

WOODWARD INCIDENT CA-RNP-12009 (PPNF62)

IAP

Monday, August 31, 2020

Today's discussion is from the Fireline Safety Category

Standard Fire Orders

The NWCG approved a revision of the Standard Fire Orders, in accordance with their original arrangements. The orders are arranged according to their importance and grouped in logical sequence. Review and consider Standard Fire Orders as a part of every shift.

Did you receive or request adequate weather briefing, current and predicted fire behavior, wind direction, predicted humidity, fuel moisture, local factor?

Do you have map of the fire? Is topography, type of fuels, direction of the spread defined?

Fire behavior group deals with what the firefighter will encounter - weather, fire status, fire behavior.

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.

Are you familiar with direction, distance, location, size of escape routes and safety zones?

Discuss the need for lookout, such as extreme fire behavior, fire located out of line-of-sight.

Discuss importance of the situational awareness.

Fireline safety group emphasizes personal safety.

4. Identify escape routes and safety zones and make them known.
5. Post lookouts when there is possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.

Review importance and means of passing tactical decisions and resource movement.

Review other factors influencing potential changes in tactics, which could affect control of your forces.

Organizational Control group is centered around tactical decisions.

7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
8. Give clear instructions and insure they are understood.
9. Maintain control of your forces at all time.

After you have considered, discussed and acted on the previous nine orders:

10. Fight fire aggressively, having provided for safety first.

COVID-19 Hotline (415) 246-4136

Signs of COVID-19

- New loss of smell or taste
- Fever
- Cough, shortness of breath
- Muscle pains/aches, More than normal
- Vomiting/diarrhea

INCIDENT OBJECTIVES	1. INCIDENT NAME Woodward	2. DATE 8/30/2020	3. TIME 1930
<p>4. OPERATIONAL PERIOD</p> <p>Values of Concern:</p> <ul style="list-style-type: none"> • Neighboring communities and private residences including Inverness, Pt. Reyes Station, Sea Haven, Olema, Laguna, and park headquarters in Bear Valley, Ranches and Bolinas. • Mountain Vision Communication Site that serves the FAA, Marin County, NPS, and other entities. • High power transmission lines providing power to Novato and the Bay Area. • Highway 1 providing a main thoroughfare. • Many historic, natural, cultural and recreational values within the park including historic buildings and multiple T&E species. • Federally designated wilderness – Phillip Burton Wilderness. • Economic values associated with park partners, concessionaires, ranches and local businesses. <p>Management Objectives:</p> <ul style="list-style-type: none"> • Provide for emergency personnel and public safety at all times through the utilization of a deliberate risk-informed approach, with avenues for feedback from personnel. Also, ensure COVID-19 precautions and best practices are met by following agency, team and county guidance. • Ensure coordinated, timely and accurate release of public information. When possible utilize virtual platforms. • Foster and maintain relationships with the public, cooperators and stakeholders. • Maintain fiscal accountability by making good risk-informed decisions. <p>Operational Objectives:</p> <ul style="list-style-type: none"> • Under the full suppression strategy, utilize direct and indirect tactics to minimize fire size. As feasible, utilize minimum impact suppression tactics in the Phillip Burton Wilderness. • Protect the values of concern identified above by suppressing the wildfire, utilizing point protection of structures when necessary and strategies and tactics which result in minimal impact to resource values. • Identify and utilize primary and alternate containment opportunities considering risk, resource availability, and probability of success. • Cooperating with Marin County Fire Department, refine and further develop a population protection plan for the surrounding communities. <p>Commander's Intent:</p> <p>It is my expectation that we as an organization will meet the following Leader's Intent as well as the above objectives:</p> <ul style="list-style-type: none"> • TASK: Ensure all incident strategies and actions reflect a commitment to public, responder, and aviation safety through using the risk management process as outlined in the IRPG and the aviation risk assessment process. If you cannot mitigate a tactical hazard to an acceptable level of risk, do not implement the corresponding tactical action until such time as the risk can be satisfactorily mitigated before re-engaging. Ensure that Commander's intent is clearly communicated and understood. PURPOSE: To manage risk in all incident actions. END STATE (Outcome): No serious illnesses, injuries or deaths. • TASK: Coordinate incident management activities with our requesting and cooperating agencies including but not limited to suppression actions and support needs. PURPOSE: To ensure incident management activities are aligned with the overall goals and direction provided by the requesting and cooperating agencies. END STATE (Outcome): The mission assignment is resolved to the satisfaction of requesting and cooperating agencies. • TASK: Coordinate closely with resource advisors, or designated agency representative, on all operational activities. PURPOSE: To ensure that suppression impacts to natural and cultural resources are kept to a minimum. END STATE (Outcome): To the greatest extent feasible, resource values have received no detrimental impacts. • TASK: Treat all incident personnel, cooperators, and local publics with dignity and respect creating a "no tolerance" atmosphere for harassment, alcohol, or illegal drug use. PURPOSE: To create an environment that is based on solid relationships and is conducive to efficient accomplishments. END STATE (Outcome): All people associated with the incident felt valued and were able to contribute to a positive outcome in the management of the incident.

Woodward Fire Weather Forecast

FORECAST NO: 7
PREDICTION FOR: Monday Day/Night
SHIFT DATE: 8/31
FORECAST ISSUED: 8/30/2020 at 2000

NAME OF FIRE: Woodward
UNIT: CA-RNP
SIGNED: Jeremy Michael
Incident Meteorologist

WEATHER DISCUSSION: The marine layer is hovering around 1200-1500 ft. this morning. Stratus should clear by late morning for Div. Tango/Echo, however dense smoke will be a problem. Div. Whiskey/Charlie will struggle to clear until 1200-1400 hrs. The earlier erosion in Tango/Echo will allow for a little drying and warming compared to yesterday with similar conditions in Whiskey/Charlie. Watch for lower RHs on ridgetops, especially from afternoon through evening. For the rest of the week, expect a shallower marine layer to continue with warmer/drier conditions. Watch for nighttime drying on ridgetops as low as 40% each evening and night. Winds are expected to shift northwest by Wednesday and potentially become breezy.

WEATHER FORECAST MONDAY:

WEATHER: Stratus/fog in the morning. After clearing, expect heavy smoke with visibility less than 1 mile.

TEMPERATURES: Highs 58-64 near the coast/ridges and 67-73 inland.

HUMIDITY: 75-90% near the coast and 50-65% inland valleys. Could drop to 45% on ridges.

20 FT WINDS: Terrain driven/light in the morning. S to SSW 4-9 mph, gusts up to 16 mph.

MARINE LAYER DEPTH/TIMING: Around 700-900 ft. Eroding in Div. Echo/Tango 0900-1000 hrs. Less stratus is expected across the fire compared to previous days.

MONDAY NIGHT:

WEATHER: Dense smoke under the inversion. Drying on ridgetops during the evening/overnight possible.

TEMPERATURES: 53-59.

HUMIDITY: Valleys and coast: 90-100%. Ridgetops: Could drop as low as 40%.

20 FT WINDS: Terrain driven under inversion. NE to ENE 3-7 mph, gusts up to 15 mph highest ridges.

MARINE LAYER DEPTH/TIMING: Around 700-1000 ft., moving in between 2100-2300 hrs.

EXTENDED FORECAST: Marine layer between 500-1100 ft....warmer and drier.

TUESDAY AND TUESDAY NIGHT: Marine layer possible down to 500 ft. eroding around 0900-1100 hrs. Max temps 67-77°F. Min RH 45-60%. Higher RH near coast. Generally S-SSW 4-9 mph, gusts to 17 mph. Min Temps 51-59°F. Max RH valleys 90-100% and ridgetops above marine layer 45-60%

WEDNESDAY AND THURSDAY: Marine layer between 700-1100 ft. eroding late mornings. Highs 60s/70s with Min RH 45-65%. Overnight lows 52-62°F with overnight RH 85-95% valleys/coast and 40-60% ridgetops. WNW to NW winds, possibly becoming breezy across ridgetops.

Location Definitions: Inland = Div. Echo and Tango, northern Div. Charley and northern Div. Whiskey.
Coast = Div. Zulu, southern Div. Whiskey and southern Div. Charley.

Please submit observations to IMET/FBAN or text observations to (304) 886-2331

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: # 9	TYPE OF FIRE: Wildland Fire
FIRE NAME: Woodward	OPERATIONAL PERIOD: Day 08/31/2020
DATE ISSUED: 8/30/2020	TIME ISSUED: 2000
UNIT: Point Reyes National Seashore	SIGNED: /S/ Jon Trapp (FBAN)

INPUTS

WEATHER SUMMARY:

****See attached Fire Weather Forecast****

OUTPUTS

FIRE BEHAVIOR

GENERAL:

*** This forecast is mostly the same as yesterday as the weather and fuels will be similar ***

Factors that contribute to increased fire activity: 1) **Dissipation of the marine layer** 2) Look for slopes where sunlight penetrates to the ground and start heating fuels. 3) Pay attention to the division hourly weather observations – Fire activity has been picking up when RH is below 60%. 4) Watch for wind and slope alignment.

Timber fuels: If the marine layer clears, expect short crown runs in the timber with spotting distances of half a mile. Unburned pockets will continue to burnout in the interior and produce spot fires. 1,000 hour and 100 hours fuels are ready to burn with ERC is at record high for the area.

Shrub fuels: If the marine layer clears, fire will move faster in shrub and grass fuel types. One hour fuels will become available to burn quickly after marine layer clears.

SPECIFIC:

DIVS T/E: Fire activity can pick up quickly if the marine layer clears and RH drops. SW winds will be pushing a flanking/head fire, with Rates of Spread up to 24 Chains per Hour with 11 foot Flame Lengths in understory fuels. Probability of Ignition: 30-40%

DIVS W/C/Z: Expected to remain under the marine/smoke layer throughout the operational period.

Structure Protection Group: If main fire gets into the canopy, SW winds can carry fire embers up to half a mile toward area with structures. Listen for coms indicating torching activity.

AIR OPERATIONS:

Stay alert to the various air operations that could be overhead – buckets, PSD, scoopers, retardant, etc.

SAFETY

Use caution patrolling in areas that burned within the last few days. Trees and limbs continue to fall with minimal wind.

SAFETY MESSAGE

Woodward Fire

August 31, 2020

An important aspect of safety is individual responsibility for one's own health and safety. Even with the best supervision, each individual firefighter will occasionally be required to make personal decisions concerning their safety. It is important that individual responsibility is taught as the basis for a viable safety program.

Individual responsibilities

- ✓ Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet,
- ✓ Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. Fireline supervisors have more important duties to focus on other than performing glove patrol.
- ✓ Maintain situational awareness at all times
- ✓ Do not expect someone else to be responsible for your safety. Take it upon yourself to make "Safety" your number one priority.

Medical Incident Report (8 line)

- Purpose of the 8-Line is have a standard process to get the right medical response to someone in need. Also any firefighter can fill out and transmit with prior training and direction.
- Treat it like an incident anyone may start out as the IC till someone with more experience can takeover.
- Always be ready for the first plan to fail have an alternate plan think Pace Primary, Alternate, Contingency, Emergency

The time to understand the medical evac. plan is before you need it. The plan is in IAP and under Emergency Medical Care (Pink) in the IRPG. Discuss with everyone around you. You may be the one depending on it to work to get you the proper care.

Turman's Safety Team Northern Rockies Safety Team 2

DIVISION ASSIGNMENT LIST				1. Branch I		2. Division C			
3. Incident Name Woodward				4. Operational Period Date: 8/31/2020 Time: 0800 - 0800

6. Control Operations/Work assignments:									
<p>Task: Hold and improve control lines on DIV-C to the DIV-Z break. Continue to support crews with hose lay to help secure slop overs. Professional fallers to assist with snagging all work areas. Maintain situational awareness to provide for firefighter safety throughout the shift. During mop-up operations, mop up to the extent necessary to ensure the fire won't escape containment lines with predicted weather and fire behaviors.</p> <p>Purpose: Minimize the fire spread and protect the population along with private and public property by stopping the spread of fire north/west into populated areas.</p> <p>End State: The fire is contained by adequate control lines. All responders safely returned from their assignments. Injuries to the public and responders were minimized. Community and the regional economy returned to normal. Infrastructure remains intact.</p>

O-11.62 SOF2 LOVAN	9/4			LOVAN, STAN	1	ICP	ICP		

6. Control Operations/Work assignments:
Task: Secure and improve all constructed lines within Division Z. Complete any remaining hose lay needs within Division, extending from Division C. Utilize water for direct suppression efforts on hot spots close to containment lines to strengthen and hold lines. Continue to monitor fire activity in unburned green pockets between containment lines and the fire's edge.
Purpose: Utilize direct suppression tactics, prevent fire from spreading beyond containment lines and crossing into MAP's. Minimize and remove available fuel pockets close to containment lines.
End State: Fire is contained within primary division boundaries and containment lines. All identified slop-overs are lined, and fire is controlled and cold trailed. All responders have safely returned from their assignments. Injuries to the public and responders were minimized. The community and the regional economy returned to normal. Infrastructure remains intact.

7. Special Instructions:
 Watch Outs: Poison oak and poison sumac. Working around machinery. Use caution on narrow, windy roads. Steep, rugged terrain. Drought stressed trees and snags in fire area. Maintain situational awareness and ensure LCES.
 Remain aware of loose soil on hand and dozer lines and issues as it presents footing concerns.
 The NPS repeaters are not to be used unless you cannot communicate on any of the command repeaters and there is an EMERGENCY.

O-162 ARCH WRIGHT		9/10			WRIGHT, JASON	1	ICP	ICP			
6. Control Operations/Work assignments: Task: Complete burn out along Bear Valley TR between DP 15 to DP10. Continue mop up and monitoring on direct handline from Coast Trail to Baldy Trail. Monitor for spot fires and slop overs along Bear Valley TR. Mitigate snags that may compromise line or are a safety hazard. Purpose: Prevent fire from crossing Bear Valley Trail and spreading to the south. Continue mop up along hand line. End State: Keep fire contained along handline from Coast TR to Baldy TR, Baldy TR to DP15 and along Bear Valley Trail from DP15 to DP10, while protecting values in the park and adjacent private property.											
7. Special Instructions: Watch Outs: Poison oak, poison sumac, stinging nettle, bees. Heightened awareness for fire weakened snags and draught stressed trees throughout the fire area, along hand line and Bear Valley TR. Working around machinery and felling operations. Use caution on narrow, windy roads. Steep, rugged terrain. Maintain Situational Awareness and ensure LCES. The NPS repeaters are not to be used unless you cannot communicate on any of the command repeaters and there is an EMERGENCY. In Branch II, use Command 2 repeater from Bear Valley Trail to DP10 and use Command 3 repeater from DP10 to DP20. STG MRN 9151G designated as lighting crew											
9. Division/Group Communication Summary											
See Communications Plan											
Prepared by (Resource Unit Leader) <i>Casey Cook RESL (T)</i>				Approved by (Planning Section Chief) <i>Scott BSCOTT</i>				Date 8/30/2020		Time 2000	

DIVISION ASSIGNMENT LIST				1. Branch STRUCTURE		2. Division STRUCTURE			
3. Incident Name Woodward				4. Operational Period Date: 8/31/2020 Time: 0700 - 2000					
5. Operations Personnel									
Operations		Mike Granger, Brandon Cichowski, Joey Gallion (T), Bret Lewis (T)			Division Supervisor		Kirk Kraft, Todd Overshiner		
Branch Director		Roger Goldman, Chris Johnson (T)			Safety Officer		Dan LeCrone, Gerald Vickers, Shannon Bowman		
6. Resources Assigned this Period									
Strike Team/ Task Force/ Resource Designator		14 th Day	21 st Day	30 th Day	Leader	Number of persons	Drop off	Pick up	Comments
E-9 STC MRN 9152C			9/8		PAYNE, JOHN	16	DP7	DP7	5 Type 3 Engines
MARIN CTY STRUCT. ASSESS TEAM					BROWN, CHRIS	16	DP7	DP7	
6. Control Operations/Work assignments:									
<p>Task: Conduct structure assessments and build a common operating picture of community geography and infrastructure to inform incident resources responding to wildfire in the planning area. Follow ignition operations to catch spot fires and prevent fires from reaching values at risk. Make contact with landowners to brief them on fire status, evacuation updates, and how to remove light fuels from around structures to mitigate damage from fire spread. Maintain contact with Marin County Fire to receive daily strike team support for boost, when needed. Assign structure assessment teams to priority communities. Familiarize resources with road systems and communities at risk. Prepare staging area to receive incoming resources.</p> <p>Purpose: Resources are improving and holding indirect and direct line construction and aviation assets are supporting their efforts when air clears. If wildfire spreads into communities, incoming incident resources will need immediate access to structure assessments and community geography. If citizens keep situational awareness, they will be more prepared to evacuate when ordered.</p> <p>End State: Ensure wildfire risk to structures and community infrastructure is minimized, responders are familiar with community maps and geography, and landowners are educated on mitigation measures, fire information, and evacuation procedures. Agencies with public safety responsibilities are informed regarding the progress of assessments and strategies should structure group engage in protection of high value assets at risk. Firefighters and landowners safety is maximized and property damage is minimized.</p>									
7. Special Instructions:									
<p>Coordinate with DIVS that is igniting to familiarize adjoining forces with our location and capacity. Familiarize all structure protection resources with local agency evacuation status and protocols. Download electronic structure protection zones and road maps in the immediate fire area.</p> <p>The NPS repeaters are not to be used unless you cannot communicate on any of the command repeaters and there is an EMERGENCY.</p> <p>In Branch II, use Command 2 repeater from Bear Valley Trail to DP10 and use Command 3 repeater from DP10 to DP20.</p>

6. Control Operations/Work assignments:											
Task: Patrol and monitor fire control lines. Take actions to control any spots found.											
Purpose: Minimize the fire spread and protect the population along with private and public property by stopping the spread of fire into populated areas.											
End State: The fire is contained by adequate control lines. All responders safely returned from their assignments. Injuries to the public and responders were minimized. Community and the regional economy returned to normal. Infrastructure is intact.											
7. Special Instructions:											
Recon fire area for potential snags or other potential hazards prior to sunset.											
Notify fire communications of any emergency situation.											
The NPS repeaters are not to be used unless you cannot communicate on any of the command repeaters and there is an EMERGENCY.											
In Branch II, use Command 2 repeater from Bear Valley Trail to DP10 and use Command 3 repeater from DP10 to DP20.

VIAIR OPERATIONS SUMMARY
220v.3

Prepared By: Lori Clark, AOB

Prepared Date: 08/30/2020

Prepared Time: 2000

1. INCIDENT NAME: Woodward	2. OPS PERIOD DATE: 08/31/2020	START TIME: 0800	END TIME: 2000	(Petalumna) SUNRISE: 0639	SUNSET: 1940
--------------------------------------	--	----------------------------	--------------------------	-------------------------------------	------------------------

3. Risk Assessment Mitigations, Special Instructions, and Remarks:
Hazards: Visibility – smoke and marine fog Mitigation: Ensure visibility is within acceptable limits to safely conduct flight operations
HAZARD: External loads (water bucket) over high traffic routes (Hwy 101): discuss best options for safest routes & potential off-helispot locations for bucket attachment
Situational Awareness: good planning is essential to stay ahead of the game. If needed, take a pause, re-evaluate and re-align.

SPECIAL INSTRUCTIONS for SUNRISE/SUNSET: Smokey conditions will decrease visibility; aviation operations will terminate at sunset (use last 1/2hr for RTB—exceptions allowed—managers must communicate intent)
With the "One Module concept" for COVID mitigation – Communication is critical Attend Zoom Briefing daily at 0700; contact AOB or ASGS with any follow-up questions

HOW TO SUBMIT YOUR TIME

Resources have three options:

1. Fill out your CTR/Shift Ticket, have your supervisor sign it, and Division will forward it to Planning Ops who will give it to Finance.
2. Fill out your CTR/Shift Ticket, have your supervisor sign it, take a picture of it, and email it to Finance with the word **Time** in the subject line: 2020.woodward.finance@firenet.gov.
3. Fill out an electronic CTR/Shift Ticket, email it to your supervisor to sign, and then email it to Finance with the word **Time** in the subject line: 2020.woodward.finance@firenet.gov.

Include a contact email and cell phone in the remarks!

Please do not wait to turn in your time. We never know when resources could be moved to a higher priority fire and that will really slow down the reassignment process. We want to make this as smooth as possible for you.

Note: Ensure your CTR or Shift ticket has a supervisor's signature and shows meal breaks.

Thank you,

Your Finance Section

Woodward Fire Resource Advisor Message

WHENEVER POSSIBLE:

- ❑ Employ Minimal Impact Strategies and Tactics (MIST) when conducting operations in the Phillip Burton Wilderness.
- ❑ Avoid cutting any trees greater than 18 inches diameter at breast height or wildlife trees with large cavities or deformities
- ❑ Avoid bucket drops in freshwater ponds, wetlands, and streams

Consult with Fireline Resource Advisors (REAFs) before:

- ❑ working in an area flagged off with sensitive resource flagging
(yellow + red-polka dots)
- ❑ conducting fire operations in known noxious weed infestations
- ❑ transporting slash material beyond the area it was cut
- ❑ establishing new camps, staging areas, safety zones, helispots, etc.
- ❑ discharging water on roads or at stream crossings
- ❑ constructing dozerline within 100 feet of dry of stream channels

PLEASE PACK OUT ALL GARBAGE

**Thank you for your *commitment* and *dedication* in preserving
valuable natural and cultural resources**

Woodward Fire

SOD Decontamination

Sudden Oak Death (SOD) is one of several fungal pathogens present in vegetation and soils at Point Reyes that results in mortality of many Oak species. SOD is widespread throughout the Woodward Fire area and is spreading rapidly throughout California and Oregon.

In order to prevent the spread of SOD beyond the fire area, all fireline personnel are required to conduct SOD decontamination prior to demobing from the incident.

WHAT IS INVOLVED?

- **Brushing soil off boots & tools**
- **Spraying boot soles, hand tools, and chainsaws with rubbing alcohol**

A staffed incident SOD decontamination station is located adjacent to the incident WEED WASH station at the Point Reyes Headquarters Maintenance Yard.

GPS: "1 Bear Valley Rd.Olema, CA"

Look for signs for Weed Wash/SOD Decon

Hours of Operation 0630 - 2130

QUESTIONS?

Woodward Lead READ @ 360.630.3231

Woodward Fire

Demobilization Check-out

Due to Covid-19 safety precautions, we will be using virtual approvals instead of obtaining signatures on a paper copy of the ISC-221 form.

All departing resources will complete the Demobilization Check-out process by the contact methods listed below. The unit's approving official will notify the Demob unit of your clearance.

Weed Wash and SOD Decon Stations- located at Point Reyes Visitor Center

Supply - located near ICP entrance

Communications - located in the trailer at the west end of ICP main building

Facilities - window service at the east end of ICP main building on the lower level

Ground Support (vehicle inspections)- located at the east end of ICP parking lot

Time - contactless only service - submit all records to 2020.woodward.finance@firenet.gov

Documentation - Contactless only - submit all records to 2020.woodward.plans@firenet.gov

Demob - contactless only service - Please confirm ETAs prior to departing ICP using the QR code below to ensure that IROC will be accurately updated of your release from the incident.

****Any resource requiring commercial air travel, must make those arrangements with the Demob unit at least 72 hours in advance.****

Please contact the Demob Unit if you need assistance! Your feedback is welcome!

Rebecca Bulls

Demobilization Unit Leader (DMOB)

Northern Rockies Incident Management Team 2

HUMAN RESOURCE MESSAGE

There is zero tolerance for drugs and alcohol on this fire incident.

You are always responsible for how you act and what you say...no matter how you feel.

Incident Personnel Responsibilities:

Incident personnel have the responsibility to conduct themselves in a manner that supports a discrimination and harassment-free work environment.

Incident Personnel Rights:

Incident personnel have the right to work in a harassment-free environment where they are treated with dignity and respect.

It is the obligation of all incident personnel to practice mutual respect for other personnel.

Debby Hassel, HRSP (406) 274-7985

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report					
<p>FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.</p> <p>FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.</p>					
<p>Use the following items to communicate situation to communications/dispatch.</p>					
<p>1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i></p>					
<p>2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical. IC is TFLD Jones. EMT Smith is providing medical care."</i></p>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>				
	<input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i>				
	<input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>		
Patient Location			<i>Descriptive Location & Lat. / Long. (WGS84)</i>		
Incident Name			<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>		
Patient Care			<i>Name of Care Provider (Ex: EMT Smith)</i>		
<p>3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)</p>					
<p>Patient Assessment: See IRPG page 106</p>					
<p>Treatment:</p>					
<p>4. TRANSPORT PLAN:</p>					
<p>Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:</p>					
<p>Helispot / Extraction Site Size and Hazards:</p>					
<p>5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:</p>					
<p><i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i></p>					
<p>6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable</p>					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
<p>7. CONTINGENCY: <u>Considerations:</u> If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.</p>					
<p>8. ADDITIONAL INFORMATION: Updates/Changes, etc.</p>					
<p>REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.</p>
