**Ignition Receptiveness:** ERC levels just below the 90<sup>th</sup> percentile. Probability of Ignition Day 90%  
Night 30%.

**Dryness:** Dead and down fuel moistures :1 hour – 3% day, **10 hour– 5%**, 100 hour–6%, and 1000 hour– 6%.

### FIRE BEHAVIOR

#### \*\*\* Local Thresholds exceeded\*\*\*

You can expect several shifts of critical fire weather with SW gusty winds and low RH. The fuels remain dry and drought stressed, both live and dead. Be aware of fire behavior in and around SW/NE oriented drainages. Winds (gust 30 mph) can intensify and become erratic. In smoke shaded areas the fire remains very active (upslope runs, group torching and short-range spotting). Fire can get into the crowns relatively easy with slope and wind alignment.

#### SPECIFIC FIRE BEHAVIOR:

##### Branch X North Zone:

**Division AA/TT:** Minimal fire activity expected in Div AA. In Div TT, expect smoldering from previous firing operation.

**Division MM:** Expect active fire behavior as the fire continues to advance to the North uninterrupted with the smoke inversion. Fire behavior consisting of torching, upslope movement and short-range spotting.

**Division QQ:** Backing from firing operation. Potential for rollout and spotting.

**Division P/S/V/X/Z:** These divisions are in mop-up/patrol status. Interior islands will continue to smolder and creep.

##### Branch VII South Zone:

**Division BB:** Fuel/topography driven fire consisting of flanking, upslope movement and slope reversals. Be mindful of SW/NE oriented drainages.

**Division DD:** Fuel/topography driven fire consisting of flanking, upslope movement and slope reversals. Potential for active fire behavior with SW/NE drainage alignment. Backing from firing operations.

**Division GG:** Expect fuel/topography driven fire consisting of flanking, upslope movement and slope reversals. Potential for active fire behavior from SW/NE drainage alignment.

**Division JJ:** SW/NE drainage alignment will increase fire behavior. Potential for fire activity from the West Zone (CALFire).

**Night Division:** Moderate temperatures tonight. Low RH on the ridge tops but much higher in the valleys. Winds will be SW 8-12 mph then down drainage 4-7 after 2300. Firing and holding operations should be successful after 2300. A PIG of 30 will keep spot fires manageable. Fuels continue to remain receptive and burn readily at night.

### AIR OPERATIONS

Air operations over the entire incident will be limited due to smokey conditions.

### Safety Message

**WATCH OUT SITUATION:** Wind increasing and/or changing direction.

# North Complex – Safety Message

INCIDENT #CA-PNF-001308

DATE: 09-13/14-2020 TIME: 0600-0600 Day/Night Shift

## Situational Awareness

*In the wildland fire environment, "SA" is a requirement!*

- Driving: Maintain safe driving practices
- Trees: Gravity always wins. Look up, down and around
- Steep Terrain: Look for rolling material
- Fatigue: Monitor your health and that of those around you
- Concentrate: Stay focused on the task at hand
- Communications: Be clear, be concise, be accurate
- Smoke: Recognize the effects of long term smoke exposure and mitigate

## The A, B, C's of Safety:

Always

Be

Careful

### Points to Ponder

- Vehicle accidents are a common cause of firefighter injuries – **Drive Smart**
- Trees are a major cause of wildland firefighter injuries and fatalities – **Look Up**
- Ash pits and stump holes are the most common cause of burn injuries – **Look Down**
- FF's can be the cause of, or recipient of rolling debris – **Look Around**
- Heat, long hours, and repetition can lead to complacency and injuries – **Pace yourself**
- Multiple Resources of multiple typing doing multiple jobs = Multiple potential for injury – **Stay Focused**
- Communicate clearly and get confirmation that your message is understood – **Communicate Clearly**

### Individual Accountability

- Know where your crewmembers are at all times.
- Have crewmembers work in pairs.
- Inform Division or your Supervisor of changing locations.
- Review radio procedures, and ensure your radio is properly cloned.
- Check **IN** and **OUT** with Branch and or Division if not assigned to that location and are passing through.
- Check **OUT** with your supervisor (or Division) at the end of shift.

## ***North Complex COVID-19 Expectations***

---

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.**
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- **Social Distancing.** Maintain a minimum of 6’ physical distancing, especially from those outside of your module-as-one.
- **Face Coverings.** Face coverings are required to be worn, **in the appropriate manner covering nose and mouth**, when at ICP and camps. Outside of camp, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

## Human Resource Message North Complex September 13, 2020

### **HUMAN RESOURCE MESSAGE**

**Communication is a two-way street.** When communication becomes a one-way, it becomes a traffic jam and turns into an issue. Some examples are:

- Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- It can be like the telephone game. It starts with specific information and by the time it gets to the end it's very different than what was first communicated.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two way street!

**“The single biggest problem in communication is the illusion that it has taken place”....by George Bernard Shaw**

Feel free to call/text or come by the HRSP yurt if you have questions, concerns, or just want to chat. **Adam Alvarez - (HRSP) – (707) 373-3715**

# Maidu Requests for Visiting Homeland

## 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

## 2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

## 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

## 4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

## 5. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

## 6. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

- Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. **We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!**
