FUELS: The major fuel types, found in and around the fire area are timber litter and shrubs.

<u>Ignition Receptiveness</u>: ERC levels just below the 90<sup>th</sup> percentile. Probability of Ignition Day 90% Night 30%.

**Dryness:** Dead and down fuel moistures :1 hour – 3% day, **10 hour – 5%**, 100 hour – 6%, and 1000 hour – 6%.

#### **FIRE BEHAVIOR**

### \*\*\* Local Thresholds exceeded\*\*\*

Moderate risk burn environment due to moderate temps, low RH and low fuel moistures. Be aware of fire behavior in and around SW/NE oriented drainages. Winds (gust 25 mph) can intensify and become erratic. In smoke shaded areas the fire remains very active (upslope runs, group torching and short-range spotting). Fire can get into the crowns relatively easy with slope and wind alignment.

#### SPECIFIC FIRE BEHAVIOR:

#### **Branch X North Zone:**

**Division AA/TT:** Minimal fire activity expected in Div AA. In Div TT, expect interior smoldering and potential for spotting from SW winds.

Division MM: Expect backing, group torching and flanking. Potential for spotting due to SW winds.

**Division QQ:** Expect backing, group torching and flanking from firing operation. Potential for spotting due to SW winds.

**Division P/S/V/X/Z:** These divisions are in mop-up/patrol status. Interior islands will continue to smolder and creep.

#### **Branch VII South Zone:**

**Division BB:** Expect backing in the Minervia Bar and DP 98 area due to the firing operation. Be mindful of SW/NE oriented drainages.

**Division DD:** Expect backing from firing operations. Smoldering and creeping near the containment line. The fire is aligning in the Onion Valley (East-West drainage). Be mindful of the forecasted SW winds.

Division GG: Smoldering and creeping near containment line.

**Division JJ:** Smoldering and creeping near containment line. Potential for fire activity from the West Zone (CALFire).

**Night Division:** Moderate temperatures tonight. Low RH on the ridge tops but much higher in the valleys. Winds will be South 10 mph through the morning hours. The forecasted winds will be advantages for the South Zone and pose a challenge for the North Zone. A PIG of 40 will keep spot fires manageable. Fuels continue to remain receptive and burn readily at night.

#### AIR OPERATIONS

Air operations over the entire incident will be limited due to smokey conditions.

ALL	TRAFFIC HAZARDS AND DRIVING	<ul> <li>Many roads are narrow, mid-slope, with soft shoulders. Allow vehicles to pass on uphill side. ALL	FATIGUE/COMPLACENCY	Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps to maintain SA for the duration of the incident.

#### North Complex – Safety Message

INCIDENT #CA-PNF-001308

DATE:09-15/16-2020 TIME:0600-0600 Day/Night Shift

#### **RISK MANAGEMENT**

Use the following process to quickly assess risk for the situations you face throughout the day.

<u>Step 1</u> - Identify the hazards. Make this an ongoing, continuous process in your daily decision making routine. Gather as much information as possible.

<u>Step 2</u> - Assess the risk levels. The probability and severity of an undesirable outcome linked to identified hazards = **RISK**.

<u>Step 3</u> - Analyze and select control or mitigation measures. <u>Limiting exposure is almost always an option.</u>

Step 4 - Reassess risk level with controls in place (residual risk).

<u>Step 5</u> - Make your informed decision based on the residual risk. Ask the **risk vs. gain** question: is the benefit of the action I'm considering worth the risk?

Step 6 - Monitor the situation

#### RECOGNIZE THE SIGNS OF FATIGUE

The effects of fatigue can directly hinder our abilities to:

- Perform various tasks, maintain a positive and supportive attitude
- Maintain situational awareness and a high degree of alertness
- React appropriately in a timely manner and fashion
- Retain a sharp memory and recollection of information

# Mitigate or Change Tactics When Faced With

- Indirect Fireline
- Change of fuel characteristics
- Change in fire behavior
- Reburn Potential
- Lack of Communications With All Forces
- Downhill Line Construction
- Under slung Line
- Fatigued Crew

#### **Leadership is All About Character**

Fire leaders set the example by exhibiting strong character. Character is based on values. It is the combination of actions and words that others appraise to determine if the leader can be trusted to do the right thing

- Know our values, review them frequently, and look for areas of improvement.
- Admitting when we are wrong.
- Taking time to reflect on our actions.
- Finding role models and asking them to be a mentor.
- Studying leaders and leadership, learning from their successes and mistakes.

CIIMT #4 Safety Group

#### North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits "close contacts" to those within the module. A "close contact" is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- <u>Social Distancing.</u> Maintain a minimum of 6' physical distancing, especially from those outside of your module-as-one.
- Face Coverings. Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and camps. Outside of camp, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- Wash your hands. Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

#### NORTH COMPLEX COVID-19 DAILY SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

#### **Symptom**

Cough more than expected?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside your normal for firefighting?

Sore throat?

New loss of taste or smell?

Fatigue, outside your normal for firefighting?

Headache, outside your normal for firefighting?

#### **Maidu Requests for Visiting Homeland**

#### 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

#### 2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

#### 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

#### 4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

#### 5. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

#### 6. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

 Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!
