# North Complex: Claremont & Bear Fires Weather Forecast

FORECAST NO: 12

UNIT: CA-PNF SHIFT DATE: Wednesday, Sep 2<sup>nd</sup>, 2020

PREDICTION FOR: 0700 - 0700 FORECAST ISSUED: 2000 hrs. 9/1/20

Incident Meteorologist: Brett Lutz

**SIGNED:** 

You can call, text, or e-mail WX OBS to: (240) 778-5297 / Brett.Lutz@noaa.gov

WEATHER DISCUSSION: Moderate and gusty east winds this morning will be strongest over the ridges and in the Middle Fork of the Feather River drainage, especially in the canyon near the Bear Fire. These east winds are likely to continue through the morning and then will diminish some, but still continue into the afternoon to early evening. Smoke will be blown down drainage and west of the fires, primarily through the Middle Fork of the Feather River drainage. It will be hot and dry this afternoon under clear skies. Dry weather will continue, becoming slightly hotter with time. Daily record high temperatures will be threatened this upcoming weekend.

Today (0700-1900):

Weather: Sunny. Smoke down canyon of the fires in the morning, mainly in the main Middle Fork of the Feather River drainage. Smoke moving up canyon and overspreading areas north and east of the fires in the PM.

High Temperatures: 82-87° Upper Slopes & Ridges, 85-98° Low-Mid Slopes & Valleys. (Trend: Up 2F)

Afternoon Humidity: 11-20%. (Trend: Little-Change)

20 Foot Winds:

Valleys/Lower Slopes: E 10 mph with gusts 20 mph in the morning, diminishing to 5 mph with gusts to 10-15

mph mid to late afternoon.

Upper Slopes & Ridges: East 15 mph with gusts 25 mph in the morning, diminishing to 5-10 mph with gusts

10-20 mph in the afternoon.

(Wind Trend: Up 5-10 mph valleys and 10-15 mph upper slopes & ridges in the morning.)

Transport Wind: E 17 mph in the morning, becoming E 12 mph in the afternoon.

LAL: 1.

Che of Wetting Rain (> or = to 0.10"): 0%

Stability: Weak Inversion near 6,500ft MSL until late AM.

Afternoon Mixing Height: 13,000 feet MSL.

Tonight (1900-0700):

Weather: Clear. Smoke down canyon of the fires, mainly in the main Middle Fork of the Feather River drainage.

Temperatures: Lows 42° valley bottoms to 62° ridges. (Trend: Down 5°)

Overnight Max Humidity: Valleys: 35-85%; Ridges: 25-35%. (Trend: Down 10% on the ridges)

20 Foot Winds:

Lower Slopes: E 5 mph gusting 10 mph, becoming downslope and down drainage 5-10 mph overnight.

Upper Slopes: E 5-10 with gusts 10-15 mph.

LAL: 1

Che of Wetting Rain (> OR = to 0.10"): 0%

**Inversion:** 6,000ft MSL with smoke becoming trapped below it.

<u>2-5 Day Outlook, Thursday-Sunday:</u> Getting hotter, with record breaking temps possible next weekend. Dry with wide diurnal temperature ranges, hot afternoons, and moderate to poor RH recoveries on the upper slopes and ridges. Mostly clear. Max Temps 81-100° with Min RHs 10-20%. Overnight Lows 45-65°. Max RHs: 25%-95%. SW winds 5-10mph G15 mph each PM, 5-10 mph drainage winds overnight. Mostly smoky.

Observations from Sunday, 9/1/20:

Red Hill Lookout (6333ft) W of Bear Fire: Temps: 57F/77F, RH: 40%,20%, Max wind: NNE 25mph.

Cashman (4478ft) near Quincy-Temps: 62F/90F, 43%,14%, Max wind: NE 27 mph.

Buck Lake Road West (3793ft) NE of Bear Fire-Temps: 45F/89F, RH: 93%,16%, Max wind: N 16 mph.

#### Sheep Fire Weather Forecast

FORECAST NO: 6 UNIT: CA-PNF

SHIFT DATE: Wednesday, September 2nd, 2020

PREDICTION FOR: 0700 Wed-0700 Thu

FORECAST ISSUED: 1930 hrs. 09/01/20

**Incident Meteorologist:** Christian Cassell

You can call, text, or e-mail obs to:

(240) 778-5305 / Christian.Cassell@noaa.gov

...Significantly Warmer Today; Near Record-Breaking Heat Possible Later This Week Through Labor Day Weekend...

WEATHER DISCUSSION: An unusually strong late-summer high pressure system becomes nearly stationary over the fire area later today, and remains over the fire area through this weekend and possibly beyond. This will bring a noticeable increase in temperatures that may threaten record daily high temperatures for many consecutive days. Hot, dry, and unstable conditions likely peak this coming weekend, though heavy wildfire smoke could prevent afternoon temperatures from reaching their full potential. No precipitation is expected through at least early next week.

Today (0700-1900):

Weather: Mostly Sunny. Smoke possibly increasing toward late afternoon or evening.

High Temperatures: 87-90° Upper Slopes & Ridges, 91-95° Low-Mid Slopes & Valleys. (Trend: Up 5-9°)

**Afternoon Humidity:** 11 to 19%. (Trend: Little change.)

20 Foot Winds:

Valleys/Lower Slopes: Upslope/Upvalley 4 to 8 mph becoming Southwest with gusts to 12 mph late in the

afternoon.

Upper Slopes & Ridges: Light winds becoming West to Southwest 5 to 10 mph in the late afternoon.

Transport Wind: Light Winds.

**LAL:** 1.

Chc of Wetting Rain (> or = to 0.10"): 0%

**Stability:** Inversion at 1500-ft agl until noon local time.

Afternoon Mixing Height: 5,000 feet agl.

Tonight (1900-0700):

Weather: Mostly clear. Smoke likely increasing.

Temperatures: 70-75° Mid-Slopes, Upper Slopes, & Ridges, 50-60° Valleys Overnight Max Humidity: 20 to 35% Mid-Slopes and Ridgetops; 35-50% Valleys

20 Foot Winds:

Lower Slopes: West 5 to 8 mph with gust to 15 mph in the evening becoming Downslope/Downvalley 2 to 5

**Upper Slopes:** West to Southwest 6 to 10 mph with gusts to 15 mph in the evening becoming Light and Variable.

LAL: 1

Chc of Wetting Rain (> OR = to 0.10"): 0%

**Inversion:** Descending to <500-ft agl.

#### 2-5 Day Outlook, Thursday through Sunday:

Near-record high temperatures are expected Thursday into early next week. Smoke from this and other wildfires will be a determining factor in whether we reach those forecast near-record highs. Winds will be generally be light and slope-based each day with the typical late afternoon and evening westerly and southwesterly breezes increasing Friday into the weekend. Unstable conditions can also be expected each afternoon, especially from Friday onward. though thick smoke could be an inhibiting factor. Poor to moderate humidity recovery is expected each night except right along the valley floors where recoveries will be moderate to good. Max Temps 88-100° with Minimum RHs 11-20%. Lows 55-73°, coolest valley bottoms. Max RHs: 20%-60%, highest valley bottoms.

#### FIRE BEHAVIOR FORECAST

i	
FORECAST NUMBER: 14	TYPE OF FIRE: Wildland Fire
FIRE NAME: North Complex	OPERATIONAL PERIOD: 9/2/20 Day
DATE ISSUED: 9/1/20	TIME ISSUED: 2100
UNIT: Plumas NF	SIGNED:/s/ Patrick Dovle_FRAN-t/Rich McCrea_FRAN

#### **INPUTS**

WEATHER SUMMARY: \*\*\*\* See Fire Wx Forecast \*\*\*\*

#### **OUTPUTS**

#### **FIRE BEHAVIOR**

#### GENERAL:

As we transition slowly to a typical southwest flow over area, fire spread will return to topography and fuels driven in the morning, with afternoon winds in Fire activity this morning through today will test lines on S to SW areas fire. WATCHOUT for spotting across control lines, drainages, and spreading out of

#### Key Points:

- Very low fuel moistures (~90th percentile conditions) and low nighttime Rh recovery continues to make most if not all dead and down fuels
- North Winds will increase in the afternoon, causing increased fire activity and potential spotting with to low relative humidity.
- Torching and spotting has contributed significantly to fire spread and challenged control efforts. Watch for holdover heat near control lines,

ERC 76 (▲up +1, near 90th percentile)

BI 54 (▼up +2, below 90th percentile)

Northern Sierras PSA NC07

100 HR Dead Fuel Moisture: 8% (no change, near 90th percentile)

1000 HR Dead Fuel Moisture: 8% (no change, at 90th percentile)

Expected ROS, FL, and PIGs below for uncontained/controlled fires, or if fire spots or slops outside of control lines. Rate of Spread (ROS): max 10-90 ch/hr, min ROS creeping to 1-10 ch/hr. Prob. Of Ignition (PIG): 82-90% afternoon Flame Lengths (FL): areas in alignment expect FL 5-10+ ft., where fuels and topography are not in alignment expect FLs creeping to <1-5 ft.

#### SPECIFIC:

Branch IV & V: Sheep Fire - Minimal fire behavior overall, low Rh's, low dead fuel moisture recovery overnight. Expect smoldering fire and in some areas backing with concentration of fuels consuming. Such as burning logs, stump holes, snags and heavy fuel concentrations in dozer berms. Be heads up for fire weakened trees coming down and rocks rolling down on steep slopes due to stabilizing due and large woody material being removed. Key Points:

- Div B/D keep a look out for any spotting that may have occurred over the last couple days from N to E winds. Potential still exists spotting outside of control lines to be active in dead & down fuels due to low overnight recoveries and very dry fuels.
- Div H little activity, smoldering and burning up heavy fuels in the interior. Continued fire activity where pocket of fuels exist north of bare rock crest of the Diamond Mountains.
- Div A/M/F little activity, smoldering and burning up heavy fuels in the interior.

Branch II: Claremont Fire - Keep a lookout for any overnight spotting from last night, especially in areas that are in the thermal belt or from holdovers in areas with higher fuel moistures. Expect a transition to typical southwest flow wind pattern, whereas once it gets established fuels that have been pushed in on from NE will become more available for active fire. This may range from creeping in the morning to individual tree and group torching in the afternoon. When temperatures and probability of ignition increase and relative humidity's decrease. Key Points:

- Div Z activity continue decrease as fuels are consumed. Be ready for any activity from last couple days that with change in wind direction, watch out for spread/spot across dozer lines between La Porte Road (near Red Bridge) and Harrison Flat over 23N10 road. Be heads up for embers trying to spot from island of fuels, burning out, in the area between Bray Creek, La Porte Road, and dozer line from H-2 to La Porte Road.
- Div S/V/X with minimal fire activity in Div S/V, and greatly reduced activity in Div X. Watch for any heat near the lines.

Branch X: Bear Fire - Active fire spread in the north part of fire between Mt. Ararat Creek to upper Bear Creek, with low to moderate rate of spread upslope, with occasional individual tree and group torching. Canyon winds will return to a typical southwest upcanyon flow during the day and northeast downcanyon flow at night.

#### Key Point:

- Div QQ/TT Following yesterdays activity, holdover intense heat to increase in activity in the afternoon.
- Div AA Expect increased activity in the mid-upper slope of east flank above the Middle Fork of the Feather River to be active with burn period push of southwest canvon winds.
- Watch out for roll-out igniting material below and making uphill runs in drainage, and in afternoon spotting continues to be a significant component of fire spread (spotting distances 1/10 to 1/25 of mile). Fire will actively back, flank, and spread uphill/updrainage in most directions.

#### AIR OPERATIONS:

Southwest wind pattern will push smoke back up into drainages decreasing visibility, and probability of smoke and haze inversions.

#### SAFETY

Watch Out Situations: #11, Watch out for unburned fuel between you and the main fire.

#### 6. Work Assignments:

Continue to prep control lines from DP41 to branch II/X break. Prepare to conduct strategic firing operations from DP41 to branch II/X break. Continue holding dozer line from DP41 to Claremont Trail to secure the fire edge. All tactical and/or strategic firing operations must have approval from Operations.

#### 7. Special Instructions:

Backhaul all trash, modules need to take all trash back to ICP.

Ambulance Medic 2 @ DP57 assigned to DIV P available branch wide.

REMS 1 assigned to DIV P @ DP42 and REMS 2 assigned to DIV TT @ DP88, both are available incident wide

Avoidance Flagging: North Complex will be red and black candy striped: Sheep Fire will be red and white candy stripe.

6 Work Assignments:		L		· · · · · · · · · · · · · · · · · · ·			

#### 6. Work Assignments:

Mop up around structures, dozer and handline securing the fires edge to prevent fire spread and spot fires.

continue holding existing line from repeater site to DIV S/V/X / DIV Z break.

Mop up and secure burn areas around structures to prevent ignition to the degree possible.

Continue holding and mopping up along Hwy 70, dozer lines and the 23N22 Rd.

Continue to conduct strategic firing operations to clean up the unburned fuel near Estray Creek, and to secure the dozer line that ties into Middle Fork Feather River.

#### 7. Special instructions:

Backhaul all trash, modules need to take all trash back to ICP.

Ambulance Medic 2 @ DP57 assigned to DIV P available branch wide.

REMS 1 assigned to DIV P @ DP42 and REMS 2 assigned to DIV TT @ DP88, both are available incident wide

Avoidance Flagging: North Complex will be red and black candy striped: Sheep Fire will be red and white candy stripe.

# **North Complex Safety Message**

Day/Night Operations: September 2-3, 2020

### **Normalization of Deviance**

- When we take short cuts or do not follow known processes but <u>NOTHING BAD</u>

  <u>HAPPENS!</u> This will create an automatic response or loop in your brain to repeat the decision until there is a negative reaction (Lesson Learned).
- Naturally occurs because firefighters rely on Recognition Primed Decision-Making Process that is based on previous experience. (Gary Klein, *Sources of Power*)
- The Brains desire to work efficiently and quickly. We will likely take shortcuts.
- Time pressure only increases the risk to take short cuts.

# THE BRAIN IS BRILLIANTLY STUPID

Examples of simple actions we often get away with:

- 1. Driving too fast
- 2. Wearing seat belts
- 3. Time to scout the fire, escape routes, safety zones, weather
- 4. Disconnecting or putting tape over the "door open" warning light.
- 5. Conducting a safety check before a flight, shift or mission
- Not reviewing the medical plan, Medical Incident Report in case there is an incident within an incident.

Ways to combat the brains natural desire to normalize deviant behaviors:

- 1. Plan the work, work the plan
- 2. Follow LCES, standing fire orders, watch out situations, policies and procedures. These are written in blood!
- 3. Learn from close calls and near misses
- 4. Be mindful of your work
- 5. Slow is fast and fast is slow

**National Multi Agency Coordinating Group** 

Subject:

Tactical Pause-Focus on Risk Management

We are in the height of the 2020 Western fire season and we have been reminded that the wildland fire environment is dangerous whether you are on the ground or in the air. Along with the increase in fire activity, there has been an increase in close calls, serious accidents, injuries, and fatalities. Please honor those that have fallen, most recently our aviators, by actively managing risk. It is now late August and long-term fatigue is setting in, which exacerbates the complexity of a fire season made even more difficult by COVID-19.

We ask you to take a tactical pause at some point on Wednesday, September 2<sup>ND</sup> to discuss current risks to which you are exposed. The timing and length of this tactical pause is at your discretion. During this time stop, think, and talk about how you assess and mitigate risk. Ask yourself, your coworkers, or your crew what, if anything, is different from your previous experience and how are you dealing with it? What is concerning you specifically when it comes to your safety and those you work with or lead? What might you be missing? It is all too easy to be task oriented so take this opportunity to discuss some simple reminders or measures you can take to reduce your exposure to the inherent hazards of our occupation or COVID-19, which can reduce the probability of the next accident or illness.

Use references such as the Incident Response Pocket Guide (IRPG) to aid you in your discussions. The latest interagency wildland fire COVID-19 information can be found on the <u>Medical and Public Health Advisory Team (MPHAT) webpage</u>. The value of this tactical pause will be in the discussions you engage in so make it count.

We also recommend that you review and discuss *Planning for Medical Emergencies* (page #2) and the *Medical Incident Report* (page #118-119), also referred to as the "8-Line", in your IRPG. Reviewing and discussing these job aids will better prepare you to respond to an accident or medical emergency if one does occur.

Finally, NMAC wants to be clear that we care about the health and welfare of our responders. We are asking you to take this time to discuss risk management and do everything possible to ensure you return home safely at the end of each shift and each fire assignment.

/s/ Joshua Simmons NMAC Chair

#### **INCIDENT SAFETY ANALYSIS 215a**

North Complex and Sheep Fire - Wednesday, September 02,

		and Sneep Fire - Wednesday, September 02,
8 Location	2020 9 Hazard	64. Control or Abatement Action (Engineering: Administrative, RRE, Avoidance, Education, etc).
All	Air Operations	~ Ensure positive communication with all air resources. ~ Don't plan on air resources for medical transport or resupply. ~ Follow "Aviation Watch-Out Situations" IRPG Pg 46. ~ Refer to "Directing Bucket or Retardant Drops" IRPG Pg 58. ~ Refer to "Aerial Retardant Safety" IRPG Pg57. ~ Refer to "Aircraft Mishap Response Procedure" IRPG Pg 62.
Ali	Hazard Trees	<ul> <li>Follow "Hazard Tree Safety" guidelines, IRPG page 22.</li> <li>Post lookouts, or use a spotter in mop-up areas with personnel.</li> <li>Don't park vehicles or take breaks in high concentrations of hazard trees.</li> <li>Establish trigger points for disengagement during high wind events.</li> <li>Remember that the hazard zone extends a minimum of 2 1/2 tree heights.</li> </ul>
All	Extreme Fire Behavior	<ul> <li>∼ Share weather observations with all personnel assigned to division.</li> <li>∼ Establish "Trigger Points" to withdraw.</li> <li>∼ Use "Risk Management" process prior to engaging in suppression actions IRPG Pg 1.</li> <li>∼ Refer to "Common Denominators of Fire Behaior Tragedy Fires" IRPG Pg 5.</li> <li>∼ Refer to "Alighnments &amp; Patterns for Dangerous Fire Behavior" IRPG Pg 73</li> </ul>
All	Injury & Medical Emergency	~ Assist injured employee appropriate medical care. ~ Use EMT's on Division for initial care. ~ Follow "Emergency Medical Care" IRPG Pgs 105-118 ~ Follow procedures in Medical Plan, ICS 206 ~ Refer to "Planning for Medical Emergencies" IRPG Pg 2
Br X	Indirect Fireline	~ Post lookouts, identify escape routes and safety zones IRPG Pg. 7 ~ Review "Strategy Direct/Indirect Attack" IRPG Pg. 82-83 ~ Refer to "Line Location" IRPG Pg 84
All	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets.     ~ Use spotters & Honk horn to alert personnel when backing.     ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts).     ~ Always use headlights.     ~ Yield to pedestrians and bicycles.     ~ Observe posted speed limits.     ~ Use the 3 second rule for following distance when driving.     ~ Use chock blocks, turn wheels into hill.     ~ Avoid distractions (eating, cell phones, radio).     ~ Ensure that windshields are kept clean of dust and bugs.     ~ Refer to "Smoke and Transportation Safety" IRPG Pg 31     ~ Refer to "Roadside Response Safety" IRPG Pg 26
All	Fatigue & Over Exertion	<ul> <li>Drink 1 quart of water each hour during and after work.</li> <li>Rotate crews out of smoky areas.</li> <li>Set a reasonable work pace and allow adequate rest breaks while on the project.</li> <li>Stagger work crews start time to limit fatigue.</li> <li>Use buddy system to monitor personnel of heat related and fatigue issues.</li> <li>Follow work / rest guidelines.</li> </ul>
Br II & X	Steep Terrain & Rolling Debris	<ul> <li>Maintain 8'-10' spacing when working &amp; walking.</li> <li>Don't work above any personnel.</li> <li>Be on the lookout for rolling rocks, debris, or burning material.</li> <li>Evaluate necessity to send personnel in areas with limited access.</li> <li>Post lookouts IRPG Pg 7</li> </ul>

# **INCIDENT SAFETY ANALYSIS 215a**

All	Heavy Equipment Operations	~ Refer to "Working with Heavy Equipment" IRPG Pg 86 ~ Ensure communications are established with operators. ~ Use hand signals if other communications are unavailable. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Use a spotter when backing. ~ Avold working below heavy equipment.
All	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG Pg 22  ~ Follow "Procedural Felling Operations" IRPG Pg 85.  ~ Look up, Look down, Look around for hazard tree indicators.  ~ Only fell and buck trees within your expertise, and training.  ~ Do not fall trees during high wind events.  ~ Ensure proper use of all required PPE.
BR II & X	Firing Operations & Devices	<ul> <li>Only personnel trained in the use of each device will be authorized to use firing equipment.</li> <li>Ensure all personnel are aware of firing operation that may affect them.</li> <li>Wear appropriate PPE.</li> <li>Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.</li> </ul>
All	Communications	<ul> <li>Maintain communication with aviation resources, and suppression organization.</li> <li>Ensure all know frequency and protocol for contacting resources.</li> <li>Utilize the ICS 205.</li> <li>Utilize human repeaters when working in dead spots.</li> </ul>
Br II	Night Operations	<ul> <li>Maintain high visibility in work area and wear vest while in roadway.</li> <li>Use glow sticks to mark hazards.</li> <li>Ensure personnel have a personal light (headlamp).</li> <li>Watch for signs of fatigue.</li> <li>Take breaks away from areas of known hazard.</li> </ul>
Br X	ATV/UTV use	~ Ensure equipment is inspected and safe to use. ~ Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. ~ Ensure operator is trained and certified to operate. ~ Ensure operator has proper PPE according to the Redbook and/or RMA. ~ Question if it is mission critical.
Br II & Sheep	Mop-up & Rehab	<ul> <li>Do not work above or below personnel during rehab/mop-up operations.</li> <li>Alert crew personnel of rolling debris by yelling to affected individuals.</li> <li>Position debris that could roll vertically on slope.</li> <li>Wear eye protection.</li> </ul>
All	Wildlife & Livestock	∼ Watch out for wildlife & livestock inside fire area and along roadways. ∼ Clean up all debris and trash during each operational period.
All	Mines	∼ Identify and avoid mining areas. ∼ Notify others of hazard.

AIR-TO-GRND							
TACTICAL							
7. CONTINGENCY: Considerations: ahead.	If primary options fall, what ac	l tions can be implemented in	conjunction with primary evac	uation method? Be thinking			
8. ADDITIONAL INFORMATION: Up REMEMBER: Confirm ETA's of re Decisively.	odates/Changes, et c. sources ordered. Act accor	rding to your level of trai	ning, Be Alert. Keep Calm.ി	Think Clearly. Act			

# Daily requirement of all personnel assigned to the North Complex & Sheep Fire

Region 5: Employee Self-Assessment Questions
June 11, 2020

Have all employees apply this self-assessment prior to entering any work location every day. This self-assessment includes four questions:

- 1. In the last 14 days have you had a fever, shortness of breath, body-aches or coughing (not attributable to something else, e.g. allergies) or been diagnosed with COVID-19 (presumptive or positive test)?
  - If so, do not return to work until cleared by a medical professional or you meet CDC guidance on "Discontinuation of Icolation."
- 2. In the last 14 days have you had close contact with someone who may have COVID-19? This includes anyone with a positive COVID-19 test or who has COVID-19 symptoms (fever, shortness of breath, body-aches or coughing (not attributable to allergies)).
  - If so, you cannot report to the workplace until cleared by a medical provider <u>or</u> until 14 days after the last date of exposure. If you develop symptoms, see #1.
- 3. In the last 14 days have you assisted in the care of an individual (outside your household) who is not well?
  - If so and you were wearing proper PPE (including a N95 mask), work with your supervisor to determine whether you should report to the workplace.
  - If so and you were not wearing proper PPE, you cannot report to the workplace until cleared by a medical provider <u>or</u> until 14 days after date of exposure. If you develop symptoms, see #1.
- 4. In the last 14 days have you traveled outside your local area?
  - If,so, you should notify your supervisor and monitor yourself for symptoms for 14 days. If mitigations were not possible during travel, work with your supervisory chain to determine if self-quarantine is needed. If you develop symptoms, see #1.

# Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

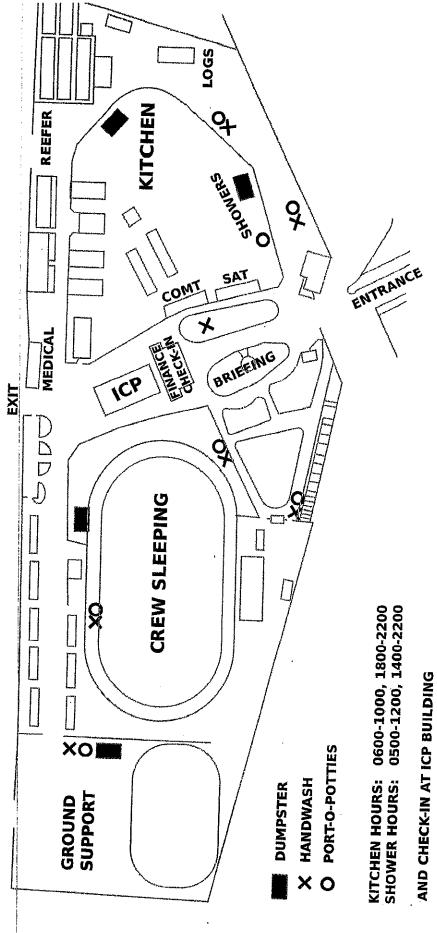

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Your OES AREP for the North Complex including the Sheep

Patrick Titus 916-634-9225
