

**SLATER & DEVIL  
INCIDENTS  
CA-KNF-007035 (P5NKM3)  
IAP**

**Wednesday, September 23, 2020  
(0700-0700)**

**NO COMMUNICATION LINK WITH CREW MEMBERS,  
SUPERVISORS & ADJOINING FORCES**

Watchout Situation #7 is a danger that must be mitigated by maintaining good communications while working on fires. Firefighters must constantly ask themselves the following questions as situations change on the fireline:

- Can communications be established?
  - Talk about how communications are set up on fires.
  - Review situations where communications were a problem and what was done to fix the problem.
- Is the communication triangle complete?
  - Review the communication triangle and where it comes up in the "10 Standard Fire Orders" and the "18 Watchout Situations."
  - Discuss ways that firefighters can maintain the communication triangle on the fireline.
- Reduce the risks
  - If the situation is complex, wait until communications are in place.
  - Talk about the fires where crews had to leave the line, didn't go out on the line, or something negative happened because communications were inadequate. Discuss what was done to establish communications.

INCIDENT OBJECTIVES	1. INCIDENT NAME Slater – North Zone	2. DATE 09/22/2020	3. TIME 1930
<p><b>4. OPERATIONAL PERIOD</b></p> <p><b>Commander's Intent:</b></p> <p>It is my expectation that we as an organization will meet the following Leader's Intent as well as the objectives identified below:</p> <ul style="list-style-type: none"> <li>• Ensure all incident strategies and actions reflect a commitment to public, responder, and aviation safety through use of the risk management process as outlined in the IRPG and the aviation risk assessment process.</li> <li>• Coordinate incident management activities with our requesting and cooperating agencies including but not limited to suppression actions and support needs.</li> <li>• Treat all incident personnel, cooperators, and local publics with dignity and respect creating a "no tolerance" atmosphere for harassment, alcohol, or illegal drug use.</li> </ul> <p><b>Values of Concern:</b></p> <ul style="list-style-type: none"> <li>• Neighboring communities and private residences in California and Oregon.</li> <li>• Critical communication and utility infrastructure including high power transmission lines, DOD/AT&amp;T fiber optic cable, communication sites and repeaters.</li> <li>• Highway 199 providing a main thoroughfare for inland and coastal areas of Southern Oregon and Northern California.</li> <li>• Many historic, natural, cultural and recreational values within the fire area including historic buildings and multiple T&amp;E species.</li> <li>• Economic values impacted by area closures.</li> </ul> <p><b>Management Objectives:</b></p> <ul style="list-style-type: none"> <li>• Provide for emergency personnel and public safety at all times through the utilization of a deliberate risk-informed approach, with avenues for feedback from personnel. Also, ensure COVID-19 precautions and best practices are met by following agency, team and county guidance.</li> <li>• Reduce the impacts of fire on communities, major infrastructure and private lands.</li> <li>• Foster and maintain relationships with the public, cooperators and stakeholders.</li> <li>• Ensure coordinated, timely and accurate release of public information. When possible utilize virtual platforms.</li> <li>• Maintain fiscal accountability by making good risk-informed decisions.</li> <li>• All personnel assigned should receive evaluations prior to leaving the incident.</li> </ul> <p><b>Operational Objectives:</b></p> <ul style="list-style-type: none"> <li>• Under the full suppression strategy, utilize direct and indirect tactics to minimize fire size. As feasible utilize minimum impact suppression tactics within the Red Buttes and Siskiyou Wilderness areas.</li> <li>• Protect the values of concern identified above by suppressing the wildfire and utilizing point protection of structures when necessary.</li> <li>• Scout, recon and identify primary and alternate containment opportunities considering resource availability and probability of success.</li> <li>• Work collaboratively to refine and implement the population protection plan when necessary.</li> <li>• Coordinate with lead Resource Advisor, including the Karuk Tribe representative, and operational Resource Advisors to minimize natural and cultural resource damage.</li> <li>• Provide initial attack for the Rogue Siskiyou NF in the area under the Temporary Flight Restriction.</li> <li>• Secure lines and mop-up to the level necessary based on site conditions associated with the values at risk to make the likelihood of escape minimal considering current/predicted weather conditions.</li> </ul>

# FIRE WEATHER FORECAST

FORECAST NO. 13

NAME OF FIRE: Slater & Devil – North Zone PREDICTION FOR: Wednesday September 22, 2020

UNIT: Klamath National Forest

TIME AND DATE

SIGNED: Julia E. Ruthford

FORECAST ISSUED: 2000 Tuesday 9/22/20

Julia Ruthford – 971-221-6728  
Incident Meteorologist

**\*\*\* Strong SW Winds Today...especially along ridges \*\*\***

---

**WEATHER DISCUSSION:** An approaching Pacific frontal system will bring strong southwesterly winds to the area today. Initially RHs will remain relatively dry reaching minimums for the day in the early afternoon before then gradually climbing as winds increase in the afternoon. A marine layer along the coast and extending inland to near the 199 tunnel will tend to keep RHs higher in western portions of the fire area while further to the east will start the day drier and stay drier longer into the afternoon. Precipitation will begin spreading over western portions over the fire area late in the evening and continue east through the early morning hours.

---

**WEDNESDAY:**

**WEATHER:** Clouds increasing through the day. Becoming very windy along ridges.

**MAXIMUM TEMPERATURE:** Highs in the lower 80 1500 ft valleys, lower 70s mid-slopes & lower ridges and mid 60s 5000 to 6000 ft ridges and peaks.

**MINIMUM RELATIVE HUMIDITY:** 45-50% western portions of the Slater (AA/DD/GG/JJ), 35-40% other northern portions of Slater, 25-30% SE Slater and Devil. Min RHs around 1300 NW & 1500 SE then gradually increasing.

**20 FOOT WINDS:**

**Slopes and Valleys –** SW winds 10 to 15 mph with afternoon gusts 20 to 25 mph...locally stronger afternoon winds 15 to 20 mph with gusts to 30 mph in the Illinois Valley and other aligned drainages. In areas without SW exposure, diurnal terrain driven winds will prevail.

**Ridges and Peaks –** Along 4000 to 5000 ft ridges SW winds increasing to 25 mph with gusts 40 mph in afternoon. Highest peaks will see SW winds 30-35 mph with gusts up to 50 mph.

**STABILITY:** Shallow inversions mixing out early. Unstable in the afternoon with strong turbulence near ridges.

**CHANCE OF RAIN:** 0%      **LAL:** 1      **Smoke Transport Wind:** SW 40 to 50 mph.

---

**WEDNESDAY NIGHT:**

**WEATHER:** Rain beginning over western portions of the fire around 2200 and spreading east overnight. Fire average precipitation totals of 0.20" expected through Thu morning. Up to 0.3 – 0.4" possible far west with around 0.1" eastern areas.

**MINIMUM TEMPERATURE:** Lows in the upper 40s to mid-50s.

**MAXIMUM RELATIVE HUMIDITY:** 100%.

**20 FOOT WINDS:** SW winds 30 to 40 mph along ridges in the evening diminishing to 20 to 30 mph around midnight. Winds becoming more westerly through the early morning hours and diminishing to 15 to 20 mph.

**STABILITY:** Cloud cover, rain and windy conditions will prevent the formation of valley inversion for much of the night, however patchy lowland fog is likely to form towards morning.

**CHANCE OF RAIN:** 90%      **LAL:** 1      **Smoke Transport Wind:** SW 30 to 40 mph.

---

**THURSDAY AND FRIDAY:** Precipitation will taper off through Thu morning with cool, moist conditions persisting through Fri. A few additional isolated showers are possible both Thu and Fri afternoons but should be on the light and spotty side. Nighttime RH recoveries will be excellent, near 100% with valley fog likely. RHs during the day will remain high as well with afternoon minimums around 60% Thu and 50% Fri.

---

**OUTLOOK FOR SATURDAY THROUGH MONDAY:** A strong ridge building in on Sat and strengthening Sun will begin a rapid warming and drying trend which will persist into next week. Locally breezy N-NW winds will develop on Sat then become NE and increase in strength Sat night and persist through Sun morning. Temperatures will continue to warm with RHs lowering rapidly Sun and Mon and remaining low through the overnight hours with the offshore flow pattern continuing as well.

---

Please email observations to [julia.ruthford@usda.gov](mailto:julia.ruthford@usda.gov) or text them to 971-221-6728. Thanks!

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #8

TYPE OF FIRE: Wildland Fire

FIRE NAME: Slater and The Devil North Zone

OPERATIONAL PERIOD: Day 09/23/2020

DATE ISSUED: 09/22/2020

TIME ISSUED: 2000 hrs

UNIT: Klamath National Forest

SIGNED: /S/ David Tingley FBAN(t)

### WEATHER

#### Higher Winds

See Fire Weather Forecast for Details

#### Local Weather Thresholds That Support Active Fire Behavior:

Temperatures greater than 80°, Relative Humidity less than 25%, Wind greater than 15mph.

### FUELS

1. ERC's are greater than 90%
2. Fire is burning in mixed conifer stands with a shrub understory.
3. Secondary fuel types are moderate brush fields and grass shrub mix.
4. Fuel Moistures
  - 10 hour fuels are 6-9%, 100 hour fuels are 10%, 1000 hour fuels are 8-10%

### FIRE BEHAVIOR

#### GENERAL:

1. The heavy inversion layer has been impacting the winds ability to reach the ground.
2. Tomorrows winds should be strong enough to break down the inversion early in the day, potentially producing active fire behavior across the fire area.
3. A potential for an increase in relative humidity exists. Significant variability across the fire area exists, the timing of that arrival and how moist that air mass is, may temper active fire behavior.

#### SPECIFIC:

##### Upper Elevations:

- Mixed conifer stands expect rates of spread around 20 chains per hour with flame lengths around 12 feet.
- Brush fields 20-40 chains per hour and 8-10 ft flame lengths.
- Grass and shrub 15-30 chains per hour and 4-6 ft flame lengths.

##### Lower Elevations:

- Backing and flanking fire with upslope runs 5-10 chains per hour when wind and slopes align.

##### Night Shift:

- Fire behavior will diminish to creeping and smoldering in valley bottoms after sunset as RH's recover.
- Active burning in highest elevations where the RH recovery is minimal.

### AIR OPERATIONS

Expect clean air earlier in the day, however, wind speeds may limit air operations.

### SAFETY

Reburn Potential: With an increase in winds, reburn potential exists where only the surface fuels consumed, and brush was pretreated. Those areas are susceptible to reburn, especially where winds and slope align.

# **SAFETY MESSAGE**

## **Slater Fire**

**September 23, 2020**

An important aspect of safety is individual responsibility for one's own health and safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility is taught as the basis for a viable safety program.

### **Individual responsibilities**

- ✓ Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet,
- ✓ Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- ✓ Maintain situational awareness at all times
- ✓ Do not expect someone else to be responsible for your safety. Take it upon yourself to make "Safety" your number one priority.

### **Medical Incident Report (8 line)**

- Purpose of the 8-Line is have a standard process to get the right medical response to someone in need. Also any firefighter can fill out and transmit with prior training and direction.
- Treat it like an incident anyone may start out as the IC till someone with more experience can takeover.
- Always be ready for the first plan to fail have an alternate plan think Pace Primary, Alternate, Contingency, Emergency

The time to understand the medical evac. plan is before you need it. The plan is in IAP and under Emergency Medical Care (Pink) in the IRPG. Discuss with everyone around you. You may be the one depending on it to work to get you the proper care.

<b>6. Control Operations/Work assignments:</b>								
<p><b>Task:</b> Secure, improve, and hold containment lines within Division from division break with DIV RR to Althouse Creek to the north. Hold containment lines south along Althouse Creek Road to the 0-11 road. Complete hose lay to hold and mop-up along Althouse Creek on north end of division. Complete construction of dozer line from 0-18 road to FS 4703. Complete construction of line from the NF-042 road down to Sucker Creek.</p> <p><b>Purpose:</b> Keep fire south of Althouse Creek along northern portion of division west of Althouse road to minimize fire spread north into areas with additional values at risk. Protect life and property within division.</p> <p><b>End State:</b> Fire spread north into areas with higher values at risk is minimized. Division resources execute their respective missions and return safely at end of shift. All resource assignments are clearly understood. Resources are under clear command and within span of control.</p>								
<b>7. Special Instructions:</b> Safety: Be aware of hazards due to active mining claims in the area. Constructed line is in steep terrain. Watch footing, potential rollout, and snags in burned area. Current dozer line construction and operations on BLM property in division has been verbally approved by Bureau of Land Management resource (Jim Berge). Work with your resource advisor to avoid open mine shafts and protect cultural resource.

<b>6. Control Operations/Work assignments:</b>											
<b>Task:</b> Establish control line around the fire perimeter west of Highway 199. Continue using Structure Group to mop up and monitor in the Dwight Creek and Elk Creek areas. Continue contingency line in the Arrowhead housing complex. Scout and communicate alternate control lines should primary lines fail. Coordinate with Branch VIII on control lines and firing operation to contain fire west of 199. Continue to seek direct control lines from Monkey Ridge Northward towards Blue Creek.											
<b>Purpose:</b> Protect life and property in the O'Brien community. Establish an anchor point for Branch VII operations. Coordinate with adjacent Divisions regarding firing operations. Keep the planned ignition area as small as possible. Continue looking for direct line opportunities.											
<b>End State:</b> Threat of fire spread on the west side of Highway 199 into O'Brien is minimized.											
<b>7. Special Instructions:</b> Validate existing dozer and hand lines are spatially defined in Collector. If dozer line is planned to cross Bureau of Land Management, consult with READ. Coordinate with adjoining resources in Branch VIII regarding progress or barriers to containment of fire west of Highway 199. Coordinate with Structure Branch resources adjacent to your division. Communicate resource status and supply orders to Branch VII by 1400 daily. Avoid ground disturbance in the West Fork Illinois River Research Natural Area & Oregon Mountain Botanical Area. Within a ¼ of a mile of the river ground disturbance should be avoided.

<b>6. Control Operations/Work assignments:</b>										
<b>Task:</b> Complete and improve direct control lines. Mop up 10 feet along direct control lines and extend hose lays. Hold and improve control line above the community of Takilma. Coordinate with Structure Group when fire behavior threatens structures and community infrastructure.										
<b>Purpose:</b> Protect life, property, and resource values on the east side of the community of Takilma.										
<b>End State:</b> Direct line with improvements completed. Mop up progressing South from div TT break with hose lay. Also from Div PP break to Happy Camp Rd. Threat of fire spread into the community of Takilma is minimized. Division and Structure Group resources are executing their respective missions and all resources are under clear command and control.										
<b>7. Special Instructions:</b> Validate existing dozer and hand lines are spatially defined in Collector. If dozer line is planned to cross BLM land, consult with Resource Advisor. Coordinate with adjoining resources in Branch V, and with Structure Branch resources adjacent to your division. Communicate resource status and supply orders to Branch VII by 1400 daily. Work with your resource advisor to protect cultural resources, avoidance areas, and rare plants.

<b>6. Control Operations/Work assignments:</b>									
<b>Task:</b> Scout areas on the south and west side of fire to determine contingency lines from Division break to town of Gasquet. Assess the Little Jones Road Corridor as possible contingency line to the wilderness boundary. Continue to access structures along the Hwy 199 corridor.									
<b>Purpose:</b> Determine resource needs and locations of contingency lines to prevent fire spread.									
<b>End State:</b> Fire is contained within control and contingency lines.									
<b>7. Special Instructions:</b> Spike camp at Grassy Campground off Hwy 199. Continue to scout and prep counting your lines. Assist with structure protection as needed. Use Chippers along the Jawbone Road and elsewhere if needed.

<b>6. Control Operations/Work assignments:</b>										
<b>Task:</b> Continue prepping Knopki creek road from previous days burns towards Haystack Mountain. Hold and secure sections of Knopki road and Hwy199 that have been burned in previous days. Scout and prep potential handling along wilderness boundary to tie into Naches fire scar.										
<b>Purpose:</b> Hold the fire east of Hwy 199 and north and east of Knopki creek road and eventually tie the fire back into the wilderness.										
<b>End State:</b> Fire remains east of Hwy 199 and north and east of Knopki Creek road and is tied into natural barriers in the wilderness. To prevent fire spread from going west of Hwy 199.										
<b>7. Special Instructions:</b> Scout area to determine contingency lines and what equipment and resources needed for completion. Prepare for hose lay operations as fire line moves towards the designated wilderness areas. As weather permits utilize aerial ignition to begin backing fire from the ridge down towards Knopki road. Resources will spike at Grass Flats CG.

6. Control Operations/Work assignments:									
<b>Task:</b> Continue improvements and prep work on contingency lines to prevent movement and contain fire on west side of Highway 199. Continue black lining along Monkey Ridge Rd.									
<b>Purpose:</b> Keep fire movement in check. Contain fire on west side of Highway 199 tunnel to DIVS DD/GG break to keep it from growing in size.									
<b>End State:</b> Fire movement is stopped and contained east of the Monkey Creek drainage.									
7. Special Instructions: Spike Camp at Grassy Selma Lake. Use dozers and tactical water tenders to suppress and hold fire east of Monkey Ridge - FS 18N14 road. Work with your resource advisors about avoidance areas, cultural resources.

<b>TASK/MISSION/ ASSIGNMENT (Type/ function includes: Air Tactical, Retardant, Recon, Personnel Transport, Bucket Operations, SAR, etc.</b>				
Request from	Mission	AIRCRAFT	Time Needed	Comments
Branch 7. Divs JJ	#1 <b>PRIORITY in B7:</b> Bucket work to delay fire spread until control lines are complete			
Branch 7. Divs PP	#2 <b>PRIORITY in B7</b> Bucket work (T2 ok if T1 needed for JJ)			
Branch 7. Divs MM	#3 <b>PRIORITY in B7</b> Bucket work at DIV MM break (T2 ok if T1 needed for JJ)			
Branch 7. Divs RR	#4 <b>PRIORITY in B7.</b> Bucket work (T2 ok) to delay fire to handline construction & support potential burnout.			
Branch 5. Divs TT	#1 <b>PRIORITY in B5.</b> Bucket as requested & conditions allow. Hold west portion of division "lobe".			
Branch 5. Divs ZZ	Recon of W edge Devil. Bucket to slow NE fire spread (current comms thru Rogue dispatch)			FF w/RVCC
Branch 5. Divs UU	Bucket support as requested & conditions allow			
Branch 8. Divs DD	Buckets (heavy) in advance of NE winds to slow fire spread out of wilderness, and support blackline in 3-4 days (approx. 9/24-26)- Proposed Aerial ignition (UAS or helo) to initiate fire on ridge above Knopki Ck			
Branch 8. Divs GG	Buckets drops to hold Monkey Ridge			

**RESOURCE CONCERNS/INSTRUCTIONS**

<b>Retardant</b>	Track locations and gallons applied
	AVOID aerial application of retardant / foam / agent within 300' of waterways, bodies of water, etc.
	If Retardant / Foam / Agent is dropped within these areas immediately notify the AOB and provide the following information: Lat / Long, estimated number of gallons and a map detailing the area.
<b>Dipsites</b>	Track all dipsite use by gallons and locations (for cost share purposes)
	Dips from Kelly Lake must be dropped north of Klamath River and south of Oregon border
<b>Illinois Valley Helibase</b>	Minimize driving off pavement, utilize weed wash adjacent to airport, utilize Hotsy for bucket rinse if changing watersheds

**6. Special Medical Emergency Procedures:**

- 1) All patients, unless deemed extremely critical, will be screened in tents outside the facility to assess: (a) CDC risk factors; (b) presenting symptoms; (c) exposure risk(s); and (d) need for isolation and/or quarantine.
- 2) All staff performing triage will have and use proper PPE as per the AHJ.
- 3) All staff performing triage and/or working in the triage area(s) will have their vital signs, including temperature taken at least twice (2X) per shift.
- 4) Any staff having a temperature >100.3 will be relieved of duty and sent for further assessment to include testing.
- 5) Any actual or potential occupational exposures in the triage areas will be documented and reported as per AHJ.
- 6) All Staff will implement the AHJ's Infection Control protocols for handwashing, disinfection, site management, and patient isolation.
- 7) Patients will be limited to no more than two (2) visitors at a time for no more than 30 minutes at a time-four (4) hour intervals between visits- NO VISITS AFTER 8 P.M.

**Refer to Division Assignment (ICS 204) for line medical personnel coverage.**

## Slater Incident – North Zone: Resource Advisor Message

### Cultural Resources:

There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered that they are not disturbed in any manner.

- GPS its location and take a photo, but do not remove or collect anything. Work with your division to notify a resource advisor for recommendations on how to proceed.
- Some cultural resources present hazardous conditions, such as open mining shafts. Be attentive to these potential hazards when working around known mines or in rocky areas.
- Resource damage can usually be avoided with good communication. Known resources may be flagged ahead in work areas.

### Remember:

- Weed Wash: Please remember to use the weed wash when checking-in and during demob. Resources that arrived without initial weed-washing are being cycled through by division. Do not park in the flagged off weed patch at the mill site briefing area.

- Fish Screens: Please ensure that Mark 3 and engine/tender suction hoses have a 3/16" fish screen attached when drafting. Do not draft from areas marked as no-draft zones due to the presence of invasive aquatic species.
- Port-Orford cedar root disease: All water tenders and engines will apply bleach to their tanks in a 1 to 1000 ratio (using bleach with 6.0 % sodium hypochlorite).

# FINANCE PROCEDURES

## How to Check in with Finance

**Contractors & Cooperators:** Scan, take a picture, or attach an electronic copy of your **1.** Resource Order, **2.** Agreement, **3.** Pre-Use Equipment Inspection (if applicable), **4.** Crew Manifest (if applicable), and **5.** Travel Shift Ticket signed by your supervisor and email to [2020.slater.finance.north@firenet.gov](mailto:2020.slater.finance.north@firenet.gov) with **Finance Check In and your Resource Order number** in the subject line.

**ADs/Casual Hires:** Scan, take a picture, or attach an electronic copy of your **1.** Resource Order, **2.** Casual Hire Form with ECI#, and **3.** *Forest Service ADs only:* Receipts for travel to the incident if the fire will be processing your travel and email to [2020.slater.finance.north@firenet.gov](mailto:2020.slater.finance.north@firenet.gov) with **Finance Check In and your Resource Order number** in the subject line.

**Federal or State Gov't Employees:** Scan, take a picture, or attach an electronic copy of your **1.** Resource Order and email it to [2020.slater.finance.north@firenet.gov](mailto:2020.slater.finance.north@firenet.gov) with **Finance Check In and your Resource Order number** in the subject line.

- ODF, OSM and Local Fire Support resources **DO NOT** need to check in with Finance.

## How to Submit Your Time

Resources have two options:

1. Fill out your CTR/Shift Ticket, have your supervisor sign it, take a picture of it, and email it to Finance with the word **Time and your Resource Order number** in the subject line: [2020.slater.finance.north@firenet.gov](mailto:2020.slater.finance.north@firenet.gov).
2. Fill out an electronic CTR/Shift Ticket, email it to your supervisor to sign, and then email it to Finance with the word **Time and your Resource Order number** in the subject line: [2020.slater.finance.north@firenet.gov](mailto:2020.slater.finance.north@firenet.gov).

**Note:** *Ensure your CTR or Shift ticket has a supervisor's signature and shows meal breaks. Include a contact email and cell phone in the remarks!* Please do not wait to turn in your time. The electronic process may take some extra time, and we want to make this as smooth as possible for you. Thank you!

# SLATER AND DEVIL FIRES CHECK-IN

---

## Illinois Valley Support, ODF, & Large Fire Support Resources

Follow these check-in steps if your resource order shows you as assigned to Illinois Valley Support (ODF) or Large Fire Support:

- 1) Call status check in at **406-270-9870** or email [2020.slater.plans.north@firenet.gov](mailto:2020.slater.plans.north@firenet.gov)
- 2) Provide the following information:
  - arrival date/time,
  - resource order number,
  - resource name,
  - contact information (name, phone number, email),
  - first work day,
  - number of total personnel.

## Slater Fire Assigned Resources

If your resource order shows you as assigned to the Slater Fire, follow these check-in steps:

- 1) Fill out and submit the online check-in form available at [https://linktr.ee/slater\\_incident](https://linktr.ee/slater_incident) (or scan the QR code). Use your resource order to help you answer the questions.
- 2) Email copies of your 1) resource order; 2) red/qualification cards (line resources); and 3) manifest/roster (if applicable) to [2020.slater.plans.north@firenet.gov](mailto:2020.slater.plans.north@firenet.gov) with your resource order number in the subject line.
- 3) Email copies of your finance paperwork to [2020.slater.finance.north@firenet.gov](mailto:2020.slater.finance.north@firenet.gov) with "Finance Check In" and your resource order number in the subject line. See the finance page in the IAP for more information.
- 4) Wait for confirmation that you are checked in. Check in will provide instructions for how to contact your division. Contact check-in at 406-270-9870 or [2020.slater.plans.north@firenet.gov](mailto:2020.slater.plans.north@firenet.gov) if you have not been contacted within 2 hours of initially emailing your paperwork.

# MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications / dispatch.**

1. **CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report) *Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*
2. **INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.  
*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. <b>Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location	<i>Descriptive Location &amp; Lat. / Long. (WGS84)</i>
Incident Name	<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander	<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care	<i>Name of Care Provider (Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

**4. TRANSPORT PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication*

**6. COMMUNICATIONS:** Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY:** Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
