Red Salmon Complex Weather Forecast

FORECAST NO: 2
UNIT: Six Rivers / Shasta Trinity
SHIFT DATE: Saturday, August 1, 2020
PREDICTION FOR: 0600 - 0600
FORECAST ISSUED: 2000 hrs. 7/31/2020

SIGNED:

Jon Bonk: jon.bonk@noaa.gov
Incident Meteorologist
Call or Text Obs to: (240)778-5287

Poor Humidity Recovery

WEATHER DISCUSSION: High pressure is centered over the Great Basin while weak low pressure sits off the British Columbia coast. The low will slowly drift north the next couple days allowing the ridge to drift west and over the fire. A subsidence inversion has brought poor humidity recovery last night. Humidity will change little, or maybe increase slightly during the afternoon. Ridge wind direction rotates clockwise around the compass the next 24 hours. Lower and mid-slope winds are terrain driven. *Poor humidity recovery expected again tonight* with little change from last night's conditions.

Today (0600-1800):

Weather: Sunny. Low smoke may hang over the fire area at times.

High Temperatures: Red Fire: 68-71°; Salmon Fire 71-74°.

Afternoon Minimum Humidity: Red Fire 20-25%; Salmon 16-20%; rising about 10% near 1800 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 0-3 mph until 1100, then terrain driven 4-8 mph.

Upper Slopes: East 6-10 mph with gusts up to 15 mph until 1200, then becoming South 5-7 until 1500, then West 7-10 mph with gusts up to 18 mph.

LAL: 1 **Chc of Wetting Rain (0.10"):** 0%

Stability: Low level inversion lifts around 1200 hrs. Subsidence inversion near the ridges holds all day.

Afternoon Mixing Height: 4,000 feet AGL.

Tonight (1800-0600):

Weather: Clear. Smoke settling across the fire area.

Temperatures: Red Fire: 57-62°; Salmon Fire 60-64°.

Overnight Humidity: Red Fire 16-20%; Salmon 14-16%.

20 Foot Winds:

Lower/Mid Slopes: Variable 3-5 mph until 2300, then drainage.

Ridges: West 7-10 mph with gusts up to 18 mph until 2200, becoming north 3-6 mph until 0200, then East 4-8 mph.

LAL: 1. **Chc of Wetting Rain (0.10"):** 0%

Inversion: Weak inversion and thermal belt around 1,000 ft MSL. Strong inversion and thermal belt around 5,000 ft MSL.

Sunday: Sunny with patchy smoke hanging low over the fires. Max Temps: 67-73°. Afternoon RH: Red Fire 20-25%, Salmon Fire 16-20%. Afternoon Winds - Lower Slopes: Variable/Terrain Driven. Upper slopes: North 6-8 mph becoming West 5-10 mph in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE Wildfire
FIRE NAME: Red/Salmon	OPERATIONAL PERIOD 08/01/2020
DATE ISSUED 07/31/2020	TIME ISSUED 2000
UNIT CA-SRF	SIGNED Scott Cones, FBAN 

INPUTS

WEATHER SUMMARY:

DISCUSSION... High pressure centered over the Great Basin while weak low pressure sits off the coast. The low will slowly drift north the next couple days allowing the ridge to drift west over the fire. Humidity will change little, or maybe increase slightly during the afternoon. Ridge wind direction rotates clockwise around the compass the next 24 hours. Lower and mid-slope winds are terrain driven. Poor humidity recovery expected again tonight with little change from last night's conditions.

See Spot Weather Forecast

FIRE BEHAVIOR

GENERAL

Fire behavior will remain terrain driven, with active surface fire and occasional torching is possible. Short terrain driven runs should be expected as the fire aligns on the slope.

Above normal fuel moisture persists along the upper portions of the fire area due to above average rainfall in June. However, fuels are beginning to cure and are becoming more available.

Predicted ERC: 78 Timber ROS: 6-10 ch/hr. Timber FL: 2-6 feet
Predicted BI: 42 Brush ROS: 4-8 ch/hr. Brush FL: 4-8 feet

LOCAL THRESHOLDS – WATCH OUTS

Combinations of any of these threshold factors can greatly increase fire behavior:

Thresholds:	20' wind Over 7 mph	RH Less Then 34%	Temperatures Over 82°
--------------------	------------------------	---------------------	--------------------------

SPECIFIC

SPECIFIC FIRE BEHAVIOR:

Branch I (Red): The fire is burning primarily in old growth timber understory on a north aspect. Deep duff and litter layers will hold heat and continue to creep with potential for re-burn. Expect increased fire activity along the north flank where fire is established across Red Cap Creek. Primarily backing and flanking fire on the south and east flanks.

Branch V (Salmon): The fire is burning in a south facing box canyon, spreading to the east, west and north. The fire is within the 2009 Redspot Fire footprint with grass and brush being the primary carrier. Heavy dead and down fuels intermixed with the brush will increase residency times and preheating of other fuels. Short upslope runs and short to mid-range spotting are likely along the west, north and east flanks. Primarily backing fire on the south flank.

AIR OPERATIONS

Low level inversion lifts around 1200 hrs. Subsidence inversion near the ridges holds all day.

SAFETY

Rollout, slope reversal, and upslope runs are possible in all fire locations. Maintain situational awareness at all times.

6. Control Operations/Work Assignments:
Prep and construct indirect line along ridge from Div N to Div P.

7. Special Instructions:
Utilize Mist tactics.
All line resources will spike overnight.
Utilize READ's for Cultural Resources concerns.
ID Medivac sites, helispots and drop points, get lat-longs.
Backhaul trash and excess equipment.

MEDICAL PLAN (ICS 206 WF)
Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications: Div. Alpha. Stand-by for Emergency Traffic."

INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat/Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED/PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW/PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN/PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (<i>Ex: Unconscious, Struck by Falling Tree</i>)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (<i>Ex: Trout Meadow Medical</i>)
On-Scene Incident Commander	Name of on-scene IC of Incident within an Incident (<i>Ex: TFLD Jones</i>)
Patient Care	Name of Care Provider (<i>Ex: EMT Smith</i>)

INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG Page 106

Treatment:

TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. /Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Provide Tactical Aerial Support

Water dropping requested by Ops, Branch, Division or Air Attack

As requested. Coordinate requests with AOB.

On request: Check application avoidance areas

Request through SRF Dispatch on Command Repeater. Give location: lat/long if known, and current visibility. Check Medical plan/IAP.

As requested

Provide IA Helitack and loan copters on request

When available as requested through Ops

Incident Risk Analysis (ICS 215a)

CA-SRF-000656

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	COVID-19 Environment	<ul style="list-style-type: none"> Utilize social distancing (6 feet). Wear a facemask if you can't social distance. Maintain the "module of one" concept. Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.). Utilize technology to communicate while maintaining social distance. Wash your hands frequently.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify helispots and communicate Lats/Longs to DIVS. Be familiar with the Medical Plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access and egress. Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively.
All	Driving & Traffic	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters and honk horn when backing. Keep clutter off dash and inside cab, and clean windshields. Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). Always use headlights and obey posted speed limits. Use chock blocks, turn wheels into hill. Avoid distractions (eating, & cell phones etc.) and use the 3 second rule.
All	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Post road guards when appropriate.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8-10' spacing when working and walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material.
All	Air Operations	<ul style="list-style-type: none"> Follow "Aviation Watch-Out Situations" on page 46, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources.
All	Poison Oak	<ul style="list-style-type: none"> Identify, make known, and avoid hazardous areas. Launder clothing. Shower frequently. Don't wear Nomex® shirts in eating areas.
All	Bees, Ticks, Mosquitoes	<ul style="list-style-type: none"> Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self-inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
Incident Name: Red Salmon Complex		Operational Period: DAY August 1, 2020

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

For Day Operations: August 1, 2020

INCIDENT: Red Salmon Complex

DATE: August 1, 2020

Shift: Day

Major Hazard and Risk:

- **Covid-19:** You should remember to avoid stopping in any of the towns to get supplies, visit the snack shop or get gas to help protect vulnerable populations. It is OK to stop in Willow Creek while maintaining strict COVID-19 mitigations
- **Hazard Trees:** Assess ALL Trees in Work Areas....In addition to suppression and mop-up operations, assess hazard trees when you take breaks and park vehicles. Check out your IRPG pgs. 22-23.
- **Heat Related Injuries:** Stay Hydrated, drink plenty of fluids, take frequent breaks, and pay attention to your body.

SAFETY ZONES

Make sure everyone is aware of their locations.

17.TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Establish “Trigger Points” and follow them

Thanks from your Safety Team!!

Greg Marfil
Nick Bianchini

Pedro Martinez

DOES YOUR PERCEPTION MATCH REALITY?

Look at IRPG, page 1

USE THE “RISK MANAGEMENT PROCESS”
TO MAKE THEM MATCH!!

OPERATIONAL LEADERSHIP

- **Take Charge** of your resources
- **Motivate** with a “can do it safely” attitude
- **Demonstrate Initiative**...take action
- **Communicate**...give clear, concise instructions
- **Supervise**.....Provide leadership!!

August 1, 2020

TRAINING SPECIALIST MESSAGE

Red Salmon Complex

The Training Specialist is on the incident. All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

Use the QR code at the bottom of the page to log in as a Trainee.

If you need training logged, you should contact the TNSP at the earliest opportunity either by cell phone, email, or TNSP office.

John LeBlanc

SPECIAL NOTES					

MINIMUM IMPACT SUPPRESSION TECHNIQUES (MIST)

Fire Management Tool Box on Wilderness.Net

Firefighter and public safety is always the first priority in any suppression action, including operations in wilderness. Use of MIST provides guidelines for preserving wilderness areas for present and future generations.

When evaluating fire management actions, the potential degradation of wilderness character should be considered before, and given significantly more weight than, economic efficiency and convenience. Unless human life or private property is immediately threatened, only those actions that preserve wilderness character and/or have localized, short-term adverse impacts to wilderness character should be implemented.

FIRELINE CONSTRUCTION

- Take advantage of natural barriers wherever possible.
- Use cold-trail and/or wet line when appropriate.
- If the decision is made to construct line, use only the width and depth necessary for halting the fire spread. Minimize ground disturbance.
- Minimize bucking and cutting of trees to establish fire line; build line around logs when feasible and effective.
- Limb vegetation only to the extent necessary to stop fire spread.
- Avoid cutting live trees whenever possible.
- As an alternative to felling, consider allowing ignited trees and snags to burn themselves out. Ensure adequate safety measures are communicated to those affected by this decision.
- If burning trees or snags pose a serious threat of spreading firebrands, extinguish the fire with water and/or dirt wherever possible.

AIR OPERATIONS

- Limit retardant or foam use, use water instead. If retardant and foam is appropriate, avoid drops near water.

HELISPOTS

- Minimize the number of helispots in wilderness. Use alternate sites outside wilderness when possible or consider using pack strings (mules).
- Use natural openings as much as possible.
- Size the helispots for the appropriate size helicopter. Consider long line remote hook operations instead of helispots for logistical support.

SPIKE CAMPS

- Minimize the use of spike camps in wilderness. If spike camps are needed, use existing camp sites where available.
- Avoid camping in wet meadows, along streams or on lake shores. Resource Advisors can help identify suitable sites.
- Layout camp carefully from the start, identify areas for cooking, sleeping, washing, latrines and water supplies.
- In small camps individuals can use "cat hole" method

of disposal (6"-8" hole) short term. In larger camps locate community latrines 300' from water.

- Designate wash areas away from streams, and provide for gray water disposal. Do not use soap, shampoo, or other chemicals near waterways.
- Store food away from camp and so that it is not accessible to wildlife.
- Store garbage so that it is not accessible to wildlife, and remove it as frequently as possible.
- Use stoves to cook when possible. Minimize the use of campfires, and use either a pit or mound ring fire with dead or downed small diameter firewood. Do not build rock ring campfires. An old fire shelter placed under the coals helps protect the soil.
- Limit travel ways within, to, and from camp.

PERSONAL SPIKE CAMP CONDUCT

- Select durable sites for tents.
- Do not clear vegetation or dig trenches to create bedding sites.
- Pack out all garbage, including candy wrappers, cigarette butts, and flagging.
- Carry water and bathe away from lakes and streams.
- Do not use nails in trees or limb trees for bedding.
- Evaluate the short and long term impacts of your decisions.

REPAIR

- Remove signs, flagging, garbage, and equipment used during fire suppression.
- Restore disturbed areas.
- Scarify the top 2-4" of soil in heavily compacted areas and scatter needles, twigs, branches, over the area.
- Rehabilitate newly established trails on slopes <6%, water bar trails created on steeper slopes.
- Scatter cut material and camouflage cut surfaces with dirt.
- Do not use non-native materials, avoid introducing invasive species.

FINANCE MESSAGE

Options for submitting time:

Fillable PDF CTR/Shift Ticket: QR codes to the fillable forms are included below. If you do not have QR capabilities finance can e-mail you the forms directly. Make sure the forms are signed by the supervisor before submitting to Finance.

Hard Copy CTR/Shift Ticket: You may fill out a hard copy CTR/SHIFT Ticket, snap a picture and email/text that in to Finance OR you may turn in your actual hard copy as usual. If you send in a picture please make sure it is legible and includes the supervisors signature at the bottom. (if you are texting pictures to Finance, enter the email address as shown below where you would normally enter a phone number).

Please try to submit at least every other day. IF YOU HAVE ANY TROUBLE CONTACT FINANCE

H-Pay justifications are still required on your CTRs – “H=Hazard” is not sufficient

Tips for successful Finance demob:

- Send in all time documentation (including travel home) ahead of demob.
- Only 1 representative per resource should come to the Finance trailer.
- Abide by scheduled demob time or call Finance for an unscheduled demob.

Government agency resources that would like to close out their time 100% remotely should call personnel time unit leader number listed below, when they are close to demob day, and make necessary arrangements to complete the process.
