Wind gusts will peak on the upper slopes and ridges after sunrise, with gusts developing in all locations by 1100. Winds in valleys may slacken tonight, but gusty winds will persist and likely strengthen throughout the night on the ridges and upper slopes. Winds will finally slacken on Wednesday as the pressure gradient across the complex eases.

**TODAY:**

**WEATHER:** Breezy, not as hot, very dry with patchy smoke and haze. Areas of smoke west side of complex.

**TEMPERATURES:**    **Valleys:** 94-99°            **2000-4500 FT:** 87-92°            **Above 4500 FT:** 83-86°

## FIRE BEHAVIOR FORECAST NO. 43

<b>NAME OF FIRE:</b> Red Salmon Fire	<b>FCST FOR OPERATIONAL DATE:</b> 09/08/2020
<b>AGENCIES:</b> USFS Six Rivers National Forest	<b>FCST FOR OPERATIONAL PRD:</b> Day/Night Shift
<b>DATE/TIME FCST ISSUED:</b> 9/08 @ 20:00	<b>BY FBAN:</b> John Kern, FBAN 

**WEATHER:** See attached Fire Weather Forecast

### **GENERAL FIRE BEHAVIOR:**

Fuels are continuing to dry with our clear skies and low humidity, including at night. Fire behavior has been active, even at night. Active fire behavior will be occurring all day and into the evening shift.

Clear skies, low RH, very dry abundant fuels, steep topography and increasing winds and warm temperatures will present critical fire weather, and produce **dangerous** burning conditions.

All areas with moving fire will likely see isolated single tree torching (day and night) which can lead to spreading of fires. Upslope runs and down ridge runs are likely where winds (NE oriented draws and ridges could see strong runs, crowning at times, in the morning, afternoon, and into the evening shift).

Spotting distances of 0.1 to 0.5 mi. depending on wind speed and location (ridge or valley). Probability of Ignition is 70-80%.

All dead fuels (even the larger fuels) will continue to be extremely dry and will burn freely adding lots of heat to the environment. Fine fuels will remain dry even in the mornings due to very poor RH recovery.

ERC is on the rise and is above the 97<sup>th</sup> percentile for this area and is setting all time records for this date.

### **SPECIFIC FIRE BEHAVIOR:**

#### **Divisions:**

**Div A:** Minimal fire behavior expected.

**Div K:** This Division has some new fire from yesterday, and some NE to SW aligned drainages. Winds should push fire towards the black but ridgetops will experience strong winds. Look for increased upslope rapid runs with high flame lengths.

**Div O, P:** Possible upslope runs where slope and winds align. Fire intensity can be significant during uphill runs with likely torching and spotting ahead of the flaming front. There was significant fire movement in this Division yesterday.

**Div Q/R:** The fire yesterday moved south which will allow movement of that fire to the west today towards Tish Tang Point. Rapid rates of spread and high flame lengths are likely during runs in the strong winds.

**Div U:** Fire will be pushed down hill towards control lines with the NE and E winds. Heavy down timber under conifers can lead to plentiful torching and increased spotting and rapid rates of spread.

#### **Timbered Areas and in brush fields:**

ROS: 8-15 ch/hr, with faster runs during gusts.

Flame Length: 5-12 ft. are predicted, however runs of increased activity could have greater lengths.

Spotting from torching trees can be from 0.1 to 0.3 mi. depending on wind speed and position on the slope. Probability of Ignition will be high at over 75%.

Crown fire runs are possible under these dry windy conditions.

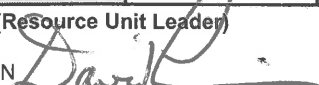

### **AIR OPERATIONS:**

An inversion is unlikely so, smoke should start to clear out by early morning.

### **SAFETY:**

Always have LCES in place and use lookouts to ensure safety of crews and personnel.

# HEALTH AND SAFETY MESSAGE

***SAFETY*** starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

September 8-9, 2020

INCIDENT: Red Salmon Complex

DAY: Tuesday/Wednesday

Shift: Day/Night

## **Major Hazard and Risk:**

- **Hazard Trees:** Assess ALL Trees in Work Areas....*Madrone* have a shallow root ball and fire weakened trees are especially susceptible to fall in High Winds.
- **Heat Related Injuries:** Stay hydrated, eat properly, drink fluids in a 3:1 ratio of water to sports drink, take frequent breaks, and pay attention to your body.
- **Extended Extraction Times:** Be familiar with the medical plan, and “game-out” how you would get an injured firefighter out timely. Factor in how smoke inversions will reduce the likelihood of utilizing helicopters for a medevac.
- **Covid-19:** Remember face coverings are mandatory in the common areas. The COVID-19 mitigations will not only prevent spread throughout fire camp, but will reduce the likelihood of you bringing it home to your loved ones.

## Watchout Of The Day

A Red Flag Warning has been issued from Monday Evening Through Wednesday morning for gusty wind and low humidity.

15. WIND INCREASES AND/OR CHANGES DIRECTION

Establish “Trigger Points” and follow them

## **Thanks from your Safety Team!!**

Greg Marfil    Cougan Carothers  
Dave Updike    Ron Bertsch    Frank Cisneros

## Situation Awareness

- **Speak up if you see something that looks wrong!!!**
- **Get a good briefing prior to beginning task**
- **Ask if you don’t understand!!!!**

**HELP BREAK THE “ERROR CHAIN”!!**

Always use the “Risk Management Process” in your decision making process.....refer to IRPG page 1 for more information.....

## Red Salmon Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the highway 96 corridor to the Fire, the Hoopa and Yurok Reservations are closed. Please do not stop in Hoopa or Weitchpec.**  
(**Exception:** The Hoopa Gas Station, which is open on business.)
- Use the COVID-19 Daily Screening Tool provided in the IAP to monitor self and module.
- Utilize Module-As-One concept to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks. A “casual contact” is defined as less than 6 feet for less than 15 minutes **or** more than 6 feet for more than 15 minutes.
- **Social Distancing.** Maintain a minimum of 6 feet physical distancing from those outside of your module-as-one.
- **Face Coverings:** Face coverings are required to be worn **in the appropriate manner covering nose and mouth** when at ICP and camps.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing or sneezing. If soap and water are not readily available, use hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizer containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- **Clean and disinfect vehicles and equipment.** Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

## Resource Advisor Messages

- Resource advisors are available in nearly all Divisions on the fire and are here to support the mission of containing this wildfire while at the same time aim to minimize resource damage impacts. If you feel something needs to be brought to a Resource Advisor (or Cultural Specialist), go through your appropriate chain of command to make the notification.
- The Six Rivers, Klamath and Shasta-Trinity National Forests, as well as the California Interagency Incident Management Team 14, have been working very closely with cultural specialists from the three main tribes in this area (the Hoopa, Karuk and Yurok) so please help us to maintain and foster these good relationships.
- The area in which the fire is burning is a very sacred place to these tribal cultures so please work with us utilizing MIST tactics to protect cultural and wilderness values. **Snags can also have cultural significance so please limit those to what is needed for safety and to contain the movement of the fire.**

Message #2 from Leaf Hillman, Karuk Cermonial Leader, about the importance of fire to the Karuk Tribe:

<https://www.youtube.com/watch?v=ahXaXVvIOM>

**Important Note:** These videos and all parts of them are property of the Karuk Tribe and are not intended for any purpose other than the reason for which they were developed. Usage of the material outside of the Red Salmon Complex fire organization is prohibited.

## Human Resource Message

**Environment** – climate, altitude, air quality, noise levels and types, new fuel types and topography, different hazards such as bees, bears, public traffic

**People** – different supervisor, different co-workers, change in objectives, change in communication, working with contractors and other agencies

**Physical** – sleeping patterns and conditions, eating patterns, demands of the work, dehydration, acclimatization, change in work schedule

**Safety** – crew awareness, covid-19, communication of hazards, exposure to new fuel types and weather patterns, lack of access to equipment and resources when needed

<b>S</b> Stand Back	Look at what's bothering you, take another approach
<b>T</b> Talk	About what's bothering you
<b>R</b> Relax	Take walks, exercise, deep breaths
<b>E</b> Escape	Take time off
<b>S</b> Scale Down	Reduce amounts of caffeine, nicotine, sugars, etc.
<b>S</b> Sense of Humor	Laughter is always the best medicine

Please remember to take care of yourself!

If something health wise is giving you concern, talk to someone about it.

Observe others around you and if you notice anything unusual, talk to the person.

Don't minimize it or be afraid to discuss with appropriate resources.

It could be a matter of life or death!
