North Complex Fire Weather Forecast

Forecast Number: 48

Office Responsible: CA-PNF Shift Date: Thursday, Oct 8, 2020

Forecast Issued At: 2000 hrs. Oct 07, 2020

Incident Meteorologist: Jeff Colton Lybre Olotter

Forecast For Shift Times: 0600-0600

WEATHER DISCUSSION:

...Turning Cooler with a Chance of Showers by Saturday ...

A developing Pacific storm system will be approaching the West Coast this weekend and will eventually pass over the North Complex by late Saturday, Ahead of this system, gusty south to southwest winds are expected, mainly during the afternoon and evening hours, along with cooler temperatures and high humidity values. Winds will eventually turn to the north and northeast behind the cold front as showers wind down early Sunday morning. Dry and warmer conditions return next week.

WEATHER FORECAST:

WEATHER:

Partly Cloudy. Areas of haze and smoke.

TEMPERATURES:

Ridges/High Valleys: Highs: 66-72 F / 21-24 C

Lows: 35-45 F / 2-7 C

Valleys/Mid-Slopes: Highs: 72-80 F / 26-30 C Lows: 50-60 F / 13-16 C

HUMIDITY:

Incident Weather Thresholds

RH Below 19%, Mid Flame Wind Speed Greater Than 8 MPH, Temperature Above 80 Degrees.

Weather is forecast to exceed thresholds but may not do so at the same time.

OUTPUTS

GENERAL FIRE BEHAVIOR:

Diurnal pattern has taken hold with upslope winds and low relative humidity during the hottest part of the day. Smoke from area fires has should not surface over the fire area today. Clear conditions could increase fire behavior and should be monitored as an indicator of transitions from surface to isolated torching.

SPECIFIC:

UNIT:

Branch II:

DIV OO (River South) - Burn down the penstocks and interior islands will continue today. Clear air could increase fire intensity as area would see warmest temperatures in several days. Spotting threat will increase as wind shifts to normal upslope/upcanyon flows. Rollout of rocks and burning material will pose a safety threat with the potential for spot fires at the bend in the penstock.

DIV OO (River North) - Spotting potential will decline as fuels available for ember production are reduced. Fire established in the 2008 BTU Lightening Complex fire footprint above Rock Creek could exhibit rapid rates of spread with wind and slope alignment. Fine fuel is dry and abundant (See Fuels and Fire Behavior Advisory). Shading from smoke or cloud cover will affect intensity. Breaks in smoke, especially, will lead to rapid changes in fire intensity and speed. Transition to flatter terrain and cooler conditions near The Big Hill and North Valley should reduce fire intensity.

DIV QQ - Slight increases in wind and lower relative humidity can be expected. Lack of smoke will contribute to increased temperature from previous days. Spots outside the line during periods of low RH may transition from surface fire to isolated torching in timber fuels. POI of 80% can be expected during daytime hours with short range spotting possible. Conditions will dry into the evening and early morning hours above the inversion. Surface spread will persist until wind shifts to a easterly flow during the evening hours.

DIV MM - Potential for spotting is decreasing as fuels burn down on the spot fire and along the line. Winds will favorable along the main fire line during the hottest part of the day. Southwest winds are forecast and could spread embers from interior torching to the east of the large spot. The thermal belt will return, and fire behavior could remain active until mixing occurs after sunup. Monitor fire behavior to identify thermal belt location and monitor fire location for the potential roll out.

Branch V - Except low to moderate fire behavior outside containment lines. Timber fuel models will exhibit the greatest intensity with torching and short-range spotting.

AIR OPERATIONS:

Smoke in the area with limited impacts on aviation operations.

North Complex-Safety Message

INCIDENT #CA-PNF-001308

DATE: 10-8/9-2020 TIME: 0600-0600 Day/Night Shift

OPERATIONAL TEMPO

Maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It is also about knowing when operations should slow down and why.

We are most vulnerable to accidents and errors when operational tempo changes, especially when it changes quickly.

Maintaining good situation awareness despite change in operational tempo represents a considerable challenge.

The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary adjustments.

Be sure all elements of your safety plan are in place prior to Engagement!!

HUMAN FACTOR BARRIERS TO SITUATIONAL AWARENESS

Fatigue

- Carbon Monoxide
- Dehydration
- Heat Stress
- Fitness Level
- 24-hrs awake affects your decision making like 0.10% blood alcohol content

Hazardous Attitude

- Invulnerability
- Anti-Authority
- Impulsive
- Overconfident
- Complacent
- Resigned
- Afraid to speak up or disagree

Ensure....

- Strategic and tactical decisions take into account extended duration firefighting efforts with massive destruction.
- Tactical decisions keep pace with the evolving fire conditions and behavior.
- Firefighting operations are coordinated with adjacent branches, divisions, and groups.
- Specific firefighting tasks are consistent with the strategy and tactics to control the incident.
- We avoid the arrogance of success or, think what we did yesterday will be sufficient for tomorrow.

DIVIDE	TIALANDOUS ACTIONS / CONDITIONS	Know where your troops are at all times.	
ALL	ACCOUNTABILITY	Know the plan, brief the plan, and implement the plan. Ensure you have communications with adjoining forces, and they Check in and out when traveling through Branches and Divisions. If you see someone that looks out of place, stop, and ask what the As fire conditions escalate and your chasing spots, do not over co	ey are doing
ALL	TRAFFIC HAZARDS & DRIVING	Many roads are narrow, mid-slope, with soft shoulders. Allow on uphill side. Use spotters when backing or turning around Practice "Defensive Driving" techniques. Assume other drivers are complacent. Use waming lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. Dusk to Dawn pose the greatest potential for a	i. fatigued and
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time; for qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees The hazard zone extends a minimum of 2½ tree lengths. Avoid parking vehicles or taking breaks under or near hazard trees).
ALL	NIGHT OPERATIONS	 Have a purpose for where you drive and what you do. Do not rush assignments. Use caution where you park or stage, especially in steep timbered Use available time for briefings on roads, terrain, and potential roll especially if the resources are new to the area. Increase SA by trying to see the work area during daylight hours. Use glow sticks to mark hazards, and ensure personnel have head 	into areas. ing material,
ALL	FATIGUE COMPLACENCY	 Be alert for signs of fatigue and take breaks, as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to complacency personnel more vulnerable to accidents. Take steps to maintain SA for the duration of the incident. 	making
ALL	WORKING IN FLUCTUATING TEMPERATURES	 Minimize intake of caffeine products Ensure that your drinking a good amount of water Take time to properly stretch your muscles prior to asking them to Start out slow and work your way up to a normal pace Dress in layers so you can remove your clothing as the shift & you 	•
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators (Visual & F Avoid working downslope from heavy equipment. Maintain a 50'-150' exclusion area around equipment. In timber increase safety distance to 2 ½ times canopy height. 	
ALL	FIRE BEHAVIOR	Are you seeing what we have predicted? Conduct thorough assessments before starting work. Ensure LCES is in place. Watch for wind and slope alignment with Plan & Communicate your exit strategy with your crew and adjacel Provide additional briefing for new resources and maintain commu	nt resources
ALL	AIRCRAFT OPERATIONS	 Conduct thorough mission assessments before starting work. Follow the guidelines in the IHOG and other aviation guidelines an Ensure coordination and communication are in place and understoresources in a mission. Ensure close coordination between Air Attack, air tankers, helicopt resources. 	od by all involved
ALL	WEATHER	 Prepare for changes in weather conditions. Expect winds to increase and know the effect that it will have on fir Anticipate rain, which will create hazardous driving conditions, uns increase in rollout and hazard trees coming down. Low temperatures coupled with moisture could cause bridges to free 	table terrain, and an

North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits "close contacts" to those within the module. A "close contact" is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- <u>Social Distancing.</u> Maintain a minimum of 6' physical distancing, especially from those outside of your module-as-one.
- <u>Face Coverings.</u> Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- Wash your hands. Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

Maidu Requests for Visiting Homeland

1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

4. Enjoy with care.

Olls from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

S. Don't touch the knicklmacks.

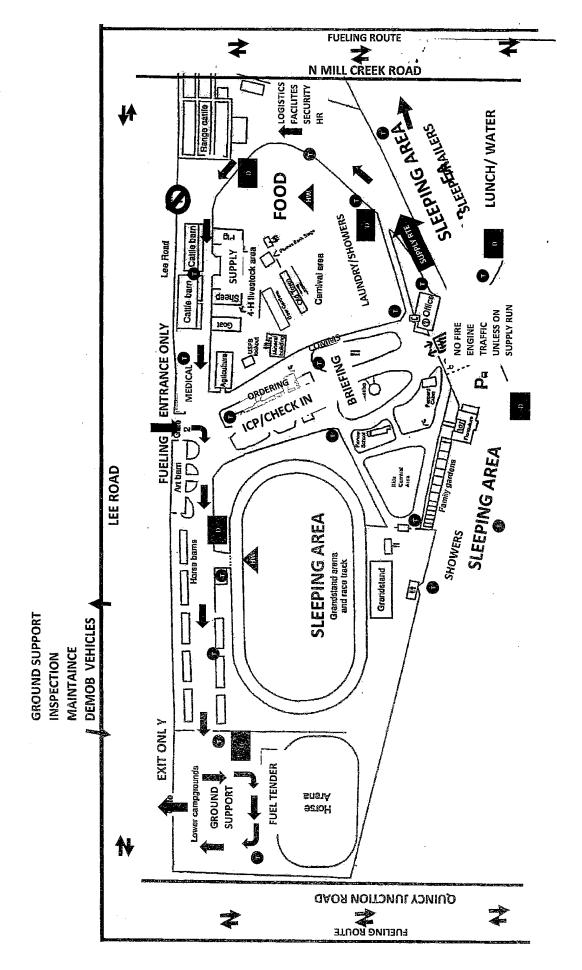

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

5. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

Over approximately 160 years, many changes have reshaped tribal relationships with
these vast landscapes as well as with each other, and yet our knowledge of and
responsibilities to these incredibly rich and vast landscapes remains strong. We
appreciate your dedication to care for and building your own relationships with our
natural environment while protecting these fragile and irreplaceable resources!
