Red Salmon Complex Weather Forecast

FORECAST NO: 9

UNIT: Six Rivers / Shasta Trinity

SHIFT DATE: Saturday, August 8, 2020

PREDICTION FOR: 0600 - 0600

FORECAST ISSUED: 2000 hrs. 8/7/2020

SIGNED:

Jon Bonk: jon.bonk@noaa:gov Incident Meteorologist

Call or Text Obs to: (240)778-5287

Warmer and drier today, poor humidity recovery tonight; hot, dry, and unstable Sunday and Monday.

WEATHER DISCUSSION: Today will be warmer and drier. The inversion over the fire continues to weaken and could break if sustained intense heat develops, possibly ventilating the fire area. Weather continues becoming hotter and drier. Sunday and Monday will bring temperatures in the lower 90s for lower elevations of the fire with middle to upper 80s at the higher ridges. 100-105° is expected at ICP and Orleans Sunday and Monday. These hot temperatures may produce strong enough mixing to possibly break through the ridgetop inversion on Saturday, becoming more likely on Sunday, and most likely on Monday. These conditions will begin to support spotting across control lines. Additionally, thunderstorms may be in the vicinity of Weaverville Helibase on Monday.

Today (0600-1800):

Weather: Sunny. Areas of low smoke over fire somewhat lifting in the afternoon.

High Temperatures: Red Fire: 78-87°; Salmon Fire 79-84°.

Humidity: Red Fire 30-34%; Salmon 28-32%; near 1300 hrs, then slowly rising through 1800 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 0-3 mph until 1000, then terrain driven 4-8 mph.

Upper Slopes: Northeast 4-7 mph until 1000, then variable 0-3 mph, becoming West-Northwest 6-9 mph with

gusts up to 15 mph. Gusts to 20 mph south of Salmon Mountain along the high ridgeline.

LAL: 1

Chance of Wetting Rain (0.10"): 0%

Stability: Low valley inversion lifts around 1000 hrs. <u>Prolonged intense heat could break the mid-level inversion.</u>

Afternoon Mixing Height: Valleys: 4,000 feet AGL. Ridges: 6,000 feet AGL if ventilating.

Tonight (1800-0600):

Weather: Clear. Smoke settling across the fire area drainages.

Low Temperatures: Red Fire: 61-65°; Salmon Fire: 66-71°.

Humidity: Red Fire: Peaking at 45-50% near 1900 hrs, then falling to 30-35% by 0600 hrs.

Salmon Fire: Peaking at 40-45% near 1900 hrs, then falling to 20-25% by 0600 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 3-5 mph until 2300, then drainage 4-6 mph.

Ridges: West-Northwest 6-9 mph until 1900, then North 4-6 mph until 0200, becoming Northeast 5-8 mph.

LAL: 1

Chance of Wetting Rain (0.10"): 0%

Inversion: Strong inversion/thermal belt centered around 4,000 ft MSL.

<u>Sunday:</u> Areas of smoke. <u>Moderate ventilation possible.</u> Max Temps: 81-91°. Afternoon RH: Red Fire 22-29%, Salmon Fire 23-27%. Afternoon Winds - Lower Slopes: Variable/Terrain Driven. Upper slopes: West-Northwest 5-8 mph with gusts up to 15 mph.

Monday and Tuesday Outlook: Hottest and Driest Monday, cooler Tuesday. Humidity 20-30%. Moderate ventilation likely Monday. Thunderstorms possible near Weaverville Helibase on Monday.

Weather near the fires with change from 24 hours ago:

WEATHER SUMMARY:

DISCUSSION... Today will be warmer and drier. The inversion over the fire continues to weaken and could break if sustained intense heat develops, possibly ventilating the fire area. Weather continues becoming hotter and drier. Sunday and Monday will bring temperatures in the lower 90s for lower elevations of the fire with middle to upper 80s at the higher ridges. 100-105° is expected at ICP and Orleans Sunday and Monday. These hot temperatures may produce strong enough mixing to possibly break through the ridgetop inversion on Saturday, becoming more likely on Sunday, and most likely on Monday. These conditions will begin to support spotting across control lines. Additionally, thunderstorms may be in the vicinity of Weaverville Helibase on Monday.

See Spot Weather Forecast for details

FIRE BEHAVIOR

GENERAL

Fire activity will be steadily increasing today through Monday as fuels rapidly dry. The inversion may break today which would lead to active fire behavior. If the inversion breaks, expect to see areas of surface fire spread, single and group tree torching with upslope runs and long-range spotting. Fire that has been smoldering or just creeping will become active with surface fire spread. If the inversion does not break, expect fire behavior to remain terrain driven.

Spotting distance: up to .3 of a mile. Probability of ignition: over 70%.

Predicted ERC: 75th percentile Predicted BI: 85th percentile

Timber ROS: 7-12 ch/hr. Timber FL: 6-10 feet

Brush ROS: 1-3 ch/hr. Brush FL: 1-4 feet

SPECIFIC

SPECIFIC FIRE BEHAVIOR:

Branch I (Red): The fire continues to spread to the west, north and south with little movement to the east. Surface spread with single tree and group torching should be expected with slope/wind alignment on all flanks. The fire is well established in the drainage at the junction of Middle Fork Red Cap and the no name creek. The fire continues to back to the west downslope and is nearing Red Cap Creek.

Branch V (Salmon): The fire has shown little growth during the past several burn periods. Large concentrations of heavy fuels burning near the line will cause spotting. Interior pockets will continue to burn as the fire consumes available fuels. The fire is within the 2009 Redspot Fire footprint with brush being the primary carrier.

Branch VII (Packsaddle Ridge): The fire is backing in to Red Cap Creek drainage. If it crosses the creek expect increased fire activity with slope reversal and terrain driven runs to the west in Divisions W and U.

AIR OPERATIONS

Low level inversion lifts around 1000 hrs. Smoke will impact aviation visibility in Branch I and V.

SAFETY

Based on local watch out conditions, we will be exceeding 3 of the 4 conditions for large fire growth today. Ensure you can see the fire or are in communication with someone who can.

6. Control Operations/Work Assignments:

Continue line construction while scouting for opportunities for indirect suppression actions.

08/16

Protect Ferris Cabin. Prep 10N01 Road to Lub Trail to Black Mountain.

Be prepared to burn when conditions are favorable.

Hold and secure black edge from firing operation.

7. Special Instructions:

REAF (T) (O-247)

Utilize MIST tactics. All line resources will spike overnight.

Utilize READ's for cultural and environmental resource concerns.

ID helispots and drop points, get lat-longs. Please return nets, swivels, and ice chests.

Back-haul trash and excess equipment.All resources use QR code to check-in.

Do not post lookouts on any bed rock out cropping without first getting clearance from REAF or READ.

- **ARCHs / REAFs** listed in Division A are shared between Division A and Red Contingency.
- **ARCHs / REAFs** will check in / out with DIVS when entering and leaving their divisions.

6. Control Operations/Work Assi	gnments:								

Continue to scout the ridge for line construction by dozers.

Limit dozer operations to within the existing footprint of previous dozer lines. Limit dozer operations in wilderness areas to one blade width.

7. Special Instructions:

Utilize MIST tactics. All line resources will spike overnight. Utilize READ's for cultural resources concerns.

ID helispots and drop points get lat and longs. Backhaul trash and excess equipment.

Do not post lookouts on any bed rock out cropping without first getting clearance from REAF or READ.

ARCH / REAFs listed in Division U are shared between Division U, Division W, and Division R.

ARCHs / REAFs will check in / out with DIVS when entering and leaving their divisions.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH. Use the following items to communicate situation to communications/dispatch. 1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." 2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care. □RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2º - 3º burns more than 4 palm sizes, heat stroke, disoriented. ☐YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes. Severity of Emergency / Transport GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Priority Ex: Sprains, strains, minor heat-related illness. Nature of Injury or Illness Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree) Mechanism of Injury Air Ambulance / Short Haul/Hoist Transport Request Ground Ambulance / Other Descriptive Location & Lat. / Long. Patient Location (WGS84) Geographic Name + "Medical" Incident Name (Ex: Trout Meadow Medical) Name of on-scene IC of Incident within an On-Scene Incident Commander Incident (Ex: TFLD Jones) Name of Care Provider **Patient Care** (Ex: EMT Smith) 3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) Patient Assessment: See IRPG PAGE 106 4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat / Long.) Patient's ETA to Evacuation Location: Helispot / Extraction Site Size and Hazards: 5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication 6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Tone/NAC * Transmit (TX) Receive (RX) Tone/NAC * Channel Name/Number Function COMMAND AIR-TO-GRND TACTICAL

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

Medical Incident Report

Category: Fire Communication

The new Medical Incident Report (MIR) form can be found at all of the following: under Emergency Medical Care (pink) in the *Incident Response Pocket Guide (IRPG)*, PMS 461 (http://www.nwcg.gov/publications/461) [1], Medical Plan ICS-206 WF (http://www.nwcg.gov/publications/ics-forms) [2] form and in many Incident Action Plans (IAPs). The MIR evolved from, and has replaced, the "9 Line Form" and "Pink Sticker."

The MIR is not always tasked to the EMT or Paramedic in "Patient Care". The intent of the form is to:

- 1. establish control of the incident whether routine or life-threatening by initiating a new Incident Command System.
- 2. have a systematic standard process for reporting medical incidents/injuries, similar to a fire size-up form for initial attack, and
- 3. have any firefighter be able to fill it out and transmit with prior training and direction.
- Treat it like any incident. If the incident is overwhelming, ask for a more qualified IC to assume command and expand/contract the
 organization's size depending on the needs of the incident.
- Fill this form out completely prior to transmitting the report to dispatch/communications. If there is a life threat, do not let documentation delay patient care.
- When transmitting the report, state the number and title of each section and say "break" and pause between the sections (e.g., "Dispatch,
 TFLD Jones, Stand by for Priority Medical Incident Report. 1. All other radio traffic please hold BREAK (pause/wait for response.) 2. Incident
 Status: Nature of Illness is chest pain. Incident Name is Tank Medical. IC will be TFLD Jones. Patient Care will be Paramedic Smith.
 BREAK. 3. Initial Patient Assessment is...").
- When using the MIR during a Multi-Casualty Incident (MCI) state the number injured and their severity (Section 3), (e.g., "3. Initial Patient Assessment, I have 5 patients. 3 Reds, 1 Yellow and 1 Green. Mechanism of Injury is...").
- Use the terms Paramedic or EMT with the provider's last name in "Patient Care." Do not use EMT to describe a Paramedic or the ambiguous term, "Medic." All those roles need to be clearly identified to understand the level of care and treatment the patient(s) will receive.
- Enact more than one transport plan and clear more than one frequency if needed for Sections 5 and 6.
- Always be ready for the first plan to fail and be flexible enough to move into an alternate plan. Use the acronym PACE (Primary, Alternate, Contingency, and Emergency) for planning purposes.

Action Items:

- Consider developing medical emergency tabletop scenarios as part of morning briefings or field scenarios on project work to be become
 familiar with the process. The more comfortable with the MIR you are, the more it will be second nature under stress.
- Ensure dispatchers and radio operators are aware of their roles and responsibilities pertaining to the Medical Incident Report.
- Review your local units' Emergency Plans.

This topic was submitted by AFMO Miles Ellis and Asst. State FMO Paul Hohn with Wyoming BLM and expanded upon by Grand Canyon Helitack's Eric Graff.

BR/DIV		AZARDOUS NS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES						
All	Aiı	Operations	 Don't plan on air resources for medical transport or resupply. Follow "Aviation Watch-out Situations" IRPG P.46. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources. Ensure Drone Operations are coordinated with air resources 						
All	H	nzard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mon-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Post road guards when appropriate. 						
All	Extended	Medical Extraction Times	 Identify helispots and communicate Lats/Longs to DIVS. Be familiar with the Medical Plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively. 						
All	Steep Terra	in & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. 						
All	Driv	ing & Traffic	 Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). Use headlights, observe speed limits, use spotters when backing, avoid distractions (i.e. eating, phones, radios), yield to pedestrians, and use the 3 second rule for following distance. Use chock blocks, turn wheels into hill. Ensure that windshields are kept clean. 						
A/D	Firit	ng Operations	 For aerial firing, prepare and follow the Project Aviation Safety Plan. Ensure all personnel are aware of firing operation that may affect them. Ensure aerial/ground ignition plans are developed and personnel are briefed. RH is lowest late at night and early in the morning. Monitor for changes in fire behavior. Watch for diurnal wind shifts. 						
Division A/U/W & Salmon Contingency	Heavy Equipment Operations		 Ensure HEQB scout narrow roads for transport travel. Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Avoid working below heavy equipment. 						
All	COVID-19 Environment		 Utilize social distancing (6 feet). Wear a facemask if you can't social distance. Maintain the "module of one" concept. Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.). Utilize technology to communicate while maintaining social distance. Wash your hands frequently.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are ALL accountable for SAFE behaviors

INCIDENT: Red Salmon Complex

DATE: 8-8-2020

Major Hazards and Risks:

TRAVEL, ROAD SAFETY, SNAGS, HYDRATION, INCREASING TEMPS

Fire Order of the Day -Be alert. Keep calm. Think clearly. Act decisively.

INCREASING TEMPERATURES!!! – The fire area will be seeing an increase in temperatures throughout the weekend. Fuels will be drying out as well as firefighters...keep your hydration up and be prepared.

CREW BRIEFING - It is absolutely essential that everyone on the fireline receives a thorough briefing. Supervisors ensure that the briefing includes the weather, fire behavior, safety message, communications plan, and the Special Instructions on the Division Assignment Form.

FATIGUE got you down - take care of yourself. WASH hands often and get the proper rest, so your body can repair itself.

Watch Out Situation of the Day

4. UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

Symptoms & Signs of Heat Illness

<u>Heat Exhaustion:</u> Victim will have cool, clammy skin; pale coloring; feel weak, dizzy and/or nauseous.

Treatment – Have individual sit in shade or cool area; administer fluids; loosen clothing and assure rest.

<u>Heat Stroke:</u> This is a medical emergency!! Victim will hot, dry, red skin and possible convulsions. These symptoms can progress to unconsciousness and death!

Treatment – Immediately cool individual's body by pouring water over them, especially the head and upper body. Contact the medical unit. Monitor the victim and provide whatever medical support necessary. Placing ice around the neck, groin and armpits can help speed the cool down.

Incident Safety Officers: Nick Bianchini SOF2(t), Greg Marfil SOF2, Perdro Martinez SOF2, Jeff Hammes SOF2

FINANCE MESSAGE

Thank you for continuing to submit your times in the safest way possible. The options for submitting your CTR's and Shift Tickets are:

- Electronic fillable PDF CTR/Shift Tickets. QR codes to the fillable forms are included below. If you do not have QR capabilities Finance can e-mail you the forms directly. Make sure the forms are signed by the supervior before submitting to Finance. (In order to use fillable forms you must have some version of Adobe Acrobat downloaded on your device.)
- Hard Copy CTR/Shift Ticket. You may fill out a hard copy CTR/SHIFT Ticket, snap a picture and email/text that in to Finance OR you may turn in your actual hard copy as usual. If you send in a picture please make sure it is legible and includes the supervisor's signature at the bottom. (If you are texting pictures to Finance, enter the email address shown below where you would normally enter a phone number).

PLEASE:

- Crews need to include a manifest with their first CTR.
- Try to submit your times at least every other day. There is a drop box at Orleans Base Camp in the check-In tent to drop off your time.
- Write your email or text # on your CTR.
- Hazard pay justifications are required on your CTR's. "H=Hazard" is not sufficient.

WHEN YOU ARE CLOSE TO DEMOB:

- Follow the demob plan instructions based on your travel route home. This will determine
 whether your demob will be in-person or remote.
- Submit all time documentation (including travel home) ahead of demob.
- Send only one representative per resource to the Finance trailers.
- Abide by scheduled demob time or call Finance for an unscheduled demob.

RED SALMON DEMOB PROCESS

Steps for the Demob Process. Note this is a paperless process. If you have difficulties with your phone or need help, please ask the person in the Checkin / Demob tent or call 530-629-1679. This includes those who do not have a smartphone.

Go to the following locations where the Unit Leader will electronically sign off on your demob:

- -ORLEANS GROUND SUPPORT *** (Do this prior to Weed Wash) ***
- -WEED WASH
- -SUPPLY
- -COMMUNICATIONS
- -TIME (LAST)

Contact Finance at the listed numbers to ensure all shift tickets and CTR's are completed: Equipment Time (530) 629-1678, Personnel Time (530) 629-1675

RESOURCES TRAVELING THROUGH YREKA TO HIGHWAY 5
FOR TIME AND DEMOB - NO NEED TO COME TO WILLOW CREEK ICP

* EQUIPMENT TIME*

Finance will generate the Emergency Equipment - Use Invoice (OF-286) and e-mail OF-286 to company owner for review and signature.

* PERSONNEL TIME*

Finance will generate the Incident Time Report(s) (OF-288) and e-mail OF-288 to designated contact for review.

When finished with the items above, return to the Check-in / Demobtent to verify no other information is needed.

Travel Itinerary for After Demob Process

Last, use the QR Code to complete the "Travel Itinerary for After Demob Process", QR Code Form, OR STOP at the Demob / Check-in tent to verbally report your travel itinerary.

RESOURCES TRAVELING SOUTH THROUGH WILLOW CREEK

After all of the above stops, EXCEPT for TIME and DEMOB, have been completed. Travel to Willow Creek ICP.

TIME - Overhead, or ONE PERSON from each Vendor or Crew will be requested to visit Finance (Equipment Time or Personnel Time) for payment processing.

DEMOB (LAST) - STOP AT THE DEMOB TRAILER to use the QR Code to complete the "Travel Itinerary for After Demob Process", QR Code Form, OR to verbally report your travel itinerary.

TRAINING SPECIALIST MESSAGE RED SALMON COMPLEX AUGUST 8, 2020

Trainee Check-In Made Easy!

USE THE CODE BELOW TO CHECK IN AS A TRAINEE. ENTER ALL YOUR TRAINING INFORMATION STRAIGHT FROM YOUR CELL PHONE!

PLEASE LET US KNOW A FEW DAYS IN ADVANCE BEFORE YOU ARE READY TO LEAVE THE INCIDENT SO WE CAN SEND YOU THE PROPER FORMS ELECTRONICALLY.

IF YOU HAVE ANY QUESTIONS PLEASE CONTACT ME.

THANK YOU,

Human Resource Message Red Salmon Complex August 8, 2020

HUMAN RESOURCE MESSAGE

TRANSITIONS AND REUNIONS

As you reunite with loved ones, friends and co-workers consider a smooth transition. You have been gone for a while and your loved ones, friends and co-workers have done a good job fulfilling your role during your absence. If possible, slowly assert yourself as you re-establish your position.

SMOOTH TRANSITIONS AND REUNIONS INVOLVE:

- © Appreciating the efforts of others
- © Communicating to understand the current state
- © Trusting in one another
- © Rebuilding relationships

Feel free to call/text or come by the HRSP yurt if you have questions, concerns, or just want to chat.

Adam Alvarez - (HRSP) - (707) 373-8715

MINIMUM IMPACT SUPRESSION TECHNIQUES (MIST)

generations.

National Wilderness Preservation System

Fire Management Tool Box on Wilderness.Net

of disposal (6"-8" hole) short term. In larger camps locate community latrines 300' from water.

Firefighter and public safety is always the first priority in

When evaluating fire management actions, the potential

considered before, and given significantly more weight than, economic efficiency and convenience. Unless

threatened, only those actions that preserve wilderness

character and/or have localized, short-term adverse impacts to wilderness character should be implemented.

any suppression action, including operations in wilderness. Use of MIST provides guidelines for preserving wilderness areas for present and future

degradation of wilderness character should be

human life or private property is immediately

- Designate wash areas away from streams, and provide for gray water disposal. Do not use soap, shampoo, or other chemicals near waterways.
- Store food away from camp and so that it is not accessible to wildlife.
- Store garbage so that it is not accessible to wildlife, and remove it as frequently as possible.
- Use stoves to cook when possible. Minimize the
 use of campfires, and use either a pit or mound
 ring fire with dead or downed small diameter
 firewood. Do not build rock ring campfires. An old
 fire shelter placed under the coals helps protect
 the soil.
- Limit travel ways within, to, and from camp.

PERSONAL SPIKE CAMP CONDUCT

- · Select durable sites for tents.
- Do not clear vegetation or dig trenches to create bedding sites.
- Pack out all garbage, including candy wrappers, cigarette butts, and flagging.
- · Carry water and bathe away from lakes and streams.
- · Do not use nails in trees or limb trees for bedding.
- Evaluate the short and long term impacts of your decisions.

REPAIR

- Remove signs, flagging, garbage, and equipment used during fire suppression.
- Restore disturbed areas.
- Scarify the top 2-4" of soil in heavily compacted areas and scatter needles, twigs, branches, over the area.
- Rehabilitate newly established trails on slopes <6%, water bar trails created on steeper slopes.
- Scatter cut material and camouflage cut surfaces with dirt.
- Do not use non-native materials, avoid introducing invasive species.

FIRELINE CONSTRUCTION

- Take advantage of natural barriers wherever possible.
- Use cold-trail and/or wet line when appropriate.
- If the decision is made to construct line, use only the width and depth necessary for halting the fire spread. Minimize ground disturbance.
- Minimize bucking and cutting of trees to establish fire line; build line around logs when feasible and effective.
- Limb vegetation only to the extent necessary to stop fire spread.
- · Avoid cutting live trees whenever possible.
- As an alternative to felling, consider allowing ignited trees and snags to burn themselves out.
 Ensure adequate safety measures are communicated to those affected by this decision.
- If burning trees or snags pose a serious threat of spreading firebrands, extinguish the fire with water and/or dirt wherever possible.

AIR OPERATIONS

Limit retardant or foam use, use water instead.
 If retardant and foam is appropriate, avoid drops near water.

HELISPOTS

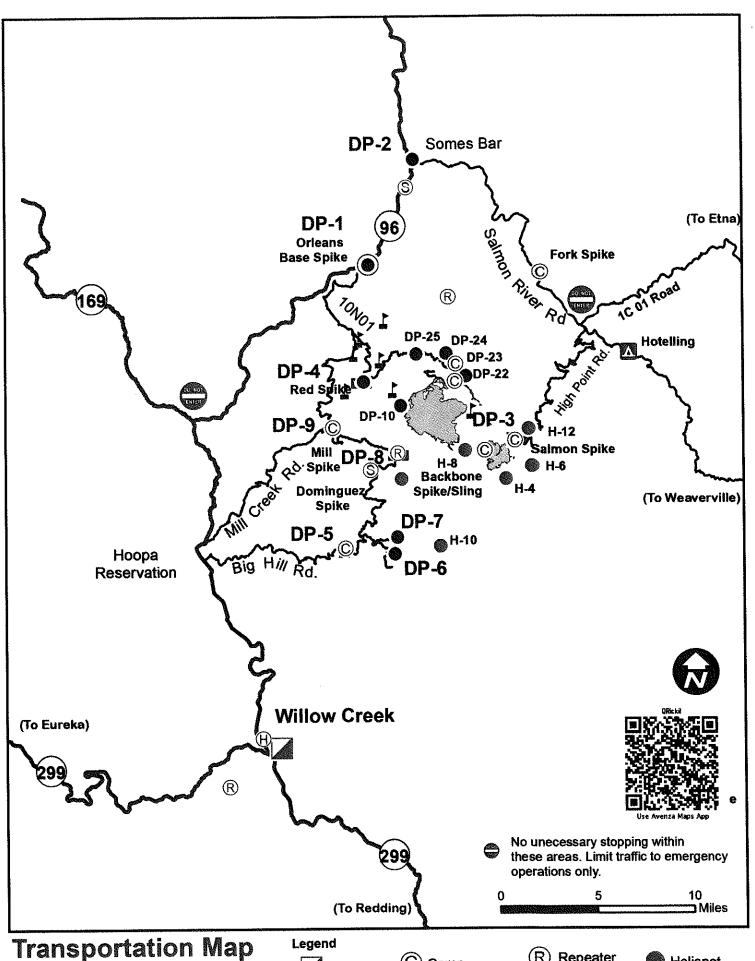

- Minimize the number of helispots in wilderness.
 Use alternate sites outside wilderness when possible or consider using pack strings (mules).
- · Use natural openings as much as possible.
- Size the helispots for the appropriate size helicopter.
 Consider long line remote hook operations instead of helispots for logistical support.

SPIKE CAMPS

- Minimize the use of spike camps in wilderness.
 If spike camps are needed, use existing camp sites where available.
- Avoid camping in wet meadows, along streams or on lake shores. Resource Advisors can help identify suitable sites.
- Layout camp carefully from the start, identify areas for cooking, sleeping, washing, latrines and water supplies.
- In small camps individuals can use "cat hole" method
