IAP

AUGUST 3, 2020

DAY SHIFT 0700 - 1900

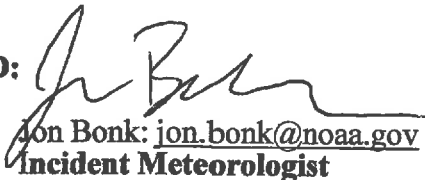

**Red Salmon Complex
Weather Forecast**

FORECAST NO: 4
UNIT: Six Rivers / Shasta Trinity
SHIFT DATE: Monday, August 3, 2020
PREDICTION FOR: 0600 - 0600
FORECAST ISSUED: 2000 hrs. 8/2/2020

SIGNED: 
Jon Bonk: jon.bonk@noaa.gov
Incident Meteorologist
Call or Text Obs to: (240)778-5287

Better humidity recovery; continued poor ventilation

WEATHER DISCUSSION: The subsidence inversion will be slightly weaker today and will allow a little more marine influenced air towards the fire area. Humidity will run about 5% higher today and temperatures will be slightly cooler. However, the inversion will continue to stay close to the fire area ridges. Humidity will rise this evening, possibly getting above 50% by 2000 hrs. Low pressure develops off the coast Tuesday and Wednesday to bring possible thunderstorms to the area each afternoon/evening. If storms form, they will be fairly dry and rather isolated.

Today (0600-1800):

Weather: Sunny. Low smoke will hang over the fire area at times.

High Temperatures: Red Fire: 70-73°; Salmon Fire 72-75°.

Afternoon Minimum Humidity: Red Fire 30-35%; Salmon 25-30%; rising about 15% by 1800 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 0-3 mph until 1100, then terrain driven 4-8 mph.

Upper Slopes: Variable 0-3 mph until 1100, then becoming West-Northwest 5-8 mph with gusts up to 15 mph.

LAL: 1 **Chance of Wetting Rain (0.10"): 0%**

Stability: Low level inversion lifts around 1100 hrs. Subsidence inversion near the ridges holds all day. Smoke trapped between 3,500 and 6,000 feet MSL

Afternoon Mixing Height: 2,000 feet AGL or less.

Tonight (1800-0600):

Weather: Clear. Smoke settling across the fire area drainages.

Temperatures: Red Fire: 50-53°; Salmon Fire 53-55°.

Overnight Humidity: Peaking 55-65% in the evening, then decreasing overnight to:
Red Fire 40-45%; Salmon 35-40%.

20 Foot Winds:

Lower/Mid Slopes: Variable 3-5 mph until 2300, then drainage 3-5 mph.

Ridges: West-Northwest 6-8 mph with gusts up to 15 mph until 2200, then Northeast 2-5 mph

LAL: 1. **Chance of Wetting Rain (0.10"): 0%**

Inversion: Weak inversion and thermal belt around 1,000 ft MSL. Strong inversion/thermal belt near 6,000 ft MSL.

Tuesday and Wednesday: Mostly sunny with areas of smoke hanging low over the fires. After 1500 hrs, partly cloudy with a slight chance of a thunderstorm at the incident through the early evening. Max Temps: 69-76°. Afternoon RH: Red Fire 40-45%, Salmon Fire 35-40%. Afternoon Winds - Lower Slopes: Variable/Terrain Driven. Upper slopes: West around 6 mph. LAL: 2. CWR: 10%.

Thursday Outlook: Slightly cooler with higher humidity as the marine layer deepens behind the departing upper low.

Weather near the fires
with change from 24
hours ago:

6. Control Operations/Work Assignments:
 Continue to prep indirect line and scout ahead.
 Improve indirect line Whitey's Peak to Salmon Mtn.
 Be prepared to burn when conditions are favorable

7. Special Instructions:
 Utilize MIST tactics. All line resources will spike overnight.
 Utilize READ's for cultural and environmental resource concerns.
 ID helispots and drop points, get lat-longs. Please return nets, swivels, and ice chests.
 Back-haul trash and excess equipment. All resources use QR code to check-in.
 Do not post lookouts on any bed rock out cropping without first getting clearance from REAF or READ.

6. Control Operations/Work Assignments:
Prep and construct indirect line along O/P break to Megram ridge.

7. Special Instructions:
Utilize Mist tactics.
All line resources will spike overnight.
Utilize READ's for Cultural Resources concerns.
ID helispots and drop points, get lat-longs.
Backhaul trash and excess equipment.
Do not post lookouts on any bed rock out cropping without first getting clearance from REAF or READ.

Incident Risk Analysis (ICS 215a)

CA-SRF-000656

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	COVID-19 Environment	<ul style="list-style-type: none"> Utilize social distancing (6 feet). Wear a facemask if you can't social distance. Maintain the "module of one" concept. Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.) Utilize technology to communicate while maintaining social distance. Wash your hands frequently.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> Identify helispots and communicate Lats/Longs to DIVS. Be familiar with the Medical Plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively.
All	Driving & Traffic	<ul style="list-style-type: none"> Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Check brakes, Emergency brake, & Seat belts) Always use headlights and obey posted speed limits. Avoid distractions (eating, & cell phones etc.) and use the 3 second rule.
All	Hazard Trees	<ul style="list-style-type: none"> Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Post road guards when appropriate.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> Maintain 8-10' spacing when working and waiting. Don't work above any personnel. Be on the lookout for rolling rocks, debris, obliterating material.
All	Air Operations	<ul style="list-style-type: none"> Follow "Aviation Watch-Out Situations" on page 46, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources. Ensure Drone Operations are coordinated with air resources.
DIV A/D	Firing Operations & Devices	<ul style="list-style-type: none"> Only personnel trained in the use of such device will be authorized to use firing equipment. Ensure all personnel are aware of firing operations that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
All	Bees, Ticks, Mosquitoes	<ul style="list-style-type: none"> Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self-inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
DIV A/N	Heavy Equipment Operations	<ul style="list-style-type: none"> Ensure HECB scout narrow roads for transport travel. Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 30'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Avoid working below heavy equipment.
Branch V	Downhill Line Construction	<ul style="list-style-type: none"> Post lookouts (IRPG pg. 7). Follow downhill line construction guidelines (IRPG pg. 9).

Human Resource Message

"The purpose of life is to live it, to taste experience to the utmost, to reach out eagerly and without fear for newer and richer experience." *Eleanor Roosevelt*

"Have a heart that never hardens, and a temper that never ties, and a touch that never hurts."

-Charles Dickens

"What we hope to do with ease, we must learn first to do with diligence."

-Samuel Johnson

The only legacy we will leave the agency is those we teach.

-Unknown

Kind words can be short and easy to speak, but their echoes are truly endless.

-Mother Teresa

If you chase two rabbits both will escape.

-Unknown

We are what we repeatedly do. Excellence, then, is not an act, but a habit.

-Aristotle

"I have learned that success is to be measured not so much by the position that one reached in life as by the obstacles which one has overcome while trying to succeed."

-Booker T. Washington

A good leader inspires men to have confidence in him; a great leader inspires them to have confidence in themselves.

-unknown

Now and then it's good to pause in our pursuit of happiness and just be happy. The measure of a life, after all, is not its duration, but its donation.

Lauren Dorosz, HRSP, is on site at the Red Salmon Complex. Contact information is (707) 980-2732 at the PIO trailer.

Hallowed Ground

By Byron Nelson, Jr

The Klamath Mountain Range where we reside is one of the most unique regions in the world. It is so unique that it ripped itself away from the Sierra Nevada Mountain Range some one hundred and forty million years ago.

By looking at a geological map of Northern California, it can be clearly seen that the southern end of the Klamath Mountain Range and the northern end of the Sierra Nevada Mountain Range could be slipped together like a jigsaw puzzle. Sixty miles separate the two mountain ranges with the northern central valley in between.

Extending into southern Oregon just south of the Rogue River, the Klamath Mountain Range includes the more well-known areas of the Trinity Alps, the Marble Mountains and the Siskiyou Mountains.

Contained within this region are more species of coniferous trees in one location than found anywhere else on the globe.

In just under twenty thousand square miles, the area harbors rich biodiversity with several distinct plant communities, including temperate rain forests, moist inland forests, oak forests and savannas, high elevation forests, and alpine grasslands.

Vast forested wild lands in the Klamath Mountain Range provide excellent habitat for an assortment of animal species, including mountain lion, black bear, lynx, bobcat, raccoon, marten, fisher, beaver, gray and red fox, northern flying squirrel, and mule and whitetail deer. Elk are being reintroduced to the area, and the introduction of wolves, similar to Yellowstone, is being considered.

A large variety of bird species flourish. Golden and bald eagles, osprey, pileated woodpecker, band-tailed pigeon, a wide variety of hawks including the red-tailed, and several large owls are a few of the bird species seen throughout the forests.

With the many mountains streams and rivers, the area provides a major spawning ground for several species of trout and salmon. Notable fish species include king, coho and silver salmon, steelhead, rainbow, brown, and cut-throat trout, sturgeon, and lamprey eel all inhabit the region.

It wasn't until a few years ago that scholars began working with a map showing those locations that an astonishing thing happened. They began to measure the distances between the sites and discovered to their amazement that the sites were equal in the distances between them; just as if a huge fishing net had been thrown over the land to mark their locations.

What was even more astonishing about that discovery was the fact that most those sacred sites were located at prominent spots such as high mountain tops. Some were located closer than others, but all calculated out equally.

On the surface, the Klamath Mountain region is truly a remarkable place, but when the spiritual element is entered into the equation, it develops into another dimension. The whole area for thousands of years was almost treated as a huge church. With prayer spots, so near each other throughout the area, it could not be forgotten that the whole region was considered hollowed ground.
