

SLATER & DEVIL INCIDENTS

CA-KNF-007035 (P5NKM3) IAP

Thursday, October 1, 2020 (0700-1900)

**Change in Procedures are Situations
That Shout Watchout!**

Happy Camp-Grayback Road Closures for Incident personnel	
Closed	0900-1200
Open	1200-1300
Closed	1300-1530
Open	1530-1630
Soft Closure (up to 20 Minute delays)	1630-2000
Open	2000-0900

NEW PROCEDURES

Every firefighter receives briefings at some point on the job. Briefings Are an effective way to disseminate information that makes the firefighter’s job safer and easier. After several briefings you may become complacent. You may not listen to parts of the briefing that never seem to change. You also may skip over parts of the IAP that never seem to change. Some changes, such as a change in how Medical Evacuations are performed could be the difference between life and death. Make sure you are familiar with forms and procedures in the daily IAP. Read the IAP. Be aware of changes. When giving a briefing, it is important to let others know that changes have occurred in the IAP the could change the procedures on the line.

INCIDENT OBJECTIVES	1. INCIDENT NAME Slater & Devil	2. DATE 09/30/2020	3. TIME 1930
<p>4. OPERATIONAL PERIOD</p> <p>Commander's Intent:</p> <p>It is my expectation that we as an organization will meet the following Leader's Intent as well as the objectives identified below:</p> <ul style="list-style-type: none"> • Ensure all incident strategies and actions reflect a commitment to public, responder, and aviation safety through use of the risk management process as outlined in the IRPG and the aviation risk assessment process. • Coordinate incident management activities with our requesting and cooperating agencies including but not limited to suppression actions and support needs. • Treat all incident personnel, cooperators, and local publics with dignity and respect creating a "no tolerance" atmosphere for harassment, alcohol, or illegal drug use. <p>Values of Concern:</p> <ul style="list-style-type: none"> • Neighboring communities and private residences in California and Oregon. • Critical communication and utility infrastructure including high power transmission lines, DOD/AT&T fiber optic cable, communication sites and repeaters. • Highway 199 providing a main thoroughfare for inland and coastal areas of Southern Oregon and Northern California. • Many historic, natural, cultural and recreational values within the fire area including historic buildings and multiple T&E species. • Economic values impacted by area closures. <p>Management Objectives:</p> <ul style="list-style-type: none"> • Provide for emergency personnel and public safety at all times through the utilization of a deliberate risk-informed approach, with avenues for feedback from personnel. Also, ensure COVID-19 precautions and best practices are met by following agency, team and county guidance. • Reduce the impacts of fire on communities, major infrastructure and private lands. • Foster and maintain relationships with the public, cooperators and stakeholders. • Ensure coordinated, timely and accurate release of public information. When possible utilize virtual platforms. • Maintain fiscal accountability by making good risk-informed decisions. • All personnel assigned should receive evaluations prior to leaving the incident. <p>Operational Objectives:</p> <ul style="list-style-type: none"> • Under the full suppression strategy, utilize direct and indirect tactics to minimize fire size. As feasible utilize minimum impact suppression tactics within the Red Buttes and Siskiyou Wilderness areas. • Protect the values of concern identified above by suppressing the wildfire and utilizing point protection of structures when necessary. • Scout, recon and identify primary and alternate containment opportunities considering resource availability and probability of success. • Work collaboratively to refine and implement the population protection plan when necessary. • Coordinate with lead Resource Advisor, including the Karuk Tribe representative, and operational Resource Advisors to minimize natural and cultural resource damage. • Provide initial attack for the Rogue Siskiyou NF in the area under the Temporary Flight Restriction. • Secure lines and mop-up to the level necessary based on site conditions associated with the values at risk to make the likelihood of escape minimal considering current/predicted weather conditions.

FIRE WEATHER FORECAST

FORECAST NO. 21

NAME OF FIRE: Slater & Devil

PREDICTION FOR: Thursday October 1, 2020

UNIT: Klamath National Forest

TIME AND DATE

SIGNED: Julia E. Ruthford

FORECAST ISSUED: 2000 Wednesday 9/30/20

Julia Ruthford – 971-221-6728
Incident Meteorologist

WEATHER DISCUSSION: A strong ridge of high pressure over the area will bring another day of unseasonably warm, dry and smoky weather. Strong thermal belts and dry air aloft will keep ridge level RHs low again tonight while lower slopes will see moderate recoveries. Smoke from the fires to the south will continue to blanket the area. While near ground visibility is expected to improve somewhat through the day, the broader smoke layer is unlikely to clear. Winds overall will remain on the lighter side with smoke shading keeping the typical afternoon terrain driven up-slope/up-valley winds lighter than normal.

THURSDAY:

WEATHER: Sunny with a thick layer of smoke over the area. Continued warm and dry.

MAXIMUM TEMPERATURE: Highs in the low 90s valleys and 80s ridges.

MINIMUM RELATIVE HUMIDITY: Mid to upper teens.

20 FOOT WINDS:

Slopes and Valleys – General winds S-SE 3 to 5 mph in the morning becoming NW to SW 4 to 7 mph in the afternoon. Up-slope/up-valley winds developing midday in areas of complex terrain but generally remaining lighter than normal due to the smoke shading.

Ridges and Peaks – E-NE winds 10 to 15 mph with gusts to 20 mph early diminishing to 5 to 7 mph mid to late morning. NW winds 8 to 10 mph in the afternoon.

STABILITY: Moderate morning valley inversions. Unstable in the afternoon above the smoke layer.

CHANCE OF RAIN: 0% **LAL:** 1

SMOKE TRANSPORT WIND: S 5 mph becoming SE 15 mph in the afternoon.

THURSDAY NIGHT:

WEATHER: Dry and smoky.

MINIMUM TEMPERATURE: Lows in the upper 60s valleys and upper 60s to low 70s slopes and ridges.

MAXIMUM RELATIVE HUMIDITY: Along ridges max RHs around 25 to 30% late evening then dropping to 15 to 20% through the early morning hours. Lower slope max RH 40 to 50% and 60 to 70% valleys.

20 FOOT WINDS: NW winds 5 mph in the evening becoming light after sunset. E-NE winds 8 to 12 mph developing along ridge-tops after midnight with light down-slope/down-valley winds elsewhere.

STABILITY: Strong thermal belt effects mid slope and ridges, stable at lower elevations with smoke continuing to move into the area from the fires to the south and settle into valley inversions.

CHANCE OF RAIN: 0% **LAL:** 1

SMOKE TRANSPORT WIND: SE 5 to 10 mph becoming SW 5 mph towards morning.

FRIDAY AND SATURDAY: Onshore flow along the coast will increase somewhat Fri and Sat bringing a slight cooling and moistening trend. NW winds will increase to 10 to 15 mph along the ridges with gusts up to 20 mph in the afternoons. High temperatures will drop into the mid-80s with min afternoon RHs around 20%. Nighttime RH recoveries will improve along western portions of Slater.

OUTLOOK FOR SUNDAY THROUGH TUESDAY: The general flow pattern will turn more northerly on Sun, NE Sun night through Mon morning then SE Mon afternoon through Tue morning and SW Tue afternoon. Winds throughout these directional shifts will remain fairly light and unlikely to help clear out much smoke but the offshore wind component will begin another warming and drying trend.

Please email observations to julia.ruthford@usda.gov or text them to 971-221-6728. Thanks!

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #15	TYPE OF FIRE: Wildland Fire
FIRE NAME: Slater and The Devil	OPERATIONAL PERIOD: Day 10/01/2020
DATE ISSUED: 09/30/2020	TIME ISSUED: 2000 hrs
UNIT: Klamath National Forest	SIGNED: /S/ Warren Appelhans, David Tingley FBAN(t)

WEATHER

Warm & Dry

See Fire Weather Forecast for Details

FUELS

- Fire is burning in mixed conifer stands with a shrub understory.
- Secondary fuel types are moderate brush fields and grass shrub mix.
- Fuel Moistures - Fine Dead Fuels (5-8) & 10-Hour Fuels should get down to (7-10%)

FIRE BEHAVIOR

GENERAL:

- Be aware of the potential for fire weakened trees to fall across control lines.
- As fuels dry out, areas where pine litter is present will be the first available fuels for significant fire activity. Be on the lookout for those areas when sizing up your tactics.

SPECIFIC:

- **DIV W & ZZ** –The dirty fire edge up Thompson Cr. will continue to smolder, especially in areas that were logged and brush and regen are the prominent fuels. Where pockets of pine exist in the regen, some active fire may be observed.
- **DIV DD/GG** –The fire edge up Knopki Cr. will continue to back down drainage. Fine fuels that were sitting on moist duff, have dried and should readily burn, including the top layer of duff.
- **DIV PP/TT/MM** – A lot of good suppression work is completed in these Divisions and should be reflected in minimal fire activity today. The open line above Sucker Cr. road near Division TT is smoldering. This area is dependent on leaf litter and resides on the lower 1/3 of a NE slope and is getting minimal sunlight.
- **DIV UU** – The fire is checked up in Sucker Cr. nearer to DIV TT, but as you move east and south updrainage, this feature will not check itself up. As crews get nearer to Swan Mtn., anticipate an active fire edge, including some single tree torching. Higher elevation locations like Swan Mtn. may be above smoke shaded inversions and may remain active.

AIR OPERATIONS

Yesterdays air quality varied across the fire area.
If that happens again today, you may have enough clear air to utilize air support.

SAFETY

“Shallow men believe in luck. Strong men believe in cause and effect.”
-Ralph Waldo Emerson

SAFETY MESSAGE

Slater Fire

October 01, 2020

Fatigue

Accumulated Fatigue often caused by long periods of stress with inadequate recovery periods. Been a long fire season especially in California add dealing with Covid since February and adjusting life styles the stress and work load has been here for some time.

Indicators

- ✓ Decreased motivation
- ✓ Increased Irritability
- ✓ Trouble with concentration/attention

Mitigation

- Take periodic rest breaks
- Eat well- balanced meals
- Hydrate
- Try to get adequate rest

Mop up and roll out

One of the 5 common denominators on tragedy or near miss fires is fires innocent in appearance then when fire weather and fire behavior come together causes a sudden flare ups or extreme fire behavior even in the mop-up stage.

Steep slopes out there and dynamics have changed. Things that have been holding material in place have burned away and rocks, logs, trees are coming down

Let's keep our head in the game, ear to the radio, and eyes all around

If you hear something say something

Turman's Safety Team Northern Rockies Safety Team 2

7. Control Operations/Work Assignments: Task: Patrol and monitor perimeter roads daily to ensure accessibility to fire perimeter. Mop-up control lines and around structures as appropriate to secure these areas. Scout and communicate alternate control lines should primary lines fail. Be available for initial attack upon request. Maintain indirect line on the northern boundary Seiad. Patrol Devil (south edge) by air. Continue to secure Thompson Cr. road with black line operations as necessary moving north. Mop-up control lines and around structures as appropriate to secure these areas. Scout and communicate alternate control lines should primary lines fail. Purpose: Allow safe access between the north and south ends of fire, to Bolan Lookout communications site and to fire edges. Protect life, property, and resource values. Bring fire down to control lines across the division where appropriate. End State: Maintain roadways for safe travel of fire resources. All line on the division is direct control line.									
8. Special Instructions: # = resource identified as initial attack. Backhaul any excess line supplies and trash. Air support as needed. Mop up Standards: The level of mop-up intensity will be based on site conditions (at the division level) of the value at risk, fuel bed receptiveness and spread potential in the area adjacent to the containment line to the extent necessary to make the likelihood of escape minimal, based on professional experience, terrain, fuel types and conditions, and current/predicted weather conditions.

7. Control Operations/Work Assignments:								
Task: Hold and secure sections of Knopki Creek Road that have been burned in previous days. Scout and prep potential handline along wilderness boundary to tie into Naches fire scar.								
Purpose: Hold the fire north and east of Knopki Creek Road and eventually tie the fire back into the wilderness and Naches fire footprint.								
End State: Fire remains east of Hwy 199 and north and east of Knopki creek road and is tied into natural barriers in the wilderness. To prevent fire spread from going west of Hwy 199. Pull excess equipment to supply.								
7. Special Instructions: Scout area to determine contingency lines and what equipment and resources needed for completion. As weather permits utilize aerial ignition to begin backing fire from the ridge down towards Knopki Creek Road as needed. Resources will spike at Grass Flats CG.								
Mop up Standards: The level of mop-up intensity will be based on site conditions associated with the values at risk, fuel bed receptiveness, and spread potential in the areas adjacent to the containment line to the extent necessary to make the likelihood of escape minimal. Operate based on your professional experience and current/predicted weather conditions.

7. Control Operations/Work Assignments:								
Task: Hold and improve control lines to prevent movement and contain fire on west side of Highway 199.								
Purpose: Prevent fire spread to the west.								
End State: Fire movement is stopped and contained east of the Monkey Creek drainage.								

8. Special Instructions:

Spike camp at Grassy Lake. Work with your resource advisors about avoidance areas and cultural resources. Continue chipping operation. Remove all accountable property and unneeded equipment and supplies from fireline.

Mop Up Standards: The level of mop-up intensity will be based on site conditions associated with the values at risk, fuel bed receptiveness, and spread potential in the areas adjacent to the containment line to the extent necessary to make the likelihood of escape minimal. Operate based on your professional experience and current/predicted weather conditions.

Control Operations/Work Assignments: Task: Continue to mop up to mop up standards and patrol specific portions of division. Inventory all accountable property. Mitigate hazard trees around structures.								
Purpose: Protect life, property, and resource values on entire division.								
End State: North end from Happy Camp Road to TT break will be in patrol status. Happy camp road South to DP 51 continue to mop up one chain.								
South PP: From end of 018 road, patrol 018 rd. to where handline leaves the O19 rd. Patrol control line from 019 handline westerly to Takilma Road. Patrol Takilma Road South to community of Sunstar. West of Takilma road patrol around structures. Minimize operational impacts to community of Takilma.								
Special Instructions: # = resource is IA available. Inventory accountable property.								
Mop Up Standards: The level of mop-up intensity will be based on site conditions (at the division level) of the value at risk, fuel bed receptiveness and spread potential in the area adjacent to the containment line to the extent necessary to make the likelihood of escape minimal, based on professional experience, terrain, fuel types and conditions, and current/predicted weather conditions.

7. Control Operations/Work Assignments:								
<p>Task: Mop-up and patrol containment lines south along Althouse Creek Road to the 0-11 road. Mop-up and improve containment lines from 0-18 road to FS 4703. Secure and improve direct line construction along fire's edge near Secure Creek and division break with UU.</p> <p>Purpose: Keep fire within containment lines in Division and west of Althouse road to minimize fire spread north into areas with additional values at risk. Keep fire west of Sucker Creek. Protect life and property within division.</p> <p>End State: Fire spread into areas with higher values at risk is contained. Division resources execute their respective missions and return safely at end of shift. All resource assignments are clearly understood. Resources are under clear command and within span of control.</p>								
8. Special Instructions:								
<p>Safety: Be aware of hazards due to active mining claims in the area. Constructed line is in steep terrain. Watch footing, potential rollout, and snags in burned area. Current dozer line construction and operations on Bureau of Land Management property in division has been verbally approved by Bureau of Land Management resource (Jim Berge). Work with your resource advisor to avoid open mine shafts and protect cultural resource.</p> <p>Mop up Standards: The level of mop-up intensity will be based on site conditions associated with the values at risk, fuel bed receptiveness, and spread potential in the areas adjacent to the containment line to the extent necessary to make the likelihood of escape minimal. Operate based on your professional experience and current/predicted weather conditions.</p>

7. Control Operations/Work Assignments:								
Task: Continue to hold and secure Sucker creek and Left fork of Sucker creek drainages. Hold and secure direct line on fires edge. Find opportunities to continue along Swan ridge with control line.								
Purpose: Protect life and property along the Highway 46 and Oregon Caves National Monument. Establish an anchor point for Branch V operations to minimize fire spread towards the Oregon Caves National Monument.								
End State: Threat of fire spread along Highway 46 and Oregon Caves National Monument is minimized. Division resources are executing their respective missions and all resources are under clear command and control.								
8. Special Instructions: Develop management action point on south edge of Oregon Caves National Monument boundary. Proposed action would be to consider activating structure protection sprinklers, dependent on observed rates of spread. Work with your READ to protect cultural resources, rare plants, and the Oregon Caves National Monument.								
Mop up Standards:								
The level of mop-up intensity will be based on site conditions (at the division level) of the value at risk, fuel bed receptiveness and spread potential in the area adjacent to the containment line to the extent necessary to make the likelihood of escape minimal, based on professional experience, terrain, fuel types and conditions, and current/predicted weather conditions.

7. Control Ops/Work Assignments:								

NORTH

SOUTH

Task: Patrol/monitor Happy Camp, Gray Back Rd., and Bolan Lookout Rd. daily to ensure passageway is clear. Identify and remove hazardous trees that could impact and block the Gray Back Rd., generally identified as 150 feet upslope and 100 feet downslope of the road. Follow the Slater Fire Hazard Tree Guidance Document.

Purpose: Allow safe access from north to south ends of fire and to Bolan Lookout communications site.

End State: Maintain roadway for safe travel of fire resources.

8. Special Instructions:

Ensure that the road can be cleared for emergency traffic within 15 minutes or less. There will be no closures of the road between 1700 and 1830. The road being open during that time is required for logistical support from Lake Selmac to Happy Camp. Engines will be utilized for mop up and fire watch as needed. Ensure compliance with Happy Camp-Grayback Road Hazardous Tree Mitigation Traffic Control Plan.

7. Control Operations/Work Assignments: General patrol and mop up as needed in branches III and V.										
8. Special Instructions: Mop Up Standards: The level of mop-up intensity will be based on site conditions associated with the values at risk, fuel bed receptiveness, and spread potential in the areas adjacent to the containment line to the extent necessary to make the likelihood of escape minimal. Operate based on your professional experience and current/predicted weather conditions.

TASK/ MISSION/ ASSIGNMENT (Type/ function includes: Air Tactical, Retardant, Recon, Personnel Transport, Bucket Operations, SAR, etc.)				
Request from	Mission	AIRCRAFT	Time Needed	Comments
UU	Helispot Approval 42 02.852 x 123 24.009			
Divs MM	Bucket support and recon			
Divs TT	Bucket as requested & conditions allow.			
Divs ZZ	Bucket to slow NE fire spread			
Divs UU	Bucket support as requested and conditions allow. HLCO or ATGS may be ordered for recon of Left Fork of Sucker Creek			
Divs DD	Buckets and recon as requested			
. Divs GG	Bucket support and recon			

RESOURCE CONCERNS/INSTRUCTIONS	
Retardant	Track locations and gallons applied
	AVOID aerial application of retardant / foam / agent within 300' of waterways, bodies of water, etc.
	If Retardant / Foam / Agent is dropped within these areas immediately notify the AOB and provide the following information: Lat / Long, estimated number of gallons and a map detailing the area.
Dipsites	Track all dipsite use by gallons and locations (for cost share purposes)
	Dips from Kelly Lake must be dropped north of Klamath River and south of Oregon border
Illinois Valley HB	Minimize driving off pavement, utilize weed wash adjacent to airport, utilize Hotsy for bucket rinse if changing watersheds

Hazardous Tree Mitigation Traffic Control Plan Happy Camp RD, Grayback RD and Indian Creek

In order to decrease the amount of non-essential traffic travel delays on the Happy Camp Road, Grayback Road and Indian Creek Road, the following timeline will allow for increase work efficiency and reduce travel delays.

It is essential that emergency traffic will have no more than a 15 minute delay.

05:00-09:00 Open for Slater Fire incident traffic

09:00-12:00 EMERGENCY traffic only

12:00-13:00 Open for Slater Fire incident traffic

13:00-15:30 EMERGENCY traffic only

15:30-22:00 Open for Slater Fire incident traffic

Special Management Areas in the Slater Fire

West Fork Illinois River Research Natural Area -1284 acres is located SW of Obrien. BLM-administered lands are Congressionally Reserved Lands and National Conservation Lands within the West Fork Illinois River suitable Wild and Scenic River segment. There are many large *Darlingtonia* wetlands in this area.

Waldo-Takilma Area of Critical Environmental Concern – 1757 acres is located west of the Takilma community below Sanger Peak. It is an area known for historic, cultural, and rare plant habitat associated with low to high elevation serpentine Jeffrey pine forests. The first county seat of Josephine County was Waldo.

Oregon Mountain and Lone Mountain Botanical Areas - The Oregon Mountain Botanical Area is located on the Wild Rivers Ranger District a few miles southwest of the town of O'Brien. The serpentine soils are derived from ultramafic rock and are the home to many rare endemic plant species and *Darlingtonia* wetland areas.

Red Buttes Wilderness -The 20,796-acre Red Buttes Wilderness straddles the crest of the Siskiyou Mountains. The area's geology is ancient and very complex; some of the highest points were carved by glaciers during the last Ice Age.

Siskiyou Wilderness - The 182,802 acres of the Siskiyou Wilderness cross Del Norte, Humboldt, and Siskiyou counties of northwestern California. The territory is characterized by forested ridges and high craggy peaks. Patches of snow often linger year-round. The area contains fragile mountain meadows, open glades, and shallow lakes.

INCIDENT RECYCLING

Slater Fire Impact (9/13/2020 - 9/25/2020)

MATERIAL	LBS RECYCLED
PLASTIC BOTTLES	854 lbs
ALUMINUM CANS	285 lbs
PAPER	839 lbs
CARDBOARD	6,810 lbs
FOOD DONATION	1,716 lbs non-perishable

- Non-perishable food donation goes to the Karuk Tribal Center and community members displaced by the fire in Happy Camp, CA, as well as Joe’s Place Ministries in Grants Pass, OR.
- Proceeds from Lake Selmac bottle and can collection go to Joe’s Place Ministries in Grants Pass, OR. Which support low income youth and their families.
- Proceeds from Happy Camp bottle and can collection go back to the Host Unit as recycling revenue.

HOW TO RECYCLE WITH US

1. Come to the recycle center and pick up a blue recycle bag
2. Drop off at the recycle center blue bags with bottles, cans, and paper bags
3. Empty food boxes into the dumpster from large cardboard box, and place cardboard next to the dumpster for recycling
4. Use the recycling stations around camp to separate your trash

Come ask us questions! We’re happy to chat!

SLATER CHECK-IN, TIME AND DEMOB INSTRUCTIONS

Due to COVID-19 safety precautions, the physical distance of resource locations, and limited support staff on the incident; virtual procedures and approvals will be used in lieu of paper copies.

***** See IAP Resource Indicators for “ODF” and “LFS” *****

“ODF” resources ordered under Illinois Valley Support incident (OR-712S-047521)

1. **Check-In:** Call Status Check-In at [406-270-9870](tel:406-270-9870) or email 2020.slater.plans.north@firenet.gov - identify yourself as an **“ODF Resource.”** Provide the following information: 1.) arrival date/time, 2.) resource order number, 3.) resource name, 4.) contact information (name, cell phone, email), 5.) first work day, and 6.) total number of personnel.
2. **Time:** Submit your time by filling out your CTR/Shift Ticket, having your supervisor sign it, take a **clear** picture of it, and email it to 2020.slater.finance.north@firenet.gov with “Time” in the subject line. Slater Finance will **forward** your time to the ODF Illinois Valley Finance personnel. If you have questions you can call ODF Finance at [541-474-3152](tel:541-474-3152).
3. **Demob & Extension Requests:** Ensure your last workday is correct. Call ODF Finance **after 0830** at [541-474-3152](tel:541-474-3152) to schedule a finance demob appointment. Be sure to bring your last shift ticket/CTR and the ticket book to the appointment. Resources will complete a 1.) weed wash, and virtual clearance: 2.) supply, 3.) comms , and 4.) ODF Finance. Complete the Demob Release Form with your ETAs available at https://linktr.ee/slater_incident or scan the universal Slater QR code **prior** to leaving ICP.

Critical extension requests will be coordinated with your incident supervisor, and should be turned back into Demob as soon as practical. Contact DMOB for questions at [541-423-2617](tel:541-423-2617) (desk) [703-939-1932](tel:703-939-1932) (cell) or 2020.slater.dmob.north@firenet.gov .

“LFS” resources ordered under RSF Large Fire Support incident (OR-RSF-000001)

1. **Check-In:** Call Status Check-In at [406-270-9870](tel:406-270-9870) or email 2020.slater.plans.north@firenet.gov - identify yourself as **“LFS Resource”**. Provide the following information: 1.) arrival date/time, 2.) resource order number, 3.) resource name, 4.) contact information (name, cell phone, email), 5.) first work day, and 6.) total number of personnel.
2. **Time:** Continue to charge and submit your time as directed by the RSF Large Fire Support finance personnel – please **do not** send your time to Slater Finance. For questions please call [541-592-4002](tel:541-592-4002) (desk) or [541-589-2142](tel:541-589-2142) (cell).
3. **Demob & Extension Requests:** Ensure your last workday is correct. Resources will complete a 1.) weed wash, and virtual clearance: 2.) supply, 3.) comms, and 4.) LFS Finance. Work with your RSF Large Fire Support finance personnel to schedule your final finance paperwork. Complete the Demob Release Form with your ETAs available at https://linktr.ee/slater_incident or scan the universal Slater QR code **prior** to leaving ICP. Contact DMOB for questions at [541-423-2617](tel:541-423-2617) (desk) [703-939-1932](tel:703-939-1932) (cell) or 2020.slater.dmob.north@firenet.gov .

Critical extension requests should be coordinated through RSF Large Fire Support planning personnel.

Resources ordered under Slater incident (CA-KNF-007035)

1. **Check-In:** Fill out and submit the online check-in form available at https://linktr.ee/slater_incident or scan the universal Slater QR code. Use your resource order to help you answer the questions. Email copies of the following: 1.) resource order, 2.) qualification/red card for line resources, and 3.) manifest/roster (if applicable) to: 2020.slater.plans.north@firenet.gov with your resource order number in the subject line.

Next email your finance check-in information to 2020.slater.finance.north@firenet.gov with "Finance Check In" and your resource order number in the subject line:

- **Contractors and Cooperators:** Scan, take a picture, or attach an electronic copy of your 1.) resource order, 2.) agreement, 3.) pre-use equipment inspection (if applicable), and 4.) manifest/roster (if applicable). Your incident supervisor will sign your travel CTR/shift ticket.
- **ADs/Casual Hires:** Scan, take a picture, or attach an electronic copy of your 1.) resource order, 2.) casual hire form with ECI#, and 3.) *Forest Service ADs only:* receipts for travel (if the fire will be processing your travel).
- **Federal or State Gov't Employees:** Scan, take a picture, or attach an electronic copy of your resource order.

Wait for confirmation that you are checked in. Check-In will provide instruction for how to contact your supervisor. Contact Check-In at [406-270-9870](tel:406-270-9870) if you have not been contacted within 2 hours of initially emailing your paperwork.

2. **Time:** Submit your time by filling out your CTR/Shift Ticket, having your supervisor sign it, take a **clear** picture of it, and email it to 2020.slater.finance.north@firenet.gov with "Time" in the subject line. (There are electronic time forms also available at https://linktr.ee/slater_incident or scan the universal Slater QR code.) If you have questions you can call Slater Finance at [541-450-9632](tel:541-450-9632).
3. **Demob & Extension Requests:** Your incident supervisor will need to submit a release request general message to Demob 72 hours prior to your departure. Ensure your last workday is correct, and resources requiring air travel should contact Demob at least three days in advance of travel to make flight arrangements. Resources will complete a virtual Checkout Form for clearance: 1.) weed wash, 2.) supply, 3.) communications, 4.) facilities, 5.) ground support, 6.) finance. Finish the process by Completing the Demob Release form found on the QR Code or https://linktr.ee/slater_incident

For finance submit all final CTRs/shift tickets to 2020.slater.finance.north@firenet.gov with "Demob" in the subject line. Finance will email your signed final OF-288 or OF-286 to you after they post your final time. If there are issues reply to the email, but if everything is correct you have cleared finance.

For documentation submit all records to 2020.slater.plans.north@firenet.gov . For demob complete the Demob Release Form with your ETAs available at https://linktr.ee/slater_incident or scan the universal Slater QR code **prior** to leaving ICP.

Critical extension should be coordinated with your incident supervisor, and turned back into Demob as soon as practical. Contact DMOB for questions at [541-423-2617](tel:541-423-2617) (desk) [703-939-1932](tel:703-939-1932) (cell) or 2020.slater.dmob.north@firenet.gov .

v. 09/26/2020

TRAINING MESSAGE

A friendly reminder to please close out with the Incident Training Specialist prior to demob.

In order to receive credit for your assignment, you must provide the following to the training specialist via email at debra.burgos@usda.gov:

1. Incident Performance Rating;
2. Evaluation Record (located in the back of the position task book);
3. Final Evaluator page (located on the backside of your PTB cover page). Only submit if your evaluator initialed #1 on your Evaluation Record; ensure he/she signs, as required;
4. Exit Interview – Can be completed by scanning the QR Code below:

[SLATER FIRE TRAINEE EXIT INTERVIEW](#)

Note: Evaluation Record and Incident Performance Rating forms are available electronically upon request.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT (Green), WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. NO NEED TO RESTRICT RADIO TRAFFIC UNLESS PATIENT CONDITION ELEVATES.

FOR A MEDICAL EMERGENCY (Red/Yellow): IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.
