# FIRE BEHAVIOR FORECAST

**FORECAST NUMBER:**16

**TYPE OF FIRE:** Wildfire

**FIRE NAME:** North Complex

**OPERATIONAL PERIOD:** Friday, Sept. 4,2020

**DATE ISSUED:** Thursday, Sept. 3, 2020

**TIME ISSUED:** 1930Hours

**UNIT:** Plumas National Forest

**SIGNED:** RichMcCrea – FBAN

## Weather Summary

**Discussion:** See attached weather forecast

## Outputs

**GENERAL FIREBEHAVIOR:**Fire behavior potential to increase due to hotter temperatures, poor humidity recovery on the upper slopes, lower humidity (trend down 6%), and a Haines Index of 5 (high). Active and possible extreme fire behavior especially in areas of smoke column development. Expect short upslope/upcanyon runs, tree torching, and short-range spotting. Resistance to control will be high due to steep slopes, deep/narrow canyons, deep duff, snags and very dry downed woody fuels. Burning debris can roll downhill on steep slopes creating new spot fires that may then run back upslope. If smoke disperses on the fire expect enhanced fire behavior.

**Spread Rate:** Timber: 1200 feet per hour (365 Meters); **Spotting,** up to 3/10 mile (one half kilometer); **Flame Length:** up to 8 ft.(2.5 meters) except in large concentrations of heavy dead fuels and on steep slopes. Maximum daily spread up to one half mile to a mile (.8 to 1.60 kilometers per hour). Fire spread in narrow canyons/steep slopes with wind alignment may exhibit even faster spread rates for a short distance.

**Fire Danger Values:** Today the Energy Release Component (ERC) is average for this time of year.

**Drought Severity Index:** This area of California is in moderate drought. **Humidity Recovery at night:** poor humidity recovery with a 24-hour trend of down 10%.

## FIREBEHAVIOR SPECIFIC:

### Branch II: Claremont Fire

**DIV. P:** The fire will continue to be active with upslope/upcanyon movement to the north/northwest, torching, and spotting, in the East Branch and South Fork of Rock Creek.

**DIV. S/V/X:** These divisions are in patrol and mop up. Expect residual burning in stump holes, logs and snags and burn out of interior islands which may cast spot fires across established firelines.

**DIV Z:** Watch out for burning of islands in interior areas that may cast hot embers across fire lines

### Branch VII: Claremont Fire

**DIVS DD:** Watch out for column development on the north side of the Middle Fork of the Feather River that may cast spot fires onto the south side of the river, with associated upslope upcanyon fire runs.

### Branch: X: Bear Fire

**DIV. AA:** Expected continued upslope and upcanyon fire runs with associated torching of conifer trees and spot fires, channeling in an easterly/northerly direction up the Middle Fork of the Feather River and upslope to the north/northeast **DIVs QQ and TT;** Watch out for spot fires across firelines and upslope fire spread.

**DIV. MM:** The Willow Creek Canyon, on the southwest side of the fire continues to hold, but watch out for torching and associated spot fires, and rolling burning debris.

**Aviation:** Smoke is being trapped between the 5500 to 6500-foot level, causing poor visibility

**SAFETY:** Today is a heads-up day due to very hot and dry conditions with fire behavior being active and potentially extreme, moderated by heavy smoke cover. There is a great deal of uncontained perimeter and spot fires may pop up in unexpected areas and upslope upcanyon fire spread may cut off roads that are being used for escape routes. Have a backup plan! Most entrapments and burnovers occur when fire crews are working above the fire and get trapped by upslope/upcanyon runs.

## ***North Complex COVID-19 Expectations***

---

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.**
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as face to face contact for at least 15 minutes or in the same enclosed space for 2 hours.
- **Social Distancing.** Maintain a minimum of 6’ physical distancing, especially from those outside of your module-as-one.
- **Face Coverings.** Face coverings are required to be worn, **in the appropriate manner covering nose and mouth**, when in identified “mask areas” at Camp. Outside of camp, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

## FINANCE SECTION STANDARD OPERATING PROCEDURES

---

### **WORK REST CYCLE**

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

### **OPERATIONAL SHIFTS**

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional time may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

### **DUTY STATUS**

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs.). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

### **PERSONNEL/EQUIPMENT TIME REPORTING**

Personnel time will be reported to the Time Unit daily or every other day once they are signed by the next level supervisor. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily or every other day and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

### **MEAL AND OTHER WORK BREAKS**

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Please also show in remarks section what division you are working in.

# Maidu Requests for Visiting Homeland

## 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

## 2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

## 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

## 4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

## 5. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

## 6. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

- Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. **We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!**

### **Social Media**

It is your responsibility to know and understand guidelines for firefighter photography, video and social media use. California Interagency Incident Management Team 4 goal is simple: to participate online in a respectful, relevant way that protects our incident’s professional reputation, does not confuse the public about the incident and follows the letter and spirit of the law. Be mindful that social media postings can be viewed as unprofessional, damage careers and lead to disciplinary actions. For further information, contact the Public Information Officer.
