***North Complex: Claremont & Bear Fires
Weather Forecast***

FORECAST NO: 18

Incident Meteorologist: Tony Fuentes

UNIT: CA-PNF

SHIFT DATE: Tuesday, Sep 8th, 2020

PREDICTION FOR: 0600 - 0600

FORECAST ISSUED: 2000 hrs. 9/7/20

**** RED FLAG WARNING until *Wed Morning* (Dry Front – Gusty NE Winds/Low RH) ****

WEATHER DISCUSSION: A Red Flag Warning for gusty NE winds/low RH continues into Wednesday morning. The strongest winds/lowest RH is expected through mid-afternoon before beginning to gradually decrease through the evening. Localized stronger winds can be expected in Middle Fork Feather River drainage and other SW-NE aligned canyons and drainages.

Today (0600-1800):

Weather: *Red Flag Warning* – Dry and Gusty NE Winds.

High Temperatures: *Upper Slopes & Ridges:* 68-71°F (20-22°C)

Mid Slopes & Valleys: 76-81°F (24-27°C)

Afternoon Min RH: 10-15%.

20 Foot Winds:

Valleys/Lower Slopes: NE 15-20mph gusts 30-35 mph (24-32kph gusts 48-56kph)

Feather River, SW-NE canyons, ridges: NE 20-25mph G40-45 mph (32-40kph G64-72kph)

Transport Wind: E-NE 30-35 mph. (48-56kph)

LAL: 1

Chc of Wetting Rain: 0%

Inversion/Thermal Belt: Above 8,500ft MSL

Afternoon Mixing Height: 7,000 feet AGL

Tonight (1800-0600):

Weather: *Red Flag Warning* - Gusty NE winds, dry with poor RH recovery. Clear.

Low Temperatures: *Valleys:* 42-47°F (6-8°C) *Ridges:* 50-55° (10-13°C)

Max RH: *Valleys/Low Slopes:* 45-55% *Upper slopes/Ridges:* 20-30%

20 Foot Winds: NE 10-15 mph with gusts 20-30mph. (16-24kph with gusts 32-48kph)

LAL: 1

Chc of Wetting Rain: 0%

Inversion: 8,500ft MSL.

2-5 Day Outlook, Wednesday-Saturday: *Winds diminishing Wed, then Warming/Drying*

Northeast winds will begin to diminish on Wednesday with very poor humidity recoveries expected through Thursday morning. High pressure will rebuild across the west with an extended period of dry and above average temperatures expected. No potential for precipitation is expected through the next week.

Latest Weather Observations

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 20

TYPE OF FIRE: Wildfire

FIRE NAME: North Complex

OPERATIONAL PERIOD: Tuesday, Sept. 8, 2020

DATE ISSUED: Monday, Sept. 7, 2020

TIME ISSUED: 1930 Hours

UNIT: Plumas National Forest

SIGNED: Rich McCrea – FBAN

Weather Summary

Discussion: See attached weather forecast

GENERAL FIRE BEHAVIOR: A **Red Flag Warning** is in effect for the incident Monday night through Wednesday morning as a strong and dry cold front moves through the region. Gusty northeast winds and dry conditions will begin Monday night as the front arrives with peak winds and lowest humidity expected Tuesday. Winds will weaken on Wednesday.

In areas not contained there is a potential for very active fire behavior and possible extreme fire behavior with upslope/upcanyon and southwest movement of the fire. Crown fire development is possible on steeper slopes with heavy timber and ladder fuels. Expect torching and short-range to medium range spotting. Resistance to control will be high due to steep slopes, deep/narrow canyons, deep duff, snags, and very dry downed woody fuels. Burning debris can roll downhill on steep slopes creating new spot fires that may then run back upslope. Smoke over the fires may limit the drying of fuels and fire behavior. If smoke disperses on the fire expect enhanced fire behavior.

Spread Rate: Timber on steep slopes- 2,000 feet per hour (610 meters); **Spotting**, max distance up to 4/10 mile (.64 kilometers); **Flame Length:** up to 10 ft. (3 meters) except in large concentrations of heavy dead fuels and on steeper slopes. Fire spread in narrow canyons/steep slopes with wind alignment may exhibit even faster spread rates.

Fire Danger Values: The adjective fire danger rating for most all of northern California is forecasted to be Extreme.

Probability of Ignition (PIG): 90%, which will vary during the day due to smoke.

Drought Severity Index: This area of California is in moderate drought.

FIRE BEHAVIOR SPECIFIC

Branch II: Claremont Fire

DIV. P: The fire behavior on the north edge has diminished due to control actions by fire crews but watch for spot fires.
DIV. S/V/X: These divisions are in patrol and mopup. Expect residual burning in stump holes, logs and snags and burn out of interior islands which may cast spot fires across established fire lines.
DIV Z: Watch out for burning of islands in interior areas that may cast hot embers across fire lines.

Branch VII: Claremont and Bear Fire

DIVS DD: There is about a 3 mile (4.8 kilometers) stretch of backing fire (north of river) spreading down slope towards the Middle Fork of the Feather River, with potential to spot over to the south side of the canyon. Backing spread has been reduced in some areas due to lack of fuels but in stringers of timber the fire continues to grow.

Branch: X: Bear Fire

DIV. AA: Short fire runs still possible on the north edge with spots established outside fire lines. .
DIVs QQ and TT; Watch out for torching and associated spot fires across fire lines with potential spread to the south west and upslope fire movement, especially near Lookout Rock.
DIV. MM: The Willow Creek Canyon, on the southwest side of the fire continues to hold and watch out for spot fires across lines.

Aviation: Smoke is being trapped between the 5500 to 6500-foot level, causing poor visibility, limiting operations.

SAFETY: Ensure escape routes are established and marked and know where the fire is located and the direction it is spreading.

INCIDENT RISK ANALYSIS NORTH COMPLEX CA-PNF-001308 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> Follow "Aviation Watch-Out Situations" on page 46, IRPG. Don't plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Plan & Communicate your exit strategy with your crew and adjacent resources. Provide additional briefing for new resources and maintain communications.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. 5mph speed limit in and around ICP, keep your speed down in all areas. Use warning lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to complacencymaking personnel more vulnerable to accidents. Take steps to maintain situational awareness for the duration of the incident.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include low energy, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.
ALL	FIRING OPERATIONS & DEVICES	<ul style="list-style-type: none"> Follow the chain of command when undertaking burning operations. Ensure that aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. Wear and use appropriate PPE. Initiate burning after ensuring the plan is authorized and understood by all.
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive and what you do. Don't rush into assignments. Use caution where you park or stage, especially in steep timbered areas. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Increase SA by trying to see the work area during daylight hours. Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	WILDLAND URBAN INTERFACE OPERATIONS	<ul style="list-style-type: none"> Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Key to success in the WUI is preparation and preplanning. Be active and engage in defense preparations & don't wait for the fire to arrive. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, and Escape Routes.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Ensure communications are established with operators (Visual & Radio). Avoid working downslope from heavy equipment. Maintain a 50'-150' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	COVID-19	<ul style="list-style-type: none"> Utilize social distancing, wear facemasks in camp. Maintain the "module of one" concept. Disinfect vehicles, tools, and commonly touch surfaces frequently. Do not share equipment and wash hands frequently.

INCIDENT NAME:

North Complex

Operational Period: 0600-0600

September 8/9, 2020

DATE AND TIME PREPARED:

September 7, 2020 1600

North Complex – Safety Message

INCIDENT: # CA-PNF-001308

DATE: 09-8/9-2020 TIME: 0600–0600 Day/Night Shift

Safety Zones

A safety zone is an area where a firefighter can survive without a fire shelter. Considerations for effective safety zones:

- Take advantage of heat barriers such as lee side of ridges, large rocks, or solid structures.
- When possible, burn out safety zones prior to arrival of fire front.
- Avoid locations upslope or downwind from the fire; chimneys, saddles, or narrow canyons; and steep uphill escape routes.
- Not intended for structure protection.
- Separation distance should be at least four times the flame height.
- Distance separation is the radius from the center of the safety zone to the nearest fuels.

HAZARD TREES

During a wind event, fire weakened trees can be more hazardous. In addition to compromised root systems and integrity, wind causes more force, exertion, and physical stress. The additional sway and rocking back and forth can lead to more trees falling than what is normally expected. Be cautious around trees. Do not park vehicles, walk under, or take a break near potential hazard trees. Saturated ground with the addition of wind can make a tree that appears stable, weak. Falling trees can damage property, hinder egress and ingress, or **KILL YOU!**

POTENTIAL FOR EXTREME FIRE BEHAVIOR

- Review “Severe Fire Behavior Potential” (IRPG p.73).
- Monitor current weather conditions and forecasts.
- Make sure all personnel receive thorough briefings every shift.
- Identify unburned pockets of fuel.
- Maintain adequate escape routes and safety zones. Set trigger points.

Maintain Situational Awareness!

COLD FRONT

- Expect Winds out of the North Northeast in the opposite direction from the normal daytime flow.
- Expect Winds to increase in excess of 20 mph along the ridges and across the burned area.
- In the Feather River Canyon you can expect wind gusts in excess of 40 MPH.
- No Precipitation!

Prepared by:

CIIMT 4 Safety Group

North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.**
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- **Social Distancing.** Maintain a minimum of 6’ physical distancing, especially from those outside of your module-as-one.
- **Face Coverings.** Face coverings are required to be worn, **in the appropriate manner covering nose and mouth**, when in identified “mask areas” at Camp. Outside of camp, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

NORTH COMPLEX COVID-19 DAILY SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms¹?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
<i>* Take temperature with no-touch thermometer, if available *</i>

Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	NOTIFY SUPERVISOR IMMEDIATELY
At entries to established camps (ICP): COVID-19 Daily Screening Tool will be posted for self screening of Incident Personnel, Cooperators and Guests.	DO NOT ANNOUNCE Ask individual or "module-as-one" to step aside and follow the steps below.
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	

Steps to follow for a symptomatic screening

Escort individual or "module-as-one" to isolation area. Separate the symptomatic personnel.
Isolation support personnel should begin documentation.
Notify Line Medics or MEDL if at ICP.
COVID Safety will coordinate with Incident COVID Advisor.
Have individual or "module-as-one" fill out WF Employee Contact Assessment Sheet.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

¹ Symptoms of Coronavirus

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Crew Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: Age: Weight: Chief Complaint:
(IRPG PAGE 106)

Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***

FINANCE MESSAGE

We would like to offer you another option for submitting your CTR's and Shift Tickets:

- **Electronic fillable PDF CTR/Shift Ticket.** If you have QR code capability, QR codes to fillable forms are at bottom of this page. Make sure the forms are signed by the supervisor before submitting to Finance. In order to use fillable forms, you must have some version of Adobe Acrobat downloaded on your device, or you can send to your email and fill out.
- **Hard copy CTR/Shift Ticket.** You may fill out a hard copy CTR/Shift Ticket, snap a picture and email to Finance OR you may turn in your actual hard copy as usual. If you send in a picture, please make sure it is legible and includes the supervisor's signature at the bottom.

EMAIL: Write TIME in subject line and email to :

2020.northcomplex.finance@firenet.gov

PLEASE:

- Crews need to include a manifest with their first CTR.
- Try to submit your times at least every other day.

WHEN YOU ARE CLOSE TO DEMOB:

- Follow the demob plan instructions based on your travel route home.
- Submit all time documentation (including travel home) ahead of demob.
- Abide by scheduled demob time.

QR codes for Electronic Times

Use this link for fillable Crew Time Report (CTR)

Use this for fillable Equipment Time Report (Shift Ticket)

FINANCE SECTION STANDARD OPERATING PROCEDURES

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional time may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs.). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit daily or every other day once they are signed by the next level supervisor. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily or every other day and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Please also show in remarks section what division you are working in.

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site
F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the
instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

**You're OES AREP on the North Complex

Human Resource Message
North Complex
Tuesday September 8, 2020

HUMAN RESOURCE MESSAGE
Zero Tolerance for Harassment

No employee should be subjected to harassing behavior. If an employee knows of, witnesses, or believes he/she has been subjected to harassing conduct, discrimination, or retaliation, he/she should report it promptly to his/her supervisor, or if the supervisor is the one engaging in the harassing behavior, report it to Incident Human Resources.

Notifying HR by reporting allows the Incident Staff to ensure that the conduct is stopped, an investigation is conducted, and anyone engaging in misconduct is held accountable.

There will be zero tolerance of harassment, bullying, intimidation or any resemblance of such on this incident period.

Feel free to call/text or come by the HRSP yurt if you have questions, concerns, or just want to chat. **Adam Alvarez – (HRSP) - (707) 373-8715**

Maidu Requests for Visiting Homeland

1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

5. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

6. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

- Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. **We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!**
