**Fuels and Fire Behavior Advisory for Northern California areas below 3000 feet. – See QR Code**

Wildland Fire Assessment System Outputs (PSA NC07 – Northern Sierra):

- Severe Fire Danger Index – Moderate
- 1000 Hour FM – 7% (3<sup>rd</sup> Percentile)
- 100 Hour FM – 7% (10<sup>th</sup> Percentile)
- ERC – 75 (87<sup>th</sup> Percentile)

### Incident Weather Thresholds

RH Below 19%, Mid Flame Wind Speed Greater Than 8 MPH, Temperature Above 80 Degrees.

Wind speeds will be above threshold values.

## OUTPUTS

### GENERAL FIRE BEHAVIOR:

High humidity and showers has suppressed surface spread. Fire activity has been reduced to sheltered areas and heavy fuels. Expect a slow return to smoldering and surface spread as fine fuel becomes available with increased drying. Consistent dry nighttime conditions and moderate winds will aid the drying of fuels. A return to continuous surface spread in interior pockets is probable.

### SPECIFIC:

#### Branch II:

**DIV OO (River South)** – Smoldering and pockets of surface fire today. Expect surface fire to return to the division. Exposed locations will see the greatest increase in drying a surface fire. Locations near Grizzly Forebay will experience the greatest wind speeds.

**DIV OO (River North)** – The light fuels of the 2008 BTU Lightning Complex fire footprint will remain a concern until the treat of torching along the south side of the river is gone. Fine fuel is dry and abundant (See **Fuels and Fire Behavior Advisory QRCode**) and will carry fire during the warmest part of the day. Moderate upslope runs in sheltered locations are possible but unlikely.

**DIV QQ** – Division will be above the inversion and subjected to higher temperatures and lower relative humidity. General winds with varying directions will complicate operational planning. Surface fire in pockets of unburned fuel will be possible.

**DIV MM** – Winds are forecast to align with the river below the line. This alignment could increase wind speed on the lower portions of the spot and contribute to torching and spotting. Down river movement toward Heinz Creek is unlikely.

**Branch V** – Monitor the fires transition from smoldering to surface fire and the weather to gauge mode changes in fire behavior. Fire behavior can increase quickly when pockets of fuel are encountered. Smoke and surface fire will return over the coming days. Follow mop-up and suppression repair guidelines while planning and implementing operations.

### AIR OPERATIONS:

Conditions are favorable for aviation operations.

### SAFETY

On a small fire or isolated portion of a large fire.

# North Complex– Safety Message

INCIDENT #CA-PNF-001308

DATE: 10-12-2020 TIME: 0700-1900 Day Shift

## Situational Awareness

*In the wildland fire environment, “SA” is a requirement!*

- Driving: Maintain safe driving practices
- Trees: Gravity always wins. Look up, down and around
- Steep Terrain: Look for rolling material
- Fatigue: Monitor your health and that of those around you
- Concentrate: Stay focused on the task at hand
- Communications: Be clear, be concise, be accurate
- Smoke: Recognize the effects of long term smoke exposure and mitigate

## PREPARE FOR A MEDICAL EMERGENCY

Practice reporting the 8-Line Medical Protocol with all crew members. An emergency should not be the first time that the process is reviewed. Know where the closest medical staff is located. Pre-plan travel routes and utilize drop points as rendezvous locations if needed. Have a plan in case aircraft are unavailable. Know who else is medically trained within assigned resources.

## ***North Complex COVID-19 Expectations***

---

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the local communities proximal to the fire, be mindful that in the State of California, face coverings are required inside local businesses.**
- Being a Federal fire, incident personnel are expected to comply with the following Region 5 and incident guidance.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks.
- **Social Distancing.** Maintain a minimum of 6’ physical distancing, especially from those outside of your module-as-one.
- **Face Coverings.** Face coverings are required to be worn, **in the appropriate manner covering nose and mouth**, when at ICP and camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible, especially with those outside your module-as-one.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

## Our time is getting shorter... How about our Tempers?

Some can see the end in sight, for some it's uncertain. Some are ready to leave; some are wishing it was longer.

With the hard work and especially the changes taking place, it is easy to get on edge and "on the edge" with each other. Let's guard against that and try to help each other out.

~Take care and be safe.

**A quick temper will make a fool of you soon enough.**

# Memo

**To:** Incident Commanders, Agency Administrators/Forest Supervisors  
**From:** Wendy Flannery  
**Date:** 10/02/2020  
**Re:** CISM Assessment Visits

The Pacific Southwest Region CAP/CISM coordinators, Wendy Flannery and Tessa Chicks will be visiting most incidents and host forests in R5 over the next few weeks. Most of the time, we will be accompanied by a culturally competent, trauma-trained clinician. ***This is not instead of normal CISM Peer Support responses, but is in addition to them...***in case of an emerging critical incident, please continue to order a CISM response through the appropriate Geographic Coordination Center (Northern Operations or Southern Operations).

The goal is to connect with the wildland firefighters and support personnel on the ground to assess the needs for how we can provide care for our employees, to learn what is working in terms of maintaining resiliency and to develop a strategic plan to support folks for the rest of this season and beyond.

We would love to offer a short presentation at your morning or evening briefing on this topic, where we would invite assigned personnel to connect with us during our visit. **Please contact or have your PSC contact Wendy at 209-283-4552** to confirm this. Below is a tentative outline of where we plan to be and when:

Day	Date	Location
Tuesday/Wednesday	10/06/2020 – 10/07/2020	Six Rivers National Forest, Red Salmon, North August Complex
Thursday/Friday	10/08/2020 – 10/09/2020	Klamath National Forest, Slater Fire and Devil Fire
Saturday/Sunday/Monday	10/10/2020 – 10/12/2020	Shasta Trinity/Mendocino/Plumas National Forest, August Complex, North Complex
Tuesday/Wednesday	10/13/2020 – 10/14/2020	Los Padres and Dolan Fire
Thursday/Friday	10/15/2020 – 10/16/2020	Sierra National Forest, Creek Fire
Saturday	10/17/2020	Sequoia National Forest and Sequoia Complex fire
Sunday/Monday/Tuesday	10/18/2020 - 10/20/2020	Angeles/San Bernardino National Forests, Bobcat and El Dorado Fires
	Wednesday	TRAVEL HOME

Additionally, I have attached an insert for your IAP, if you would like to include it on the day we visit.

Forest Supervisors/Agency Administrators: We will connect with you when we get to your neck of the woods...if you have a specific point of contact that you would like us to connect with, please let us know.

We recognize that we are focusing on locations with campaign fires currently...we will make a plan to follow up with other forests and units as well...this is just the start of our assessment. Thanks. Wendy and Tessa

## Pacific Southwest Region Peer Support/Critical Incident Stress Management

Our wildland firefighters and support employees are resilient under stress, shown time and again in our daily jobs. We do great; however, stress is cumulative. And 2020 has pushed us and our coping mechanisms to the limit.

Here are a few reminders for employees working under these stressful conditions:

- Eat Right
- Stay Hydrated
- Get Plenty of Rest
- Connect with your support system (family, friends, co-workers...)
- Reach out for additional help if needed... (Peer Support, Clinician Services, Spiritual, Employee Assistance Program, etc.)

CISM Coordinators/Peer Support and a Clinician will be onsite today.

We want to hear from you and we will be visiting your incident...how are you doing? How is your crew doing? What helps maintain resiliency? What are your plans for recuperation when the fires go out? How can we help? We have been so operational this year, with COVID-19 mitigations and fire suppression, are your needs being met in regards to crisis management? Would you or your crew or unit benefit from follow-up support?

Connect with us today or call anytime.

Wendy Flannery, R5 CISM/CAP Coordinator 209-283-4552  
Tessa Chicks, R5 Deputy CISM/CAP Coordinator 360-982-8220

- ✓ Be **HONEST** enough to let the trainee know what their strengths and weaknesses are, how they performed and if they met, did not meet, or exceeded your expectations.
- ✓ **DOCUMENT** what skills or tasks the trainee should work on next if recommending continuing assignments.
- ✓ If recommending certification, **BE SPECIFIC** in the performance evaluation that you are recommending them for certification.

# Maidu Requests for Visiting Homeland

## 1. "Be good to the land and the land will be good to you." Maidu quote

Thank you fire fighters for helping us keep our homes and cultural sites safe.

## 2. Enjoy your visit in the Mountain Maidu and Valley Maidu homelands.

Archeological sites and the resources they contain are not public property. A place, site or resource may have significance to a family or local tribe, which often carries with it a special level of protection.

## 3. Take care to avoid injuries.

Cultural sites are very old and fragile. Archeological resources are anything over 50 years old and can therefore erode easily. Also, historic dump sites can be hazardous, with sharp glass, rusty metal, and compounds and chemicals that can harm you.

## 4. Enjoy with care.

Oils from skin damage pictographs (rock paintings) and petroglyphs (rock carvings). It ruins irreplaceable historic resources, and it is illegal.

## 5. Don't touch the knickknacks.

ALWAYS LEAVE ARTIFACTS RIGHT WHERE YOU FIND THEM. Out of context, artifacts mean little to archeologists. Often the most important aspect of archeological resources is their relationship to the place and other adjacent resources. Archeological sites and artifacts are our direct link to stories that otherwise might not be told. How can these stories be complete or accurate if the setting is altered or lost? For this and other reasons, it is illegal to move or remove artifacts.

## 6. Feel free to discover.

Some of the sites are identified, and some sites are not recorded. If you happen to come across a cultural site we ask you to treat it like you would any cultural artifact. And note the location and report it to a Resource Advisor.

Speak with resource advisors about the potential for archaeological sites being located adjacent to roads or proposed fire lines. It's easy to destroy features and artifacts in the dark.

- Over approximately 160 years, many changes have reshaped tribal relationships with these vast landscapes as well as with each other, and yet our knowledge of and responsibilities to these incredibly rich and vast landscapes remains strong. **We appreciate your dedication to care for and building your own relationships with our natural environment while protecting these fragile and irreplaceable resources!**

## Summary of Suppression Damage Repair Guidelines

Objectives - The objective of the fire suppression repair is:

- Reduce the potential for soil erosion and sedimentation
- Protect natural and cultural resources from additional potential damage
- Repair roads and drainage structures to a functioning condition

**Sensitive Sites are marked with RED and BLACK CANDY STRIPE flagging.  
DO NOT repair in Sensitive Sites.**

**BACK-HAUL ALL TRASH AND UN-NEEDED FLAGGING. PLEASE LEAVE SAFETY FLAGGING IN PLACE.**

**PULL BACK SOIL BERMS All berms present from line construction should be recontoured and spread across the constructed line. Removal of berms will allow water to flow off the fire.**

The three objectives of waterbars are: (1) to divert the destructive overland flow of water **off** the fire line; (2) to discharge the water onto areas where the erosive energy can be dissipated; and (3) to aid in the recovery of vegetation.

Fire line Gradient (% slope)	Distance Between Waterbars (feet)	<b>Think 5-D System</b>	
0-5	None	Distance	Reduce the distance water can run in a straight line
5 to 15	150 to 125	Diagonal	Don't bully the flow, lead it away
15 to 35	75 to 45	Divert	Move the water off the fireline
35 to 65	35 to 65	Discharge	Good water bar is not a dam – must have open outlet.
65+	15	Dissipate	Water should spread out from outlet like a shower not a fire hose.

**DEPTH AND WIDTH:** Waterbars need to be cut into surface, do not simply push up soil. They should be deep enough to redirect the water from expected rain to area, at least 18 inches and **not to exceed 24 inches**

**OUTLETS:** Direct water primarily to unburned areas, should not be directing water into stream channels

**ANGLE:** between 30 to 45 degrees

**BLOCK FIRELINE ENTRANCES AND EXITS** using existing materials and berms use available large rocks, large trees, or walls of brush. Use onsite material try to disguise the first 100 feet of hand line and dozer line with slash and other materials where possible as not to entice OHV users.

**WATERCOURSES:** Work with READs to determine appropriate repair needs. Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.

**ROADS:** Reshape soil surfaced roads. Roads should be outsloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.
