North Complex Weather Forecast

Forecast Number: 40

Office Responsible: CA-PNF

Shift Date: Wednesday, Sept 30, 2020 Forecast Issued At: 2000 hrs. 9/29/20

Incident Meteorologist: Sean Luchs
Forecast For Shift Times: 0600 - 0600

WEATHER DISCUSSION: A summer-like stretch of weather will intensify, near the peak of the entire stretch. Overnight humidity recovery will be poor for all but the coldest valleys, setting us up for days with very low humidity across the area. Though the typical pattern of terrain winds may continue to dominate, the strength of these winds will be enhanced by the unseasonable differences in temperature between the Sierra and Sacramento Valley, even flipping the period where these winds are typically strongest, from afternoon to overnight.

Today (0600-1800):

Weather: More heat today, with highs reaching 80 degrees for all but the highest peaks, and over 90 degrees at valley floors. Stronger than usual overnight terrain winds may hold off afternoon terrain winds back an hour or two.

High Temperatures: 24hr Trend: steady to 2F warmer / steady to 1C warmer

Upper Slopes & Ridges: 73-77°F / 23-25C *Middle Slopes*: 76-81°F / 24-27C

Low Slopes & Valleys: 87-92°F / 31-33C

Afternoon Min RH: 24hr Trend: steady

Area-wide: 10-20%

20 Foot Winds: 24hr Trend: steady

Ridges & Higher Slopes: Terrain winds dominate, with nocturnal winds in the morning stronger and more persistent than afternoon winds. Peak winds 10-15 mph / 16-24 km/h, gusting to around 25 mph / 40 km/h. Low Terrain/Valleys: Downslope/Downvalley 0-5 mph / 0-8 km/h early, transitioning to upslope/upvalley in the afternoon, 5-10 mph / 8-16 km/h and some higher gusts.

A.M. Inversion/Thermal Belt: 4,800-5,300 ft. / 1450-1600 m MSL

Transport Wind: SW 10 mph/16 km/h, to NE 20 mph/32 km/h overnight Mixing Height: 8,000 ft / 2450 m MSL LAL: 1

Chance of Wetting Rain (> or = to 0.10"): 0%

Tonight (1800-0600):

Weather: Heat will keep humidity recovery poor for most – only the coldest valleys should expect overnight RH to approach 50%. A significant temperature difference between Lake Almanor and Jarbo Gap will enhance overnight winds. These winds will become very erratic in complex terrain, particularly at stream confluences and bends.

Low Temps: 24hr Trend: 2-5F / 1-3C warmer

High Valleys/Drainages: 43-48°F / 6-9C Low Valleys/Drainages: 66-71°F / 19-22C

Slopes/Ridges: 53-58°F / 12-14C

Max RH: 24hr Trend: steady

Most of the area: 25-35% High valleys and drainages: 50-60%

20 Foot Winds: 24hr Trend: generally steady, gusts in Feather River Canyon about 5-10 mph / 8-16 km/h slower.

Most of the area: Terrain winds shift from daytime to nighttime after 1900, 5-10 mph / 8-16 km/h.

Feather River Canyon: Terrain winds stronger overnight than during the day. Winds to around 15 mph / 24 km/h,

with gusts to around 25 mph / 32 km/h.

Inversion/Thermal Belt: 4,500-5,200 ft. / 1350-1600 m MSL

Chance of Wetting Rain (> OR = to 0.10"): 0%

2-5 Day Outlook, Thurs-Sun: Thursday should be the peak of this stretch of summery weather in terms of heat and low humidity. Thursday morning should also see the strongest overnight winds, especially in Feather River Canyon. This weekend, expect conditions to slowly back down from Thursday's peak, but summer-like conditions will persist.

LAL: 1

Latest Weather Observations near the Incident

FIRE BEHAVIOR FORECAST								
FORECAST NUMBER: 40	TYPE OF FIRE Wildfire							
FIRE NAME: North Complex	OPERATIONAL PERIOD 09/30-10/1 Day/Night 2020							
DATE ISSUED Tuesday, Sept. 29, 2020	TIME ISSUED 2000							
UNIT Plumas National Forest	SIGNED Boyd Lebeda, FBAN							
	INPUTS							

WEATHER SUMMARY - See Attached Fire Weather Forecast

FUELS: Fuels and Fire Behavior Advisory for Northern California areas below 3000 feet was updated – see attached sheet. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke.

Dry fuel profile today. The major fuel types found in and around the fire area are timber understory and litter with more grass and brush components in the North Fork Canyon.

Dead and down fuel moistures for today from NFDRS 24 Hour Forecast for

Cashman RAWS (upper elevations): 1 hour = 3% day, 10 hour = 4%, 100 hour = 6%, and 1000 hour = 7%. Jarbo Gap RAWS (lower elevations): 1 hour = 3% day, 10 hour = 3%, 100 hour = 5%, and 1000 hour = 6%. Cashman RAWS ERC levels are below the 90th %. **Jarbo Gap** RAWS **ERC** levels are **over** the 90th %.

TOPOGRAPHY: Steep, rugged terrain allows fire to make active upslope runs. Wind aligned with topography can funnel and accelerate winds.

FIRE BEHAVIOR

The fire is burning in Northern Sierra mixed conifer and routinely spreads by torching and spotting. Expect spots to establish quickly and fire behavior to transition active and increase to very active when fire can access available fuels.

Fire has moved down into lower elevations in the North Fork Canyon. Fire is accessing new fuel models, on new topography and will be more influenced by canyon diurnal winds.

Spotting distances are up to 0.3 miles (0.5 km). Probability of Ignition: Day 90% Night 55%.

SPECIFIC FIRE BEHAVIOR:

North Zone:

Division AA/QQ: Expect interior activity with isolated torching and possible group torching. Potential for rollout, backing and spotting.

Division MM: Expect continued torching, group torching, flanking, spotting and roll out on Grizzly Dome and down into Bucks Creek.

Division OO (Highway 70 Corridor): Expect continued backing, flanking, spotting and roll out down toward the North Fork of the Feather River and Highway 70. Watch for spot fires between Grizzly Creek and Storrie.

Division Z: Interior islands will continue to support fire activity – watch for potential spotting over the containment line.

South Zone:

Division BB/DD/GG: Watch for interior activity and possible spotting over containment line.

Night Division: There will not be a good humidity recovery again tonight – so expect fire activity to continue through the night and be poised for an early start tomorrow. A higher probability of ignition (PIG) of up to 55% will allow fire behavior to be active most of the night.

AIR OPERATIONS

Smoky conditions may limit air operations.

Safety Message

Watchout #14 – Weather becoming hotter and drier. Continue to assess the fire environment and anticipate and report changes.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 29, 2020

Subject: Dry offshore and northerly winds, followed by high temperatures will rapidly dry out fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures during August and September, coupled with limited precipitation has expanded extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through early October. Light precipitation that passed over the northern part of the region only lowered fire danger for a very brief period. Fires have recently shown or exhibited moderate to rapid rates of spread or generate extreme fire behavior when influence by winds. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will climb back up to between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values in temperatures. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels — Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links: https://gacc.nifc.gov/oncc/fuelsFireDanger Bi.php https://gacc.nifc.gov/oncc/fuelsFireDanger Erc.php https://gacc.nifc.gov/oncc/fuelsFireDanger Hundred.php https://www.esrl.noaa.gov/psd/eddi/

https://vegdri.unl.edu/Home/StateVegDRI.aspx?CA https://gacc.nifc.gov/oncc/fuelsFireDanger Thousand.php

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will likely continue until enough precipitation occurs to significantly increase and maintain higher fuel moisture readings for an extended period.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at https://gacc.nifc.gov/oncc/predictive/weather/index.htm or potential Red Flag conditions from the National Weather Service and weather at https://www.wrh.noaa.gov/fire2/cafw/.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

Human Resource Message North Complex Fire

Human Resource Specialist (HRSP) on Incident

How We Build Trust

As incident personnel, we must be trusted to "do right" in how we treat each other as colleagues and how we engage with the people and communities we serve. When we do, we increase trust and inspire others to engage with us in caring for the land and serving people.

Our dedication to service describes not only our commitment to the American people, but also our commitment to each other.

Recognizing the interdependence between us as colleagues—and between our organizations and the people and communities we serve—means we know what we do always has an impact on others.

We respect diversity in all things, including the people and communities we engage, and the cultures, perspectives, ideas, and experiences they embody and bring to the table.

Every individual is entitled to safety in every way: physical, psychological, and social.

~~Treat everyone with mutual respect and appreciation. Remember who you are and remember why you're here. ~~

NORTH COMPLEX FIRE FINANCE SECTION PROCEDURES

When possible, all finance documentation should be submitted electronically via email to:

2020.northcomplex.finance@firenet.gov

- Electronic copies can include PDF, scanned copies of document, or CELL PHONE pictures of documents.
- Please include your e-mail and cell phone number on CTRs and/or Shift Tickets.
- Please include your Resource Order Number and Name in the subject line of your email.
- Completed CTRs and/or Shift Tickets must be approved and signed by your immediate supervisor.
- Questions Overhead/Crews: 984-227-1152 Equipment/Contract Crews: 984-227-0529

If connectivity or phone capability is an issue, please coordinate with finance section to turn in time documents. Be sure to mark your last day as FINAL when you are demobing. When possible, OF-288s/OF-286s will be emailed. Please notify finance as soon as possible if there are errors. If you are a contractor or AD who needs your invoice sent in for payment, when possible we will need the final OF-288/OF-286 electronically signed and returned. Partial payments/interim invoices for contractors are typically submitted every 14 days, please coordinate with the finance section to process these invoices.

<u>Medical.</u> Please work directly with the Medical Unit Leader. The MEDL will be in contact with Finance to assure the appropriate forms are available and completed.

<u>Damages or Claims.</u> Please do not wait until the day of demob to submit damage/claim documents. A QR Code is provided below for an electronic OF-289, Property Loss or Damage Report. Ensure the form is completely filled out and contact information is included. **Comp/Claims (307) 250-2375.**

hims //tinvard.com/CrewTime

Crew Time Report

Equipment Shift Ticket

Property Loss/Damage

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.

The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

You're OES AREP on the North Complex Kit Bailey 530-307-1307

NORTH COMPLEX TRAINING SPECIALIST MESSAGE

Trainer / Mentors:

As of **9/24/20** there is no longer a Training Specialist assigned to this incident. If this changes you will be notified.

TRAINEES:

If you **ARE NOT** currently registered with the Training Specialist please make sure you get completed before you leave the incident the following from your trainer:

- Signatures in your task book
- An evaluator record completed
- A completed 225 Personnel Evaluation
- If you ARE <u>currently registered</u> with the Training Specialist, please contact me and I will process your training packet over the phone. You will need to text or email me the following information:
- Completed ICS-225WF or ICS-226 Personnel Evaluation
- Evaluator record for incident
- <u>Dates of your assignment, position held, and Trainer</u> information
- <u>Trainer information includes name, phone, home unit,</u> email address
- Percentage of your task book that has been completed

Additional forms are available on-line @ https://www.nwcg.gov/publications/ics-forms

Emil Picchi
Training Specialist

Demob Tips

North Complex CA-PNF-001308

If you need a flight home, please contact demob three days prior to your last work day to discuss flight details.

For emergency or urgent demobs contact your supervisor first and have them contact the Demob Unit directly at 2020.northcomplex.dmob@firenet.gov or (916) 296-7862.

Note: If you have cell phone coverage you will not physically need to come to demob.

After being notified by your supervisor of your tentative release date:

<u>Step 1.</u> Once you have submitted your last CTR/Shift ticket marked "Final", please contact Finance to assure all time documents have been received.

<u>Step 2</u>. Return all supplies, radios, etc. that were checked out.

<u>Step 3</u>. All vehicles that have been on the fireline must go through the weed wash near Ground Support at ICP.

AFTER steps 1-3 are completed:

<u>Step 4</u>. Complete Demob Checkout Sheet using QR code on the IAP cover page. Look for the Demob tab. Once you submit the Demob Checkout Sheet you are released from the incident and may begin travel home. You do not need to physically come to demob. Safe travels!

This document is intended to track, record, and validate the amount of water used on an incident. It is not intended to review the performance of equipment using water on an incident.

Maidu Requests for Visiting Homeland

1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

5. Don't touch the knickknacks.

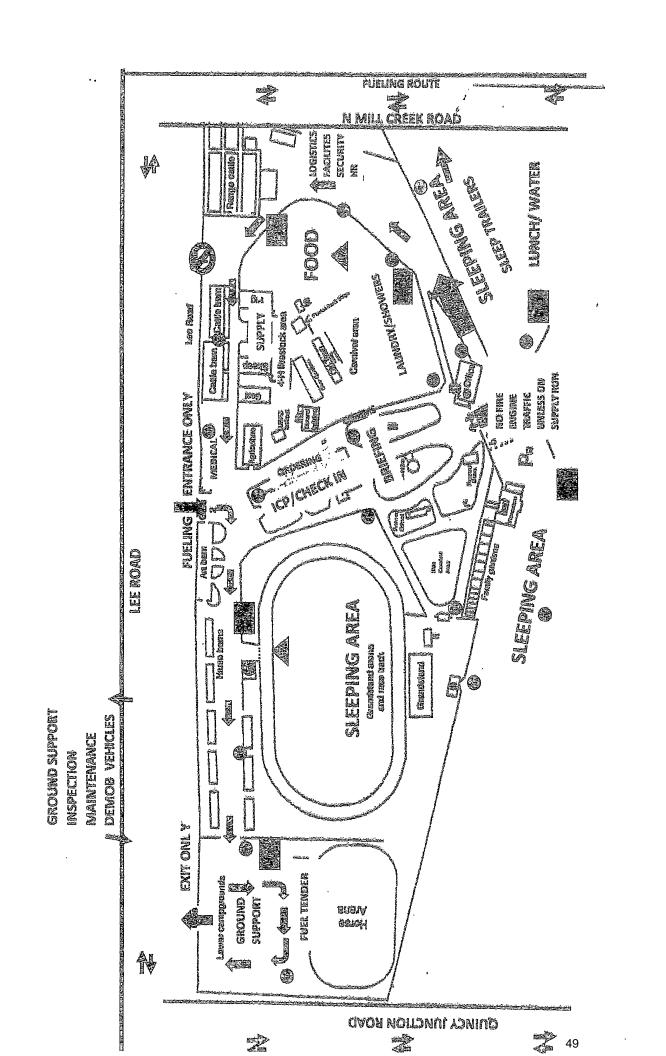

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

6. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!

Rocky Mountain IMT Black

Team Ordering/Timeline Process:

1100 - Last call to change spike camp resource hot food location.

- All crew level orders will be placed through DIVS or Branch.
- DIVS or Branch will place all orders through Communications Unit.
- All orders will be tracked using the process found on the front of this form.

GPS Datum: NAD 83- Degrees, Decimal, Minutes (DDMM.MM)

Definitions

Line Spike Camp-Managed by Operations at the *DIVS* level; mobile, short duration and self-sufficient. Spike Camp-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans. Emergency Medevac-Life threatening situation requiring immediate medical attention. Handled as per IAP med plan. Communications to clear command channel radio traffic.

Medical Transport-Transport of less serious injury/illness managed by Operations Section or line Medics back to camp for evaluation and/or treatment.

Revised 5/28/2020

North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits "close contacts" to those within the module. A "close contact" is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- **Social Distancing.** Maintain a minimum of 6' physical distancing, especially from those outside of your module-as-one.
- <u>Face Coverings</u>. Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- Wash your hands. Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

NORTH COMPLEX COVID-19 DAILY SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms 1?
Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

Instructions for Screening

Item	What to Do
If resource has a cough that is more than expected, shortness of breath	NOTIFY SUPERVISOR
or difficulty breathing, or any other symptoms listed.	IMMEDIATELY
At entries to established camps (ICP):	DO NOT ANNOUNCE
COVID-19 Daily Screening Tool will be posted for self	Ask individual or
screening of Incident Personnel, Cooperators and Guests.	"module-as-one" to step aside and follow the steps
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	below.

Steps to follow for a symptomatic screening

Escort individual or "module-as-one" to isolation area. Separate the symptomatic personnel. Isolation support personnel should begin documentation.

Notify Line Medics or MEDL if at ICP to begin evaluation for COVID-19 potential.

COVID Safety will coordinate with Incident COVID Advisor.

Have individual or "module-as-one" fill out WF Employee Contact Assessment Sheet.

Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html

¹ Symptoms of Coronavirus

COVID Roles on a Large Fire

August 26, 2020

CERT Works for Pandemic Coordinator

Responsible for COVID oversight at a Regional level. Includes reporting guidance, employee care, logistics, training, and coordination with RLT, IMOs, and COVID Advisors.

Responsible for oversight of COVID IMO and IMT. Has decision authority for COVID response, testing needs, and isolation (in conjunction with home unit of impacted resource).

Coordination And COVID Briefings: CERT Serves In Advisory Role To IMO, COVID Advisor, And/or AA

COVID IMO

Responsible for COVID related reporting and support at forest level. Implements contact assessment, coordinates testing, and provides logistical support to affected employees. Includes FS employees, ADs, volunteers. May include coordination with partners and contractors.

COVID Advisor

Liaison between IMO and IMT to track COVID related issues. Makes recommendations on testing, isolation, and/or return-to-work following exposure. Facilitates communication with home unit of impacted resource. Reviews IMT strategies for COVID prevention.

IMT

Responsible for management of the fire incident. COVID focus is prevention. Likely will assist with initial care of sick/exposed employees and contact assessment. Coordinates with partner Agencies for logistical assistance with non-FS personnel.

INCIDENT RISK ANALYSIS NORTH COMPLEX CA-PNF-001308 (ICS 215a) Day/Night Shift

		1 COMPLEX CA-PNF-001308 (ICS 215a) Day/Night Shift
DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	ACCOUNTABILITY	 Know where your troops are at all times. Know the plan, brief the plan, and implement the plan. Ensure you have communications with adjoining forces and they know the plan. Check in and out when traveling through Branches and Divisions. If you see someone that looks out of place, stop and ask what they're doing As fire conditions escalate and your chasing spots, don't over commit. When driving keep speed at safe speed limit and your headlights on. Stay as far to the right of the road as is safely possible.
ALL	Driving	 Stay as far to the right of the road as is safely possible. During shift change keep your speed at or below the posted speed limit Watch for and anticipate civilian traffic. Always fasten your seat belt before the vehicle is set into motion. Don't tail gate
ALL	FIRE BEHAVIOR	 Are you seeing what we have predicted? Conduct thorough assessments before starting work Ensure LCES is in place Plan & Communicate your exit strategy with your crew and adjacent resources Provide additional briefing for new resources and maintain communications.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees.
ALL	FATIGUE / COMPLACENCY	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps to maintain SA for the duration of the incident.
ALL	NIGHT OPERATIONS	 Have a purpose for where you drive and what you do. Don't rush into assignments. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Increase SA by trying to see the work area during daylight hours. Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	AVIATION OPERATIONS	 Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines and reference materials. Ensure coordination and communication are in place and understood by all involved resources in a mission. Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.
ALL	SMOKE EXPOSURE	 Periodically rotate crews out of smokey conditions on the line when feasible. Locate spike camps above inversion when practical. Have sufficient fuel on board for muscles to work efficiency. Monitor crew's health. Get medical care early for early signs of respiratory illness. Provide rest breaks. Ensure crews get as much sleep as possible. Hydration can flush out the system and allow the body to reset itself.
ALL	WILDLAND URBAN INTERFACE OPERATIONS	 Maintain continuous Situational Awareness based upon the fire environment, observed fire behavior, hazards and incident objectives. Key to success in the WUI is preparation and preplanning. Be active and engage in defense preparations & don't wait for the fire to arrive. Be decisive in tactical engagement. Know when to engage or not. Establish management decision points, Safety Zones, and Escape Routes.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators (Visual & Radio) Avoid working downslope from heavy equipment. Maintain a 50'-150' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height.
ALL	COVID-19	 Utilize social distancing, wear facemasks in camp. Maintain the "module of one" concept. Disinfect vehicles, tools, and commonly touch surfaces frequently. Do not share equipment and wash hands frequently.
	INCIDENTNAME:	Operational Period: 0600-0600

North Complex

September 30, 2020

DATE AND TIME PREPARED:

September 26, 2020 1600

Safety Message

INCIDENT NAME: North Complex OPERATIONAL PERIOD: 09/30/2020 Day/Night

Communication Responsibilities:

All Firefighters have five communication responsibilities

- *Briefings All resources require briefings. Use briefing checklist in pocket guide.
- *Debrief Actions as necessary. Use pocket guide After Action Review to stimulate discussion and provide guidance.
- *Communicate Hazards to Others
- *Acknowledge messages
- *Ask if you do not know Ask questions in unfamiliar situations. The only dumb question is the one you did not ask.

Ask questions if you are unsure of an assignment or procedure. It's going to be a long season – Better that we over communicate and problem solve. A person's attitude plays a major role in safety. How's yours?

Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Radio Communications may be poor in some areas: use human repeaters as needed. Ensure all personnel are familiar with the ICS 205 incident communications plan and the ICS 206 medical plan.

Make sure all resources have radios cloned appropriately.

Ensure that non-agency resources understand radio use and procedures.

SAFETY OFFICERS:	Robert Pelton SOF2, Jeff Birg SOFR, James Chard SOF2, Larry Wright Night SOF2, Kurt Schierenbeck, Justin Conrad SOF2(t)

Medical Incident Report

FOR A <u>NON-EMERGENCY INCIDENT</u>: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Be Alert - Keep Calm - Think Clearly - Act Decisively

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

	DED / PRIORITY 4 List	limb thus stanius	r inium, av illmana. I		:. INTRACTION		
Severity of Emergency	□ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.						
AND	☐YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.						
Transport Priority (priority 1, 2, 3)	Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.						
Nature of Injury or Illness	za oprano, etano, mino	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		Brief Summa	ry of Injury or Illness		
& Mechanism of Injury	(Ex: Unconscious, Struck by Falli
