## **...RED FLAG WARNING FOR ABUNDANT LIGHTNING TODAY...**

**WEATHER DISCUSSION:** Midlevel moisture and an impulse of energy aloft will combine to promote thunderstorm activity around the region today. A band of showers and thunderstorms is expected to pass through the area around midday. A few cells may produce isolated dry strikes and some very light rain possible on the perimeter. Temperatures will be slightly cooler today and RH levels will be slightly higher. A slight risk of outflow from local cells exists and will be closely monitored...otherwise surface winds remain light and mainly terrain driven.

### **Today (Sunday 0600-1800):**

**Weather:** Mostly cloudy with showers and isolated thunderstorms likely from late morning through the afternoon.  
**High Temperatures:** Midslope 2,500ft: 94-98°; Upper Slope/Ridge 5,000 feet and higher: 83-86°.  
**Humidity:** Below 4,500 feet: 20-25%, lowest in afternoon.  
4,500 feet and higher: 23-27% lowest mid morning...rising in afternoon.

### **20 Foot Winds:**

**Lower/Mid Slopes:** Downslope or east 1-3 mph until 1200, then terrain driven or west 4-8 mph.  
**Upper Slopes:** East 1-4 until 1200, becoming West 4-6 mph until sunset.

**LAL:** 2                      **Chance of Wetting Rain (0.10"): 10%**

**Stability:** Low valley inversions lift 1200. Mid-level inversion will hold in place through at least 1500 hrs.  
**Afternoon Mixing Height:** Valleys: 2,500 feet AGL. Ridges: 7,000 feet AGL, if column breaks the inversion.  
**Smoke Transport:** Toward the north.

### **Tonight (1800-0600):**

**Weather:** Partly cloudy. A slight chance of an evening shower or thunderstorm.

**Low Temperatures:** Valley-Midslope : 53-59°; Upper slope/Ridge: 60-64°.  
**Max Humidity:** Below 4,500 feet: Rising to 48-58%.  
Above 4500 feet: 45 to 50%.

### **20 Foot Winds:**

**Lower/Mid Slopes:** West 3-5 mph until 2300 hrs, then east or downslope 1-4 mph.  
**Ridges:** South and southeast 4-7 mph with Gusts to 15-18 mph through sunrise.

**LAL:** 1    **CWR: (0.10"): 0%**

**Inversion:** Moderate inversion/thermal belt centered around 4,500 ft MSL.

**Monday:** High clouds and a little stronger winds early in the day. Areas of smoke. Max Temps: 84-95°. Minimum RH: 24-28%. Afternoon Winds - Lower Slopes: Variable/Terrain Driven. Upper slopes: South West at 6 mph.

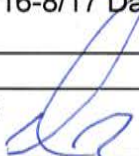

**Tuesday and Wednesday Outlook:** Partly Cloudy. Temperatures in the mid-80s to lower 90s. Afternoon humidity 22-32%. Southwest winds 3-6 mph with gusts around 12 mph.

### INPUTS

#### WEATHER SUMMARY:

**\*\*\*RED FLAG WARNING FOR ABUNDANT LIGHTNING TODAY\*\*\***

Hot and dry weather will be persistent over the next few days. Expect high temperatures and low humidity. A predicted thunderstorm will travel through the region mid-day. Isolated dry lightning strikes pose a significant threat to receptive fuel beds. High possibility of outflow winds associated with the storm.

**\*See Weather Forecast for details\***

### FIRE BEHAVIOR

#### GENERAL

We will be entering into a moderate to high risk burn environment, due to lightning, increasingly hot temperatures, and RH below 30% (fuels become more receptive, control problems, long range spotting and single/group torching). Thunderstorm outflow winds can cause flare-ups, erratic fire behavior and blow embers across containment lines. Once the inversion breaks, approx. 1500, expect an increase in fire activity where clear air exist. Areas on the incident that remain sheltered will continue to smolder, back and make short runs where slope and wind align.

Large fires become more frequent when 1000 hr fuels drop below 12%, when BI exceeds 66 and ERC exceeds 50

Forecasted for 8/15/20- 1000 hr. fuels 6 : BI 61 : ERC 82 : Probability of ignition 70-80% : Spotting .2 mile

#### SPECIFIC

##### SPECIFIC FIRE BEHAVIOR:

##### (Branch I)

**Divisions A, D, K:** Firing from the Division Alpha break to Division Yankee should expect backing fire with the potential of upslope runs and spotting. The spot in Division Delta (Prospect Peak) will continue to make upslope runs, creeping and backing while under an inversion. Once the inversion lifts fire activity will increase especially in the areas of Whiteys Peak and Indian Rocks. Division Kilo will be unstaffed.

##### (Branch V)

**Divisions M, N, O, P:** Fire activity should be minimal the areas of the Salmon Mtn., the Salmon Fire and Devils Backbone. Be mindful that where open line exists, the potential for an increase in fire behavior is present. Division Papa will be unstaffed.

##### (Branch VII)

**Divisions Y, W, U, R:** All the Divisions in the Branch except for Romeo will experience active fire behavior consisting of upslope runs when in alignment, lateral movement, backing and slope reversals. When clear air is present the intensity will increase. The areas of Packsaddle Ridge, Mills Creek gap and Black Mountain will be the most effected. Containment lines may become challenged. The predicted West wind during the burn period should reinforce the planned firing operation.

**Night Operations (All Divisions):** A strong inversion will remain in place overnight. The thermal belt will be centered at approx. 4,500 ft. Fire behavior should be minimal with smoldering and creeping.

#### AIR OPERATIONS

Forecasted thunderstorms will limit air operations, plan accordingly.

#### Safety Message

Thunderstorms may be noted by a sudden reversal in wind.

# Red Salmon Complex - Safety Message

INCIDENT # CA-SRF-000656

DATE: 08-16/17-20 TIME: 0600-0600 Day/Night Shift

## Communications

- Share your Situational Awareness (hazards, changes, etc.) to those who also have a need.
- Radio Communications may be poor in some areas: use human repeaters as needed.
- Ensure all personnel are familiar with the ICS 205 incident communications plan and the ICS 206 medical plan.
- Make sure all resources have radios cloned appropriately.
- Ensure that non-agency resources understand radio use and procedures.

## Fight Complacency

- Stay mentally engaged on the task at hand
- Give clear briefings.
- Address complacency in your daily AAR.
- Clearly identify the day's mission and purpose.
- Use the "Buddy System" and watch out for each other. If you see something, say something.
- Ask yourself: "Are you doing the job safely, the way you were trained?"
- Look for a "new" or "fresh" approach to repetitive assignments.

## Driving & Fatigue

- Make sure you are getting your rest when you can! Stick to work/rest guidelines.
- Fatigue can cause us to mentally stray from the driving task.
- It only takes a second of distraction to lose control of our vehicle. The faster you are traveling, the faster you get in trouble.
- Make sure you recognize when you are too tired to drive!
- Don't tough it out and put yourself and your passengers at risk!
- Slow down, take breaks, and talk to your passengers. If possible, keep an alert passenger in the front seat next to you. Know your limits.

## COVID-19 INCIDENT STATISTICS (to date)

Symptomatic Personnel: 8    Positive # of Cases: 0

### As a Reminder:

- Cover your **nose and mouth** with facial covering.
- Maintain at least 6 feet of physical distancing when feasible.
- Practice good hygiene. Wash hands often.
- Clean and disinfect frequently touched surfaces frequently.
- Monitor your health daily. Be alert for symptoms.

## HUMAN RESOURCE MESSAGE

### Self-Control

Self-control is strength. Calmness is mastery,  
You must get to a point where your mood doesn't shift based on the actions of  
someone else.

Don't allow others to control your emotions and in doing so overpower your  
intelligence.

Be kind, patient and respectful to one another as we share a common goal and have  
many days left to get it done together. Anything else is not acceptable.

Be safe ~ Have a great shift.

Feel free to call/text HRSP if you have questions, concerns, or just want to chat. ~  
HRSP: Adam Alvarez – (707) 373-8715

## STANDARD OPERATING PROCEDURES—FINANCE SECTION

---

### **WORK REST CYCLE**

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

### **OPERATIONAL SHIFTS**

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

### **DUTY STATUS**

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs.). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

### **PERSONNEL/EQUIPMENT TIME REPORTING**

Personnel time will be reported to the Time Unit daily or every other day once they are signed by the next level supervisor. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily or every other day and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

### **MEAL AND OTHER WORK BREAKS**

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation.

## FINANCE MESSAGE

Thank you for continuing to submit your times in the safest way possible. The options for submitting your CTR's and Shift Tickets are:

- Electronic fillable PDF CTR/Shift Tickets. QR codes to the fillable forms are included below. If you do not have QR capabilities Finance can e-mail you the forms directly. Make sure the forms are signed by the supervisor before submitting to Finance. (In order to use fillable forms you must have some version of Adobe Acrobat downloaded on your device.)
- Hard Copy CTR/Shift Ticket. You may fill out a hard copy CTR/SHIFT Ticket, snap a picture and email/text that in to Finance OR you may turn in your actual hard copy as usual. If you send in a picture please make sure it is legible and includes the supervisor's signature at the bottom. (If you are texting pictures to Finance, enter the email address shown below where you would normally enter a phone number).

### PLEASE:

- Crews need to include a manifest with their first CTR.
- Try to submit your times at least every other day. There is a drop box at Orleans Base Camp in the check-in tent to drop off your time.
- Write your email or text # on your CTR.
- Hazard pay justifications are required on your CTR's. "H=Hazard" is not sufficient.

- Submit all time documentation (including travel home) ahead of demob.

# Red Salmon Complex COVID-19 Mitigations

***It is the expectation that all incident personnel will follow the CDC and Agency guidance related to COVID-19.***

- **Maintain physical distance of 6'+.** There is currently no vaccine to prevent the novel coronavirus (COVID-19).
- **The best way to prevent illness is to avoid being exposed to this virus.**
- **The virus is thought to spread mainly from person-to-person.**
  - Between people who are in close contact with one another (within about 6 feet).
  - Through respiratory droplets produced from an infected person.

- **Wash your hands** often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use a **hand sanitizer that contains at least 60% alcohol.** Cover all surfaces of your hands and rub them together until they feel dry.
- **Avoid touching your eyes, nose, and mouth with unwashed hands.**

- **Wear a face covering.** Outside of fireline activity, it is expected that all incident personnel will wear a face covering when social distancing is not possible with those outside your “module as one”. Face coverings are to be worn, in the appropriate manner, within the ICP, Base, and Spike Camps.

**To protect the local communities along Highway 96, under no circumstances will you make any stops. Be prepared to travel non-stop in the areas from Willow Creek to Happy Camp. Expect to see hard closures.**

- ***Conduct personnel health screenings daily and report illnesses to supervisor. COVID-19 symptoms include cough, shortness of breath, trouble breathing or any two of fever, chills, repeated shaking with chills, muscle or body aches, headache, sore throat, new loss of taste or smell, congestion or runny nose, nausea or vomiting, or diarrhea.***

Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

## **EMPHASIS AREAS**

### **Training**

All trainees and trainers are expected to follow the procedures outlined in the California Interagency Incident Management Team 4 Training Expectations – See back page.

### **Evaluations**

All supervisory personnel assigned will complete an ICS 225 Incident Personnel Performance Rating form for their assigned resources according to agency policy or contractual agreement.

### **Injuries/Claims**

Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

### **Work Rest Cycles**

The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16.
