Management Objectives

- Follow identified standard procedures to minimize the spread of Covid-19 to all functions of the incident.

 Utilize nationally recognized risk management processes to minimize threats to the public and emergency responders. Use risk-based decision making and MIST tactics to protect and defend cultural values and natural resources.
- decisions and actions can be implemented. Foster and maintain positive relationships with all stakeholders and the public by sharing critical information so timely
- Provide initial attack within the TFR.
- Manage incident costs effectively for the values at risk through regular and ongoing cost analysis

Control Objectives

Keep Red and Salmon Fires:

- . . . East of Packsaddle Ridge
 West of the High Point Ridge
 North of the Soldier Creek Trail

 South of Nordheimer Creek to Salmon Summit Trail to Red Cap Creek

growth exist. Once the inversion lifts (approx. 1500) anticipate and increase in fire behavior over the incident

and critically low 1000 hr. fuel moistures. Indices may not meet local thresholds but potential for large fire Expect a low to moderate risk burn environment due to moderate seasonal temperatures, slightly higher RH

especially where open line exist. Uphill runs and spotting will be an issue where slope and wind align. RH

SPECIFIC

over 45-50% will diminish fire behavior to creeping and smoldering.

SPECIFIC FIRE BEHAVIOR:

winds later in the afternoon (after 1400). **Division A:** Low activity consisting of creeping and smoldering. **Division D:** No fire activity in Div. Delta. Firing operations (if needed) will be aided with forecasted West

along China Creek and adjacent drainages following the Butler fire burn scar. Prospect spot (interior): Will continue to move with active fire behavior. Expect to see movement East

Division K: Firing operations will be successful once RH drop below 45-50% and East wind surface.

Division M / N: Low activity expected.

be produced with significant spotting potential. Division O: Watch for fire mid-slope to align and make upslope runs. Highly active fire behavior could

and uphill runs. Division U: The main fire continues to move south across the slopes. Watch for mid slope alignment There is potential for very active fire behavior

Division P, R: No Fire Behavior

Division W, Y: low activity mostly creeping and smoldering

Night Division: Once humidities increase, expect to see fire activity drop off to smoldering

AIR OPERATIONS

Low level inversions will lift at approx. 1200, mid-level at approx. 1500

6. Control Operations/Work Assignments:

Mop-up and hold from DIV A / Y break along Red Cap Creek to Black Mountain. Utilize UAS as needed

7. Special Instructions:

Coordinate with REAFs on all dozer operations to minimize impacts to cultural sites. Limit dozer operations to pre-existing dozer lines and limit dozer width to the extent possible. Utilize MIST tactics. Utilize READ's for cultural and environmental resource concerns.

Do not post lookouts on any bed rock out cropping without first getting clearance from REAF or READ. **ARCHs / REAFs** Check in / out with DIVS when entering and leaving divisions.

FOBS assigned to SIT will be working in Branch I: T. Easley / K. Menzies

ID helispots and drop points, get lat-longs and provide to the DIVS.

Back-haul trash and excess equipment i.e. nets, swivels and ice chests to logistics.

Pick up and remove all trash from fireline, return to camp and place in dumpsters placement around rocks. Ensure positive communication with all air resources Personal hygiene is #1 when it comes to Poison Oak Prevention Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand Refer to page 58, IRPG for directing bucket drops. Don't plan on air resources for tactical support or medical transportation Follow "Aviation Watch-Out Situations" on page 46, IRPG Use glow sticks to mark hazards, and ensure personnel have headlamps Increase SA by trying to see the work area during daylight hours. especially if the resources are new to the area. Use available time for briefings on roads, terrain, and potential rolling material Use caution where you park or stage, especially in steep timbered areas assignments. Have a purpose for where you drive and what you do. Don't rush into Ensure all personnel are familiar with the incident communications plan. Share your Situational Awareness (hazards, changes, etc) to those who have a Radio communications may be poor in some areas. Use human repeaters as needed Initiate burning after ensuring the plan is authorized and understood by all drought related fire behavior considerations. Operational Period: 0600-0600 Wear and use appropriate PPE Follow the chain of command when undertaking burning operations. Take steps to maintain situational awareness for the duration of the incident. Repeated assignments in the same area can lead to complacency making Monitor ALL resources for level of fatigue Ensure that aerial/ground ignition plans have been well briefed including LCES and Maintain 2:1 work/rest ratio. Be alert for signs of fatigue and take breaks as necessary Remember there is "unburned fuel between you and the main fire." Make sure all personnel know their escape routes and safety zones Post lookouts. Make sure to stay in contact with someone who can see the main personnel more vulnerable to accidents. Ensure all personnel are familiar with the plan Keep good Situational Awareness while engaged in indirect line construction. Post lookouts where feasible. Evaluate necessity to send personnel in areas with limited access Be alert for rolling rocks, debris, or burning material Maintain 8'-10' spacing when working & walking. Do not park vehicles or take breaks under or near hazard trees The hazard zone extends a minimum of 2½ tree lengths. Be alert around hazard trees during wind events, even green trees Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Follow Hazard Tree Safety Guidelines (IRPG p.22.) Be alert for wildlife Use warning lights when working on roads or traveling in smoke complacent. Drive at or below posted speed fimits. 5mph speed limit in and around ICP, keep your speed down in all areas. Practice "Defensive Driving" techniques. Assume other drivers are fatigued and Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing, or turning MITIGATIONS / WARNINGS / REMEDIES
