

RED SALMON IAP COMPLEX

-CORRECTED-

CA-SRF-000656

P5NB4S (0510)

AUGUST 6, 2020

DAY SHIFT

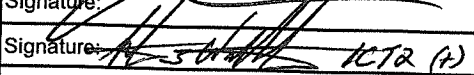

0700 - 1900

NIGHT SHIFT

1900 - 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
RED SALMON COMPLEX		Date/Time From: 08/06/2020 0700 THU	Date/Time To: 08/06/2020 1900 THU
3. Objective(s):			
<i>Management Objectives:</i>			
-Ensure firefighter and public safety by using strategies and tactics that mitigate known and anticipated hazards while following COVID-19 mitigation action.			
-Protect and understand the cultural values and natural resources in the fire area to create a risk-based decisions while utilizing MIST in the wilderness area.			
-Maintain and enhance relationships with represented agencies, local tribe council stakeholders, local landowners, and the general public.			
-Provide timely and accurate fire information to cooperators and the affected communities.			
-Effectively manage cost by implementing strategies and tactics that have a high probability of success.			
<i>Control Objectives:</i>			
Keep the Fire:			
<ul style="list-style-type: none"> • West of Battle Creek Trail, • North of Soldier Creek Trail, • East of Packsaddle Ridge and, • South of Shasta - Trinity / Klamath National Forest boundary. 			
4. Operational Period Command Emphasis:			
General Situational Awareness:			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>			
Approved Site Safety Plan(s) Located at:			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Red Salmon Complex Weather Forecast

FORECAST NO: 7
UNIT: Six Rivers / Shasta Trinity
SHIFT DATE: Thursday, August 6, 2020
PREDICTION FOR: 0600 - 0600
FORECAST ISSUED: 2000 hrs. 8/5/2020

SIGNED: 
Jon Bonk: jon.bonk@noaa.gov
Incident Meteorologist
Call or Text Obs to: (240)778-5287

Morning fog may affect Willow Creek Helibase today. Becoming hot and dry this weekend.

WEATHER DISCUSSION: Low pressure over the fire area will keep conditions relatively cool and humid today. Areas of smoke will continue impacting air operations. High pressure begins building tonight and light easterly flow will return to the higher ridges. As winds turn, drier air will lower humidity overnight, reaching below 50% by 0300 hrs. High pressure returns this weekend with weather becoming hotter and drier. Temperatures warm quite quickly. Sunday looks to bring lower 90s at lower elevations of the fire and lower to middle 80s at the higher ridges. Near 100° possible at ICP Sunday. These hot temperatures may produce strong enough mixing to break through the ridgetop inversion maybe on Saturday and more likely on Sunday.

Today (0600-1800):

Weather: Fog and low clouds through 1000 hrs below 2,000', including Willow Creek helibase. Otherwise, mostly sunny with a few shallow cumulus clouds. Areas of low smoke over fire area all day.

High Temperatures: Red Fire: 67-73°; Salmon Fire 71-75°.

Humidity: Red Fire 50-60%; Salmon 45-55%; near 1300 hrs, then rising about 15% by 1700 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 0-3 mph until 1100, then terrain driven 4-8 mph.

Upper Slopes: North 4-7 mph until 1300, then West-Northwest 7-9 mph with gusts up to 15 mph.

LAL: 1 **Chance of Wetting Rain (0.10"): 0%**

Stability: Low valley inversion lifts around 1100 hrs. Mid-level inversion holds all day.

Afternoon Mixing Height: Valleys: 3,000 feet AGL. Ridges: 2,000 feet or less.

Tonight (1800-0600):

Weather: Mostly clear. Patchy fog and low clouds possible below 1500' including Willow Creek Helibase. Smoke settling across the fire area drainages.

Low Temperatures: Red Fire: 53-56°; Salmon Fire: 54-57°.

Humidity: Red Fire: 80-90% lower elevations, 70-80% higher elevations in the evening, then 40-50% late overnight.
Salmon Fire: 65-75% in the evening, then 35-45% by late overnight.

20 Foot Winds:

Lower/Mid Slopes: Variable 3-5 mph until 2300, then drainage 3-5 mph.

Ridges: West-Northwest 7-9 mph with gusts up to 15 mph until 2000, then North to Northeast 3-6 mph.

LAL: 1 **Chance of Wetting Rain (0.10"): 0%**

Inversion: Low inversion and weak thermal belt near 1,500' MSL. Strong inversion/thermal belt near 5,500 ft MSL.

Friday: Patchy valley fog 0900, otherwise sunny. Areas of smoke hanging low over the fires. Max Temps: 76-85°.

Afternoon RH: Red Fire 35-45%, Salmon Fire 35-40%. **Afternoon Winds - Lower Slopes:** Variable/Terrain Driven.

Upper slopes: West northwest 5-8 mph with gusts up to 15 mph.

Saturday and Sunday Outlook: Becoming Hot and Dry. Humidity 20-30%. Possible moderate to strong ventilation.

Weather near the fires with change from 24 hours ago:

WEATHER SUMMARY:

DISCUSSION... Low pressure over the fire area will keep conditions relatively cool and humid today. Areas of smoke will continue impacting air operations. High pressure begins building tonight and light easterly flow will return to the higher ridges. As winds turn, drier air will lower humidity overnight, reaching below 50% by 0300 hrs. High pressure returns this weekend with weather becoming hotter and drier. Temperatures warm quite quickly. Sunday looks to bring lower 90s at lower elevations of the fire and lower to middle 80s at the higher ridges. Near 100° possible at ICP Sunday. These hot temperatures may produce strong enough mixing to break through the ridgetop inversion maybe on Saturday and more likely on Sunday.

See Spot Weather Forecast for details

FIRE BEHAVIOR

GENERAL

Fire behavior will be increasing as we head into the weekend. Today we will see similar conditions to what we have been experiencing the past several days with areas of surface fire spread, isolated single and group tree torching when wind and slope align. Otherwise expect smoldering and creeping. Overall fire behavior will remain terrain driven, with spotting up to .2 miles. Probability of ignition will be around 50%.

Live fuel moistures continue to decrease which is allowing for these fuels to become available to burn. Brush with needle drape has supported fire spread on parts of the fire.

Predicted ERC: 73rd percentile Timber ROS: 4-10 ch/hr. Timber FL: 2-8 feet
Predicted BI: 65th percentile Brush ROS: 1-3 ch/hr. Brush FL: 1-4 feet

SPECIFIC

SPECIFIC FIRE BEHAVIOR:

Branch I (Red): The fire continues to spread to the west, north and south with little movement to the east. Surface spread with single tree and group torching should be expected with slope/wind alignment on both the north and south flanks. The fire has aligned with both H-8 and Red Spike camp. The fire continues to back to the west downslope towards Red Cap Creek. The fire is burning primarily in old growth timber understory with deep duff and litter layers that hold heat and continue to creep with potential for re-burn.

Branch V (Salmon): The fire continues to back to the south in Eight Mile drainage with creeping and smoldering on the other flanks. Large concentrations of heavy fuels cause spotting which has contributed to fire growth and preheats other fuels. The north and east flanks have shown little movement over the last several burn periods. The fire is within the 2009 Redspot Fire footprint with brush being the primary carrier.

Branch VII (Packsaddle Ridge): The fire is backing towards Red Cap Creek drainage, and if it crosses the creek fire behavior may increase with slope reversal terrain driven runs to the west.

AIR OPERATIONS

Low level inversion lifts around 1100 hrs. Subsidence inversion near the ridges holds all day. Smoke will impact aviation visibility along Salmon Ridge and Branch V.

SAFETY

Limited lookout positions and visibility impacted by heavy smoke may compromise your ability to see what the fire is doing. Use caution when working in areas with poor visibility. Know what your fire is doing at all times.

Base all action on current and expected fire behavior

Provide Tactical Aerial Support

Water dropping requested by Ops, Branch, Division or Air Attack

As requested. Coordinate requests with AOBD.

On request: Check application avoidance areas

Request through Red Salmon Communications on Command Repeater. Give location: lat/long if known, and current visibility. Check Medical Plan/IAP.

As requested

Provide IA Helitack and loan copters on request

When available as requested through Ops

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. **CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex:**
"Communications, Div. Alpha. Stand-by for Emergency Traffic."
2. **INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

BR/DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
All	Air Operations	<ul style="list-style-type: none"> • Don't plan on air resources for medical transport or resupply. • Follow "Aviation Watch-out Situations" IRPG P.46. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Ensure Drone Operations are coordinated with air resources
All	Hazard Trees	<ul style="list-style-type: none"> • Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. • Post lookouts, or use a spotter in mop-up areas with personnel. • Don't park vehicles or take breaks in high concentrations of hazard trees. • Establish trigger points for disengagement during high wind events. • Remember that the hazard zone extends a minimum of 2 1/2 tree heights. • Post road guards when appropriate.
All	Extended Medical Extraction Times	<ul style="list-style-type: none"> • Identify helispots and communicate Lats/Longs to DIVS. • Be familiar with the Medical Plan and communicate 8 line promptly. • Evaluate the necessity to send personnel into areas with limited access. • Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. • Don't rely on helicopters exclusively.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Be on the lookout for rolling rocks, debris, or burning material. • Evaluate necessity to send personnel in areas with limited access.
All	Driving & Traffic	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques traveling on all roads and city streets. • Use spotters and honk horn when backing. • Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). • Use headlights, observe speed limits, use spotters when backing, avoid distractions (i.e. eating, phones, radios), yield to pedestrians, and use the 3 second rule for following distance. • Use chock blocks, turn wheels into hill. • Ensure that windshields are kept clean.
A/D	Firing Operations	<ul style="list-style-type: none"> • For aerial firing, prepare and follow the Project Aviation Safety Plan. • Ensure all personnel are aware of firing operation that may affect them. • Ensure aerial/ground ignition plans are developed and personnel are briefed. • RH is lowest late at night and early in the morning. Monitor for changes in fire behavior. • Watch for diurnal wind shifts.
Division A/U/W & Salmon Contingency	Heavy Equipment Operations	<ul style="list-style-type: none"> • Ensure HEQB scout narrow roads for transport travel. • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. • Avoid working below heavy equipment.
All	COVID-19 Environment	<ul style="list-style-type: none"> • Utilize social distancing (6 feet). Wear a facemask if you can't social distance. • Maintain the "module of one" concept. • Disinfect vehicle interiors, and commonly touched surfaces frequently. • Do not share devices (i.e. cellphones, laptops, radios etc.). • Utilize technology to communicate while maintaining social distance. • Wash your hands frequently.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Red Salmon Complex

DATE: August 6, 2020

Major Hazards and Risks:

- **STEEP TERRAIN** : be aware not to work above persons and rolling material
- **DEHYDRATION**: Remember to drink 4-6 quarts of fluid each operational period
- **DRIVING**: Reduce speed on all roads. Increase distance while driving on dirt roads.
- **HAZARD TREES**: Assess ALL Trees in Work Areas....In addition to suppression and mop-up operations, assess hazard trees when you take breaks.

Fire Order of the Day:

Identify ESCAPE ROUTES, and SAFETY ZONES and make them known.

- Avoid steep uphill escape routes
- Flag so they are known to all
- Scout and time route for slowest person considering Fatigue & Temperature factors

Common Denominators of Fire Behavior on Tragedy Fires

- On relatively small fires or deceptively quiet areas of large fires.
- In relatively light fuels, such as grass, herbs and light brush
- When there is an unexpected shift in wind direction or in wind speed
- When fire responds to topographic conditions and runs uphill

"Well, thank God we all made it out in time. ...
'Course, now we're equally screwed."

SAFETY ZONES

Make sure everyone is aware of their locations.

17.TERRAIN AND FUELS MAKE ESCAPE TO SAFETY ZONES DIFFICULT

Need more info...look in your IRPG on page 8.

Thanks from your Safety Team!!

Greg Marfil SOF2 Pedro Martinez SOF2
Nick Bianchini (T)

 08/25/2020

Don't forget.....
BE ALERT....Situational Awareness
KEEP CALM.....Leadership
THINK CLEARLY....Risk Management
ACT DECISIVELY....Confidence!!!!

FINANCE MESSAGE **PLEASE PUT EMAIL OR TEXT # ON YOUR CTR**

Options for submitting time: **NEED LEGABLE MANIFEST** please send with 1st CTR

Fillable PDF CTR/Shift Ticket: QR codes to the fillable forms are included below. If you do not have QR capabilities finance can e-mail you the forms directly. Make sure the forms are signed by the supervisor before submitting to Finance.

Hard Copy CTR/Shift Ticket: You may fill out a hard copy CTR/SHIFT Ticket, snap a picture and email/text that in to Finance OR you may turn in your actual hard copy as usual. If you send in a picture please make sure it is legible and includes the supervisors signature at the bottom. (if you are texting pictures to Finance, enter the email address as shown below where you would normally enter a phone number).

Please try to submit at least every other day. **IF YOU HAVE ANY TROUBLE CONTACT FINANCE**

H-Pay justifications are still required on your CTRs – “H=Hazard” is not sufficient

Tips for successful Finance demob:

- Send in all time documentation (including travel home) ahead of demob.
- Only 1 representative per resource should come to the Finance trailer.
- Abide by scheduled demob time or call Finance for an unscheduled demob.

Government agency resources that would like to close out their time 100% remotely should call personnel time unit leader number listed below, when they are close to demob day, and make necessary arrangements to complete the process.

Adam Alvarez HRSP – (707) 373-8715

TRAINING SPECIALIST MESSAGE

Red Salmon Complex

August 6, 2020

TRAINERS: Please take the time to check on your Trainee and ensure they are getting quality experience while meeting their goals to perform in their position.

TRAINEES: Take a minute to review your task book and work with your Trainer to get experience needed to complete the tasks in your position.

I am available to help with your training needs.

Thank You.

Nick Balent

MINIMUM IMPACT SUPPRESSION TECHNIQUES (MIST)

Fire Management Tool Box on Wilderness.Net

Firefighter and public safety is always the first priority in any suppression action, including operations in wilderness. Use of MIST provides guidelines for preserving wilderness areas for present and future generations.

When evaluating fire management actions, the potential degradation of wilderness character should be considered before, and given significantly more weight than, economic efficiency and convenience. Unless human life or private property is immediately threatened, only those actions that preserve wilderness character and/or have localized, short-term adverse impacts to wilderness character should be implemented.

FIRELINE CONSTRUCTION

- Take advantage of natural barriers wherever possible.
- Use cold-trail and/or wet line when appropriate.
- If the decision is made to construct line, use only the width and depth necessary for halting the fire spread. Minimize ground disturbance.
- Minimize bucking and cutting of trees to establish fire line; build line around logs when feasible and effective.
- Limb vegetation only to the extent necessary to stop fire spread.
- Avoid cutting live trees whenever possible.
- As an alternative to felling, consider allowing ignited trees and snags to burn themselves out. Ensure adequate safety measures are communicated to those affected by this decision.
- If burning trees or snags pose a serious threat of spreading firebrands, extinguish the fire with water and/or dirt wherever possible.

AIR OPERATIONS

- Limit retardant or foam use, use water instead. If retardant and foam is appropriate, avoid drops near water.

HELISPOTS

- Minimize the number of helispots in wilderness. Use alternate sites outside wilderness when possible or consider using pack strings (mules).
- Use natural openings as much as possible.
- Size the helispots for the appropriate size helicopter. Consider long line remote hook operations instead of helispots for logistical support.

SPIKE CAMPS

- Minimize the use of spike camps in wilderness. If spike camps are needed, use existing camp sites where available.
- Avoid camping in wet meadows, along streams or on lake shores. Resource Advisors can help identify suitable sites.
- Layout camp carefully from the start, identify areas for cooking, sleeping, washing, latrines and water supplies.
- In small camps individuals can use "cat hole" method

of disposal (6"-8" hole) short term. In larger camps locate community latrines 300' from water.

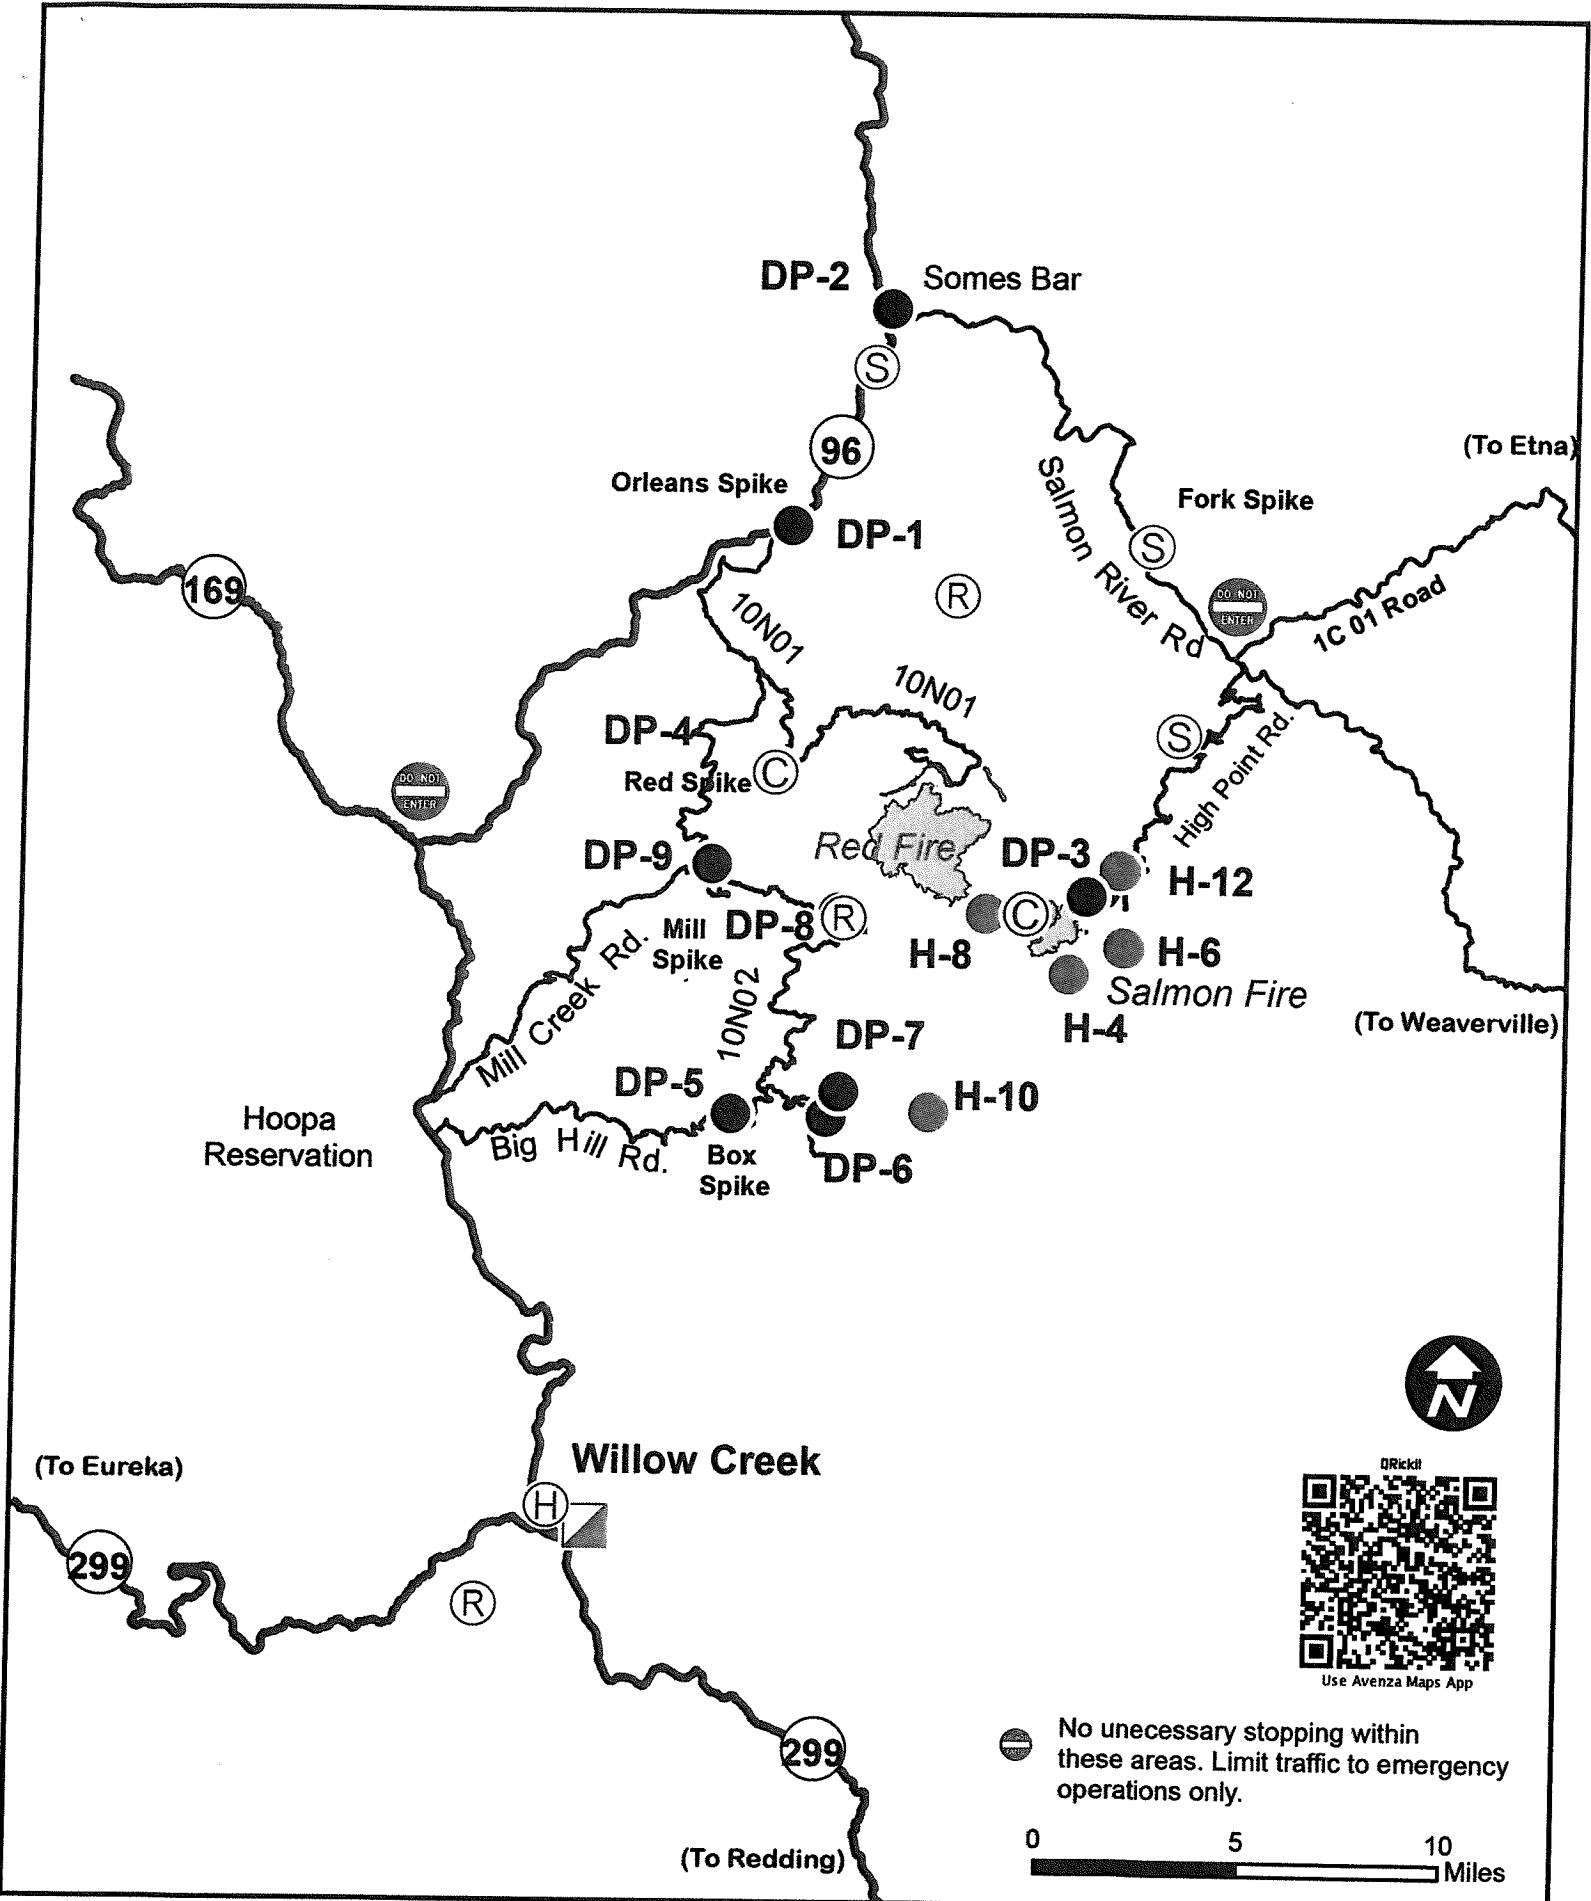

- Designate wash areas away from streams, and provide for gray water disposal. Do not use soap, shampoo, or other chemicals near waterways.
- Store food away from camp and so that it is not accessible to wildlife.
- Store garbage so that it is not accessible to wildlife, and remove it as frequently as possible.
- Use stoves to cook when possible. Minimize the use of campfires, and use either a pit or mound ring fire with dead or downed small diameter firewood. Do not build rock ring campfires. An old fire shelter placed under the coals helps protect the soil.
- Limit travel ways within, to, and from camp.

PERSONAL SPIKE CAMP CONDUCT

- Select durable sites for tents.
- Do not clear vegetation or dig trenches to create bedding sites.
- Pack out all garbage, including candy wrappers, cigarette butts, and flagging.
- Carry water and bathe away from lakes and streams.
- Do not use nails in trees or limb trees for bedding.
- Evaluate the short and long term impacts of your decisions.

REPAIR

- Remove signs, flagging, garbage, and equipment used during fire suppression.
- Restore disturbed areas.
- Scarify the top 2-4" of soil in heavily compacted areas and scatter needles, twigs, branches, over the area.
- Rehabilitate newly established trails on slopes <6%, water bar trails created on steeper slopes.
- Scatter cut material and camouflage cut surfaces with dirt.
- Do not use non-native materials, avoid introducing invasive species.
