"SAFETY is a CORE VALUE to be integrated into ALL incident activities

COMMUNICATION RESPONSIBILITIES

All firefighters have five communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know or are unclear.

Leadership

complete briefings that include a clearly stated "Leader's Intent." All leaders of firefighters have the responsibility to provide

- Task
- Н
- What is to be done
- Purpose

Mop-Up Operations

Balance the risk of exposure to hazards against the mop-up objective potentially achieved.

- Evaluate areas for hazard trees and locate stump holes for avoidance.
- Monitor fatigue; shorten shifts to increase rest where appropriate.
- Provide motivation to workers to maintain situational awareness and avoid complacency.
- Evaluate mop up distances against what is safe and necessary.
- Review and follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4).

COVID-19 INCIDENT STATISTICS (to date)

Symptomatic Personnel: 9 Positive # of Cases: 0

- Be Smart! Stay Apart! Maintain at least 6 feet distance from people when feasible
- Practice good hygiene. Wash hands often and avoid touching your face
- Cover your nose and mouth with a facial covering and cough into your elbow if needed
- Monitor your health and the health of your crew. Follow the Covid-19 Daily Screening Tool. If any symptoms are present, NOTIFY A SUPERVISOR.

August 18/19, 2020	Operational Period: 0600-0600	 Utilize social distancing, wear facemasks in camp ALWAYS. Maintain the "module of one" concept. Disinfect vehicles, tools, and commonly touch surfaces frequently. Do not share equipment and wash hands frequently. 	 Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Use caution around gas and power lines. Personal hygiene is #1 when it comes to Poison Oak Prevention. Pick up and remove all trash from fireline, return to camp and place in dumpsters. 	 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Don't plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources. 	 Have a purpose for where you drive and what you do. Don't rush into assignments. Use caution where you park or stage, especially in steep timbered areas. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Increase SA by trying to see the work area during daylight hours. Use glow sticks to mark hazards, and ensure personnel have headlamps. 	 Share your Situational Awareness(hazards, changes, etc) to those who also have a need Radio communications may be poor in some areas. Ensure all personnel are familiar with the incident communications plan. 	 Follow the chain of command when undertaking burning operations. Ensure that aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. Wear and use appropriate PPE. Initiate burning after ensuring the plan is authorized and understood by all. 	 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to completency making personnel more vulnerable to accidents. Take steps to maintain situational awareness for the duration of the incident. 	 Drink 2 to 1 water to sports drinks. Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include low energy, headaches, dizzlness, poor rest, poor eating habits, hot skin, and lack of sweating 	 Maintain 8'-10' spacing when working & walking. Be alert for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts where feasible. 	 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Do not park vehicles or take breaks under or near hazard trees. 	 Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphili side. Use spotters when backing, or turning around. Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. 5mph speed limit in and around ICP, keep your speed down in all areas. Use warning lights when working on roads or traveling in smoke. Drive at or below posted speed limits. Use chock blocks, turn wheels into hill. Be alert for wildlife. 	MITIGATIONS / WARNINGS / REMEDIES

Red Salmon Complex COVID-19 Mitigations

It is the expectation that all incident personnel will follow the CDC and Agency guidance related to COVID-19.

- (COVID-19). Maintain physical distance of 6'+. There is currently no vaccine to prevent the novel coronavirus
- The best way to prevent illness is to avoid being exposed to this virus.
- The virus is thought to spread mainly from person-to-person.
- Between people who are in close contact with one another (within about 6 feet).
- Through respiratory droplets produced from an infected person.

- coughing, or sneezing. Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose,
- Cover all surfaces of your hands and rub them together until they feel dry. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands

coverings are to be worn, in the appropriate manner, within the ICP, Base, and Spike Camps face covering when social distancing is not possible with those outside your "module as one". Face Wear a face covering. Outside of fireline activity, it is expected that all incident personnel will wear a
