# North Complex- Safety Message

INCIDENT #CA-PNF-001308

DATE: 10-7/8-2020 TIME: 0600-0600 Day/Night Shift

## **General Safety Concerns:**

- Driving: Narrow/dusty roads, others driving faster than we do. HEADS UP!!!
- **Risk versus benefit:** Do not get caught up in the moment! Always weigh the risks of tactical operations against the potential benefit. **Especially on steep slopes at night!**
- **Drought conditions:** Use all the assessment tools; Heads up for fire behavior; Ensure **LCES** is in place; Take extra time to ensure it is safe to engage! Use extra caution all the time.
- All trees can be dangerous. They do not have to be leaning, dead, burned, or gnarly. Perform adequate assessments minimize exposure and risk around all trees.
- *Line Construction:* Use all the safety protocols concerning line construction. Watch the spacing, footing, and other firefighters below.

## "SEE SOMETHING...... SAY SOMETHING!"

If you see a hazard or a dangerous situation developing, tell your supervisor and those around you.

## **Driving & Fatigue**

- Make sure you are getting your rest when you can! Stick to work/rest guidelines.
- Fatigue can cause us to mentally stray from the driving task
- It only takes a second of distraction to lose control of our vehicle. The faster you are traveling, the faster you get in trouble
- Make sure you recognize when you are too tired to drive!
- Do not tough it out and put yourself, your passengers, and others at risk
- Slow down, take breaks, and talk to your passengers. If possible, keep an alert passenger in the front seat next to you. Know your limits

## Night Shift: Patrol with a Purpose!

- Obtain a clear briefing to understand the purpose and intent of the patrol
- Coordinate all patrol activities with adjoining patrol resources
- Maintain strict accountability of all resources
- Always keep the purpose of the patrol in mind before engaging
- Always assess risk versus gain when considering acting during patrol activities

## North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits "close contacts" to those within the module. A "close contact" is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- <u>Social Distancing</u>. Maintain a minimum of 6' physical distancing, especially from those outside of your module-as-one.
- <u>Face Coverings.</u> Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- <u>Wash your hands.</u> Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

Human Resource Message North Complex October 7, 2020

# HUMAN RESOURCE MESSAGE SAY SOMETHING

We're here in an environment with a lot of moving parts, missions to carry out and sudden changes shifting our focus and direction.

Changes may stir up emotions, including anger, fear, resentment, animosity etc.

It may only be a matter of miscommunication, or it may be something more deliberate and/or abusive.

In any case, don't internalize and bottle things up thinking they may go away. Seek clarification and resolution. If you're not comfortable going to your unit leader HR is available to assist with clearing a path for resolution.

Feel free to call/text or come by the HRSP yurt if you have questions, concerns, or just want to chat. **Adam Alvarez - (HRSP) – (707) 373-3715**

# **Maidu Requests for Visiting Homeland**

#### 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

#### 2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

#### 3. Take care to avoid injuries.

Cultural sites are very oid and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

#### 4, Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

#### 5. Don't touch the knickknacks.

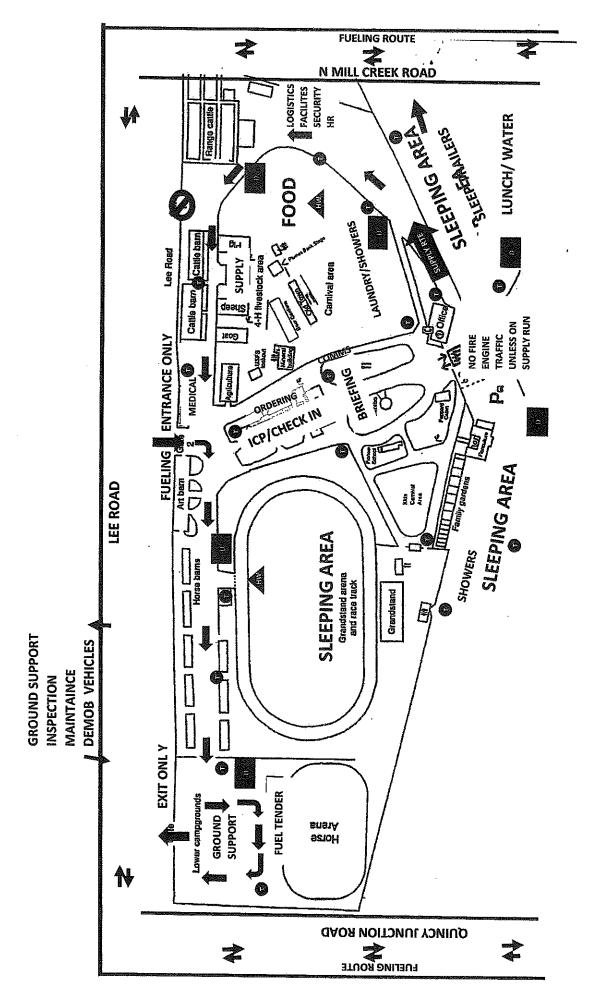

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

#### 5. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

 Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!
