WEATHER DISCUSSION: Thunderstorm activity is reduced today but a slight threat remains. The marine layer will gradually deepen over the next few nights allowing a subtle increase in overnight recoveries while the beginning of a slight cooling trend begins on Tuesday. Valley and midslope winds will remain terrain and diurnally driven while ridge winds remain out of the south but should be a little lighter today.

Today (Sunday 0600-1800):

Weather: Mid and high cloud cover.
Max Temperature: Below 4,000 ft: 96-102. Above 4,000 ft: 86-92.

LAL: 1 Chance of Wetting Rain (0.10"): 0%

Stability: Low valley inversions lift 1200. Mid-level inversion will hold in place through at least 1500 hrs.
Afternoon Mixing Height: Valleys: 2,500 feet AGL. Ridges: 7,000 feet AGL, if column breaks the inversion.

WEATHER SUMMARY

Hot and dry weather will be persistent over the next few days. Expect high temperatures and low humidity today. A slight chance of thunderstorms remains in the region. A deepening marine layer will aid in overnight recoveries. Ridge winds from the South.

See Weather Forecast for details

FIRE BEHAVIOR

GENERAL

Fuels have become increasingly receptive over the past few days with little recovery in the forecast. As local thresholds are exceeded, the potential for large fire spread and control issues become compounded. If predicted thunderstorms become established, outflow winds can cause flare-ups, erratic fire behavior and blow embers across containment lines. Once the inversion breaks, approx. 1500, expect an increase in fire activity where clear air exist. Areas on the incident that remain sheltered will continue to smolder, back and make short runs where slope and wind align.

Large fires become more frequent when 1000 hr fuels drop below 12%, when BI exceeds 66 and ERC exceeds 50

Forecasted for 8/17/20- 1000 hr. fuels 6 : BI 84 : ERC 79 : Probability of ignition 70% : Spotting .2 mile

SPECIFIC

SPECIFIC FIRE BEHAVIOR:

(Branch I)

Divisions A, D, K: Firing from the Division Alpha break to Division Yankee should expect backing fire with the potential of upslope runs and spotting. The spot in Division Delta (Prospect Peak) will continue to make upslope runs, creeping and backing while under an inversion. Once the inversion lifts fire activity will increase especially in the areas of Whiteys Peak and Indian Rocks. Division Kilo will be unstaffed.

(Branch V)

Divisions M, N, O, P: Fire activity should be minimal the areas of the Salmon Mtn., the Salmon Fire and Devils Backbone. Be mindful that where open line exists, the potential for an increase in fire behavior is present to include spotting and upslope runs. Division Papa will be unstaffed.

(Branch VII)

Divisions Y, W, U, R: All the Divisions in the Branch except for Romeo will experience active fire behavior consisting of upslope runs when in alignment, lateral movement, backing and slope reversals. When clear air is present the intensity will increase. The areas of Packsaddle Ridge, Mills Creek gap and Black Mountain will be the most effected. Containment lines may become challenged. Potential erratic out flow winds can be troublesome for planned firing operations.

Night Operations (All Divisions): A moderate inversion will remain in place overnight. The thermal belt will be centered at approx. 4,500 ft. Fire behavior should be minimal with smoldering and creeping.

AIR OPERATIONS

Low level inversions will lift at approx. 1200, mid-level at approx. 1500.

Red Salmon Complex – Safety Message

INCIDENT #CA-SRF-000656

DATE: 08-17/18-20 TIME: 0600-0600 Day/Night

Foot Travel in Steep Terrain

- When walking through steep and rocky terrain, watch footing and maintain proper spacing.
- Identify safe routes and local conditions.
- Test and use secure footing.
- Watch for over-head hazards, carry tools on downhill side, and wear gloves.
- Treat “hot spots” on feet before they become blisters.

Fatigue/Smoke Effects

- Be alert for signs of fatigue and take breaks as necessary.
- Maintain 2:1 work/rest ratio.
- Monitor incoming resources for level of fatigue.
- Allow for extended rest periods if needed.
- Avoid working in heavy inversions for prolonged periods if possible. Take occasional breaks in clear air to mitigate build up of CO, and CO2.
- ***“Hydrate” to assist in flushing smoke particulates from your system.***

Other Concerns:

- Hazard Trees- Dead trees, snags, leaning trees, burned trees (especially with a burned root system), burned “cat faces”, trees with dead “spike tops”, and large green trees.
- Driving- Unexpected local traffic, bears, speed on rough roads, long narrow single lane roads, steep drop offs, soft shoulders, dust, blind corners.
- Hydration- Hydrate frequently. Avoid energy drinks. Dilute sports drinks. Preplan for drinking water needs.
- Backing- Use a backer, and/or perform a “walk around”.
- Fire Behavior- Follow the 10, mitigate the 18, ensure LCES is in place, constant situational awareness. Maintain accountability at all times.

COVID-19 INCIDENT STATISTICS (to date)

Symptomatic Personnel: **8** Positive # of Cases: **0**

As a Reminder:

- Cover your **nose and mouth** with facial covering.
- Maintain at least 6 feet of physical distancing when feasible.
- Practice good hygiene. Wash hands often.
- Clean and disinfect frequently touched surfaces frequently.
- Monitor your health daily. Be alert for symptoms.

INCIDENT RISK ANALYSIS RED SALMON COMPLEX CA-SRF-000656 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing, or turning around. • Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. • 5mph speed limit in and around ICP, keep your speed down in all areas. • Use warning lights when working on roads or traveling in smoke. • Drive at or below posted speed limits. • Use chock blocks, turn wheels into hill. • Be alert for wildlife.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Do not park vehicles or take breaks under or near hazard trees.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Be alert for rolling rocks, debris, or burning material. • Evaluate necessity to send personnel in areas with limited access. • Post lookouts where feasible.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include low energy, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor ALL resources for level of fatigue. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps to maintain situational awareness for the duration of the incident.
ALL	FIRING OPERATIONS and DEVICES	<ul style="list-style-type: none"> • Follow the chain of command when undertaking burning operations. • Ensure that aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. • Wear and use appropriate PPE. • Initiate burning after ensuring the plan is authorized and understood by all.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness(hazards, changes, etc) to those who also have a need • Radio communications may be poor in some areas. • Ensure all personnel are familiar with the incident communications plan.
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> • Have a purpose for where you drive and what you do. Don't rush into assignments. • Use caution where you park or stage, especially in steep timbered areas. • Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. • Increase SA by trying to see the work area during daylight hours. • Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 46, IRPG. • Don't plan on air resources for tactical support or medical transportation. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Use caution around gas and power lines. • Personal hygiene is #1 when it comes to Poison Oak Prevention. • Pick up and remove all trash from fireline, return to camp and place in dumpsters.
ALL	COVID-19	<ul style="list-style-type: none"> • Utilize social distancing, wear facemasks in camp ALWAYS. • Maintain the "module of one" concept. • Disinfect vehicles, tools, and commonly touch surfaces frequently. • Do not share equipment and wash hands frequently.

Red Salmon Complex COVID-19 Mitigations

It is the expectation that all incident personnel will follow the CDC and Agency guidance related to COVID-19.

- **Maintain physical distance of 6'+.** There is currently no vaccine to prevent the novel coronavirus (COVID-19).
- **The best way to prevent illness is to avoid being exposed to this virus.**
- The virus is thought to spread mainly from person-to-person.
 - Between people who are in close contact with one another (within about 6 feet).
 - Through respiratory droplets produced from an infected person.

- **Wash your hands** often with soap and water for at least 20 seconds, especially after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, **use a hand sanitizer that contains at least 60% alcohol.** Cover all surfaces of your hands and rub them together until they feel dry.
- **Avoid touching your eyes, nose, and mouth** with unwashed hands.

- **Wear a face covering.** Outside of fireline activity, it is expected that all incident personnel will wear a face covering when social distancing is not possible with those outside your “module as one”. Face coverings are to be worn, in the appropriate manner, within the ICP, Base, and Spike Camps.

To protect the local communities along Highway 96, under no circumstances will you make any stops. Be prepared to travel non-stop in the areas from Willow Creek to Happy Camp. Expect to see hard closures.

- ***Conduct personnel health screenings daily and report illnesses to supervisor. COVID-19 symptoms include cough, shortness of breath, trouble breathing or any two of fever, chills, repeated shaking with chills, muscle or body aches, headache, sore throat, new loss of taste or smell, congestion or runny nose, nausea or vomiting, or diarrhea.***

HUMAN RESOURCE MESSAGE

Adaptability is Key

Adapting to COVID mitigation procedures has not been easy for any one of us.

Thank you for your efforts in adapting to these unique circumstances.

Communication and understanding are key and allows us all to be informed and be successful!

“It is not the strongest of the species that survives, nor the most intelligent. It is the one that is most adaptable to change.” Charles Darwin

Be safe ~ Have a great shift.

Feel free to call/text HRSP if you have questions, concerns, or just want to chat. ~

FINANCE MESSAGE

Thank you for continuing to submit your times in the safest way possible. The options for submitting your CTR's and Shift Tickets are:

- **Electronic fillable PDF CTR/Shift Tickets.** QR codes to the fillable forms are included below. If you do not have QR capabilities Finance can e-mail you the forms directly. Make sure the forms are signed by the supervisor before submitting to Finance. (In order to use fillable forms you must have some version of Adobe Acrobat downloaded on your device.)
- **Hard Copy CTR/Shift Ticket.** You may fill out a hard copy CTR/SHIFT Ticket, snap a picture and email/text that in to Finance OR you may turn in your actual hard copy as usual. If you send in a picture please make sure it is legible and includes the supervisor's signature at the bottom. (If you are texting pictures to Finance, enter the email address shown below where you would normally enter a phone number).

PLEASE:

- Crews need to include a manifest with their first CTR.
- Try to submit your times at least every other day. There is a drop box at Orleans Base Camp in the check-in tent to drop off your time.
- Write your email or text # on your CTR.
- Hazard pay justifications are required on your CTR's. "H=Hazard" is not sufficient.

WHEN YOU ARE CLOSE TO DEMOB:

- Follow the demob plan instructions based on your travel route home. This will determine whether your demob will be in-person or remote.
- Submit all time documentation (including travel home) ahead of demob.
- Send only one representative per resource to the Finance trailers.
- Abide by scheduled demob time or call Finance for an unscheduled demob.

STANDARD OPERATING PROCEDURES—FINANCE SECTION

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs.). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit daily or every other day once they are signed by the next level supervisor. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily or every other day and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation.**

- Approval for replacement is the responsibility of the incident agency and may be delegated to the Incident Management Team for IC and FSC.
- If the replacement request is approved, the replacement cost will be limited to cache equivalent value. The requesting resource will complete OF-315 for the Supply Unit.
