Red Salmon Complex Weather Forecast

FORECAST NO: 6
UNIT: Six Rivers / Shasta Trinity
SHIFT DATE: Tuesday, August 5, 2020
PREDICTION FOR: 0600 - 0600
FORECAST ISSUED: 2000 hrs. 8/4/2020

SIGNED: 
Jon Bonk: jon.bonk@noaa.gov
Incident Meteorologist
Call or Text Obs to: (240)778-5287

Morning fog may affect Willow Creek Helibase; Thunderstorm possible late this afternoon and early evening

WEATHER DISCUSSION: Weak low pressure remains over the area today. Morning fog and low clouds are possible below 2500 ft, including over Willow Creek and the helibase. Thunderstorms are possible again late this afternoon and evening, but are more likely to be distant and off to the northeast over the Trinity Alps. Expect the ridgetop inversion to slightly lift again today, but still expect modest capping to limit ventilation. Thursday and Friday, stronger low pressure will slide across British Columbia and the Pacific Northwest. This will bring cooler temperatures and higher humidity. High pressure returns this weekend with weather becoming hotter and drier.

Today (0600-1800):

Weather: Fog and low clouds possible below 2,500', including Willow Creek. Otherwise, mostly sunny until 1500 hrs, then partly cloudy with a 20% chance of a thunderstorm. Smoke hanging low over the fires all day.

High Temperatures: Red Fire: 70-76°; Salmon Fire 74-78°.

Humidity: Red Fire 45-55%; Salmon 40-50%; near 1400 hrs, then rising about 15% by 1800 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 0-3 mph until 1100, then terrain driven 4-8 mph.

Upper Slopes: Variable 2-5 mph until 1100, then becoming West-Northwest 7-9 mph with gusts up to 15 mph.

LAL: 2 **Chance of Wetting Rain (0.10"): 10%**

Stability: Low valley inversion lifts around 1100 hrs. Subsidence inversion is weaker but should hold.

Afternoon Mixing Height: Valleys: 3,000 feet AGL or less. Ridges: 4,000 feet if smoke clears

Tonight (1800-0600):

Weather: Partly cloudy with a 20% chance of a thunderstorm through 2000 hrs, then clearing. Fog or low stratus possible below 2500' including Willow Creek and Helibase. Smoke settling across the fire area drainages.

Low Temperatures: Red Fire: 51-55°; Salmon Fire: 56-60°.

Humidity: Red Fire: 70-75% lower elevations, 60-65% higher elevations.

Salmon Fire: 65-75% in the evening, then 55-65% overnight.

20 Foot Winds:

Lower/Mid Slopes: Variable 3-5 mph until 2300, then drainage 3-5 mph.

Ridges: West-Northwest 7-9 mph with gusts up to 15 mph until 2300, then North 4-7 mph.

LAL: 2. **Chance of Wetting Rain (0.10"): 10%**

Inversion: Weak inversion and thermal belt around 1,000 ft MSL. Strong inversion near 5,500 ft MSL.

Thursday: Fog and low clouds below 2500' until 1100, then mostly sunny with areas of smoke hanging low over the fires. Weaverville, mostly sunny all day. Max Temps: 66-73°. Afternoon RH: Red Fire 45-60%, Salmon Fire 40-45%.
Afternoon Winds - Lower Slopes: Variable/Terrain Driven. Upper slopes: Northwest around 7 mph.

Friday and Saturday Outlook: Warmer and drier, becoming Hot on Saturday with humidity 20-30%.

Weather near the fires with change from 24 hours ago:

WEATHER SUMMARY:

DISCUSSION... Weak low pressure remains over the area today. Morning fog and low clouds are possible below 2500 ft, including over Willow Creek and the helibase. Thunderstorms are possible again late this afternoon and evening, but are more likely to be distant and off to the northeast over the Trinity Alps. Expect the ridgetop inversion to slightly lift again today, but still expect modest capping to limit ventilation. Thursday and Friday, stronger low pressure will slide across British Columbia and the Pacific Northwest. This will bring cooler temperatures and higher humidity. High pressure returns this weekend with weather becoming hotter and drier.

See Spot Weather Forecast

FIRE BEHAVIOR

GENERAL

Fuels are dry with 1000-hr fuels below 10%. Surface fire spread with isolated single and group tree torching can be expected. Thunderstorms in the area are again possible today which may cause a sudden increase in fire behavior. Otherwise expect fire behavior to remain terrain driven, with spotting up to .2 miles and POI over 60%.

Live fuel moistures continue to decrease which is allowing for these fuels to become available to burn.

Predicted ERC: 80 percentile (steady) Timber ROS: 4-10 ch/hr. Timber FL: 2-8 feet
Predicted BI: 95 percentile (steady) Brush ROS: 1-3 ch/hr. Brush FL: 1-4 feet

SPECIFIC

SPECIFIC FIRE BEHAVIOR:

Branch I (Red): The fire continues to spread to the west, north and south with little movement to the east. Surface spread with single tree and group torching should be expected with slope/wind alignment on both the north and south flanks. The fire has aligned with both H-8 and Red Spike camp. The fire continues to back to the west downslope towards Red Cap Creek. The fire is burning primarily in old growth timber understory with deep duff and litter layers that hold heat and continue to creep with potential for re-burn.

Branch V (Salmon): The fire continues to back to the south in Eight Mile drainage with creeping and smoldering on the other flanks. Large concentrations of heavy fuels cause spotting which has contributed to fire growth and preheats other fuels. The north and east flanks have shown little movement over the last several burn periods. The fire is within the 2009 Redspot Fire footprint with brush being the primary carrier.

Branch VII (Packsaddle Ridge): The fire is backing towards Red Cap Creek drainage, and if it crosses the creek fire behavior may increase with slope reversal terrain driven runs to the west.

AIR OPERATIONS

Low level inversion lifts around 1100 hrs. Subsidence inversion near the ridges holds all day. Smoke will impact aviation visibility along Salmon Ridge and Branch V.

SAFETY

Be aware of thunderstorm development near the fire which can cause a sudden increase in fire behavior.

Base all action on current and expected fire behavior

Strike Team / Task Force / Resource Designator	LWD	Leader	Number Persons	Drop Off PT./Time	Pick Up PT./Time

6. Control Operations/Work Assignments:

Continue line construction while scouting for opportunities for indirect suppression actions.
 Protect Ferris Cabin. Prep 10N01 Road to Lub Trail to Black Mountain.
 Be prepared to burn when conditions are favorable.
 Hold and secure black edge from firing operation.

7. Special Instructions:

Utilize MIST tactics. All line resources will spike overnight.
 Utilize READ's for cultural and environmental resource concerns.
 ID helispots and drop points, get lat-longs. Please return nets, swivels, and ice chests.
 Back-haul trash and excess equipment. All resources use QR code to check-in.
 Do not post lookouts on any bed rock out cropping without first getting clearance from REAF or READ.

****ARCHs / REAFs**** listed in Division A are shared between all divisions on Branch 1
****ARCHs / REAFs**** Will check in / out with DIVS when entering and leaving their divisions.

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): Track all dipsite locations/number of dips/gallons taken. Track all drop locations/number of drops/gallons dropped. All GPS data to be collected in DEGREES, MINUTES, DECIMAL MINUTES format. AVOID Aerial Application of Retardant/Foam/Agent within 300' of Waterways, Bodies of Water, etc **AERIAL AVOIDANCE ZONE: 1/2 MILE RADIUS INDIAN ROCKS.** If Retardant/Foam/Agent is dropped within these areas immediately notify the AOBD and provide the following information: Lat/Long, estimated number of gallons and a map detailing the area.
Fly with Transponder 1255.
CAUTION POWERLINES and SMOKE.
Dip Sites: River Dip, Blacks Lake Dip

Provide Tactical Aerial Support

Water dropping requested by Ops, Branch, Division or Air Attack

As requested. Coordinate requests with AOBDD.

On request: Check application avoidance areas

Request through Red Salmon Communications on Command Repeater. Give location: lat/long if known, and current visibility. Check Medical Plan/IAP.

As requested

Provide IA Helitack and loan copters on request

When available as requested through Ops

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following item to communicate situation to communications/dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex:**
"Communications, Div. Alpha. Stand-by for Emergency Traffic."
2. **INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

HEALTH AND SAFETY MESSAGE

SAFETY** starts with **YOU

We are ALL accountable for SAFE behaviors

For Day Operations: August 5, 2020

INCIDENT: Red Salmon Complex

DATE: Wednesday August 5, 2020

Major Hazards and Risks:

- **Driving:** Watch your speed when driving on roads and increase following distance on dirt roads.
- **Hazard Trees:** Assess ALL Trees in Work Areas....In addition to suppression and mop-up operations, assess hazard trees when you take breaks and park vehicles

Quick facts about COVID-19 and the fire environment.

- “Close Contact” is face to face contact for at least 15 minutes or in the same enclosed space for two hours.
- Any employee in “close contact with someone who is sick” may return to the workplace if the sick person tests Negative for COVID-19. A Rapid test can return results in about .5 to 2 hours.
- If you had “close contact” with a person testing positive you may have to self-isolate for 14 days.

- “Casual contact” is face-to-face contact for less than 15 minutes or in enclosed space for less than 2 hours.
- If you have “casual contact” with someone who tests positive you can return to work if you are symptom free.
- The Contact Assessment, to determine if you had contact with the positive person is the 2-day period before the illness or the positive test, whichever came first.

The bottom line: If you maintain social distancing, you will not have “close contact” with someone.

Line Prep/ Burnout Operations

Go slow for success are still the key words. Warm and dry conditions are returning. Don't get so eager to accomplish your goals that you compromise safety. Ensure LCES mitigations are in-place and known to all. Make sure you have more than one escape route and that your holding forces are in-place and briefed. Wear all your needed PPE...it saves lives...

Environmental— along with steep/rocky/nasty/ugly terrain and snags you can add snakes, bees, poison oak, and heat stress/dehydration concerns. Remember to push fluids before shift and limit your intake of caffeine. Flag and avoid hazards you cannot eliminate and communicate to others

Watch out for high winds and share information with your co-workers!!!

Get Briefings and Monitor the Weather Throughout the Shift!

Safety & Health Working Team

Thanks from your Safety Team!!

Greg Marfil SOFR2 Pedro Martinez SOF2
Nick Bianchini SOF2(T)

[Handwritten Signature]
08/04/2020

Follow the “Risk Management” Process in all your decisions. For more information refer to page 1 of your IRPG!!!

CA-SRF-000656

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Air Operations	<ul style="list-style-type: none"> • Don't plan on air resources for medical transport or resupply. • Follow "Aviation Watch-out Situations" IRPG P.46. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Ensure Drone Operations are coordinated with air resources
All	Hazard Trees	<ul style="list-style-type: none"> • Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. • Post lookouts, or use a spotter in mop-up areas with personnel. • Don't park vehicles or take breaks in high concentrations of hazard trees. • Establish trigger points for disengagement during high wind events. • Remember that the hazard zone extends a minimum of 2 1/2 tree heights. • Post road guards when appropriate.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> • Identify helispots and communicate Lats/Longs to DIVS. • Be familiar with the Medical Plan and communicate 8 line promptly. • Evaluate the necessity to send personnel into areas with limited access. • Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. • Don't rely on helicopters exclusively.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Be on the lookout for rolling rocks, debris, or burning material. • Evaluate necessity to send personnel in areas with limited access.
All	Driving & Traffic	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques traveling on all roads and city streets. • Use spotters and honk horn when backing. • Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). • Use headlights, observe speed limits, use spotters when backing, avoid distractions (i.e. eating, phones, radios), yield to pedestrians, and use the 3 second rule for following distance. • Use chock blocks, turn wheels into hill. • Ensure that windshields are kept clean.
A/D	Firing Operations	<ul style="list-style-type: none"> • Wear appropriate PPE, and only allow personnel properly trained to use firing equipment. • Ensure all personnel are aware of firing operation that may affect them. • Rotate holders out of smoke. • RH is lowest late at night and early in the morning. Monitor for changes in fire behavior. • Ensure ignition plans have been adequately developed and personnel are briefed. • Watch for diurnal wind shifts.
Division A/U/W & Salmon Contingency	Heavy Equipment Operations	<ul style="list-style-type: none"> • Ensure HEQB scout narrow roads for transport travel. • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. • Avoid working below heavy equipment.
All	COVID-19 Environment	<ul style="list-style-type: none"> • Utilize social distancing (6 feet). Wear a facemask if you can't social distance. • Maintain the "module of one" concept. • Disinfect vehicle interiors, and commonly touched surfaces frequently. • Do not share devices (i.e. cellphones, laptops, radios etc.). • Utilize technology to communicate while maintaining social distance. • Wash your hands frequently.

NOTICE

FIREFIGHTERS DO NOT STOP OR SHOP

Our Communities appreciate all of the firefighters that are here helping to suppress the fires. Please help us to remain safe and do not stop while in our communities to refuel or buy supplies. We are asking this because the safety of our community is everyone's top priority.

FINANCE MESSAGE **PLEASE PUT EMAIL OR TEXT # ON YOUR CTR**

Options for submitting time: **NEED LEGABLE MANIFEST** please send with 1st CTR

Fillable PDF CTR/Shift Ticket: QR codes to the fillable forms are included below. If you do not have QR capabilities finance can e-mail you the forms directly. Make sure the forms are signed by the supervisor before submitting to Finance.

Hard Copy CTR/Shift Ticket: You may fill out a hard copy CTR/SHIFT Ticket, snap a picture and email/text that in to Finance OR you may turn in your actual hard copy as usual. If you send in a picture please make sure it is legible and includes the supervisors signature at the bottom. (if you are texting pictures to Finance, enter the email address as shown below where you would normally enter a phone number).

Please try to submit at least every other day. **IF YOU HAVE ANY TROUBLE CONTACT FINANCE**

H-Pay justifications are still required on your CTRs – “H=Hazard” is not sufficient

Tips for successful Finance demob:

- Send in all time documentation (including travel home) ahead of demob.
- Only 1 representative per resource should come to the Finance trailer.
- Abide by scheduled demob time or call Finance for an unscheduled demob.

Government agency resources that would like to close out their time 100% remotely should call personnel time unit leader number listed below, when they are close to demob day, and make necessary arrangements to complete the process.

In order to use fillable forms you must have some version of Adobe Acrobat downloaded on your device.

TRAINING SPECIALIST MESSAGE

Red Salmon Complex

August 5, 2020

Training, make the best of it.

TRAINERS: Please take the time to check on your Trainee and ensure they are getting quality experience while meeting their goals to perform in their position.

TRAINEES: Take a minute to review your task book and work with your Trainer to get experience needed to complete the tasks in your position.

I am available to help with your training needs.

Thank You.

MINIMUM IMPACT SUPPRESSION TECHNIQUES (MIST)

Fire Management Tool Box on Wilderness.Net

Firefighter and public safety is always the first priority in any suppression action, including operations in wilderness. Use of MIST provides guidelines for preserving wilderness areas for present and future generations.

When evaluating fire management actions, the potential degradation of wilderness character should be considered before, and given significantly more weight than, economic efficiency and convenience. Unless human life or private property is immediately threatened, only those actions that preserve wilderness character and/or have localized, short-term adverse impacts to wilderness character should be implemented.

FIRELINE CONSTRUCTION

- Take advantage of natural barriers wherever possible.
- Use cold-trail and/or wet line when appropriate.
- If the decision is made to construct line, use only the width and depth necessary for halting the fire spread. Minimize ground disturbance.
- Minimize bucking and cutting of trees to establish fire line; build line around logs when feasible and effective.
- Limb vegetation only to the extent necessary to stop fire spread.
- Avoid cutting live trees whenever possible.
- As an alternative to felling, consider allowing ignited trees and snags to burn themselves out. Ensure adequate safety measures are communicated to those affected by this decision.
- If burning trees or snags pose a serious threat of spreading firebrands, extinguish the fire with water and/or dirt wherever possible.

AIR OPERATIONS

- Limit retardant or foam use, use water instead. If retardant and foam is appropriate, avoid drops near water.

HELISPOTS

- Minimize the number of helispots in wilderness. Use alternate sites outside wilderness when possible or consider using pack strings (mules).
- Use natural openings as much as possible.
- Size the helispots for the appropriate size helicopter. Consider long line remote hook operations instead of helispots for logistical support.

SPIKE CAMPS

- Minimize the use of spike camps in wilderness. If spike camps are needed, use existing camp sites where available.
- Avoid camping in wet meadows, along streams or on lake shores. Resource Advisors can help identify suitable sites.
- Layout camp carefully from the start, identify areas for cooking, sleeping, washing, latrines and water supplies.
- In small camps individuals can use "cat hole" method

of disposal (6"-8" hole) short term. In larger camps locate community latrines 300' from water.

- Designate wash areas away from streams, and provide for gray water disposal. Do not use soap, shampoo, or other chemicals near waterways.
- Store food away from camp and so that it is not accessible to wildlife.
- Store garbage so that it is not accessible to wildlife, and remove it as frequently as possible.
- Use stoves to cook when possible. Minimize the use of campfires, and use either a pit or mound ring fire with dead or downed small diameter firewood. Do not build rock ring campfires. An old fire shelter placed under the coals helps protect the soil.
- Limit travel ways within, to, and from camp.

PERSONAL SPIKE CAMP CONDUCT

- Select durable sites for tents.
- Do not clear vegetation or dig trenches to create bedding sites.
- Pack out all garbage, including candy wrappers, cigarette butts, and flagging.
- Carry water and bathe away from lakes and streams.
- Do not use nails in trees or limb trees for bedding.
- Evaluate the short and long term impacts of your decisions.

REPAIR

- Remove signs, flagging, garbage, and equipment used during fire suppression.
- Restore disturbed areas.
- Scarify the top 2-4" of soil in heavily compacted areas and scatter needles, twigs, branches, over the area.
- Rehabilitate newly established trails on slopes <6%, water bar trails created on steeper slopes.
- Scatter cut material and camouflage cut surfaces with dirt.
- Do not use non-native materials, avoid introducing invasive species.

LETS RECYCLE!

Zero hero, working under the USFS greening fire program is here to recycle as much bottles, cardboard and other recyclables as we can. For your convinience, you'll find the ZeroHero recycling stations throughout the camps. We encourage you to take a second and pitch your bottles and other recycleables in the recycling receptacles. Thank you for making a difference.
