Forecast Number: 49 Office Responsible: CA-PNF Shift Date: Friday, Oct 9, 2020 Forecast Issued At: 2000 hrs. Oct 08, 2020

Incident Meteorologist: Jeff Colton	
Allen Platter	

Forecast For Shift Times: 0600-0600

## WEATHER DISCUSSION:

#### ...COLD FRONT PASSES LATE SATURDAY...

An upper level Pacific storm system will pass to the north on Saturday with an associated surface cold front sweeping across Northern California. Ahead of this system, gusty southwest winds are expected with winds shifting to the north to northeast by Sunday. Humidity levels will be climbing as the system moves through with a slight chance for showers on Saturday. Warmer and drier weather returns early next week.

## WEATHER FORECAST:

WEATHER: Partly Cloudy. Areas of smoke and haze.

TEMPERATURES:	Ridges/High Valleys: Valleys/Mid-Slopes:	0				35-45 F / 2-7 C 50-60 F / 13-16 C
HUMIDITY:	Ridges/Slopes: Valleys:	Min: Min:	16-22% 16-22%	Max: Max:	50-60% 60-70%	-

**20 FT WINDS:** Ridges: Downslope/down-valley 2-6 mph (3-10 kph) with gusts to 14 mph (22 kph) until 1100...then winds becoming southwest 4-8 mph (8-16 kph) with gusts to 20 mph (32 kph) during the afternoon. Winds returning to downslope/down-valley 3-6 mph (5-10 kph) with gusts near 18 mph (30 kph) after 2100.

**Valleys:** Downslope/down-valley 0-4 mph (0-6 kph) until 1030...then winds becoming upslope/up-valley 4-8 mph (8-16 kph). Winds returning to downslope/down-valley 2-5 mph (3-8 kph) after 2100.

CHANCE OF WETTING RAIN: 0 percent. LAL: 1. A.M. INVERSION/THERMAL BELT: 4500-6000 ft. / 1350-1800 m MSL. TRANSPORT WINDS: Southwest 15 mph (24 kph).

## OUTLOOK FOR SATURDAY:

Mostly cloudy and cool with a slight chance of rains showers. Areas of smoke and haze. Highs 55 to 65 (12 to 18 C) and afternoon humidity levels dropping to between 30 and 40%. Southwest winds 5 to 15 mph (8 to 24 kph) with gusts up to 30 mph (48 kph).

## **EXTENDED OUTLOOK:**

**Sunday through Tuesday:** Dry and warmer with gusty northeast winds, mainly overnight and through the early morning hours. Temperatures climbing back into the 70s and 80s (20s C) with humidity values dropping to near 20 percent.

🟟 Latest Weather Observations near the Incident | Metric Table 🔿

**Weather Word of the Day: Ground Fog** – Fog produced over the land by the cooling of the lower atmosphere as it comes in contact with the ground. Also known as radiation fog, and in parts of California as tule fog.

## North Complex- Safety Message

## INCIDENT #CA-PNF-001308

DATE: 10-9/10-2020 TIME: 0600-0600 Day/Night Shift

## FIGHT COMPLACENCY!

- Stay mentally engaged on the task at hand
- Give clear briefings. Address complacency in your daily AAR.
- Clearly identify the day's mission and purpose.
- Use the "Buddy System" and watch out for each other. If you see something, say something.
- Ask yourself: "Are you doing the job safely, the way you were trained?"
- Look for a "new" or "fresh" approach to repetitive assignments.

# The A, B, C's of Safety: <u>Always</u> <u>Be</u><u>Careful</u>

## Safety is No Accident!

- Situational Awareness: gathering information about your surroundings.
- Hazard Assessment: identify the tactical hazard.
- Hazard Control: develop mitigations to reduce or eliminate risk.
- Decision Point: are mitigations in place and timely?
- Evaluate: What is changing? Are strategy and tactics working? Is fatigue becoming a bigger factor?
- Be deliberate in your actions and have a purpose for performing a task.
- You are the last line of defense in safety. It comes down to you!

## **End of Assignment Watchouts**

- Not mentally engaged in the task at hand
- Your driver is driving faster than when you got here
- Not giving good, thorough briefings
- Your hardhat and web gear are still on the truck
- Assuming all is good because you worked this piece of ground yesterday
- All the conversations are around what you are going to do when you get home
- You and your folks are tripping and stumbling more than usual
- It is taking you longer to get out of camp
- No AAR after each shift

## CALIFORNIA INTERAGENCY INCIDENT MANAGEMENT TEAM 4 SAFETY GROUP

## INCIDENT RISK ANALYSIS - NORTH COMPLEX CA-PNF-001308 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	DRIH COMPLEX CA-PNF-001308 (ICS 215a) Day/Night Shift MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS	<ul> <li>Many roads are narrow, mid-slope, with soft shoulders. Allow vehicles to pass on uphill side. Use spotters when backing or turning around.</li> <li>Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent.</li> <li>Use warning lights when working on roads or traveling in smoke.</li> <li>Drive at or below posted speed limits.</li> <li>Use chock blocks, turn wheels into hill.</li> </ul>
ALL	HAZARD / DANGER TREES	<ul> <li>Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.</li> <li>Follow Hazard Tree Safety Guidelines (IRPG p.22.)</li> <li>Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled.</li> <li>Be alert around hazard trees during wind events, even green trees.</li> <li>The hazard zone extends a minimum of 2½ tree lengths.</li> <li>Avoid parking vehicles or taking breaks under or near hazard trees.</li> </ul>
ALL	ACCOUNTABILITY	<ul> <li>Know where your troops are at all times.</li> <li>Know the plan, brief the plan, and implement the plan.</li> <li>Ensure you have communications with adjoining forces, and they know the plan.</li> <li>Check in and out when traveling through Branches and Divisions.</li> <li>If you see someone that looks out of place, stop, and ask what they are doing</li> <li>As fire conditions escalate and your chasing spots, do not over commit.</li> <li>Back off, regroup, and re-engage.</li> </ul>
ALL	FATIGUE COMPLACENCY	<ul> <li>Be alert for signs of fatigue and take breaks, as necessary.</li> <li>Maintain 2:1 work/rest ratio.</li> <li>Monitor ALL resources for level of fatigue.</li> <li>Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents.</li> <li>Take steps to maintain SA for the duration of the incident.</li> </ul>
ALL	WORKING IN FLUCTUATING TEMPERATURES	<ul> <li>Minimize intake of caffeine products</li> <li>Ensure that your drinking a good amount of water</li> <li>Take time to properly stretch your muscles prior to asking them to perform</li> <li>Start out slow and work your way up to a normal pace</li> <li>Dress in layers so you can remove your clothing as the shift &amp; you warm up</li> </ul>
ALL	NIGHT OPERATIONS	<ul> <li>Have a purpose for where you drive and what you do. Do not rush into assignments.</li> <li>Use caution where you park or stage, especially in steep timbered areas.</li> <li>Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area.</li> <li>Increase SA by trying to see the work area during daylight hours.</li> <li>Use glow sticks to mark hazards, and ensure personnel have headlamps.</li> </ul>
ALL	HEAVY EQUIPMENT OPERATIONS	<ul> <li>Ensure communications are established with operators (Visual &amp; Radio)</li> <li>Avoid working downslope from heavy equipment.</li> <li>Maintain a 50'-150' exclusion area around equipment.</li> <li>In timber increase safety distance to 2 ½ times canopy height.</li> </ul>
ALL	FIRE BEHAVIOR	<ul> <li>Are you seeing what we have predicted?</li> <li>Conduct thorough assessments before starting work.</li> <li>Ensure LCES is in place. Watch for wind and slope alignment with roll out.</li> <li>Plan &amp; Communicate your exit strategy with your crew and adjacent resources</li> <li>Provide additional briefing for new resources and maintain communications</li> </ul>
ALL	AIRCRAFT OPERATIONS	<ul> <li>Conduct thorough mission assessments before starting work.</li> <li>Follow the guidelines in the IHOG and other aviation guidelines and reference materials.</li> <li>Ensure coordination and communication are in place and understood by all involved resources in a mission.</li> <li>Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.</li> </ul>
ALL	WEATHER	<ul> <li>Prepare for changes in weather conditions.</li> <li>Expect winds to increase and know the effect that it will have on fire behavior.</li> <li>Anticipate rain, which will create hazardous driving conditions, unstable terrain, and an increase in rollout and hazard trees coming down.</li> <li>Low temperatures coupled with moisture could cause bridges to freeze.</li> </ul>
ALL	COVID-19	<ul> <li>Utilize social distancing, wear facemasks in camp.</li> <li>Maintain the "module of one" concept.</li> <li>Disinfect vehicles, tools, and commonly touch surfaces frequently.</li> <li>Do not share equipment and wash hands frequently</li> </ul>
	INCIDENT NAME NORTH COMPLEX	Operational Period: 0600-0600 October 9/10, 2020 DATE AND TIME PREPARED: October 8, 2020 1630 Hours

## North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits "close contacts" to those within the module. A "close contact" is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- <u>Social Distancing</u>. Maintain a minimum of 6' physical distancing, especially from those outside of your module-as-one.
- Face Coverings. Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- <u>Wash your hands.</u> Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

31

## NORTH COMPLEX COVID-19 DAILY SCREENING TOOL

Today or in the	past 24 hours, have	you had any of the	following symptoms <sup>1</sup> ?
~~~~~	<b>r</b> ,,,,,	J	

Symptom

Cough more than expected?

Shortness of breath or difficulty breathing?

Fever? Chills?

Muscle pain, outside your normal for firefighting?

Sore throat?

New loss of taste or smell?

Fatigue, outside your normal for firefighting?

Headache, outside your normal for firefighting?

Congestion or runny nose, outside your normal for firefighting?

Nausea or vomiting

Diarrhea

\* Take temperature with no-touch thermometer, if available \*

## **Instructions for Screening**

Item	What to Do
If resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed.	NOTIFY SUPERVISOR IMMEDIATELY
At entries to established camps (ICP):	DO NOT ANNOUNCE
COVID-19 Daily Screening Tool will be posted for self screening of Incident Personnel, Cooperators and Guests.	Ask individual or "module-as-one" to step aside and follow the steps
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	below.

Steps to follow for a symptomatic screeningEscort individual or "module-as-one" to isolation area. Separate the symptomatic personnel.Isolation support personnel should begin documentation.Notify Line Medics or MEDL if at ICP to begin evaluation for COVID-19 potential.COVID Safety will coordinate with Incident COVID Advisor.Have individual or "module-as-one" fill out WF Employee Contact Assessment Sheet.Protect and secure any collected Personal Identifiable Information (PII) or Personal HealthInformation (PHI).

# DEMOBLIZATION MESSAGE For October 9, 2020

If you need **AIR TRAVEL** back to your home unit, Please stop by the DMOB Unit located at the ICP located at the Plumas County Fairgrounds <u>Seventy-Two (72) Hours</u> prior to your DMOB DATE.

This will ensure that the Travel Agent has plenty Of time to secure you a flight.

If you are listed on the Tentative DMOB list Please plan accordingly so that the DMOB Process Will be a simple one. Make sure you turn in your CRT's or Shift Tickets To the Finance Section Daily.

> Thank you, Kelly Mosinski (T) Hans Rohr, DMOB (T)

## Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden. The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

#### OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

## HUMAN RESOURCE MESSAGE

# Self-Control

Self-control is strength. Calmness is mastery, You must get to a point where your mood doesn't shift based on the actions of someone else. Don't allow others to control your emotions and in doing so overpower your intelligence.

Be kind, patient and respectful to one another as we share a common goal and have many days left to get it done together. Anything else in not acceptable.

Be safe ~ Have a great shift.

Feel free to call/text HRSP if you have questions, concerns, or just want to chat.  $\sim$  HRSP: Adam Alvarez – (707) 373-8715

Don't Be

# NORTH COMPLEX

# **Trainee Watch Out Situations**

You've been working all shift and you haven't seen your trainer since breakfast.

The Training Specialist shows up on the line looking for you.

Your trainer asks you "So how do these darn task books work anyhow?"

Your Red Card shows you as a trainee, you're working, but you have no idea who is training you.

You haven't looked at your task book since checking in last week.

Your task book has tasks signed off in May of 2013.

You're finally going to get that training assignment as \_\_\_\_\_, and you forgot your task book!

You see your trainer driving out of camp, heading home, and you still haven't gone over your task book.

It's Day 5 of the incident and your trainer still can't remember your name.

You are a Trainer or Trainee and you have not checked in with the Training Specialist.

# Maidu Requests for Visiting Homeland

#### 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

#### 2. Enjoy your visit in the Mountain Majdu and Velloy Majdu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

#### 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

#### 4, Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

#### S. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

#### 5. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

 Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!

47

#### Summary of Suppression Damage Repair Guidelines

Objectives - The objective of the fire suppression repair is:

- Reduce the potential for soil erosion and sedimentation
- Protect natural and cultural resources from additional potential damage
- Repair roads and drainage structures to a functioning condition

#### Sensitive Sites are marked with RED and BLACK CANDY STRIPE flagging. DO NOT repair in Sensitive Sites.

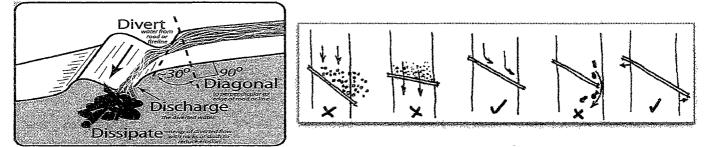

#### BACK-HAUL ALL TRASH AND UN-NEEDED FLAGGING. PLEASE LEAVE SAFETY FLAGGING IN PLACE.

PULL BACK SOIL BERMS All berms present from line construction should be recontoured and spread across the constructed line. Removal of berms will allow water to flow off the fire.

The three objectives of waterbars are: (1) to divert the destructive overland flow of water **off** the fire line; (2) to discharge the water onto areas where the erosive energy can be dissipated; and (3) to aid in the recovery of vegetation.

Encline Gradient	Distance Berween Waterbars (1997)		Think 5-D-System
0-5	None	Distance	Reduce the distance water can run in a straight line
5 to 15	150 to 125	Diagonal	Don't bully the flow, lead it away
15 to 35	75 to 45	Divert	Move the water off the fireline
35 to 65	35 to 65	Discharge	Good water bar is not a dam – must have open outlet.
65+	15	Dissipate	Water should spread out from outlet like a shower not a fire hose.

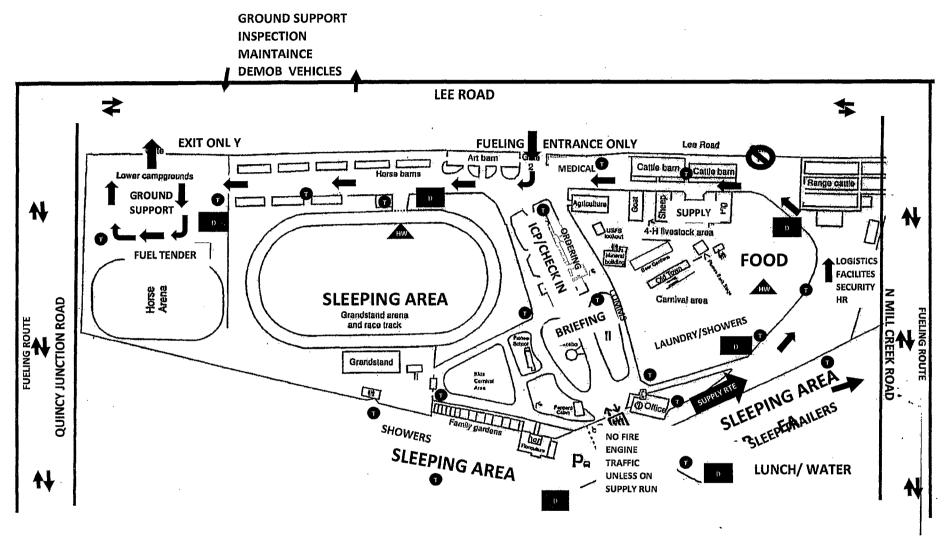

**DEPTH AND WIDTH:** Waterbars need to be cut into surface, do not simply push up soil. They should be deep enough to redirect the water from expected rain to area, at least 18 inches and **not to exceed 24 inches OUTLETS:** Direct water primarily to unburned areas, should not be directing water into stream channels **ANGLE:** between 30 to 45 degrees

**BLOCK FIRELINE ENTRANCES AND EXITS** using existing materials and berms use available large rocks, large trees, or walls of brush. Use onsite material try to disguise the first 100 feet of hand line and dozer line with slash and other materials where possible as not to entice OHV users.

WATERCOURSES: Work with READs to determine appropriate repair needs. Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

**ROADS**: Reshape soil surfaced roads. Roads should be outsloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.
