# North Complex Fire Weather Forecast

Forecast Number: 51

Office Responsible: CA-PNF Shift Date: Sunday, Oct 11, 2020

Forecast Issued At: 2000 hrs. Oct 10, 2020

Incident Meteorologist: Jeffrey D Colton

Forecast For Shift Times: 0700-0700

### **WEATHER DISCUSSION:**

High pressure will be building back across the region this week with warming temperatures and falling humidity levels. However, conditions are not expected to get as warm or dry as what we were experience a week ago. Winds will favor a northeasterly direction for much of the week with the peak speeds likely occurring overnight and into the early morning hours each day.

### **WEATHER FORECAST:**

WEATHER:

Morning clouds, then clearing. Areas of smoke and haze.

**TEMPERATURES:** 

Valleys/Mid-Slopes:

Ridges/High Valleys: Highs: 58-68 F / 14-20 C

Lows: 28-38 F / -2 to +3 C

Lows: 38-48 F / 3 to 9 C Highs: 66-76 F / 19-24 C

**HUMIDITY:** 

Ridges/Slopes:

Min: 30-40% Max: 80-90%

Valleys:

Min: 28-38% Max: 80-90%

20 FT WINDS: Ridges: Northwest to north winds 4-8 mph (6-13 kph) with gusts up to 20 mph (32 kph) until 2100, then northeast winds 3-6 mph (5-10 kph) with gusts to 18 mph (29 kph). Strongest winds are expected in the North Fork of the Feather River.

> Valleys: Downslope/down-valley 0-4 mph (0-6 kph) until 1100...then winds becoming northwest 3-6 mph (5-10 kph) with gusts up to 16 mph (26 kph). Winds switching to the northeast after 2100 and decreasing to 0-4 mph (0-6 kph) with gusts to 10 mph (16 kph).

**CHANCE OF WETTING RAIN: 0%** LAL:

A.M. INVERSION/THERMAL BELT: 4000-5000 ft. / 1200-1500 m MSL

TRANSPORT WINDS: West 8 mph (13 kph)

### **OUTLOOK FOR MONDAY:**

Mostly clear with areas of smoke and haze. Highs 65 to 75 (18 to 24 C) and afternoon humidity levels dropping to between 25 and 35%. Northeast winds 4 to 8 mph (6 to 13 kph) with gusts up to 20 mph (32 kph) with the strongest winds in the early morning hours.

### **EXTENDED OUTLOOK:**

Tuesday through Thursday: Dry and warm with gusty northeast winds, mainly overnight and through the early morning hours. Temperatures in the 70s and lower 80s (20s C) with humidity values dropping to near 20 percent.

🖢 Latest Weather Observations near the Incident | Metric Table 🖈

Weather Word of the Day: Lapse Rate - The change in temperature with altitude in the atmosphere.

Fahrenheit	Celsius	MPH	KPH

### **INPUTS**

WEATHER SUMMARY: Morning clouds, then clearing. Areas of smoke and haze.

Temperatures: Day Ridges: 58-68 Degrees (14-20 C) Valleys/Canyons: 66-76 Degrees (19-24 C)

Night 28–38 Degrees (-2-3 C)

38-48 Degrees (3-9 C)

Robert Scott - 530.990.4048c

**Relative Humidity**: Ridges: Min 30%-40% Max 80%-90% Valleys: Min 28%-38% Max 80%-90%

20 FT Winds: Ridgetop: Northwest to north winds 4-8 mph (6-13 kph) with gusts up to 20 mph (32 kph) until 2100, then northeast winds 3-6 mph (5-10 kph) with gusts to 18 mph (29 kph). Strongest winds are expected in the North Fork Feather River

Slope/Valley: Downslope/down-valley 0-4 mph (0-6 kph) until 1100...then winds becoming northwest 3-6 mph (5-10 kph) with gusts up to 16 mph (26 kph). Winds switching to the northeast after 2100 and decreasing to 0-4 mph (0-6 kph) with gusts to 10 mph (16 kph).

Fuels and Fire Behavior Advisory for Northern California areas below 3000 feet was updated - see link in Safety Message below

Wildland Fire Assessment System Outputs (PSA NC07 - Northern Sierra):

- Severe Fire Danger Index Moderate
- 1000 Hour FM 7% (3<sup>rd</sup> Percentile)
- 100 Hour FM 6% (3<sup>st</sup> Percentile)
- ERC 84 (97<sup>th</sup> Percentile)

### Incident Weather Thresholds

RH Below 19%, Mid Flame Wind Speed Greater Than 8 MPH, Temperature Above 80 Degrees.

Wind speeds will be above threshold

### **OUTPUTS**

### **GENERAL FIRE BEHAVIOR:**

Warming today will trend fuel moistures back toward record lows. Surface fire with isolated torching in heavy pockets will be possible. Northeast winds will be enhanced in the North Fork Feather River. Fire outside containment, although unlikely, could be enhanced by wind a slope alignment and exhibit low to moderate rate of spread during day light hours.

### SPECIFIC:

### Branch II:

**DIV OO (River South)** – Favorable conditions today with increased fuel moisture and northwest winds. Rock and tree roll out from burn down of duff layers remain a threat to firefighter safety. Locations near Grizzly Forebay will experience the greatest wind speeds.

**DIV OO (River North)** – The light fuels of the 2008 BTU Lightening Complex fire footprint will remain a concern until the treat of torching along the south side of the river is gone. Fine fuel is dry and abundant (See **Fuels and Fire Behavior Advisory**) and will carry fire during the warmest part of the day. Moderate upslope runs in sheltered locations are possible but unlikely.

DIV QQ - Forecast winds will be favorable today. Surface fire in pockets of unburned fuel will be possible.

**DIV MM** – Winds are forecast to align with the river below the line. This alignment could increase wind speed on the lower portions of the spot and contribute to torching and spotting. Down river movement toward Heinz Creek is unlikely.

**Branch V** – Interior smoke may increase as fuel reaches its moisture of extinction. Large fuels and pockets of light unburned fuel remain inside containment lines. Follow mop-up guidelines while accessing mop-up operations.

### AIR OPERATIONS:

Conditions are favorable for aviation operations.

### SAFETY

Fire not scouted and sized up. - Fuels and Fire Behavior Advisory for Northern California https://www.predictiveservices.nifc.gov/fuels\_fire-danger/Fuels\_Fire\_Behavior\_Advisory\_N-CA.pdf

# North Complex - Safety Message

### **INCIDENT #CA-PNF-001308**

DATE: 10-11-2020 TIME: 0700-1900 Day Shift

## **Emotional Awareness**

Wildfires with a wide range of destruction can cause mood swings, sleep disruption, and stress reactions. Take care of yourself by:

- Talking to a trusted friend, colleague, adviser, or family about what your feeling.
- Staying connected to life outside of the fire.
- Taking frequent breaks from firefighting efforts if feasible.
- Eating healthy and get plenty of sleep.

### **Command and Control**

Ask yourself key questions:

- · Are tasks in alignment with tactical objectives?
- Are tactical objectives in alignment with the strategic objectives?
- Are the strategic objectives in alignment with the incident priorities?
- What am I going to do to make a positive impact on this incident today?

# **Driving**

- When driving keep the speed at or below the posted speed limit and turn your headlights on. Is the posted speed limit a safe speed under the current conditions and traffic?
- Use caution on unimproved roads as some have soft shoulders. Some roads are also only one lane with pullouts!
- Road surfaces are variable with washboard conditions and thick dust that can compromise turning and braking.
- Watch for and anticipate livestock and wildlife especially from dusk to dawn.
- Always fasten your seat belt before the vehicle is set into motion. Use backers.
- Do not tail gate, especially in dusty conditions.
- Slow down, slow down, and slow down!

### **Public**

- Be alert for residents returning home who have been gone for a month or more.
- Heads up on hunters accessing the fire area despite forest closures in effect.
- Watch out for travelers as the 3-day weekend will increase the amount of people traveling within the fire perimeter to access recreation areas.
- Working on highly traveled roadways may be more dangerous than the fire itself.

Watchout! Keep your head up! Be visible!

Prepared by CIIMT 4 Safety Team

INCIDENT RISK ANALYSIS - NORTH COMPLEX CA-PNF-001308 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MURTIN COMPLEX CA-PNY-001306 (ICS 213a) Day SNIT
ALL	TRAFFIC HAZARDS  & DRIVING	Many roads are narrow, mid-slope, with soft shoulders. Allow vehicles to pass on uphill side. Use spotters when backing or turning around.  Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent.  Use warning lights when working on roads or traveling in smoke.  Drive at or below posted speed limits.  Use chock blocks, turn wheels into hill.  Be alert for wildlife. Dusk to Dawn pose the greatest potential for accidents.
ALL	HAZARD / DANGER TREES	<ul> <li>Follow Hazard Tree Safety Guidelines (IRPG p.22.)</li> <li>Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled.</li> <li>Be alert around hazard trees during wind events, even green trees.</li> <li>The hazard zone extends a minimum of 2½ tree lengths.</li> <li>Avoid parking vehicles or taking breaks under or near hazard trees.</li> </ul>
ALL	WORKING IN FLUCTUATING TEMPERATURES	<ul> <li>Minimize intake of caffeine products</li> <li>Ensure that your drinking a good amount of water</li> <li>Take time to properly stretch your muscles prior to asking them to perform</li> <li>Start out slow and work your way up to a normal pace</li> <li>Dress in layers so you can remove your clothing as the shift &amp; you warm up</li> </ul>
ALL	HEAVY EQUIPMENT OPERATIONS	<ul> <li>Ensure communications are established with operators (Visual &amp; Radio)</li> <li>Avoid working downslope from heavy equipment.</li> <li>Maintain a 50'-150' exclusion area around equipment.</li> <li>In timber increase safety distance to 2 ½ times canopy height.</li> </ul>
ALL	DOZER LINE PUSHES/BERMS	<ul> <li>When possible, use mechanized equipment to pull back and break down dozer pushes</li> <li>Avoid walking or climbing over pushes due to burning debris within the push</li> <li>Avoid white ash pockets and mop up with caution</li> </ul>
ALL	WEATHER	<ul> <li>Prepare for changes in weather conditions.</li> <li>Expect winds to increase and know the effect that it will have on fire behavior.</li> <li>Anticipate rain, which will create hazardous driving conditions, unstable terrain, and an increase in rollout and hazard trees coming down.</li> <li>Low temperatures coupled with moisture could cause bridges to freeze</li> </ul>
ALL	ACCOUNTABILITY	<ul> <li>Know where your troops are at all times.</li> <li>Know the plan, brief the plan, and implement the plan.</li> <li>Ensure you have communications with adjoining forces, and they know the plan.</li> <li>Check in and out when traveling through Branches and Divisions.</li> <li>If you see someone that looks out of place, stop, and ask what they are doing</li> <li>As fire conditions escalate and your chasing spots, do not over commit.</li> <li>Back off, regroup, and re-engage.</li> </ul>
ALL	FATIGUE COMPLACENCY	<ul> <li>Be alert for signs of fatigue and take breaks, as necessary.</li> <li>Maintain 2:1 work/rest ratio.</li> <li>Monitor ALL resources for level of fatigue.</li> <li>Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents.</li> <li>Take steps to maintain SA for the duration of the incident.</li> </ul>
ALL	FIRE BEHAVIOR	<ul> <li>Are you seeing what we have predicted?</li> <li>Conduct thorough assessments before starting work.</li> <li>Ensure LCES is in place. Watch for wind and slope alignment with roll out.</li> <li>Plan &amp; Communicate your exit strategy with your crew and adjacent resources</li> <li>Provide additional briefing for new resources and maintain communications</li> </ul>
ALL	AIRCRAFT OPERATIONS	<ul> <li>Conduct thorough mission assessments before starting work.</li> <li>Follow the guidelines in the IHOG and other aviation guidelines and reference materials.</li> <li>Ensure coordination and communication are in place and understood by all involved resources in a mission.</li> <li>Ensure close coordination between Air Attack, air tankers, helicopters, and ground resources.</li> </ul>
ALL	COVID-19	<ul> <li>Utilize social distancing, wear facemasks in camp.</li> <li>Maintain the "module of one" concept.</li> <li>Disinfect vehicles, tools, and commonly touched surfaces frequently.</li> <li>Do not share equipment and wash hands frequently</li> </ul>
ì	INCIDENT NAME NORTH COMPLEX	OPERATIONAL PERIOD: 0700-1900 October 11, 2020  DATE AND TIME PREPARED: October 10, 2020 1630 Hours

# North Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits "close contacts" to those within the module. A "close contact" is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- <u>Social Distancing.</u> Maintain a minimum of 6' physical distancing, especially from those outside of your module-as-one.
- Face Coverings. Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- Wash your hands. Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

# NORTH COMPLEX COVID-19 DAILY SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms<sup>1</sup>?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

# **Instructions for Screening**

Item	What to Do
If resource has a cough that is more than expected, shortness of breath	NOTIFY SUPERVISOR
or difficulty breathing, or any other symptoms listed.	IMMEDIATELY
At entries to established camps (ICP):	DO NOT ANNOUNCE
COVID-19 Daily Screening Tool will be posted for self	Ask individual or
screening of Incident Personnel, Cooperators and Guests.	"module-as-one" to step
	aside and follow the steps
If resource has cough, shortness of breath or difficulty breathing, or any	below.
other listed symptoms including fever (over 100.4) at entry.	

Steps to follow for a symptomatic screening
Escort individual or "module-as-one" to isolation area. Separate the symptomatic personnel.
Isolation support personnel should begin documentation.
Notify Line Medics or MEDL if at ICP to begin evaluation for COVID-19 potential.
COVID Safety will coordinate with Incident COVID Advisor.
Have individual or "module-as-one" fill out WF Employee Contact Assessment Sheet.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

#### Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Trout Meadow Medical Incident, IC is TFLD Jones. EMT Smith is providing medical care."

		RED / PRIORITY 1	Life or limb threat	ening injury o	r iliness. Evacua	tion need is	
Severity of Emergency		Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.					
	AND	U YELLOW / PRIORIT	TY 2 Serious Injury	or iliness. E	vacuation may be	DELAYED IF

# DEMOBLIZATION MESSAGE For October 11, 2020

If you need **AIR TRAVEL** back to your home unit, Please stop by the DMOB Unit located at the ICP located at the Plumas County Fairgrounds

<u>Seventy-Two (72) Hours</u> prior to your

DMOB DATE.

This will ensure that the Travel Agent has plenty Of time to secure you a flight.

If you are listed on the
Tentative DMOB list
Please plan accordingly so that the DMOB Process
Will be a simple one.
Make sure you turn in your CRT's or Shift Tickets
To the Finance Section Daily.

Thank you,
Kelly Mosinski (T)
Hans Rohr, DMOB (T)

#### Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.

The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Your Region 3 OES AREP Patrick Titus 916-634-9225

# Human Resource Message North Complex October 11, 2020

## HUMAN RESOURCE MESSAGE GIVE RESPECT GET RESPECT

People don't like their feelings hurt. But they don't think about how their actions will hurt others either.

Treat people the way you want to be treated. Talk to people the way you want to be talked to.

Respect is earned not given. Give Respect to get Respect.
It goes both ways.

Feel free to call/text or come by the HRSP yurt if you have questions, concerns, or just want to chat. Adam Alvarez – (HRSP) - (707) 373-8715

# TRAINING MESSAGE 36-668-53283

## ESCAPEE(N)

Someone who checks-in to the incident as a Trainee but leaves the incident before checking out with the Training Specialist.

Check-In

**Exit Interview** 

Your assignment has finished and you want to get home. Spend the extra 5 minutes and capture the hard work that was performed. **PLEASE** check out with the Training Specialist. Phone, text, email, or in-person.

Emil Picchi (650)520-5102 Ed Gonzalez (530)720-7512 EPICCHI@WOODSIDEFIRE.ORG ED.GONZALEZ@CHICOCA.GOV

### TURN IN TO FINANCE EQUIPMENT TIME DAILY

This document is intended to track, record, and validate the amount of water used on an incident. It is not intended to review the performance of equipment using water on an incident.

# **Maidu Requests for Visiting Homeland**

#### 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

#### 2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

#### 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

#### 4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

#### 5. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

#### 6. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

 Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!

### Summary of Suppression Damage Repair Guidelines

Objectives - The objective of the fire suppression repair is:

- Reduce the potential for soil erosion and sedimentation
- Protect natural and cultural resources from additional potential damage
- Repair roads and drainage structures to a functioning condition

# Sensitive Sites are marked with RED and BLACK CANDY STRIPE flagging. DO NOT repair in Sensitive Sites.

BACK-HAUL ALL TRASH AND UN-NEEDED FLAGGING. PLEASE LEAVE SAFETY FLAGGING IN PLACE.

PULL BACK SOIL BERMS All berms present from line construction should be recontoured and spread across the constructed line. Removal of berms will allow water to flow off the fire.

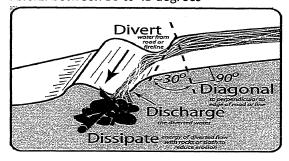

The three objectives of waterbars are: (1) to divert the destructive overland flow of water **off** the fire line; (2) to discharge the water onto areas where the erosive energy can be dissipated; and (3) to aid in the recovery of vegetation.

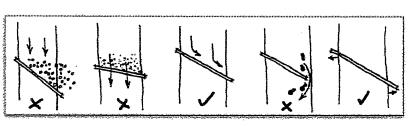

Enclose Gradieni -	Distance Between. Waterbars 407		Think 5-D System
0-5	None	Distance	Reduce the distance water can run in a straight line
5 to 15	150 to 125	Diagonal	Don't bully the flow, lead it away
15 to 35	75 to 45	Divert	Move the water off the fireline
35 to 65	35 to 65	Discharge	Good water bar is not a dam – must have open outlet.
65+	15	Dissipate	Water should spread out from outlet like a shower not a fire hose.

**DEPTH AND WIDTH:** Waterbars need to be cut into surface, do not simply push up soil. They should be deep enough to redirect the water from expected rain to area, at least 18 inches and **not to exceed 24 inches** 

**OUTLETS:** Direct water primarily to unburned areas, should not be directing water into stream channels

ANGLE: between 30 to 45 degrees

**BLOCK FIRELINE ENTRANCES AND EXITS** using existing materials and berms use available large rocks, large trees, or walls of brush. Use onsite material try to disguise the first 100 feet of hand line and dozer line with slash and other materials where possible as not to entice OHV users.

WATERCOURSES: Work with READs to determine appropriate repair needs. Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

**ROADS**: Reshape soil surfaced roads. Roads should be outsloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.
