INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
RED SALMON COMPLEX	Date/Time From:	Date/Time To:
	08/09/2020 0700 SUN	08/09/2020 1900 SUN
3. Objective(s):		
Management Objectives:		
-Ensure firefighter and public safety by using strafollowing COVID-19 mitigation action.	ategies and tactics that mitigate kn	own and anticipated hazards while
-Protect and understand the cultural values and utilizing MIST in the wilderness area.	natural resources in the fire area to	o create a risk-based decisions while
-Maintain and enhance relationships with represe and the general public.	ented agencies, local tribe council :	stakeholders, local landowners,
-Provide timely and accurate fire information to c	ooperators and the affected comm	unities.
-Effectively manage cost by implementing strateg	gies and tactics that have a high pr	obability of success.
Control Objectives: Keep the Fire:		
 West of Battle Creek Trail, North of Soldier Creek Trail, East of Packsaddle Ridge and, South of Shasta - Trinity / Klamath National I 	Forest boundary.

Red Salmon Complex Weather Forecast

FORECAST NO: 10

UNIT: Six Rivers / Shasta Trinity

SHIFT DATE: Sunday, August 9, 2020 PREDICTION FOR: 0600 - 0600

FORECAST ISSUED: 2000 hrs. 8/8/2020

SIGNED:

Jon Bonk: jon.bonk@noaa.gov

Incident Meteorologist

Call or Text Obs to: (240)778-5287

*** Red Flag Warning Today and Monday for Dry and Very Unstable Conditions ***

WEATHER DISCUSSION: The atmosphere is unstable enough today where intense heat WILL break the weak midlevel inversion and produce a convective column. Temperatures are hotter and drier today after poor humidity recovery and warm ridge temperatures last night. Expect ridge winds to make a diurnally driven easterly to westerly reversal around mid-day as we've seen several times in the last week. Afternoon/evening winds and the unstable conditions would likely transport fire brands toward the North-Northeast in the afternoon before shifting toward the east and finally east-southeast by 1800 hours. Conditions become very hot and unstable on Monday and am expecting the mid-level inversion will break and allow significant ventilation during the afternoon and evening hours. Additionally, thunderstorms may be in the vicinity of Weaverville Helibase on Monday.

Today (0600-1800):

Weather: Sunny and hot. Patchy low smoke over the fires.

High Temperatures: Red Fire: 84-93°; Salmon Fire 82-86°.

Humidity: Red Fire 22-29%; Salmon 28-32%; near 1300 hrs, then slowly rising through 1800 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 0-3 mph until 1000, then terrain driven 4-8 mph.

Upper Slopes: Northeast 4-7 mph until 1200, becoming West then Northwest 5-8 mph with gusts up to 15 mph.

LAL: 1 Chance of Wetting Rain (0.10"): 0%

Stability: Low valley inversion lifts around 1000 hrs. Prolonged intense heat will break the mid-level inversion.

Afternoon Mixing Height: Valleys: 5,000 feet AGL. Ridges: 9,000 feet AGL if ventilating.

Tonight (1800-0600):

Weather: Clear. Smoke settling across the fire area drainages.

Low Temperatures: Red Fire: 64-68°; Salmon Fire: 67-73°.

Humidity: Red Fire: Peaking at 45-50% near 2300 hrs, then falling to 25-30% by 0600 hrs.

Salmon Fire: Peaking at 40-45% near 2300 hrs, then falling to 23-27% by 0600 hrs.

20 Foot Winds:

Lower/Mid Slopes: Variable 3-5 mph until 2300 hrs, then drainage 4-6 mph.

Ridges: Northwest 5-8 mph with gusts to 15 mph until 2200 hrs, then Northeast 5-8 mph.

LAL: 1 Chance of Wetting Rain (0.10"): 0%

Inversion: Strong inversion/thermal belt centered around 4,000 ft MSL.

Monday: Very hot. Areas of smoke. <u>Full ventilation possible.</u> Thunderstorms possible near Weaverville Helibase. Max Temps: 83-94°. Afternoon RH: Red Fire 20-27%, Salmon Fire 21-25%. Afternoon Winds - Lower Slopes: Variable/Terrain Driven. Upper slopes: West-Northwest 5-8 mph.

<u>Tuesday and Wednesday Outlook:</u> Gradual cooling with afternoon humidity rising to 30-35% by Wednesday. Continued moderate to poor humidity recovery. Conditions becoming less unstable with mixing heights falling to 7,000 feet Tuesday and 6,000 feet on Wednesday.

Weather near the fires with change from 24 hours ago:

WEATHER SUMMARY:

DISCUSSION... The atmosphere is unstable enough today where intense heat WILL break the weak midlevel inversion and produce a convective column. Temperatures are hotter and drier today after poor humidity recovery and warm ridge temperatures last night. Expect ridge winds to make a diurnally driven easterly to westerly reversal around mid-day as we've seen several times in the last week. Afternoon/evening winds and the unstable conditions would likely transport fire brands toward the North-Northeast in the afternoon before shifting toward the east and finally east-southeast by 1800 hours. Conditions become very hot and unstable on Monday and am expecting the mid-level inversion will break and allow significant ventilation during the afternoon and evening hours. Additionally, thunderstorms may be in the vicinity of Weaverville Helibase on Monday.

See Spot Weather Forecast for details

FIRE BEHAVIOR

GENERAL

<u>Fire activity will continue to increase today with dry fuels and a weak mid-level inversion</u>. Heat generated from the fire or from burn out operations has potential to break the inversion layer leading to an increase fire activity. Rapid rates of spread with torching, crowning and long-distance spotting should be expected if a convection column develops. Otherwise expect to see surface fire spread with upslope runs when in alignment with slope.

<u>Spotting distance</u>: up to .3 of a mile. <u>Probability of ignition</u>: Near 90%.

Predicted ERC: 81st percentile Predicted BI: 75th percentile

Timber ROS: 7-12 ch/hr. Timber FL: 6-10 feet Brush ROS: 1-3 ch/hr. Brush FL: 1-4 feet

SPECIFIC

SPECIFIC FIRE BEHAVIOR:

Branch I (Red): The fire continues to spread and burn actively. Surface fire spread with single and group torching, running and spotting should be expected with slope/wind alignment on all flanks.

Branch V (Salmon): Large concentrations of heavy fuels continue to burn near the line will cause spotting. Interior pockets will continue to burn as the fire consumes available fuels.

Branch VII (Packsaddle Ridge): The fire has crossed Red Cap Creek drainage and is on a very steep northeast facing slope. Divisions U/W can expect active fire behavior with terrain driven runs, torching and spotting.

AIR OPERATIONS

Low level inversion lifts around 1000 hrs. Smoke will impact aviation on all Branches.

SAFETY

Another day of active burning conditions is expected, know the locations of your escape routes and safety zones.

6. Control Operations/Work Assignments:

Continue to scout the ridge for line construction by dozers.

7. Special Instructions:

Utilize Mist tactics. All line resources will spike overnight.

ID helispots and drop points, get lat-longs. Backhaul trash and excess equipment.

Utilize READ's for Cultural Resources concerns.

Do not post lookouts on any bed rock out cropping without first getting clearance from REAF or READ.

- **ARCH / REAFs listed in Division U are shared between all divisions within Branch VII.**
- **ARCHs / REAFs** will check in / out with DIVS when entering and leaving their divisions.**

Controlled Unclassified Information/Basic FINAL

THE IMPORTANCE OF CALCORD AND AIR GUARD IN YOUR RADIO

CALCORD AND AIR GUARD ARE INCLUDED IN YOUR RADIO FOR YOUR SAFETY AND THE SAFETY OF YOUR FELLOW FIREFIGHTERS.

CALCORD IS THE DE FACTO AIR TO GROUND FREQUENCY FOR EMS HELICOPTERS IN THE STATE OF CALIFORNIA. AIR AND GROUND AMBULANCES WILL USE CALCORD TO COORDINATE WITH GROUND RESOURCES WHEN ARRIVING ON THE SCENE OF AN EMS INCIDENT. WHEN USING CALCORD, TRANSMIT TONE 6 (156.7) MUST BE UTILIZED.

AIR GUARD IS A "BROKEN ARROW" CHANNEL TO COMMUNICATE WITH AIR RESOURCES ASSIGNED TO AN INCIDENT IN AN EMERGENCY. WHEN USING AIR GUARD, **TONE 1 (110.9) MUST BE UTILIZED**.

BR/DIV	ACT	HAZARDOUS IONS/CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES			
All	A	Air Operations	 Don't plan on air resources for medical transport or resupply. Follow "Aviation Watch-out Situations" IRPG P.46. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources. Ensure Drone Operations are coordinated with air resources 			
All		Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Post road guards when appropriate. 			
All	Extende	d Medical Extraction Times	 Identify helispots and communicate Lats/Longs to DIVS. Be familiar with the Medical Plan and communicate 8 line promptly. Evaluate the necessity to send personnel into areas with limited access. Be aware of weather conditions (i.e. smoke inversions, high winds etc.), that could affect the ability of helicopters to reach you. Don't rely on helicopters exclusively. 			
All	Steep Ter	rain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. 			
All	Dr	ving & Traffic	 Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters and honk horn when backing. Follow Driving LCES (Lights, Chock blocks, Emergency brake, & Seat belts). Use headlights, observe speed limits, use spotters when backing, avoid distractions (i.e. eating, phones, radios), yield to pedestrians, and use the 3 second rule for following distance. Use chock blocks, turn wheels into hill. Ensure that windshields are kept clean. 			
A/D	Firing Operations		 For aerial firing, prepare and follow the Project Aviation Safety Plan. Ensure all personnel are aware of firing operation that may affect them. Ensure aerial/ground ignition plans are developed and personnel are briefed. RH is lowest late at night and early in the morning. Monitor for changes in fire behavior. 			
Division A/U/W & Salmon Contingency	Heavy Equipment Operations		 Watch for diurnal wind shifts. Ensure HEQB scout narrow roads for transport travel. Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Avoid working below heavy equipment. 			
All	COVID-19 Environment		 Utilize social distancing (6 feet). Wear a facemask if you can't social distance. Maintain the "module of one" concept. Disinfect vehicle interiors, and commonly touched surfaces frequently. Do not share devices (i.e. cellphones, laptops, radios etc.). Utilize technology to communicate while maintaining social distance. Wash your hands frequently.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

For Day

INCIDENT: Red Salmon Complex

DATE: August 09, 2020

Major Hazards and Risks:

- Driving & Traffic: Hwy 96, and narrow, congested roads in fire area.
- Dehydration: remember to drink 1 quart an hour
- Communication: Ensure you communicate with your supervisor and adjoining forces

Fire Order of the Day: Give clear instructions and insure they are understood.

- Task = What is to be done
- **Purpose** = Why it is to be done
- End State = How it should look when done

NEED MORE INFO????.....Check your IRPG, Page ix (white pages)

Operational Leadership

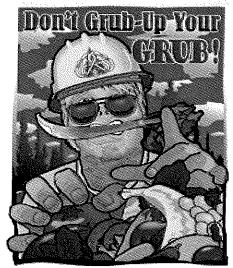

- TAKE CHARGE of assigned resources
- MOTIVATE with a "CAN DO SAFELY" attitude
- DEMONSTRATE INITIATIVEtake action
- COMMUNICATE.....give specific instruction
- SUPERVISE.....be accountable for your actions

"Hey, I'm not crazy. ... Sure, I let him drive once in a while, but he's never, never off this leash for even a second."

Personal Hygiene(COVID-19)

- Wash your hands every opportunity
- Don't share personal items
- Be proactive....evaluate daily!
- Get 8 hours of rest each night

Wash-Up Belore You Chow-Down!

Thanks from your Safety Team!!

Greg Marfil Pedro Martinez Nick Bianchini(t)

Jeff Hammes (Orleans Base Camp)

Nuiso Sorzer)

Don't forget.....

BE ALERT....Situation Awareness KEEP CALM.....Leadership THINK CLEARLY....Risk Management ACT DECISIVELY....Confidence!!!!

FINANCE MESSAGE

Thank you for continuing to submit your times in the safest way possible. The options for submitting your CTR's and Shift Tickets are:

- Electronic fillable PDF CTR/Shift Tickets. QR codes to the fillable forms are included below. If you do
 not have QR capabilities Finance can e-mail you the forms directly. Make sure the forms are signed
 by the supervior before submitting to Finance. (In order to use fillable forms you must have some
 version of Adobe Acrobat downloaded on your device.)
- Hard Copy CTR/Shift Ticket. You may fill out a hard copy CTR/SHIFT Ticket, snap a picture and email/text that in to Finance OR you may turn in your actual hard copy as usual. If you send in a picture please make sure it is legible and includes the supervisor's signature at the bottom. (If you are texting pictures to Finance, enter the email address shown below where you would normally enter a phone number).

PLEASE:

- Crews need to include a manifest with their first CTR.
- Try to submit your times at least every other day. There is a drop box at Orleans Base Camp in the check-In tent to drop off your time.
- Write your email or text # on your CTR.
- Hazard pay justifications are required on your CTR's. "H=Hazard" is not sufficient.

WHEN YOU ARE CLOSE TO DEMOB:

- Follow the demob plan instructions based on your travel route home. This will determine whether your demob will be in-person or remote.
- Submit all time documentation (including travel home) ahead of demob.
- Send only one representative per resource to the Finance trailers.
- Abide by scheduled demob time or call Finance for an unscheduled demob.

RED SALMON DEMOB PROCESS

Steps for the Demob Process. Note this is a paperless process. If you have difficulties with your phone or need help, please ask the person in the Checkin / Demob tent or call 530-629-1679. This includes those who do not have a smartphone.

Demob Process

Go to the following locations where the Unit Leader will electronically sign off on your demobi

- -ORLEANS GROUND SUPPORT *** (Do this prior to Weed Wash)***
- -WEED WASH
- -SUPPLY
- -COMMUNICATIONS
- -TIME (LAST)

Contact Finance at the listed numbers to ensure all shift tickets and CTR's are completed: Equipment Time (530) 629-1678, Personnel Time (530) 629-1675

- ***RESOURCES TRAVELING THROUGH YREKA TO HIGHWAY 5***
 FOR TIME AND DEMOB NO NEED TO COME TO WILLOW CREEK ICP
- * EQUIPMENT TIME*

Finance will generate the Emergency Equipment - Use Invoice (OF-286) and e-mail OF-286 to company owner for review and signature.

* PERSONNEL TIME*

Finance will generate the Incident Time Report(s) (OF-288) and e-mail OF-288 to designated contact for review.

When finished with the items above, return to the Check-in / Demobtent to verify no other information is needed.

Travel Itinerary for After Demob Process

Last, use the QR Code to complete the "Travel Itinerary for After Demob Process", QR Code Form, OR STOP at the Demob / Check-in tent to verbally report your travel itinerary.

RESOURCES TRAVELING SOUTH THROUGH WILLOW CREEK

After all of the above stops, EXCEPT for TIME and DEMOB, have been completed. Travel to Willow Creek ICP.

TIME - Overhead, or ONE PERSON from each Vendor or Crew will be requested to visit Finance (Equipment Time or Personnel Time) for payment processing.

DEMOB (LAST) - STOP AT THE DEMOB TRAILER to use the QR Code to complete the "Travel Itinerary for After Demob Process", QR Code Form, OR to verbally report your travel itinerary.

Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

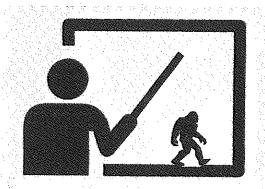

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

Questions?

OES Assistant Chief Pat Titus 916-634-9225

Training Message

RED SALMON
COMPLEX

<u>AUGUST 9, 2020</u>

Please sign in your trainees to get proper documentation

NEW TRAINEES USE THE CODE BELOW TO GET CHECKED INTO THE TRAINING DATABASE.

PLEASE LET US KNOW A FEW DAYS IN ADVANCE BEFORE YOU ARE READY TO LEAVE THE INCIDENT SO WE CAN SEND YOU THE PROPER FORMS ELECTRONICALLY.

IF YOU HAVE ANY QUESTIONS PLEASE CONTACT ME.

THANK YOU,

NICK BALENT TNSP (t) 707.298.1805 nicholas.balent@usda.gov

Red Salmon Complex Sunday, August 9, 2020

HUMAN RESOURCE MESSAGE

RESPECT

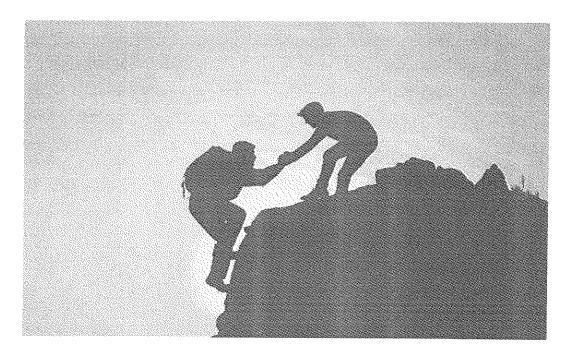

I am encouraged with my observation of the standard of behavior displayed on this assignment, where positive interaction with each other seems to be the rule and not the exception.

As society wrestles to depart from what we've known in the past as normal, this camp expresses respect of cultural diversities, reflective of those individuals who make up our society, which you all appeared to recognize, accept and respect.

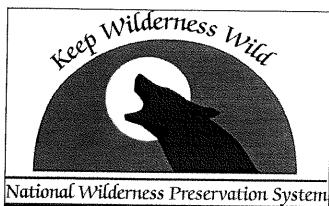

I applaud your commitment towards treating each other with dignity and respect in camp and on the line. Your professionalism has been second to none.

Be safe ~ Have a great shift.

Feel free to call/text or come by the HRSP yurt if you have questions, concerns, or just want to chat. ~ HRSP Trainee: Adam Alvarez – (707) 373-8715

MINIMUM IMPACT SUPRESSION TECHNIQUES (MIST)

Fire Management Tool Day at Male

Fire Management Tool Box on Wilderness.Net

Firefighter and public safety is always the first priority in any suppression action, including operations in wilderness. Use of MIST provides guidelines for preserving wilderness areas for present and future generations.

When evaluating fire management actions, the potential degradation of wilderness character should be considered before, and given significantly more weight than, economic efficiency and convenience. Unless human life or private property is immediately threatened, only those actions that preserve wilderness character and/or have localized, short-term adverse impacts to wilderness character should be implemented.

FIRELINE CONSTRUCTION

- Take advantage of natural barriers wherever possible.
- Use cold-trail and/or wet line when appropriate.
- If the decision is made to construct line, use only the width and depth necessary for halting the fire spread. Minimize ground disturbance.
- Minimize bucking and cutting of trees to establish fire line; build line around logs when feasible and effective.
- Limb vegetation only to the extent necessary to stop fire spread.
- Avoid cutting live trees whenever possible.
- As an alternative to felling, consider allowing ignited trees and snags to burn themselves out.
 Ensure adequate safety measures are communicated to those affected by this decision.
- If burning trees or snags pose a serious threat of spreading firebrands, extinguish the fire with water and/or dirt wherever possible.

AIR OPERATIONS

Limit retardant or foam use, use water instead.
 If retardant and foam is appropriate, avoid drops near water.

HELISPOTS

- Minimize the number of helispots in wilderness.
 Use alternate sites outside wilderness when possible or consider using pack strings (mules).
- Use natural openings as much as possible.
- Size the helispots for the appropriate size helicopter.
 Consider long line remote hook operations instead of helispots for logistical support.

SPIKE CAMPS

- Minimize the use of spike camps in wilderness.
 If spike camps are needed, use existing camp sites where available.
- Avoid camping in wet meadows, along streams or on lake shores. Resource Advisors can help identify suitable sites.
- Layout camp carefully from the start, identify areas for cooking, sleeping, washing, latrines and water supplies.
- In small camps individuals can use "cat hole" method

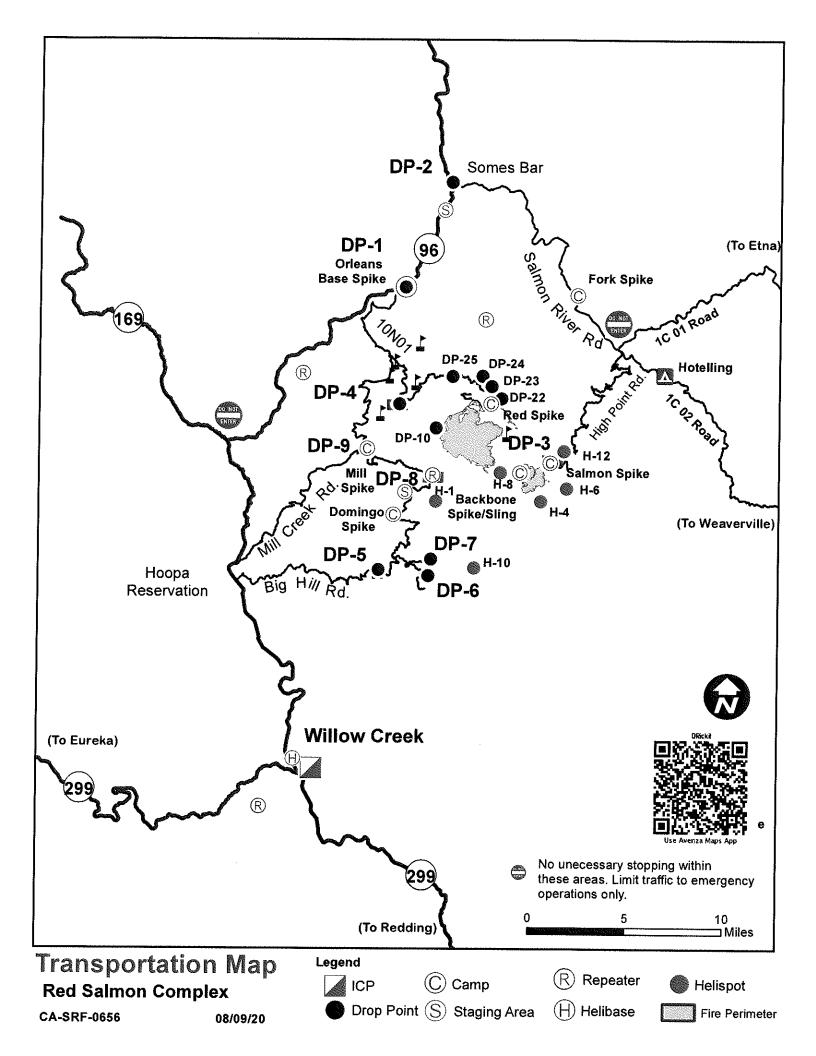

- of disposal (6"-8" hole) short term. In larger camps locate community latrines 300' from water.
- Designate wash areas away from streams, and provide for gray water disposal. Do not use soap, shampoo, or other chemicals near waterways.
- Store food away from camp and so that it is not accessible to wildlife.
- Store garbage so that it is not accessible to wildlife, and remove it as frequently as possible.
- Use stoves to cook when possible. Minimize the
 use of campfires, and use either a pit or mound
 ring fire with dead or downed small diameter
 firewood. Do not build rock ring campfires. An old
 fire shelter placed under the coals helps protect
 the soil.
- Limit travel ways within, to, and from camp.

PERSONAL SPIKE CAMP CONDUCT

- · Select durable sites for tents.
- Do not clear vegetation or dig trenches to create bedding sites.
- Pack out all garbage, including candy wrappers, cigarette butts, and flagging.
- Carry water and bathe away from lakes and streams.
- Do not use nails in trees or limb trees for bedding.
- Evaluate the short and long term impacts of your decisions.

REPAIR

- Remove signs, flagging, garbage, and equipment used during fire suppression.
- Restore disturbed areas.
- Scarify the top 2-4" of soil in heavily compacted areas and scatter needles, twigs, branches, over the area.
- Rehabilitate newly established trails on slopes
 6%, water bar trails created on steeper slopes.
- Scatter cut material and camouflage cut surfaces with dirt.
- Do not use non-native materials, avoid introducing invasive species.
