### INPUTS

#### WEATHER SUMMARY

**WEATHER:** Gusty SW winds developing in the afternoon ahead of a cold front. Smoke/sun.

**MAX TEMP:** Mid Slope & Valleys: **81-86°** Upper Slopes & Ridges: 67-73° **MIN RH: 20-25%**

**20 FOOT WINDS:** East of DIV TT: **S 4-8** mph after 1000, then becoming SSW 10-15 G25-30mph after 1300  
West of DIV TT: **S 4-8** mph after 1000, then becoming SSW 10-15 G20-25mph after 1300

**LAL: 1 CHANCE OF WETTING RAIN** ( $\geq 0.10''$ ): 0%

**FUELS:** The major fuel types, found in and around the fire area are timber litter and shrubs.

**Ignition Receptiveness:** ERC levels are below the 90<sup>th</sup> percentile. Probability of Ignition Day 80%  
Night 30%.

**Dryness:** Dead and down fuel moistures :1 hour – 3% day, **10 hour– 5%**, 100 hour–6%, and 1000 hour– 6%.

### FIRE BEHAVIOR

\*\*\* Local Thresholds exceeded\*\*\*

**Expect a high risk burn environment for strong SSW gusty winds and low fuel moistures.** The intensity of the winds will affect the East (G25-30 mph) and West (G20-25 mpg) sides differently. These winds can mix down into drainages, increase in speed and become erratic. Significant increase in spotting potential. In smoke shaded areas the fire remains very active (upslope runs, group torching and short-range spotting). Where open line and clear air exist, fire behavior will intensify.

#### SPECIFIC FIRE BEHAVIOR:

##### Branch X North Zone:

**Division AA/TT:** Minimal fire activity expected in Division AA. In Division TT, expect interior smoldering and potential for spotting from SSW winds.

**Division MM:** Minimal activity on the west side; smoldering. Backing, flanking and torching in the area closest to the MM, QQ Division break. Potential for spotting.

**Division QQ:** Expect backing and flanking from previous shifts firing operation. Potential for spotting due to SSW winds.

**Division P/S/V/X/Z:** These divisions are in mop-up/patrol status. Interior islands will continue to smolder.

##### Branch VII South Zone:

**Division BB:** Expect uphill movement, torching and spotting as the fire moves through the landscape. Potential for long-range spotting (1-1.5 miles) from strong transport winds. Be mindful of SW/NE oriented drainages.

**Division DD:** Expect backing fire from tactical firing operations off the PCT (if needed). The fire continues to advance (flanking, torching, spotting) through the Onion Valley. Be mindful of the forecasted SSW winds.

**Division GG:** Smoldering and creeping near containment line.

**Division JJ:** Smoldering and creeping near containment line. Potential for fire activity from the West Zone (CALFire).

**Night Division:** Cooler temperatures tonight. Moderate RH on the ridge tops but much higher in the valleys. Winds will be South 10-13 mph through the morning hours. The forecasted winds will be advantages for the South Zone and pose a challenge for the North Zone. A PIG of 30 will keep spot fires manageable. Fuels continue to remain receptive and burn readily at night.

#### AIR OPERATIONS

Air operations over the entire incident will be limited due to smokey conditions.

#### Safety Message

**Plan for erratic winds in and around topographical features i.e. drainages, saddles, spur ridges.**

INCIDENT NAME:

Operational Period: 0600-0600

# September 17/18, 2020

DATE AND TIME PREPARED:

September 16, 2020 1600

# North Complex – Safety Message

INCIDENT # CA-PNF-001308

DATE: 09-17-18-2020 TIME: 0600-0600 Day/Night Shift

**“SAFETY is a CORE VALUE to be integrated into ALL incident activities”**

## **See Something Say Something, Communicate Safety!**

- **Take Charge** of assigned resources.
- **Motivate** firefighters with a “can do safely” attitude.
- **Demonstrate Initiative** by taking action in the absence of orders.
- **Communicate** by giving specific instructions and asking for feedback!
- **Supervise** at the scene of the action.

## **Module as One**

- Same as “module as a crew/family. Same people travel together for the season. No need to physical distance within the crew.
- A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/mask.
- On the fireline; the **Fire** is the focus. Try not to co-mingle close (less than 6’ apart) from other personnel.
- In camp, **coronavirus** is the focus. **Use face coverings** and physical distance in common areas such as briefing areas, chow line, shower area etc.

## **Driving**

- When driving keep the speed at or below the posted speed limit and turn your headlights on. Is the posted speed limit a safe speed under the current conditions and traffic?
- **Use caution on unimproved roads as some have soft shoulders. Some roads are also only one lane with pullouts!**
- Road surfaces are variable with washboard conditions and thick dust that can compromise turning and braking.
- Watch for and anticipate stock and wildlife especially from dusk to dawn.
- Always fasten your seat belt before the vehicle is set into motion. Use backseat.
- Don’t tail gate, especially in dusty conditions.
- Slow down, slow down, and slow down!

## **Hazard Tree Indicators**

- Tree burning for any period of time.
- High risk tree species (rot and shallow roots).
- Numerous downed trees.
- Dead, broken, or burning tops and limbs overhead.
- Accumulation of needles, bark, or limbs.
- Leaning or hung-up trees.

Eliminate the hazards with qualified sawyers and modify suppression tactics or fireline location to avoid high risk areas. Always provide timely feedback to others regarding any hazard trees.

Prepared by,  
**Team 4 Safety Group**

## ***North Complex COVID-19 Expectations***

---

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.**
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- **Social Distancing.** Maintain a minimum of 6’ physical distancing, especially from those outside of your module-as-one.
- **Face Coverings.** Face coverings are required to be worn, **in the appropriate manner covering nose and mouth**, when at ICP and camps. Outside of camp, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

# Maidu Requests for Visiting Homeland

## 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

## 2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

## 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

## 4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

## 5. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.
