Red Salmon Complex Weather Forecast

FORECAST NO: 25

UNITS: Six Rivers / Shasta Trinity

SHIFT DATE: Monday, August 24, 2020

PREDICTION FOR: 0600 - 0600

FORECAST ISSUED: 2000 hrs. 8/23/2020

SIGNED:

Jeff Tonkin
Incident Meteorologist

Call or Text Obs to: (707) 672-3386

...RED FLAG WARNING FOR DRY LIGHTNING TODAY AND TONIGHT...

WEATHER DISCUSSION: Main issues today will be potential dry lightning and associated impacts (outflow wind) and dry RH values along the entire perimeter. Expect thunderstorms to form or move across Northern CA from this morning and through this afternoon with the focus of activity to our south and east...however there is a 35% chance of cells moving or forming across our perimeter as well. Smoke from the fires to the south will continue to become more prominent each day around highway 96 as smoke transport winds become a little more southerly.

Today (Monday 0600-1800):

Weather: Mostly Cloudy with smoke. Thunderstorms possible in the morning and through the afternoon (35%

chance). Some improvement in sky cover and smoke in the afternoon.

Max Temperature: Below 4,000 ft: 82-88. Above 4,000 ft: 77-81.

Min Humidity: Below 4,000 feet: 25-30%....rising to 30-40% in the afternoon.

Above 4,000 feet and higher: 17-23%...rising to near 30% in the afternoon.

20 Foot Winds:

Lower/Mid Slopes: Downslope or east 1-3 mph until 1300, then upslope or west northwest 4-7 mph. **Upper Slopes/Ridges:** West-southwest 1-4 until 1400, then West and Southwest 4-6 mph with Gusts to 10 mph until sunset.

LAL: 2 Chance of Wetting Rain (0.10"): 5%

Stability: Low valley inversions lift 1200. Mid-level inversion will hold in place through at least 1500 hrs.

Afternoon Mixing Height: Valleys: 3,500 feet AGL. Ridges: 5,000 feet AGL.

Smoke Transport: Toward the North and Northeast.

Tonight (1800-0600):

Weather: Mostly Cloudy with smoke. Low RH recoveries. Isolated thunderstorms through the evening possible.

Low Temperatures: Valley-Midslope: 60-65°; Upper slope/Ridge: 64-69°.

Max Humidity: <u>Below 4000 feet</u>: 25 to 35%. Above 4000 feet: 20 to 25%.

20 Foot Winds:

Lower/Mid Slopes: West and Northwest 3-5 mph until 2200 hrs, then East or downslope 2-5 mph.

Ridges: West and South 3-5 mph until 2200 hrs...then East and Northeast 4-6 mph with Gusts to 10 mph through sunrise.

LAL: 2 CWR: (0.10"): 5%

Inversion: Moderate inversion/thermal belt centered around 4,500 ft MSL.

<u>Tuesday:</u> Partly to Mostly Cloudy. 20 chance of dry thunderstorms. Max Temps: 83-87°. Minimum RH: 25-30%. Afternoon winds - Lower and mid Slopes: West or Upslope 5 mph Gusts to 10 mph. Upper slopes/Ridges: West-southwest at 6 mph Gust to 12 mph.

<u>Wednesday and Thursday Outlook:</u> Partly Cloudy w/ afternoon cumulus. 10% chance of thunderstorms. Max Temperatures in the 80s to near 90. Afternoon humidity 25-35% Wednesday...drier on Thu. West winds 3-6 mph with gusts around 12 mph...More northwesterly on Thursday. East winds at night and early morning to 5 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 28	TYPE OF FIRE: Wildland Fire
FIRE NAME: Red Salmon	OPERATIONAL PERIOD: Day/night Shift, August 24, 2020
DATE ISSUED: August 23, 2020	TIME ISSUED: 2000
UNIT: Six Rivers National Forest	SIGNED: Stewart Turner, FBAN, Diondray Wiley, FBAN(T)

INPUTS

WEATHER SUMMARY: For Specifics Please see the attached Incident Weather Forecast.

RED FLAG WARNING FOR DRY LIGHTNING

WEATHER: Cloudy with smoke. Thunderstorms possible in the morning and through the afternoon (30%

chance).

MAX TEMP: 77 to 87° MIN RH: 17-30%

20 FOOT WINDS: West-Southwest 4-6 mph with gusts to 10mph in the afternoon.

CHANCE OF WETTING RAIN (≥ 0.10"): 5%

FUELS: The major fuel types, found in and around the fire area are timber litter and shrubs.

Ignition Receptiveness: ERC levels are just below the 90th percentile. Probability of Ignition 85% Night 37%. **Dryness:** Dead and down fuel moistures :1 hour – 3% day, 10 hour – 5%, 100 hour – 7%, and 1000 hour – 8%.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Drying conditions will be favorable for burnout. Spotting will be a problem today with the higher PIG and the low 1000 hour fuel moistures. Spots will be more frequent and harder to control.

Thunderstorms in the area can produce strong erratic winds and of course new starts from lightning. Strikes will be efficient in producing new fires so IA may be on the plate for the day. Stay aware of any new starts and how they will impact your work area. Watch for alignment in the drainages that are east and west or northeast and southwest. Fire behavior continues to be active after sunset with the lower humidity. The lack of solar radiation at night will help keep the PIG down decreasing spotting efficiency.

SPECIFIC:

Division A,Y and W: Smoldering with some interior creeping in unburned fuels.

Prospect Peak area: Continual northwest movement upslope of China Creek in the timber stringers with moderate to low fire behavior. The head will continue to move northeast across Nordheimer Creek upslope towards the containment line. Active to very active fire behavior can be expected with upslope runs. The east flank will continue to back down to Nordheimer Creek with rollouts and moderate to active fire behavior. Expect to see activity through the night.

Division K, H: The burnout operation will continue to see active fire behavior with backing and short upslope runs. Winds and the high PIG will make spotting a problem. Night burning winds will be favorable blowing embers back into the black.

Division M and N: Smoldering.

Division O: Fire will continue to move south on the eastern side of the drainage. The southward movement has been about 100 chains a day. Watch for fire mid-slope to align and make upslope runs. Very active to extreme fire behavior could be produced.

Division U: The main fire continues to move south across the slopes. Watch for mid slope alignment and uphill runs. Very active to extreme fire behavior from upslope runs.

Night Division: Recovery will be poor tonight so expect to see active to very active fire behavior. Your burning techniques will dictate the fire behavior tonight. Moderate to active fire behavior can be achieved with spot ignitions and narrow strip ignitions.

AIR OPERATIONS:

Inversions and smoke may restrict air operations.

SAFETY

To reduce the risk: Post lookouts, check communications, back off if you have doubts about your escape routes or safety zones or if the situation becomes too complex.

Red Salmon Complex - Safety Message

INCIDENT #CA-SRF-000656

DATE:08-24/25-2020 TIME:0600-0600 Day/Night Shift

OPERATIONAL TEMPO

Maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It's also about knowing when operations should slow down and why.

We are most vulnerable to accidents and errors when operational tempo changes, especially when it changes quickly.

Maintaining good situation awareness in spite of change in operational tempo represents a considerable challenge.

The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team, and then applying good judgment to determine whether to push forward or pull back while making necessary adjustments.

BACK TO THE BASICS

Size-Up; when does it start and when does it end? You can size up the weather, fuels, topography and the condition of crews enroute to a fire. Once on the incident, size-up should be occurring constantly to keep up situational awareness. Size-up doesn't end at demob. It ends when your back at home, after your gear is repacked and reset for the next assignment.

COVID-19 INCIDENT STATISTICS (to date)

Symptomatic Personnel: 11 Positive # of Cases: 0

Safety is No Accident!

- Situational Awareness: gathering information about your surroundings.
- Hazard Assessment: identify the tactical hazard.
- Hazard Control: develop mitigations to reduce or eliminate risk.
- Decision Point: are mitigations in place and timely?
- Evaluate: What is changing? Are strategy and tactics working? Is fatigue becoming a bigger factor?

End of Assignment Watch-Outs

- Not mentally engaged in the task at hand
- Your driver is driving faster than when you got here
- Not giving good, thorough briefings
- Your hardhat and web gear are still on the truck
- Assuming all is good because you worked this piece of ground yesterday
- All the conversations are around what you're going to do when you get home
- You and your folks are tripping and stumbling more than usual
- It's taking you longer to get out of camp
- No AAR after each shift

Prepared by;

CIIMT #4 Safety Group

	PENT RISK ANALYSIS RED SAL	MON COMPLEX CA-SRF-000656 (ICS 215a) Day/Night Shif
DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	 Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing, or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. 5mph speed limit in and around ICP, keep your speed down in all areas. Use warning lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Be alert for wildlife.
ALL	HAZARD / DANGER TREES	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Do not park vehicles or take breaks under or near hazard trees.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	 Maintain 8'-10' spacing when working & walking. Be alert for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts where feasible.
D,F,H, K,O,P, U	INDIRECT FIRELINE	 Keep good Situational Awareness while engaged in indirect line construction. Post lookouts. Make sure to stay in contact with someone who can see the main fire Ensure all personnel are familiar with the plan. Make sure all personnel know their escape routes and safety zones. Remember there is "unburned fuel between you and the main fire."
ALL	FATIGUE/COMPLACENCY	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps to maintain situational awareness for the duration of the incident.
K,O,U	FIRING OPERATIONS and DEVICES	 Follow the chain of command when undertaking burning operations. Ensure that aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. Wear and use appropriate PPE. Initiate burning after ensuring the plan is authorized and understood by all.
ALL	COMMUNICATIONS	 Share your Situational Awareness (hazards, changes, etc) to those who have a need. Radio communications may be poor in some areas. Use human repeaters as needed Ensure all personnel are familiar with the incident communications plan.
A,D,K, W,Y	NIGHT OPERATIONS	 Have a purpose for where you drive and what you do. Don't rush into assignments. Use caution where you park or stage, especially in steep timbered areas. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Increase SA by trying to see the work area during daylight hours. Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	AIR OPERATIONS	 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Don't plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	ENVIRONMENTAL HAZARDS	 Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention. Pick up and remove all trash from fireline, return to camp and place in dumpsters.
ALL	COVID-19	 Utilize social distancing, wear facemasks in camp ALWAYS. Maintain the "module of one" concept. Disinfect vehicles, tools, and commonly touch surfaces frequently. Do not share equipment and wash hands frequently.
	INCIDENT NAME:	Operational Period: 0600-0600

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

i. Contact communications	/ DISPATCH (Verify correct frequency prior to starting report)
	Ex: "Communications. Div. Alpha. Stand-by for Emergency Traffic

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

Red Salmon Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- As you travel through the highway 96 corridor to the Fire, the Hoopa and Yurok reservations are closed so please do not stop in Hoopa or Weitchpec.
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus.
 This limits "close contacts" to those within the module. A "close contact" is defined as
 less than 6 feet, for at least 15 minutes with or without face coverings/masks. A "casual
 contact" is defined as less than 6 feet for less than 15 minutes or more than 6 feet for
 more than 15 minutes.
- **Social Distancing.** Maintain a minimum of 6' physical distancing from those outside of your module-as-one.
- <u>Face Coverings.</u> Face coverings are required to be worn, in the appropriate manner covering nose and mouth, when at ICP and Camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible with those outside your module-as-one.
- Wash your hands. Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

RED SALMON COVID-19 DAILY SCREENING TOOL

Today or in the past 24 hours, have you had any of the following symptoms 1?

Symptom
Cough more than expected?
Shortness of breath or difficulty breathing?
Fever? Chills?
Muscle pain, outside your normal for firefighting?
Sore throat?
New loss of taste or smell?
Fatigue, outside your normal for firefighting?
Headache, outside your normal for firefighting?
Congestion or runny nose, outside your normal for firefighting?
Nausea or vomiting
Diarrhea
* Take temperature with no-touch thermometer, if available *

Instructions for Screening

Item	What to Do
If Spike or fireline resource has a cough that is more than expected, shortness of breath or difficulty breathing, or any other symptoms listed. At entries to established camps (Willow Creek ICP, Orleans Base Camp):	NOTIFY SUPERVISOR IMMEDIATELY DO NOT ANNOUNCE
Temperature screening required for all incident personnel, cooperators and guests. Although medical personnel are ideal, screeners do not have to be medically trained.	Ask individual or "module-as-one" to step aside and follow the steps
If resource has cough, shortness of breath or difficulty breathing, or any other listed symptoms including fever (over 100.4) at entry.	below.

Steps to follow for a symptomatic screening
Escort individual or "module-as-one" to isolation area. Separate the symptomatic personne
Isolation support personnel should begin documentation.
Notify Line Medics or MEDL if at ICP or Orleans Base Camp.
COVID Safety will coordinate with SRF Forest IMO.
Have individual or "module-as-one" fill out WF Employee Contact Assessment Sheet.
Protect and secure any collected Personal Identifiable Information (PII) or Personal Health Information (PHI).

STANDARD OPERATING PROCEDURES—FINANCE SECTION

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, <u>and/or</u> be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs.). Off duty time will be in a non-pay status. Each federal employee is guaranteed at least 8 hours of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

<u>Personnel time</u> will be reported to the Time Unit daily or every other day once they are signed by the next level supervisor. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

<u>Private Contracted Equipment time</u> must be tracked on a Shift Ticket daily or every other day and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation.

FINANCE MESSAGE

Thank you for submitting your times in the safest way possible. The options for submitting your CTR's and Shift Tickets are:

- Electronic fillable PDF CTR/Shift Ticket. QR codes to fillable forms are included below. If you do not have QR capabilities, Finance can email you forms directly. Make sure the forms are signed by the supervisor before submitting to Finance. In order to use fillable forms, you must have some version of Adobe Acrobat downloaded on your device, or you can send to your email and fill out.
- Hard copy CTR/Shift Ticket. You may fill out a hard copy CTR/Shift Ticket, snap a picture and email to Finance
 OR you may turn in your actual hard copy as usual. If you send in a picture, please make sure it is legible and
 includes the supervisor's signature at the bottom. The phone numbers listed below are hard line phones, so
 texting does not work.

PLEASE:

- Crews need to include a manifest with their first CTR.
- Try to submit your times at least every other day. There is a drop box at Orleans Base Camp in Check-in to drop off your time.
- Write your email on your CTR
- Hazard pay justifications are required on your CTR's in comments section. "H=Hazard" is not enough.

WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Call" to make sure all your documents have been received.
- Follow the demob plan instructions based on your travel route home. This will determine whether your demob will be in-person or remote.
- Submit all time documentation (including travel home) ahead of demob.
- Send only one representative per resource to finance tent.
- Abide by scheduled demob time or call finance for an unscheduled demob.

SHIFTTICKET

Finance Section Chief (530) 629-1677

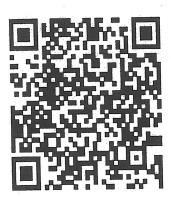

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Questions?

OES Assistant Chief Pat Titus 916-634-9225

Resource Advisor Message

- Resource advisors are available in nearly all Divisions on the fire and are here to support the mission of containing this wildfire while at the same time aim to minimize resource damage impacts. If you feel something needs to be brought to a Resource Advisor (or Cultural Specialist), go through your appropriate chain of command to make the notification.
- The Six Rivers, Klamath and Shasta-Trinity National Forests, as well as California Team 4, have been working very closely with cultural specialists from the three main tribes in this area (the Hoopa, Karuk and Yurok) so please help us to maintain and foster these good relationships.
- The area in which the fire is burning is a very sacred place to these tribal cultures so please work with us utilizing MIST tactics to protect cultural and wilderness values.

Message #2 from Leaf Hillman, Karuk Cermonial Leader, about the importance of fire to the Karuk Tribe:

https://www.youtube.com/watch?v= ahXaXVvI0M

Important Note: These videos and all parts of them are property of the Karuk Tribe and are not intended for any purpose other than the reason for which they were developed. Usage of the material outside of the Red Salmon Complex fire organization is prohibited.

Red Salmon Complex Monday August 24, 2020

HUMAN RESOURCE MESSAGE

What an Attitude Costs

A good attitude i.e. being nice, considerate, helpful, grateful, humble, costs nothing and adds value to your overall situation.

A bad attitude is going to cost you. Bad attitudes include rudeness, disrespect, bullying, gossip, not contributing to the team, sabotage. These attitudes will cost you relationships, opportunities, completing your mission, and generally lead to an overall less productive workplace.

Be safe \sim Have a great shift. Feel free to call/text if you have questions, concerns, or just want to chat. \sim HRSP: Adam Alvarez – (707) 373-8715

TRAINING SPECIALIST MESSAGE

Due to COVID-19 and Social Distancing Please keep our Training Specialist safe assigned to the incident.

All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist to receive proper credit for your assignment.

RED SALMON DEMOB

Check in with Demob at least 72 hours prior to demobing if you need air travel arrangements made.

Demob on the Red Salmon is paperless. Use **QR Code #1** to start your process.

If you have difficulties with your phone or need help, stop by the Demob Unit or call 530-629-1679.

Once you have scanned **QR Code #1**, proceed to the following locations to get signed off. This can be done at both Willow Creek and Orleans (except for Finance, see instructions below):

QR Code #1Demob Process

- GROUND SUPPORT *** (Do this prior to Weed Wash)***
- WEED WASH
- SUPPLY
- COMMUNICATIONS
- TIME (SECOND TO LAST)
 - Contact Finance to ensure that all shift tickets and CTR's are completed and turned in prior to demob:

<u>Equipment Time (530) 629-1678</u> <u>Personnel Time (530) 629-1677</u>

WILLOW CREEK FINANCE:

Complete the above stops, TIME and DEMOB are last.

TIME: Overhead, or ONE PERSON from each Vendor or Crew will be allowed to visit Finance for payment processing (Equipment Time or Personnel Time).

REMOTE FINANCE:

Call the numbers above to initiate closing out with finance.

Equipment Time will generate the Emergency Equipment Use Invoice (OF-286) and e-mail the invoice to company owner for review and signature.

Personnel Time will generate Incident Time Reports(s) (OF-288) and e-mail the report to designated contact for review.

- DEMOB (VERY LAST)
 - Visit or call Demob (530-629-1679) to verify that your checkout process has been completed
 - Scan QR Code # 2 to submit your travel itinerary or verbally report it to Demob.

FIRE REPLACEMENT PROCEDURES

START THIS PROCESS AT LEAST 48 HOURS PRIOR TO DEMOB

Submit requests for all incident replacements on a 213, General Message:

- Separate cache from non-cache items on separate 213's!
- Include explanation for lost or damaged items.
- Include DIVS signature on the 213 to verify the item(s) has/have been lost or damaged and support the circumstances surrounding it.
- For stolen items, contact your supervisor and Security Manager as soon as practical.

FOR CACHE ITEMS

Requesting Resource is **NOT Being Demobed** and Requested Items **ARE Available** in Supply:

• R&D shall fill request and note on the 213.

Requesting Resource is <u>NOT Being Demobed</u> and Requested Items are <u>NOT Available</u> in Supply.

• The Supply Unit will place an order for the requested items through the regular cache order process on the incident. The order will be shipped to the incident and replacement will take place at the Supply Unit and noted on the 213.

Requesting Resource <u>IS Being Demobed</u> and Requested CACHE Items are <u>NOT in Stock</u> in Supply:

- Along with the 213, complete an OF-315, Incident Replacement Requisition for cache items only and take to SPUL for review and approval. Include the requesting resources' email on the form so the Resource Order can be emailed to the Requesting Resource.
- The SPUL will issue S#'s pending receipt and verification of proper documentation for cache items.

NON-CACHE Items – This is the Important Part!!!

Non-Cache items include any item not available through the National Cache System.

Lost, damage, or destroyed government non-cache property shall be reported to the appropriate DIVS or higher-level overhead within 24 hours of occurrence. The requesting resource shall complete an ICS-213 and OF-289, Property Loss and Damage Report – Fire Suppression, available at Orleans Base Camp Supply Unit. Include the following:

- All witnesses shall document the facts and circumstances of the loss or damage on the OF-289. Explanations shall be detailed and indicate how the incident caused the damage.
- The requesting resource will email the completed ICS-213 and OF-289 to the Comp/Claims Unit Leader at scott_parsons@firenet.gov. The COMP will make a determination based upon the documentation presented.
- Approval for replacement is the responsibility of the incident agency and may be delegated to the Incident Management Team for IC and FSC.
- If the replacement request is approved, the replacement cost will be limited to cache equivalent value. The requesting resource will complete OF-315 for the Supply Unit.
- Items that do not have a like-item in the cache will be reviewed and approved at the discretion of the FSC or Incident Business Advisor, as delegated by the Agency Administrator.
