	54%	100%	S/SW 5-10 Gust 15 mph	1	Lt. Rain

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 9	TYPE OF FIRE: Wildland Fire
FIRE NAME: Slater	OPERATIONAL PERIOD: September 14, 0600-1800
DATE ISSUED: September 13, 2020	TIME ISSUED: 2000
UNIT: Klamath National Forest	SIGNED: Isl Ken Larson, FBAN

INPUTS

WEATHER SUMMARY:

See attached Fire Weather Forecast

Discussion: Gusty southwest winds and low relative humidity can be expected along the highest elevations.

Weather: Smoke decreasing gradually.

Max Temp: 68-76°

Min RH: 35-40% drainages; 27-33% upper slopes/ridges

Winds (Eye Level):

Lower Slopes/Drainages: West or upslope 3-7 mph, gusts to 15 after 1400.

Upper Slopes/Ridges: Southwest 8-12 mph, gusts 20-25.

FIRE BEHAVIOR

GENERAL

Review the Fuels and Fire Behavior Advisory issued by the Northern California Geographic Area in the IAP

The fire is burning primarily through mixed conifer stands with a shrub understory. Other fuel types burning include moderate brush fields; and low grass-shrub fuels intermixed with areas of small to large downed logs associated with recent fire scars. Snags from previous fires are also contributing to fire spread.

Reduced fire spread has occurred on the west side of the fire due to movement into areas of recent fire (last 5 years). Heavy smoke concentrations are reducing fire behavior activity significantly.

The Energy Release Component based on the Slater Butte RAWS is above the 97th percentile and near a record value.

SPECIFIC FIRE BEHAVIOR

The areas most likely to be impacted by the SW trough winds are the Devil Fire and the East flank of the Slater Fire near the California/Oregon border.

Mixed conifer stands: **Upper slopes/Ridges** potential head rate of spread 10-20 chains per hour with flame length 6-10 feet. Expect single and group tree torching and occasional crown fire runs on steeper slopes. Spotting to 3/10 mile. Probability of ignition 60-70%. **Lower slopes/drainages** mostly backing/flanking fire with upslope movement to 5-10 chains per hour. Probability of ignition 20-40%.

Moderate brush fields: **Upper slopes/Ridges** rate of spread 20-40 chains per hour, flame length 8-10 feet. **Lower slopes/drainages** mostly backing/flanking fire with minimal upslope movement.

Low grass-shrub fuels: **Upper slopes/Ridges** rate of spread 15-30 chains per hour, flame length 4-6 feet. **Lower slopes/drainages** mostly backing/flanking fire with minimal upslope movement..

AIR OPERATIONS

Air operations will be impacted by smoke during the day.

Sunrise: Monday, 09/14 06:51 Sunset: Monday, 09/14 19:21

SAFETY

The gusty southwesterly winds at the upper elevations of the fire may result in some smoke reduction today. If this occurs there could be an increase in fire behavior at lower elevations. Keep heads up for changes in smoke dispersion during the shift.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 7, 2020

Subject: Extended high temperatures continues to rapidly dry out an above normal live fuel load and dead fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures in August and early September coupled with limited precipitation has been expanding extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through September. The thunderstorm event of August 16-17 produced much lightning with limited rainfall that only lowered fire danger for a very brief period. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior once the any cap of smoke lifts out. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will generally range between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels - Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:

https://gacc.nifc.gov/oncc/fuelsFireDanger Bi.php https://gacc.nifc.gov/oncc/fuelsFireDanger Erc.php https://gacc.nifc.gov/oncc/fuelsFireDanger Hundred.php https://www.esrl.noaa.gov/psd/eddi/

https://vegdri.unl.edu/Home/StateVegDRI.aspx?CA https://gacc.nifc.gov/oncc/fuelsFireDanger Thousand.php

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at https://gacc.nifc.gov/oncc/predictive/weather/index.htm or potential Red Flag conditions from the National Weather Service and weather at https://www.wrh.noaa.gov/fire2/cafw/ .

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

Lookouts Communications Escape Routes Safety Zones

SLATER INCIDENT

Operation Period: 09/14/2020 Day Shift

SAFETY MESSAGE

YOUR SAFETY IS DEPENDENT UPON YOUR ABILITY TO:

- **FORECAST** the future and how it will affect your safety.
- **PREDICT** fire behavior, and how the weather and terrain will influence it.
- **ANTICIPATE** problems and needs, finding solutions in advance.
- **RECOGNIZE** hazards and minimize risk exposure.

Please try and operate in a proactive mode, not a reactionary mode!

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DRIVING	HAZARD TREES
POISON OAK	COMMUNICATIONS	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

Driving and Fatigue

- Make sure you are getting your rest when you can! Stick to work/rest guidelines.
- Fatigue can cause us to mentally stray from the driving task.
- It only takes a second of distraction to lose control of our vehicle. The faster you are traveling, the faster you get in trouble.
- Make sure you recognize when you are too tired to drive!
- Don't tough it out and put yourself and your passengers at risk!

Roadside Operations

- Use warning lights when necessary to alert traffic
- Anytime traffic flow is affected by the incident, contact the jurisdictional law enforcement agency for assistance.
- Conduct all operations as far from traffic lanes as possible to provide for crew and public safety.
- Park units on the same side of the roadway whenever possible to avoid traffic congestion.
- Personnel do not exit the fire apparatus until instructed to do so by the module leader.
- Exit the fire apparatus away from the roadway or where hazard exposure is minimized.
- Exit the fire apparatus with full personal protective equipment.

CHMT 10 Safety Officers: Frank Pingiczer, Chuck Frank, Robert Hilfer(t)

INCIDENT RISK ANALYSIS (ICS 215A) Slater Fire 09/14/2020 Day Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNIN	NGS / REMEDIES
ALL ALL	Driving Hazard Trees	 Narrow, steep, unforgiving native surfaced r Watch for rocks and wildlife on Highway Practice Defensive Driving Techniques. Be aware of livestock and wildlife in area Use warning lights when working on roads of Follow "Hazard Tree Safety" guidelines, IRI Post lookouts, road guards, spotters in areas Establish trigger points for disengagement de Limit exposure to work area as much as poss 	96. Especially from dusk to dawn. or traveling in smoke. PG pgs. 22-23. where mop up is happening. uring high wind events.
ALL	Heavy Equipment Operations	 Ensure communications are established with Use hand signals if other communications ar Maintain a 50'-100' exclusion area around e Use a spotter when backing. 	operators. e unavailable.
ALL	Fire Behavior	 Anticipate active fire behavior and rapid rate Establish and maintain LCES. Expect increased spot fires. Allow for adequate time to escape routes and Dry Fuels and Large dead and down compo 	1 safety zones.
ALL	Indirect Line Construction	 Establish and maintain LCES. Locate line in favorable location, lighter fuels Utilize natural or existing barriers. 	
ALL	Fatigue	 Be alert for signs of fatigue and take breaks a Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue 	-
ALL	Steep Terrain an Rolling Rocks	 Maintain 8'-10' spacing when working & wa Don't work above any personnel. Evaluate necessity to send personnel in areas 	
ALL	Powerlines	 Treat all powerlines as live. Some structures power back into the lines. Review Powerline Safety section in IRPG pg Communicate, Identify, Isolate, Deny Entry. 	
ALL	Point Protection	 Review WUI Firefighting in IRPG pgs. 12-1 Ensure you have adequate access and egress. Set trigger points to disengage and allow ade secondary safety zones. Look for propane tanks and other hazardo 	equate time to relocate to primary and

Slater Fire - Incident Training Program

A TNSP is assigned to this incident and will be performing majority of duties "virtually".

To receive documented credit for your assignment,

scan the QR Code below to access and complete the Trainee Registration Form. Once registered you will receive additional instructions via text. For training related questions, call Brad Smith (TNSP) at 209-770-4809 or email bradley smith@firenet.gov

Slater Fire - Trainee Registration Form

California Interagency Incident Management Team 10 WATER USAGE LOG

NCY ID / VEN UEST#		I.e., Strike	Team 1110	C, Acme Wat	er Tenders
