INCIDE	NT OBJECTIVES (ICS 202)			
1. Incident Name:	2. Operational Period:	Date From:	9/19/2020	Date To:	9/20/2020
Slater and Devil Fires					-,,
South Zone 3. Objective(s):		Time From:	0600	Time To:	0600
Management Objectives					
Provide for responder and public safety three exposure.	ough sound risk manage	ment practices inc	luding mitigati	ons for C()VID-19
- Implement strategies and tactics that have natural and cultural resources by developin	a high likelihood of succe g and executing plans th	ess to limit exposu at are well unders	res to life, pro tood.	perty, infra	ıstructure,
- Build and maintain positive relationships be communities through professional engagen	tween assigned resource nent.	es, cooperators, st	akeholders, a	nd affecte	d
- Maintain close coordination with Northern R and southern zones of the incident.	Rockies Team 2 to insure	timely and efficier	nt managemer	nt of the no	orthern
- Keep costs commensurate with the values	at risk by using thoughtfu	Il business proces	ses.		
Control Objectives					
- Prioritize life safety and point protection of v	values at risk to reduce th	ne exposure to life	and property		
- Keep the fires north of Hwy 96 to limit the p	otential for significant gro	wth into the Klam	ath NF.		
Keep the fires west of Seiad Creek and the values.				ands and	other
- Keep the fire east of the Siskiyou Wildernes	·e				
- Be prepared to support the local units with i		on a biah ututu utu	- 17		
20 properties to support the local units with	milai attack by maintainir	ig a nigh state of r	eadiness		
_					
	6				
General Situational Awareness:				<u> </u>	
- Steep and rugged terrain, critically dry and i	receptive fuel beds, activ	e area for fire histo	ory and drougl	nt stressed	trees.
- In the COVID-19 environment, high density					
 In the COVID-19 environment, high density your family and to ensure all employees retu 	populations or large grou arn home safely, make si	ups are particularly ure to practice soc	rat risk. To he ial distancing	lp protect	yourself,

Slater South Fire Weather Forecast

FORECAST NO: 9 D PREDICTION FOR:

SHIFT DATE:

FORECAST ISSUED:

Saturday

September 19, 2020

1900 September 18, 2020

NAME OF FIRE: Slater Fire UNIT: KNF / CIIM Team 10

Incident Meteorologist: Eric Kurth (T)

WEATHER DISCUSSION: Today starts off cool with good humidity recovery, then warms up quickly in sunny skies. Lower Relative Humidity and warmer afternoon temperatures are expected under the clearer air. Northerly winds shift to light northeasterly after midnight tonight and continue into early Sunday. Widespread warmer and drier conditions are in store through midweek, but cooler and wetter weather could return by Thursday.

WEATHER FORECAST FOR SATURDAY:

WEATHER: Mostly sunny.

MAX TEMPS: Lower Slopes and Valleys 68 - 76F. Mid Slopes up to Ridges 66 - 72 F MIN HUMIDITY: Lower Slopes and Valleys 58 - 65%. Mid Slopes up to Ridges 25 - 30%

WINDS (EYE LEVEL): Lower Slopes and Valley: Northeast 2 to 4 mph becoming North North west 4 to 8 mph

with gusts to 14 mph after 1300.

Mid Slopes to Ridges: Northwest 5 to 10 mph with Gusts 12 to 17 mph.

LAL: 1 CWR: 0% Mixing Height:: 5k ft AGL

STABILITY / INVERSION: Weakly Unstable. Inversions over-night lasting through 1200 PDT.

SMOKE TRANSPORT WIND: Northeast 14 mph

WEATHER FORECAST FOR SATURDAY NIGHT (SOUTH ZONE):

WEATHER: Mostly clear.

MIN TEMPERATURES: Lower Slopes and Valleys 48 – 54F. Mid Slopes up to Ridges 45 – 50 F

MAX HUMIDITY:

WINDS (EYE LEVEL):

Lower Slopes and Valleys 58 – 65%. Mid Slopes up to Ridges 25 – 30%

Valleys - East Northeast 3 - 6 mph Gusts to 12 mph in aligned drainages

Ridges - East Southeast 4-8 mph Gusts to 13 mph

LAL: 1 CWR: 0% Mixing Height: 500 ft AGL

SMOKE TRANSPORT: Northeast12 mph

OUTLOOK FOR SUNDAY: Sunny, warmer and drier. Max Temps: 70-77. Min RH: 25-35%. Ridge Wind: West Northwest 5-10 mph. Gusts 14 mph. LAL 1. CWR 0%. Mixing Height: 7k ft.

THREE DAY EXTENDED (MONDAY - WEDNESDAY ABOVE 3500 FT)

	<u>Max T</u>	Min RH	Max RH	Ridge Winds, Afternoon LAL	WX
MON	75– 79	27%	40%	WSW 4-8 mph 1	H.Overcast
TUE	73– 77	26%	38%	WSW 4-8 mph Gust 14 mph 1	Ptly Cldy
WED	73- 78	28%	50%	WSW 5-8 mph Gust 17 mph 1	Ptly Cldy

Observations from Yesterday (Friday) at 1500 PDT:

	Temp:	RH:	Wind Dir.	Wind Spd:
Illinois Valley (1400 ft)	71	45%	WSW	10 G 21 mph
Dutch Indy (2300 ft)	69	55%	SW	4 G 12 mph
Slater Butte (4600 ft)	70	69%	SW	5 G 14 mph

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 18	TYPE OF FIRE: Wildland Fire
FIRE NAME: South Zone Slater and Devil Fires	OPERATIONAL PERIOD: Sept. 19, 0600-Sept. 20, 0600
DATE ISSUED: September 18, 2020	TIME ISSUED: 1930
UNIT: Klamath National Forest	SIGNED: /s/ Ken Larson, FBAN

INPUTS

WEATHER SUMMARY:

See attached Fire Weather Forecast

Discussion: Today starts off cool with good RH recovery. Lower RH and warmer afternoon temperatures expected.

Weather: Mostly sunny. Clear at night.

Max Temp: 68-76° lower slopes/valleys; 66-72° mid slopes to ridges. In the low 50's overnight. Min RH: 58-65% lower slopes and valleys; 25-30% mid slopes to ridges. Same overnight.

Winds (Eye Level):

Lower Slopes/Valleys: NE 2-4 mph, becoming NNW 5-10 gusts to 14 after 1300. ENE 3-6, gusts to 12 overnight.

Mid Slopes to Ridges: NW 5-10 mph, gusts 12-17. ESE 4-8 mph, gusts to 13 overnight

FIRE BEHAVIOR

GENERAL

Review the Fuels and Fire Behavior Advisory issued by the Northern California Geographic Area in the IAP

The fire is burning primarily through mixed conifer stands with a shrub understory. Other fuel types burning include moderate brush fields; and low grass-shrub fuels intermixed with areas of small to large downed logs associated with recent fire scars. Snags from previous fires are also contributing to fire spread.

Reduced fire spread has occurred on the west side of the fire (south of the State line) due to movement into areas of recent fire (last 5 years). Movement of the Devil Fire has also been impacted by a previous fire (Goff Fire 2012).

The Energy Release Component based on the Slater Butte RAWS dropped below the 90th percentile Thursday and dropped to average (58) on Friday due to the moist conditions.

SPECIFIC FIRE BEHAVIOR

Mixed conifer stands: **Upper slopes/Ridges** potential head rate of spread 5-10 chains per hour with flame length 6-8 feet. Possible single and group tree torching. Any spotting will be short range. Probability of ignition 40-60%. May remain active overnight. **Lower slopes/drainages** mostly backing/flanking fire with maximum upslope movement less than 5 chains per hour. Probability of ignition 10-20%.

Moderate brush fields: **Upper slopes/Ridges** potential rate of spread to 30 chains per hour, flame length 6-8 feet. May remain active overnight. **Lower slopes/drainages** mostly backing/flanking fire with minimal movement.

Low grass-shrub fuels: **Upper slopes/Ridges** potential rate of spread to 20 chains per hour, flame length 3-4 feet. **Lower slopes/drainages** mostly backing/flanking fire with minimal movement. Less activity overnight.

AIR OPERATIONS

Air operations will be impacted by smoke during part of the day.

Sunrise: Saturday, 09/19 06:56

Sunset: Saturday, 09/19 19:12

Sunrise: Sunday, 09/20

06:57

SAFETY

Keep heads-up as the fire continues to back downslope. Rolling debris can not only result in slop-overs but can cause serious injuries if struck. Watch for aerial fire in standing trees/snags that can reach over the line if burn-through occurs.

Fuels and Fire Behavior Advisory

Northern California Geographic Area September 7, 2020

Subject: Extended high temperatures continues to rapidly dry out an above normal live fuel load and dead fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures in August and early September coupled with limited precipitation has been expanding extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through September. The thunderstorm event of August 16-17 produced much lightning with limited rainfall that only lowered fire danger for a very brief period. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior once the any cap of smoke lifts out. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will generally range between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels - Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696 .
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links: https://gacc.nifc.gov/oncc/fuelsFireDanger Bi.php https://gacc.nifc.gov/oncc/fuelsFireDanger Erc.php https://gacc.nifc.gov/oncc/fuelsFireDanger Hundred.php https://www.esrl.noaa.gov/psd/eddi/

https://vegdri.unl.edu/Home/StateVegDRI.aspx?CA https://gacc.nifc.gov/oncc/fuelsFireDanger Thousand.php

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at https://gacc.nifc.gov/oncc/predictive/weather/index.htm or potential Red Flag conditions from the National Weather Service and weather at https://www.wrh.noaa.gov/fire2/cafw/.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

SAFETY MESSAGE

Attention to Detail-The Small Things Make a Difference

- Stay focused on the small things that can compromise your safety.
- Small issues may seem inconsequential when viewed alone.
- Sometimes multiple small issues can develop into a major problem.
- Mitigate small issues so they do not snowball into a major issue.
- Communicate minor problems so everyone is aware.
- If you see something, say something!

MAJOR HAZARDS AND RISKS

Steep Terrain	Complacency	Fatigue
Driving	Steep Terrain	Dehydration
Poison Oak	Hazard Trees	Rolling Material

Be sure all elements of your safety plan are in place prior to engagement

Look Up, Look Down, Look Around During Mop Up

- *Look Up: Check the sky for any weather changes such as building or approaching thunderstorms, wind shifts or increasing in speed. Watch for air operations and water drops. Look for snags and the potential for rolling material.
- *Look Down: Watch your footing. Keep an eye out for snakes, bee's nests, Stump holes, and ash pits.
- * Look Around Check for flagging identifying hazards in the area, and general terrain features. Keep an eye on fellow firefighters for signs of heat stress and fatigue.

Driving Responsibilities

- * Ensure seatbelts are used by all personnel.
- * Drive Defensively!
- * Keep headlights on.
- * Use wheel chocks.
- * Use spotters when backing up or in tight road conditions.
- * Reduce speed when visibility is poor or reduced.
- * Reduce speed in populated areas and at ICP.
- * Adhere to agency driving regulations.

CHMT 10 Safety Officers: Frank Pingiczer, Robert Hilfer(t)

INCIDENT RISK ANALYSIS (ICS 215A) Slater/Devil Fire 09/19-20/2020 Day/Night Shift

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNI	NGS / REMEDIES
ALL	Driving	 Narrow, steep, unforgiving native surfaced Watch for rocks and wildlife on Highway Practice Defensive Driving Techniques. Be aware of livestock and wildlife in area. Use warning lights when working on roads 	96. Especially from dusk to dawn.
ALL	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IR Post lookouts, road guards, spotters in areas Establish trigger points for disengagement of Limit exposure to work area as much as post 	PG pgs. 22-23. s where mop up is happening. during high wind events.
A,W	Heavy Equipment Operations	 Ensure communications are established with Use hand signals if other communications a Maintain a 50'-100' exclusion area around Use a spotter when backing. 	h operators. re unavailable.
W, NIGHT	Firing Operations	 Conduct thorough briefing for all personnel Qualified personnel for all assignments. Tra Required PPE to be worn by all personnel in Establish LCES prior to implementing burn 	ninees to have qualified trainers.
F	Direct line Construction	Conduct thorough briefing for all personnel Ensure LCES in place prior to engagement. Situations. Use Downhill Line Checklist. Utilize Risk Management Process.	
T,W	Indirect Line Construction	 Establish and maintain LCES. Locate line in favorable location, lighter fuel. Utilize natural or existing barriers. 	s and gentler topography when possible.
ALL	Fatigue	 Be alert for signs of fatigue and take breaks Maintain 2:1 work/rest ratio. Monitor incoming resources for level of fatigue 	
ALL	Communications	 Ensure all personnel are familiar with the in Share your situational awareness (hazards, oneed Ask for intel if and when you don't know 	cident and IA communications plan. changes, ETC.) to those who also have a

Slater Fire - Incident Training Program

A TNSP is assigned to this incident and will be performing majority of duties "virtually".

To receive documented credit for your assignment,

scan the QR Code below to access and complete the Trainee Registration Form. Once registered you will receive additional instructions via text. For training related questions, call Brad Smith (TNSP) at 209-770-4809 or email bradley_smith@firenet.gov

Slater Fire - Trainee Registration Form

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT
