## North Complex Fire Weather Forecast

Forecast Number: 48

Office Responsible: CA-PNF Shift Date: Thursday, Oct 8, 2020

Forecast Issued At: 2000 hrs. Oct 07, 2020

Incident Meteorologist: Jeff Colton

Forecast For Shift Times: 0600-0600

Collected of the

#### **WEATHER DISCUSSION:**

#### ...Turning Cooler with a Chance of Showers by Saturday ...

A developing Pacific storm system will be approaching the West Coast this weekend and will eventually pass over the North Complex by late Saturday. Ahead of this system, gusty south to southwest winds are expected, mainly during the afternoon and evening hours, along with cooler temperatures and high humidity values. Winds will eventually turn to the north and northeast behind the cold front as showers wind down early Sunday morning. Dry and warmer conditions return next week.

#### **WEATHER FORECAST:**

WEATHER:

Partly Cloudy. Areas of haze and smoke.

**TEMPERATURES:** 

Ridges/High Valleys: Highs: 66-72 F / 21-24 C

Lows: 35-45 F / 2-7 C

Valleys/Mid-Slopes:

Highs: 72-80 F / 26-30 C

Lows: 50-60 F / 13-16 C

**HUMIDITY:** 

Ridges/Slopes:

Min: 14-20% Max:

25-35%

Valleys:

Min: 14-20%

Max: 60-70%

20 FT WINDS: Ridges: Downslope/down-valley 3-7 mph (13-23 kph) with gusts to 18 mph (32 kph) until 1100...then winds becoming southwest 4-8 mph (8-16 kph) with gusts to 22 mph (35 kph) during the afternoon. Winds returning to downslope/down-valley 3-7 mph (8-16 kph) with gusts near 18 mph (32 kph) after 2100.

> Valleys: Downslope/down-valley 0-4 mph (0-6 kph) until 1030...then winds becoming upslope/up-valley 4-8 mph (8-16 kph). Winds returning to downslope/down-valley 2-5 mph (3-8 kph) after 2100.

CHANCE OF WETTING RAIN: 0 percent.

A.M. INVERSION/THERMAL BELT: 4000-6000 ft. / 1200-1800 m MSL.

TRANSPORT WINDS: Northeast 15 mph (24 kph) until 1000, then southwest 20 mph (32 kph).

#### **OUTLOOK FOR FRIDAY:**

Partly Cloudy with areas of smoke and haze. Not as hot with temperatures 60 to 70 F / 18 to 24 C and afternoon humidity levels dropping to between 18 and 28%. Northeast winds in the morning gusting up to 15 mph (24 kph), shifting to the southwest after 1100 with gusts up to 25 mph (40 kph), mainly along the ridges. Local eddying of winds in steep valleys and stream confluences should be expected.

#### **EXTENDED OUTLOOK:**

Saturday through Monday: Breezy to windy through the period with south to southwest winds gusting up to 30 mph (56 kph) along the ridges. Winds shifting to the north on Sunday and Monday. Colder with higher humidity levels. Scattered to numerous showers developing late Saturday and evening by early Sunday morning. Rainfall amounts up to 0.25 inches possible.

🖿 Latest Weather Observations near the Incident | Metric Table 📥

Weather Word of the Day: TURBULENCE - Disrupted flow in the atmosphere that produces gusts and eddies.

Fahrenheit	Celsius	MPH	KPH
32	0	5	8
41	5	10	16
50	10	15	24
59	15	20	32
68	20	25	40
77	25	30	48
86	30	35	56

#### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 48 TYPE OF FIRE: Wildland

OPERATIONAL PERIOD: October 8, 2020 FIRE NAME: **North Complex** 

DATE ISSUED: October 7, 2020 TIME ISSUED: 20:00

SIGNED: (A Syd) Robert Scott - 530,990,4048c

#### **INPUTS**

WEATHER SUMMARY: Partly Cloudy. Areas of haze and smoke. Gusty south to southwest winds will become common over the next few days ahead of a strong Pacific storm system that will be moving across Northern California on Saturday.

Temperatures: Day Ridges: 66-72 Degrees (21-24 C) Valleys/Canyons: 72-80 Degrees (26-30 C)

35-45 Degrees (2-7 C) 50-60 Degrees (13-16 C) Night

Relative Humidity: Ridges: Min 14%-20% Max 25%-35% Valleys: Min 14%-20% Max 60%-70%

20 FT Winds: Ridgetop: Downslope/down valley 3-7 mph with gusts to 18 mph becoming southwest 4-8 mph with gusts to 22 mph in the afternoon. Evening winds downslope/down valley 3-7 mph with gusts to 18 mph.

Slope/Valley: Downslope/down valley 0-4 mph becoming upslope/up valley 4-8 mph. Evening winds downslope/down valley 2-5 mph.

Fuels and Fire Behavior Advisory for Northern California areas below 3000 feet was updated - see link in Safety Message below

Wildland Fire Assessment System Outputs (PSA NC07 - Northern Sierra):

**Plumas National Forest** 

- Severe Fire Danger Index High
- 1000 Hour FM 7% (3rd Percental)
- 100 Hour FM 5% (1st Percental)
- ERC 86 (99th Percental)

#### Incident Weather Thresholds

RH Below 19%, Mid Flame Wind Speed Greater Than 8 MPH, Temperature Above 80 Degrees.

Weather is forecast to exceed thresholds but may not do so at the same time.

#### **OUTPUTS**

#### GENERAL FIRE BEHAVIOR:

Diurnal pattern has taken hold with upslope winds and low relative humidity during the hottest part of the day. Smoke from area fires has should not surface over the fire area today. Clear conditions could increase fire behavior and should be monitored as an indicator of transitions from surface to isolated torching.

#### SPECIFIC:

UNIT:

#### Branch II:

DIV OO (River South) - Burn down the penstocks and interior islands will continue today. Clear air could increase fire intensity as area would see warmest temperatures in several days. Spotting threat will increase as wind shifts to normal upslope/upcanyon flows. Rollout of rocks and burning material will pose a safety threat with the potential for spot fires at the bend in the penstock.

DIV OO (River North) - Spotting potential will decline as fuels available for ember production are reduced. Fire established in the 2008 BTU Lightening Complex fire footprint above Rock Creek could exhibit rapid rates of spread with wind and slope alignment. Fine fuel is dry and abundant (See Fuels and Fire Behavior Advisory). Shading from smoke or cloud cover will affect intensity. Breaks in smoke, especially, will lead to rapid changes in fire intensity and speed. Transition to flatter terrain and cooler conditions near The Big Hill and North Valley should reduce fire intensity.

DIV QQ - Slight increases in wind and lower relative humidity can be expected. Lack of smoke will contribute to increased temperature from previous days. Spots outside the line during periods of low RH may transition from surface fire to isolated torching in timber fuels. POI of 80% can be expected during daytime hours with short range spotting possible. Conditions will dry into the evening and early morning hours above the inversion. Surface spread will persist until wind shifts to a easterly flow during the evening hours.

DIV MM - Potential for spotting is decreasing as fuels burn down on the spot fire and along the line. Winds will favorable along the main fire line during the hottest part of the day. Southwest winds are forecast and could spread embers from interior torching to the east of the large spot. The thermal belt will return, and fire behavior could remain active until mixing occurs after sunup. Monitor fire behavior to identify thermal belt location and monitor fire location for the potential roll out.

Branch V - Except low to moderate fire behavior outside containment lines. Timber fuel models will exhibit the greatest intensity with torching and short-range spotting.

#### AIR OPERATIONS:

Smoke in the area with limited impacts on aviation operations.

#### SAFETY

Fire responds to topographic features, runs surprisingly fast up slopes and drainages. - Fuels and Fire Behavior Advisory for Northern California https://www.predictiveservices.nifc.gov/fuels\_fire-danger/Fuels\_Fire\_Behavior\_Advisory\_N-CA.pdf

#### 6. Control Operations/Work Assignments:

Cold trail and construct direct line on flank and spot adjacent to Highway 70 corridor.

#### 7. Special Instructions:

Backhaul all trash, modules need to take all trash back to ICP.

Drafting restrictions to prevent spread of deadly fungus to endangered frogs.

Avoidance Flagging: North Complex will be red and black candy striped.

# North Complex - Safety Message

INCIDENT #CA-PNF-001308

DATE: 10-8/9-2020 TIME: 0600-0600 Day/Night Shift

## **OPERATIONAL TEMPO**

Maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It is also about knowing when operations should slow down and why.

We are most vulnerable to accidents and errors when operational tempo changes, especially when it changes quickly.

Maintaining good situation awareness despite change in operational tempo represents a considerable challenge.

The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary adjustments.

# Be sure all elements of your safety plan are in place prior to Engagement!!

# HUMAN FACTOR BARRIERS TO SITUATIONAL AWARENESS

#### **Fatigue**

- Carbon Monoxide
- Dehydration
- Heat Stress
- Fitness Level
- 24-hrs awake affects your decision making like 0.10% blood alcohol content

#### **Hazardous Attitude**

- Invulnerability
- Anti-Authority
- Impulsive
- Overconfident
- Complacent
- Resigned
- · Afraid to speak up or disagree

#### Ensure....

- Strategic and tactical decisions take into account extended duration firefighting efforts with massive destruction.
- Tactical decisions keep pace with the evolving fire conditions and behavior.
- Firefighting operations are coordinated with adjacent branches, divisions, and groups.
- Specific firefighting tasks are consistent with the strategy and tactics to control the incident.
- We avoid the arrogance of success or, think what we did yesterday will be sufficient for tomorrow.

Prepared by:

CIIMT 4 Safety Group

INCIDENT RISK ANALYSIS - NORTH COMPLEX CA-PNF-001308 (ICS 215a) Day/Night Shift

DIV/BR		MITIGATIONS / WARNINGS / REMEDIES
ALL	ACCOUNTABILITY	Know where your troops are at all times.     Know the plan, brief the plan, and implement the plan.     Ensure you have communications with adjoining forces, and they know the plan.     Check in and out when traveling through Branches and Divisions.     If you see someone that looks out of place, stop, and ask what they are doing     As fire conditions escalate and your chasing spots, do not over commit.     Back off, regroup, and re-engage.
ALL	TRAFFIC HAZARDS & DRIVING	<ul> <li>Many roads are narrow, mid-slope, with soft shoulders. Allow vehicles to pass on uphill side. Use spotters when backing or turning around.</li> <li>Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent.</li> <li>Use warning lights when working on roads or traveling in smoke.</li> <li>Drive at or below posted speed limits.</li> <li>Use chock blocks, turn wheels into hill.</li> <li>Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.</li> </ul>
ALL	HAZARD / DANGER TREES	<ul> <li>Follow Hazard Tree Safety Guidelines (IRPG p.22.)</li> <li>Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled.</li> <li>Be alert around hazard trees during wind events, even green trees.</li> <li>The hazard zone extends a minimum of 2½ tree lengths.</li> <li>Avoid parking vehicles or taking breaks under or near hazard trees.</li> </ul>
ALL	NIGHT OPERATIONS	<ul> <li>Have a purpose for where you drive and what you do. Do not rush into assignments.</li> <li>Use caution where you park or stage, especially in steep timbered areas.</li> <li>Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area.</li> <li>Increase SA by trying to see the work area during daylight hours.</li> <li>Use glow sticks to mark hazards, and ensure personnel have headlamps.</li> </ul>
ALL	FATIGUE COMPLACENCY	Be alert for signs of fatigue and take breaks, as necessary.  Maintain 2:1 work/rest ratio.  Monitor ALL resources for level of fatigue.  Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents.  Take steps to maintain SA for the duration of the incident.
ALL	WORKING IN FLUCTUATING TEMPERATURES	<ul> <li>Minimize intake of caffeine products</li> <li>Ensure that your drinking a good amount of water</li> <li>Take time to properly stretch your muscles prior to asking them to perform</li> <li>Start out slow and work your way up to a normal pace</li> <li>Dress in layers so you can remove your clothing as the shift &amp; you warm up</li> </ul>
ALL	HEAVY EQUIPMENT OPERATIONS	<ul> <li>Ensure communications are established with operators (Visual &amp; Radio)</li> <li>Avoid working downslope from heavy equipment.</li> <li>Maintain a 50'-150' exclusion area around equipment.</li> <li>In timber increase safety distance to 2 ½ times canopy height.</li> </ul>
ALL	FIRE BEHAVIOR	Are you seeing what we have predicted?     Conduct thorough assessments before starting work.     Ensure LCES is in place. Watch for wind and slope alignment with roll out.     Plan & Communicate your exit strategy with your crew and adjacent resources     Provide additional briefing for new resources and maintain communications
ALL	AIRCRAFT OPERATIONS	<ul> <li>Conduct thorough mission assessments before starting work.</li> <li>Follow the guidelines in the IHOG and other aviation guidelines and reference materials.</li> <li>Ensure coordination and communication are in place and understood by all involved resources in a mission.</li> <li>Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.</li> </ul>
ALL	WEATHER	<ul> <li>Prepare for changes in weather conditions.</li> <li>Expect winds to increase and know the effect that it will have on fire behavior.</li> <li>Anticipate rain, which will create hazardous driving conditions, unstable terrain, and an increase in rollout and hazard trees coming down.</li> <li>Low temperatures coupled with moisture could cause bridges to freeze.</li> </ul>
ALL	COVID-19	<ul> <li>Utilize social distancing, wear facemasks in camp.</li> <li>Maintain the "module of one" concept.</li> <li>Disinfect vehicles, tools, and commonly touch surfaces frequently.</li> <li>Do not share equipment and wash hands frequently</li> </ul>
	INCIDENT NAME NORTH COMPLEX	Operational Period: 0600-0600 October 8/9, 2020  DATE AND TIME PREPARED: October 7, 2020 1630 Hours

# North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus.
   This limits "close contacts" to those within the module. A "close contact" is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- **Social Distancing.** Maintain a minimum of 6' physical distancing, especially from those outside of your module-as-one.
- Face Coverings. Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- Wash your hands. Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

# NORTH COMPLEX COVID-19 DAILY SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

## **Instructions for Screening**

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	NOTIFY SUPERVISOR IMMEDIATELY
At entries to established camps (ICP):	DO NOT ANNOUNCE
COVID-19 Daily Screening Tool will be posted for self screening of Incident Personnel, Cooperators and Guests.	Ask individual or "module-as-one" to step aside and follow the steps
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	below.

# Escort individual or "module-as-one" to isolation area. Separate the symptomatic personnel. Isolation support personnel should begin documentation. Notify Line Medics or MEDL if at ICP to begin evaluation for COVID-19 potential. COVID Safety will coordinate with Incident COVID Advisor. Have individual or "module-as-one" fill out WF Employee Contact Assessment Sheet. Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

#### Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A <u>MEDICAL EMERGENCY</u>: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

			and the second second section of the second			
		☐RED / PRIORITY 1	Life or limb thre	atening injury	or Ilin <b>ess.</b> Eva	cuation need is

# DEMOBLIZATION MESSAGE For October 8, 2020

If you need **AIR TRAVEL** back to your home unit, Please stop by the DMOB Unit located at the ICP located at the Plumas County Fairgrounds

<u>Seventy-Two (72) Hours</u> prior to your

DMOB DATE.

This will ensure that the Travel Agent has plenty Of time to secure you a flight.

If you are listed on the
Tentative DMOB list
Please plan accordingly so that the DMOB Process
Will be a simple one.

Make sure you turn in your CRT's or Shift Tickets
To the Finance Section Daily.

Thank you, Kelly Mosinski (T) Hans Rohr, DMOB (T)

## TURN IN TO FINANCE EQUIPMENT TIME DAILY

This document is intended to track, record, and validate the amount of water used on an incident. It is not intended to review the performance of equipment using water on an incident.

# **Maidu Requests for Visiting Homeland**

### 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

### 2. Enloy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

### 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

#### 4. Eniov with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

#### 5. Don't touch the knickknacks.

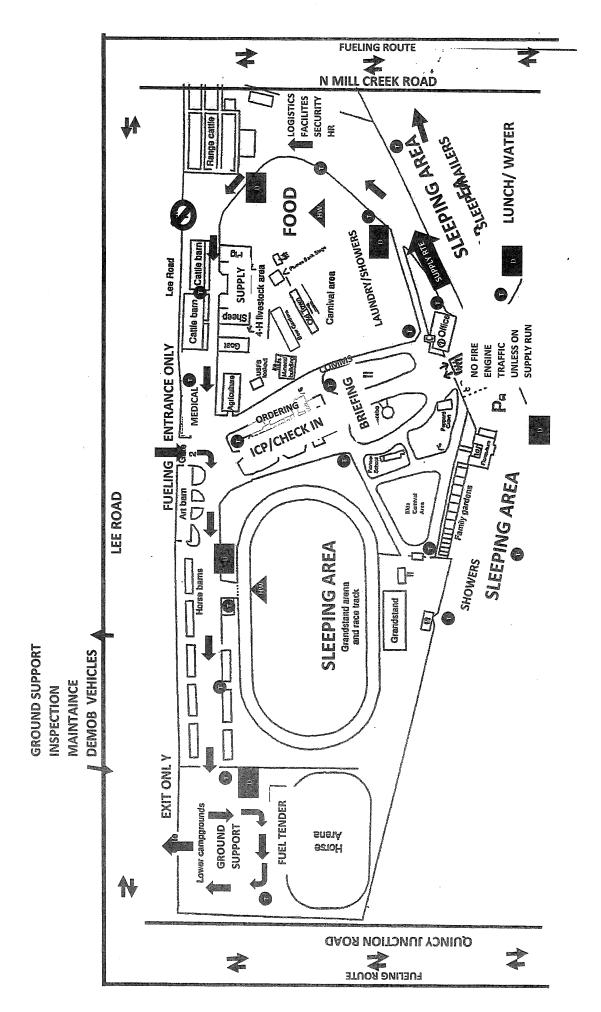

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

### 5. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

 Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!
