

INCIDENT ACTION PLAN

SLATER FIRE - SOUTH ZONE

CA-KNF-7035

P5NKM3

Wednesday

NIGHT SHIFT

9/16/2020 1800

to

9/17/2020 0600

Fire Information: (530) 324-2528

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Slater Fire - South Zone	2. Operational Period:	Date From: 9/16/2020	Date To: 9/17/2020
		Time From: 1800	Time To: 0600

3. Objective(s):

- Management Objectives**
- Provide for responder and public safety through sound risk management practices including mitigations for COVID-19 exposure.
 - Implement strategies and tactics that have a high likelihood of success to limit exposures to life, property, infrastructure, natural and cultural resources by developing and executing plans that are well understood.
 - Build and maintain positive relationships between assigned resources, cooperators, stakeholders, and affected communities through professional engagement.
 - Maintain close coordination with Northern Rockies Team 2 to insure timely and efficient management of the northern and southern zones of the incident.
 - Keep costs commensurate with the values at risk by using thoughtful business processes.

- Control Objectives**
- Prioritize life safety and point protection of values at risk to reduce the exposure to life and property.
 - Keep the fires north of Hwy 96 to limit the potential for significant growth into the Klamath NF.
 - Keep the fires west of Seiad Creek and the Applegate River to check fire spread onto private timberlands and other values.
 - Be prepared to support the local units with initial attack by maintaining a high state of readiness

- General Situational Awareness:**
- Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.
 - In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.
 - Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

Slater Fire Weather Forecast

FORECAST NO: 6 N
 PREDICTION FOR: Wednesday Night Shift
 SHIFT DATE: September 16/17, 2020
 FORECAST ISSUED: 1200 September 16, 2020

NAME OF FIRE: Slater Fire
 UNIT: KNF / CIIM Team 10
 Incident Meteorologist: Jeff Tonkin

WEATHER DISCUSSION: Tonight will be very moist at all levels while the fire area remains under moderate to heavy smoke. Overnight conditions will remain similar to previous nights with cool temperatures and very light winds but again very high recoveries expected even along the ridge tops. Some very light rain showers may bring a few hundredths of spotty rain to the perimeter on Thursday accompanied by slight chance of isolated thunderstorms. On Friday morning showers may produce an additional 0.10 inches to 0.20 inches of rain. A significant improvement in smoke conditions is expected Thursday night into Friday.

WEATHER FORECAST TONIGHT FOR NORTH ZONE:

MIN TEMPS: Branch V: Lower Slopes and Valleys: 46 – 51F. Mid Slopes up to Ridges: 57 – 67 F
 Branches VII,VIII: Lower Slopes and Valleys: 52 – 56F. Mid Slopes up to Ridges: 61 – 65 F.
MAX RH: Branch V: Lower Slopes and Valleys: Near 100%. Mid Slopes up to Ridges: 70-80%.
 Branches VII, VIII: Lower Slopes and Valleys: 80%
 Mid Slopes up to Ridges: 60-70%.
WINDS (EYE LEVEL): Lower Slopes and Valley: East or Downslope 2 to 4 mph.
 Mid Slopes to Ridges: Southwest 6 to 10 mph with Gusts to 14.
LAL: 1 CWR: 0% Mixing Height: 4k ft AGL
STABILITY / INVERSION: Weakly Unstable. Inversions over-night lasting through 1300 PDT.
SMOKE TRANSPORT WIND: Southwest 20-25 mph

WEATHER FORECAST FOR TODAY SOUTH ZONE:

MIN TEMPS: Branch I: Lower Slopes and Valleys 52 – 55F. Mid Slopes up to Ridges 60 – 64 F
 Branch IX: Lower Slopes/Drainages 51 – 55F. Mid Slopes up to Ridges 60 – 64 F
MAX HUMIDITY: Branch I: Lower Slopes and Valleys 80-90% Mid Slopes up to Ridges 60-70%
 Branch IX: Lower Slopes/Drainages 70-80%. Mid Slopes up to Ridges 60-70%
WINDS (EYE LEVEL): Lower Slopes and Valley: Variable 2 to 4 mph.
 Mid Slopes to Ridges: Southwest 6 to 10 mph with Gusts 12 to 16 mph.
LAL: 1 CWR: 0% Mixing Height: 4k ft AGL
STABILITY / INVERSION: Weakly Unstable. Inversions over-night lasting through 1400 PDT.
SMOKE TRANSPORT WIND: Southwest 20-25 mph

OUTLOOK FOR THU NIGHT / FRI MORNING: Mostly Cloudy...High RH's all levels. Min Temps: 55 to 60.
 Max RH: 70 - 80%. Ridge Wind: South and Southeast 6 – 8 mph... Gusts 12 - 15 mph. LAL 1. CWR 0%.

EXTENDED FORECAST FOR: FRIDAY - SUNDAY (3500 FT UPPER SLOPE)

	Max T	Min RH	Max RH	Ridge Winds, Afternoon	LAL	WX
FRI	68 – 72	40%	65%	W/SW 5–10 Gust 15 mph	1	Sprinkles
SAT	65 – 70	50%	80%	SW 5-10 Gust 15 mph	1	Lt. Rain
SUN	78 – 83	25%	40%	W/NW 10-15 Gust 20 mph	1	Sunny

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14	TYPE OF FIRE: Wildland Fire
FIRE NAME: South Zone Slater and Devil Fires	OPERATIONAL PERIOD: Sept. 16, 1800-Sept. 17, 0600
DATE ISSUED: September 16, 2020	TIME ISSUED: 1200
UNIT: Klamath National Forest	SIGNED: /s/ <i>Ken Larson</i> , FBAN

INPUTS

WEATHER SUMMARY: ***See attached Fire Weather Forecast***

Discussion: Tonight will be very moist at all levels with very high RH recovery.

Weather: Continued very smoky.

Min Temp: Lower Slopes/Valleys 51 - 55°; Mid Slopes/Ridges 60 - 64°

Max RH: Lower Slopes/Valleys 70 - 90%; Mid Slopes/Ridges 60 - 70%.

Winds (Eye Level):

Lower Slopes/Valleys - Variable 2 - 4 mph.

Mid Slopes/Ridges - Southwest 6 - 10 mph, gusts 12-16 mph.

FIRE BEHAVIOR

GENERAL

Review the Fuels and Fire Behavior Advisory issued by the Northern California Geographic Area in the IAP

The fire is burning primarily through mixed conifer stands with a shrub understory. Other fuel types burning include moderate brush fields; and low grass-shrub fuels intermixed with areas of small to large downed logs associated with recent fire scars. Snags from previous fires are also contributing to fire spread.

Little to no fire spread has occurred on the west side of the fire (south of the State line) due to movement into the footprint of the Natchez Fire (2018) and the Eclipse Complex (2017).

ERC values based on the Slater Butte RAWS are above the 97th percentile. Many RAWS stations in NW California and SW Oregon are above the 97th percentile with some reaching new record values during the past week.

SPECIFIC FIRE BEHAVIOR

Mixed conifer stands: **Upper slopes/Ridges** potential head rate of spread 5-10 chains per hour with flame length around 5 feet. Possible single and group tree torching. Spotting will be short range. Probability of ignition 10%. **Lower slopes/drainages** mostly backing/flanking fire with upslope movement less than 5 chains per hour. Probability of ignition 10%.

Moderate brush fields: **Upper slopes/Ridges** rate of spread less than 20 chains per hour, flame length to 6 feet. **Lower slopes/drainages** mostly backing/flanking fire with minimal upslope movement.

Low grass-shrub fuels: **Upper slopes/Ridges** rate of spread 0-2 chains per hour, flame length 0-1 foot. **Lower slopes/drainages**, with this fuels type, may not support any spread overnight.

Heavy smoke concentrations continue to reduce fire behavior activity significantly.

AIR OPERATIONS

Air operations will be impacted by smoke during the operational period.

Sunset: Wednesday, 09/16 19:18

Sunrise: Thursday, 09/17 06:54

SAFETY

Although moist conditions are expected through the shift larger fuels such as logs and snags will continue to be a threat to containment. Keep heads-up for roll out or falling debris.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 7, 2020

Subject: Extended high temperatures continues to rapidly dry out an above normal live fuel load and dead fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures in August and early September coupled with limited precipitation has been expanding extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through September. The thunderstorm event of August 16-17 produced much lightning with limited rainfall that only lowered fire danger for a very brief period. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior once the any cap of smoke lifts out. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to **above normal fine fuel loading**. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will generally range between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels – Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:
https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php <https://vegqdr1.unl.edu/Home/StateVegQDR1.aspx?CA>
https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php
https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php <https://www.esrl.noaa.gov/psd/eddi/>

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service and weather at <https://www.wrh.noaa.gov/fire2/cafw/>.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

SLATER INCIDENT

Operation Period: 09/16-17/2020 Night Shift

SAFETY MESSAGE

Human Factors Errors

1. Underestimating hazards, and using inadequate safety measures.
2. Failing to notice changing conditions and adjust tactics accordingly.

7 Barriers to Situational Awareness

1. Inexperience.
2. Getting too Comfortable (Complacency, Inattention, Autopilot).
3. Distraction from Primary Duty.
4. Priorities Out of Order.
5. Social Influences (Groupthink, Peer Pressure).
6. Stress Reaction (Tunnel Vision, Mission Fixation).
7. Physical Impairment (Fatigue, Carbon Monoxide, Heat Stress, Medications).

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION DRIVING	HEAVY EQUIPMENT SNAGS COMPLACENCY
--	--	---

Be sure all elements of your safety plan are in place prior to engagement

Night Operations Hazards

Your ability to maintain your situational awareness at night is compromised by your inability to see hazards and other visual indicators in your work area.

Other challenges faced during night operations:

- Ability to maintain your orientation
- Difficulty seeing hazards beyond your headlamp
- Difficulty estimating distances
- Inability to use landmarks as reference
- Blowing smoke can increase visual difficulties
- Logistical support is limited

Communication Responsibilities

All Firefighters have five communication responsibilities

- ***Briefings** – All resources require briefings. Use briefing checklist in pocket guide.
- ***Debrief Actions** – as necessary. Use pocket guide After Action Review to stimulate discussion and provide guidance.
- ***Communicate Hazards to Others** –
- ***Acknowledge messages** –
- ***Ask if you do not know** – Ask questions in unfamiliar situations. The only dumb question is the one you did not ask.

The greatest problem with communication is the illusion that it has been achieved

INCIDENT RISK ANALYSIS (ICS 215A) Slater Fire 09/16-17/2020 Night Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	Point Protection	<ul style="list-style-type: none"> • Review WUI Firefighting in IRPG pgs. 12-16. • Do not commit to stay in areas without adequate safety zones. • Ensure you have adequate access and egress. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials. • Structures may have generators that may be putting power back into the lines.
ALL	Driving	<ul style="list-style-type: none"> • Narrow, steep, unforgiving native surfaced roads within the fire area. • Watch for rocks and wildlife on Highway 96. Especially from dusk to dawn. • Practice Defensive Driving Techniques. • Be aware of livestock and wildlife in area • Use warning lights when working on roads or traveling in smoke, fog. • Local traffic on road at night.
ALL	Hazard Trees	<ul style="list-style-type: none"> • Follow "Hazard Tree Safety" guidelines, IRPG pgs. 22- 23. • Post lookouts, road guards, spotters in areas where mop up is happening. • Establish trigger points for disengagement during high wind events. • Limit exposure to work area as much as possible.
ALL	Fire Behavior	<ul style="list-style-type: none"> • Anticipate active fire behavior and rapid rates of spread. • Establish and maintain LCES. • Expect increased spot fires. • Allow for adequate time to escape routes and safety zones. • Large dead and down component.
ALL	Fatigue	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor incoming resources for level of fatigue.
ALL	Steep Terrain and Rolling Material	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	Communications	<ul style="list-style-type: none"> • Ensure all personnel are familiar with the incident and IA communications plan. • Share your situational awareness(hazards Changes ETC) to those who also have a need • Ask for intel if and when you don't know the plan
ALL	Powerlines	<ul style="list-style-type: none"> • Treat all powerlines as live. Some structures may have generators that may be putting power back into the lines. • Review Powerline Safety section in IRPG pgs. 24-25. • Communicate, Identify, Isolate, Deny Entry.
ALL	Marijuana Plantations	<ul style="list-style-type: none"> • Maintain situational awareness. • Watch for open areas and sign of improvements or irrigation systems. • Be aware of evidence that cultivation has occurred in the area. • If you stumble upon an area with probable cultivation be extremely cautious, exit on the same route you arrived and notify supervisor immediately.
ALL	Firing Operations	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Qualified personnel for all assignments. Trainees to have qualified trainers. • Required PPE to be worn by all personnel involved. • Establish LCES prior to implementing burning operations.
ALL	COVID	<ul style="list-style-type: none"> • Maintain 6' foot distance whenever possible. • Utilize masks, frequent handwashing/sanitizing, disinfect common surfaces. • Follow county Public Health guidelines. Monitor for symptoms.
ALL	Environmental Hazards	<ul style="list-style-type: none"> • Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. • Personal hygiene is #1 when it comes to Poison Oak Prevention.
INCIDENT NAME <div style="text-align: center; font-size: 1.2em; font-weight: bold;">Slater</div> ICS 215a		DATE PREPARED: <div style="text-align: center; font-weight: bold;">September 16, 2020</div> TIME PREPARED: 1000 HOURS
		OPERATIONAL PERIOD 09/16-17/2020 1800 - 0600 Prepared by Frank Bingiczer SOF2

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - o Cough, more than expected
 - o Shortness of breath or difficulty breathing
 - o New loss of taste or smell
 - o Fever o Chills
 - o Sore throat o Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - o Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

Find more information: <https://www.nwcg.gov/coronavirus>

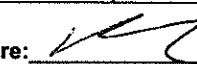

WILDLAND FIRE COVID-19 SCREENING TOOL

Have you in the past 14 days, had contact with a person known to be infected with the Coronavirus (COVID-19)?

Today or in the past 24 hours, have you had any of the following symptoms?

- + Cough more than expected?
- + Fever? Chills?
- + Nausea or vomiting?
- + New loss of taste or smell?
- + Headache, outside your normal for firefighting?
- + Congestion or runny nose, outside your normal for firefighting?
- + Muscle pain, outside your normal for firefighting?
- + Shortness of breath or difficulty breathing?
- + Sore throat?
- + Diarrhea?
- + Fatigue, outside your normal for firefighting?

Slater Fire – South Zone

Incident Training Program

A TNSP is assigned to this incident and will be performing majority of duties “virtually”.

To receive documented credit for your assignment,

scan the QR Code below to access and complete the Trainee Registration Form. Once registered you will receive additional instructions via text. For training related questions, call Brad Smith (TNSP) at 209-770-4809 or email bradley_smith@firenet.gov

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. <i>(WGS84)</i>
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Agency Affiliation: **(NO NAMES OR CREW NAMES)** Federal Contractor Local Government

Assessment: Age: Weight: Chief Complaint:

(If Pertinent to Injury) Skin Signs: Level of Consciousness: B/P: HR: RR:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered.
 Act according to your level of training.
 Be Alert. Keep Calm.
 Think Clearly. Act Decisively.
