North Complex: Bear & Claremont Fires Weather Forecast

FORECAST NO: 7 UNIT: CA-PNF

SHIFT DATE: Friday, Aug 28, 2020 **PREDICTION FOR:** 0700 - 1900

FORECAST ISSUED: 1930 hrs. 8/27/20

Incident Meteorologist: Brett Lutz

SIGNED:

You can call, text, or e-mail obs to: (240) 778-5297 / Brett.Lutz@noaa.gov

...A Slight Chance of Showers & Thunderstorms Expected Between 1300-1900L Today...
...Hot and Dry Afternoons Continuing Into Next Week...

WEATHER DISCUSSION: An east flow this morning will fade out over the area today as weak low pressure in the upper levels moves overhead. Moisture and instability are looking lesser than they previously were, so there will be only a slight chance of showers and thunderstorms this afternoon into early this evening. Winds will be light and weather conditions will change very little over the coming days with cool night-morning and hot, dry afternoons.

Today (0700-1900):

Weather: Smoky, lifting between 0700 and 1500L mostly north and east of the fires. Smoke densest in the Middle

Fork of the Feather River drainage. Smoke increasing and spreading eastward 1600L through the evening.

Otherwise, Mostly Sunny in the morning with increasing clouds in the afternoon. A slight chance of

showers and thunderstorms between 1300L and 1900L.

High Temperatures: 78-85° Upper Slopes & Ridges, 86-95° Low-Mid Slopes & Valleys. (Trend: Up 5°)

Afternoon Humidity: 14-20%, except 20-30% upper slopes and ridges. (Trend: Down 5%)

20 Foot Winds:

Valleys/Lower Slopes: Downslope & down drainage 5 mph in the morning, then becoming upslope and up valley

5-10 mph in the afternoon.

Upper Slopes & Ridges: E 5-15 mph through early afternoon, then becoming west 5 mph in the afternoon.

(Wind Trend: East wind 5 mph stronger through early afternoon, then lighter winds afternoon)

Transport Wind: ESE 7 mph, becoming variable 5 mph in the afternoon, then W 5 mph early evening.

LAL: 2.

Che of Wetting Rain (> or = to 0.10"): 10%

Stability: Inversion at 6,800ft MSL until noon local time.

Afternoon Mixing Height: 20,000 feet MSL.

Tonight (1900-0700):

Weather: Partly cloudy and smoky.

Temperatures: Lows 53° valley bottoms to 69° ridges. (Trend: Up 2-4°)

Overnight Max Humidity: Valleys: 45-80%; Ridges: 25-45%. (Trend: Down 5-15%, greatest ridges)

20 Foot Winds:

Lower Slopes: NW 5 mph early in the evening, becoming downslope and down valley 5 mph.

Upper Slopes: NW 5.

LAL: 1

Chc of Wetting Rain (> OR = to 0.10"): 0%

Inversion: 6,800ft with smoke becoming trapped below it.

2-5 Day Outlook, Saturday-Tuesday:

Southwest winds 5-15 mph Saturday afternoon. Northwest afternoon winds Sunday afternoon. Otherwise, mostly clear with cool mornings with moderate to poor RH recoveries on the upper slopes and ridges, and hot, dry afternoons. Max Temps 75-95° with Minimum RHs 10-25%. Overnight Lows 41-68°. Max RHs: 25%-95%.

Observations from Thursday, 8/27/20:

Pierce (5811ft) SW of Sheep Fire: Temps: 53F/81F, RH: 85%, 21%, Max wind: NW 17 mph.

Buck Lake Road West (3793ft) NE of Bear Fire-Temps: 48F/84F, RH: 99%, 25%, Max wind: SSW 6 mph.

Feather River College (3425ft) near ICP- Temps: 48F/87F, RH: 100%, 25%. Max wind: SW 7 mph.

Sheep Fire Weather Forecast

FORECAST NO: 1 UNIT: CA-PNF

SHIFT DATE: Friday, Aug 28, 2020 PREDICTION FOR: 0700 Fri – 0700 Sat FORECAST ISSUED: 1930 hrs. 8/27/20

Incident Meteorologist: Christian Cassell SIGNED:

(240) 778-5305 / Christian Cassell@noaa.gov

... Continued Hotter and Drier Today Into Saturday...

WEATHER DISCUSSION: Another very warm and dry day is on tap, but with a slight chance for isolated showers and thunderstorms in the afternoon and early evening. Any storms will be slow movers, with the potential for gusty and erratic outflow winds and moderate rainfall. Generally easterly winds, occasionally gusty toward ridgetops, will give way to a more light and variable wind regime in the afternoon along with the typical upslope/upvalley winds.

Today (0700-1900):

Weather: Mostly Sunny, then partly cloudy in the afternoon. Smoky. A 20% chance of thunderstorms in the

afternoon/evening. Storms will be capable of producing gusty and erratic outflow wind gusts.

High Temperatures: 75-82° Upper Slopes & Ridges, 83-92° Low-Mid Slopes & Valleys. (Trend: Up 3°)

Afternoon Humidity: 13-22%. (Trend: Down 2-3%)

20 Foot Winds:

Valleys/Lower Slopes: East to Northeast or Downslope/Downvalley 5 mph in the morning, then becoming

Upslope/Upvalley 5-10 mph in the afternoon.

Upper Slopes & Ridges: East 5 to 10 mph with gusts to 15 mph. Winds becoming variable in the late afternoon

and early evening.

(Wind Trend: Speeds same to 5 mph less and direction W instead of SW in the afternoon upper slopes & ridges)

Transport Wind: E or NE 5-10 mph becoming light and variable in the afternoon.

LAL: 2.

Che of Wetting Rain (> or = to 0.10"): <5%

Che of Wetting Rain (> OR = to 0.10"): <5%

Stability: Inversion at 4000-ft agl until noon local time.

Afternoon Mixing Height: 10,500 feet agl.

Tonight (1900-0700):

Weather: Mostly clear. Smoky. A 20% chance of thunderstorms early in the evening.

Temperatures: Lows 50° valley bottoms to 67° ridges. (Trend: Up to 3°)

Overnight Max Humidity: Valleys: 50-85%; Ridges: 30-50%. (Trend: No significant trend.)

20 Foot Winds:

LAL: 2

Lower Slopes: West 5 to 10 mph in the evening becoming downslope and down valley 2 to 5 mph. Upper Slopes: Northwest 5 to 10 mph in the evening, becoming light and variable toward morning.

Inversion: Descending to 400-ft agl with smoke becoming trapped below it.

2-5 Day Outlook, Saturday-Tuesday:

Sunny, warm, and dry Saturday. Trending cooler Saturday night through Monday with a cold frontal passage sometime Sunday. North winds 10 to 15 mph with gusts to 25 mph will be possible especially on the north and east side of the fire. Timing and strength of the front are uncertain at this time. Otherwise, mostly clear with cool mornings with moderate to poor RH recoveries on the upper slopes and ridges. Max Temps 75-95° with Minimum RHs 13-28%, 8-17% Sat-Mon. Lows 41-68°. Max RHs: 25%-95%. Temperatures trend gradually warmer through next week with little to no precipitation expected.

FIRE BEHAVIOR FORECAST

| FORECAST NUMBER: 08 | TYPE OF FIRE: Wildland Fire |
|--------------------------|-----------------------------------|
| FIRE NAME: North Complex | OPERATIONAL PERIOD: 8/28/20 Day |
| DATE ISSUED: 8/27/20 | TIME ISSUED: 2100 |
| UNIT: Plumas NF | SIGNED: /s/ Patrick Doyle, FBAN-t |

INPUTS

WEATHER SUMMARY:

Temps: Highs 78-95° RH: min. 14-30%

Winds: morning topography-driven 0-5 mph, transitioning in the afternoon to W 5-10 mph

Ridges: afternoon E 10-15 mph morning, then w 5 mph afternoon (see Fire Wx Forecast, previous page)

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Potential thunderstorm development over the Bear and Claremont today this could produce outflow winds or erratic fire behavior any wind direction. There will be lower fire activity in the morning, transitioning to increased fire activity in afternoon with lifting smoke and haze. As fire responds to increased temperatures, lower windspeeds, and decreased Rh. Watch areas that have heavier fuels, that are holding heat and waking up with warmer temps and with lower relative humidities.

Key Points:

- Still critically low fuel moistures (~90th percentile conditions) make all dead and down fuels available for burning, continue to lower into weekend.
- Low nighttime Rh recovery continues to contribute to critically low and decreasing fuel moisture in dead fuels.
- Expect afternoon winds to pick up lifting out smoke and inversion with increased fire activity and spotting.
- Torching and spotting has contributed significantly to fire spread and reduced control efforts. Watch for holdover heat near control lines. BI 50 (▼down -3, below 90th percentile) Northern Sierras PSA NC07

ERC 71 (▼down -2, below 90th percentile) 100 HR Dead Fuel Moisture: 8.6% (▲up +1.2, below 90th percentile)

1000 HR Dead Fuel Moisture: 7.8% (▲ up +0.1, greater than 90th percentile)

SPECIFIC:

Branch IV & V: Sheep fire - Reduced fire activity over most of Sheep fire today, as control lines restrict fires access to new fuels to consume. Low dead fuel moistures and near or greater fire danger rating indices, such as energy release component (ERC) and burning index (BI) have supported dead and down fuel consumption.

Key Points:

- Div H will continue to flank on mid-to-upper slopes in timber, creeping to actively flanking where opportunities are present.
- Div B and B/D break, where firing activities were completed yesterday are going to be an area of concern to watch for afternoon increased fire activity near line that may threaten line from spotting across the line.
- Div A/M lot of heat in this area, will need to be monitored due to alignment with winds and slope.
- Spotting has contributed significantly to increased fire spread rates and reduced control efforts.

Rate of Spread (ROS): max 10-90 ch/hr, min ROS 1-10 ch/hr. Prob. Of lanition (PIG): 80-91%

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where fuels and topography are not in alignment expect FL <1-5 ft.

Branch II: Claremont Fire - Watch out for potential spotting upslope or downwind across containment lines in Div Z south of Feather River and possibly Div X near Lee's Summit.

Key Points:

- Div Z: Fire behavior modeling (continues) project fire spread to the E, parallel with Middle Fork Feather River spreading towards Sloat.
- Fire activity in Div Z continues to try spread/spot across line south into Harrison Flat over 23N10 road.
- Watch for spotting from individual tree torching or heavy down fuels holding heat spring back to life with winds and solar heating in the afternoon near control lines.

Rate of Spread (ROS): max 10-90 ch/hr, min ROS 1-8 ch/hr.

Prob. Of Ignition: 80-91%

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where fuels and topography are not in alignment expect FL <1-5 ft.

Branch X: Bear Fire -- Fire activity continues to spread up the Little Bear and Bear Creeks. Fire has backed down to the Middle Fork of the Feather River, approximately in the middle portion of fire, between Little Bear Creek and Bear Creek. Flanking upcanyon in the top third of the slope continues in the Middle Fork of the Feather River east of Bear Creek.

Key Point:

Watch out for roll-out with material igniting below with uphill runs in drainage, and in afternoon spotting continues to be a significant component of fire spread (spotting distances 1/10 to 1/25 of mile). In addition, to actively backing and flanking, and uphill/updrainage spread in most directions.

Rate of Spread (ROS): max 10-90 ch/hr, min 1-8 ch/hr.

Prob. Of Ignition: 80-91%

Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where fuels and topography are not in alignment expect FL <1-5 ft.

AIR OPERATIONS:

Air operations window may be affected by inversion and thunderstorm development in area.

SAFETY

Limited visibility may give you a false sense of security. Use LCES to ensure you know what the fires are doing around you.

SAFETY MESSAGE North Complex and Sheep Fire

August 28, 2020

USE LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES, SAFETY ZONE LCES IN PLACE EVERY TIME

Major Hazards and Risks:

- ✓ <u>Situational Awareness</u> Conduct thorough briefings with your crew on all components of the IAP. Weather forecast should be highlighted in crew briefing today. Crews know where your EMTs and incident ambulances are, and ensure communications are in place. Make LCES personal for your piece of real estate.
- ✓ <u>Fire Behavior</u> Watch for alignment of the wind flow in the drainages coming off Bear Fire and Clairmont Fire. This fire has gotten up and run a couple of times. With the changing weather pattern, watch for increased spotting potential.
- ✓ <u>Communications</u> Command seems to have good coverage, but there is a delay as each repeater begins transmitting. Give a pause after pushing the PTT button to allow for all repeaters to begin transmitting. Inform communications if you locate any dead spots. Keep in constant communications with your crew, adjacent forces and appropriate overhead. Test command before engaging —use human repeaters where needed to ensure positive communications.
- ✓ <u>Driving Safety</u> Slow down, watch for powdered out corners on the forest roads, especially in Div D, F, and H. The Roxy Peconon Rd is closed to all but fire personnel but not staffed. Dirt bikes are still testing that, drive accordingly.
- ✓ <u>Heavy Equipment</u> Ensure all personnel are visible to dozers, maintain communications and mitigate overhead and rolling hazards. Maintain adequate separation between dozers and crews. Utilize traffic control on roads when transporting dozers to different parts of the fire. Ensure good comms with operators (their equipment can be very loud). Consider pairing up a private timber company operator with an agency or incident operator for accountability.

Prepared by: Doug McKelvey SOF1 August 27, 2020

INCIDENT SAFETY ANALYSIS 215a

North Complex CA-PNF-001308 - Friday, August 28, 2020

| 8. Location | 9. Hazard | 6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc) |
|-----------------------|-----------------------------------|---|
| All | Extreme Fire Behavior | Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions IRPG Pg 1. Refer to "Common Denominators of Fire Behaior Tragedy Fires" IRPG Pg 5. Refer to "Alighnments & Patterns for Dangerous Fire Behavior" IRPG Pg 73 |
| Alt | Hazard Trees | Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. |
| All | Injury & Medical Emergency | Assist injured employee appropriate medical care. Use EMT's on Division for initial care. Follow "Emergency Medical Care" IRPG Pgs 105-118 Follow procedures in Medical Plan, ICS 206 Refer to "Planning for Medical Emergencies" IRPG Pg 2 |
| All | Fireline Hazards | ~ Refer to "Fireline Location" considerations, IRPG Pg 84 ~ Do not work directly above or below personnel during firing and mop-up operations. ~ Watch for falling and rolling debris on steep slopes. ~ Alert crew personnel of rolling debris by yelling to affected individuals. ~ Position debris that could roll vertically on slope. ~ Avoid stepping over debris that could roll by walking around object. ~ Avoid radiant heat by wearing appropriate PPE correctly. ~ Use correct tool for task assigned. ~ Flag and isolate all HAZMAT and alert all personnel working in Division. ~ Follow WUI recommendations, IRPG Pg 12. |
| Br II | Heavy Equipment Operations | ~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avoid working below heavy equipment. |
| Br II | Steep Terrain & Rolling Debris | ∼ Maintain 8'-10' spacing when working & walking. ∼ Don't work above any personnel. ∼ Be on the lookout for rolling rocks, debris, or burning material. ∼ Evaluate necessity to send personnel in areas with limited access. ∼ Post lookouts IRPG Pg 7 |
| Br II & Sheep Fire | Firing Operations & Devices | ~ Only personnel trained in the use of each device will be authorized to use firing equipment. ~ Ensure all personnel are aware of firing operation that may affect them. ~ Wear appropriate PPE. ~ Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed. |
| All | Air Operations | ~ Ensure positive communication with all air resources. ~ Don't plan on air resources for medical transport or resupply. ~ Follow "Aviation Watch-Out Situations" IRPG Pg 46. ~ Refer to "Directing Bucket or Retardant Drops" IRPG Pg 58. ~ Refer to "Aerial Retardant Safety" IRPG Pg57. ~ Refer to "Aircraft Mishap Response Procedure" IRPG Pg 62. |

INCIDENT SAFETY ANALYSIS 215a

| All | Communications | Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots. |
|---------------------|---|---|
| All | Driving & Traffic | ~ Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters & Honk horn to alert personnel when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). Always use headlights. Yield to pedestrians and bicycles. Observe posted speed limits. Use the 3 second rule for following distance when driving. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, radio). Ensure that windshields are kept clean of dust and bugs. Refer to "Smoke and Transportation Safety" IRPG Pg 31 Refer to "Roadside Response Safety" IRPG Pg 26 |
| All | Heat Related Illness (HRI)& Dehydration | Refer to Heat Ralated Illness information, IRPG Pg 109 Drink Fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take Frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include. Lack of energy Headaches, dizziness Lack of rest No hunger, poor eating habits Hot skin, and lack of sweating |
| Sheep & Clariage | Structure Protection & HAZMAT | Review "Wildland Urban Interface Firefighting" considerations, IRPG Pg 12-16 Use "Structure Assessment" checklist, IRPG Pg 13 Refer to "Structure Hazard Marking System" IRPG Pg 41 Follow "HAZMAT Incident Operations" IRPG Pg 36 |
| All | Unidentified Hazardous Waste and Unexploded Ordinance | ∼ Avoid identified Hazmat and UXO areas ∼ Use "Unexploded Ordinance Safety" guidelines IRPG Pg 27 ∼ Deny entry to others. Do not transmit on radio if in proximity ∼ Map location of all UXO and Hazmat. |
| All | Fatigue & Over Exertion | ~ Drink 1 quart of water each hour during and after work. ~ Rotate crews out of smoky areas. ~ Set a reasonable work pace and allow adequate rest breaks while on the project. ~ Stagger work crews start time to limit fatigue. ~ Use buddy system to monitor personnel of heat related and fatigue issues. ~ Follow work / rest guidelines. |
| Br II Sheep | Night Operations | ∼ Maintain high visibility in work area and wear vest while in roadway. ∼ Use glow sticks to mark hazards. ∼ Ensure personnel have a personal light (headlamp). ∼ Watch for signs of fatigue. ∼ Take breaks away from areas of known hazard. |

Daily requirement of all personnel assigned to the North Complex & Sheep Fire

Region 5: Employee Self-Assessment Questions
June 11, 2020

Have all employees apply this self-assessment prior to entering any work location every day. This self-assessment includes four questions:

- 1. In the last 14 days have you had a fever, shortness of breath, body-aches or coughing (not attributable to something else, e.g. allergies) or been diagnosed with COVID-19 (presumptive or positive test)?
 - If so, do not return to work until cleared by a medical professional or you meet CDC guidance on "Discontinuation of localities."
- 2. In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms (fever, shortness of breath, body-aches or coughing (not attributable to allergies)).
 - If so, you cannot report to the workplace until cleared by a medical provider <u>or</u> until 14 days after the last date of exposure. If you develop symptoms, see #1.
- 3. In the last 14 days have you assisted in the care of an individual (outside your household) who is not well?
 - If so and you were wearing proper PPE (including a N95 mask), work with your supervisor to determine whether you should report to the workplace.
 - If so and you were not wearing proper PPE, you cannot report to the workplace until cleared by a medical provider <u>or</u> until 14 days after date of exposure. If you develop symptoms, see #1.
- 4. In the last 14 days have you traveled outside your local area?
 - If,so, you should notify your supervisor and monitor yourself for symptoms for 14 days. If mitigations were not possible during travel, work with your supervisory chain to determine if self-quarantine is needed. If you develop symptoms, see #1.

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

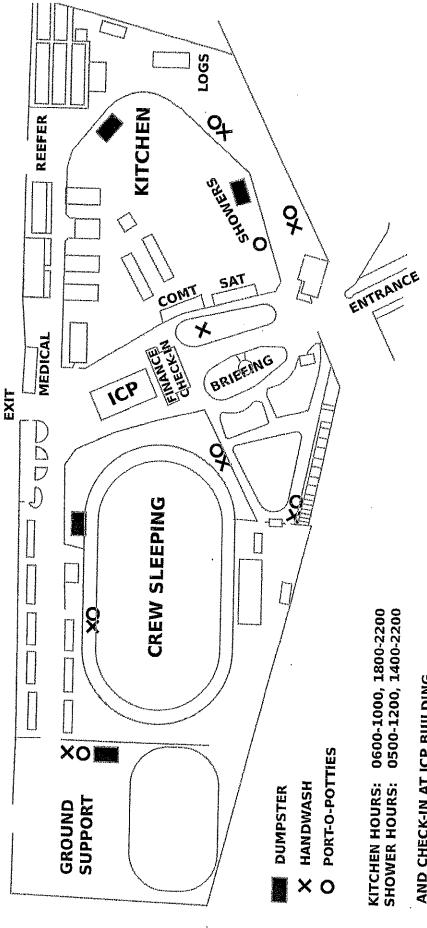

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Your OES AREP for the North Complex including the Sheep

Patrick Titus 916-634-9225
